

The Pit Viper XS is a version of the iconic Pit Viper sunglasses, specifically designed for kids. While these sunglasses are more lightweight and compact, they offer the same durability and adjustability as their adult counterparts. They have earpieces that can be adjusted for depth and angle and an adjustable retainer strap for added comfort.

The Pit Viper's lenses are made of polycarbonate or plastic and are very impact resistant. Although they don't feature polarized lenses, they offer 100% UV protection. They are also resistant to dust and chemicals. The lenses also feature a special feature that makes them water resistant.

After undergoing rigorous quality checks, the [Pit Viper Exciters](#) were nearly ready for the market. The company hired artist Chuck Dawson to paint the frames. Dawson's paintings capture the extreme lifestyle of the 90s. Thanks to his efforts, the company's campaign received funding from crowdfunding site Kickstarter. This allowed the company to expand their production and make a bigger impact.

The [Pit Viper XS](#) is a stylish and durable pair of sunglasses. They provide 100% UV protection, and feature 2.2mm thick polycarbonate lenses. Some models feature polarized lenses for enhanced protection.

They are also equipped with a cord that allows you to remove them easily.

Pit Viper goggles

Pit Viper goggles are designed for extreme winds, and a typical pair is capable of bucking wind speeds of up to 420 kph. Some Pit Viper users say they need to travel faster than that. The newest generation of these goggles is designed to go faster and withstand more extreme winds.
