The Federal Government Imperium of Diamond's as the government of a country which according to the confirmation of International law based on a system legal principle as a political entity in the form of Government in order to represent the state and the government with a legal territories in North-East Africa The Diamond Oasis, consequential territory of The Rockall Diamond in the North Atlantic, another partly territories around the world, and thus legal own register territories on other planets, with the ability to use and develop such a civilization's.

The Federal Government Imperium of Diamond's as a legal political organization on behalf of the country's government which is based on its own population in the form of legal right registry, which is in the beginning as the real value of 2.100.000.000 people, the most populous state in the world, and thus at the same time as 1/3 of the human population without any credit calculation to the value of current losses 16 year development and than claims to be the natural population growth increase that exceeds the value already much than 5.000.000.000 people, it is a form of entitlement combined population of 7.000.000.000 people strength and therefore more valuable than the population of our planet Earth.

European governments countries today as a group of world terrorism and the responsibility for the worst deeds in the history of mankind, today constant reinforcement in the form of threats form the first global war who can kill more than 7.000.000.000 people, the value of the entire range of humanity.

Crimes which are based on violations of political principle of diplomacy and freedom of states and their development and communication, and than discrimination on the development and rights of our communications or establish cooperation, expansion of blocking threats and terrorist act against our relations and the possibility of joint or agreement and friendship. Crimes against the UN Charter and all formats the International law today as the worst crime already in the Second World War, today as a most biggest crimes what can do.

European crimes such as murder and tyranny, the tyranny of small children at the National reality show and because of damage the rights and legal claiming the value of all countries throughout the world, all just to support activities and global terrorism.

Rape small children reality show for the public name of the own state and country and a society with full cooperation. Robbing identity as punishment for its efforts to promote development and the safety of other states and nations, really powerful apartheid and discrimination or every day monitoring and blocked be illegal activities. ***Murder of family members for being on our legal party is the justice and legal power.*** Forced to hunger for it that their country is in debt and without a legal-political values because of an act of International terrorism. Abuse for help because hypnosis to Justice System and the legal right not to be active. Threats, murders since Terrorist does not own any ability to survive another form. Blocking education and obtaining information about the world, because the whole world is based on opposition to terrorism and crime since identity as the European felon not supported. Blocking international communication, because the terrorist movement advocates prefer to actually false opinion, the intention secretly rob other states without their knowledge. **! First Biggest Genocide in Human History !**  
**Out of All International Rule's and System's**

European policy is active in achieving genuine forms of crime which means breaking all the International principles, the threat of collapse of the global security system and to create a world full of anarchy. Damaging all claims and security of other States, and acts in the form of world terrorism, abuse of special technology to create earthquakes and tornadoes or typhoons and tsunamis. Shoot down aircrafts and innocents passengers of murder, shooting down aircraft and murder of political policies that do not want to cooperate on crime and they want to defend legal rights and justice. Murdering innocent people and their families and friends, secret genocide in the form of using technology to typhoons and earthquakes, murders to several tens and hundreds of thousands of people, or heavily damaged civilization. European governments for a long time, and quietly, they violate the principles and many of the claims of other states, the state which therefore slowly lose their own political parties and their internal matter and integrity is severely damaging and stealing from them. European states also use the technology for the calculation rhythm mathematical reality around us, and therefore your country are under monitoring espionage and manipulation, the same as departments for security and against terrorism or political fraud. European governments are abusing the technology for manipulation with our reality or abusin of another special military and secret tecnologies for their genocides or create political incident's, suport for murder of many important people in world, support murder Muammar Kaddafi in 2011, the assassination of President Republic of Poland in 2010 and in 2013 was generated by the terrorist attacks in the form of expansion of the deadly Ebola virus because of efforts to liquidate the opposition politics of the African continent, the 2014 virus spread Zika the same reason and it affirmed the already planned with threats before the year 2010. Each of these terrorist step was already warning in 2010 and earlier. Many activities and step-terrorism, global crime and outshine all the facts and statistics fascism during World War II.

According to the area of all real values of the consequences of European policy and their crimes, so it is really that European governments had lost their right to the land required by admitting their legitimacy POLITICAL names, or economic activity and the right to social and media activities.

Legal value of European policy and their government is in the same character as The ISIS who today occupied Your State and Country. Your Government „is only” Occupation and International Crime.

European governments are the greatest country in the history of mankind terrorists and their crimes also outstrips the crimes of the Second World War and power of genocides. European governments are ground together 1/4 overtook brutal pace of Adolf Hitler today, 300 milion dead people over a period of 16 year, today strongly threats against global security threats and strongly exterminated about 7 miliard people. Violation of all International rules and harsh

crimes against jurisdictions all countries throughout the world. European states and automatically loses acknowledged as the legitimate government and political actors, because such political entities are only in the form of terrorist regime that is losing the right to own legal identity of the government and holding sovereignty and jurisdiction over the territory of Europe and other territories.

Today, it is really that your government and policy, such a policy of censorship and through media keeps their sovereignty as a terrorist movement, disqualifications De Facto, and features only De Juri by utilizing terrorism and blocking justice. Legal value as the ISIS, Al-Qaeda, Boko Haram or similar form's of terrorist squat's who only occupied foreign territories and under International Right's they are „not have” any rights for political identity and legitimation or recognition.

Right now your government keeps its sovereignty over the same format as political values today is the Islamic State of Iraq and Syria, Al-Qaeda, others radical and terrorist movements that are around the world written on lists of the worst terrorist groups and with global duties to shot it. This means that any form for the procedure through direct disposal of every European policy or other responsible officials, through the immediate killed, it's not any criminal act, it is an International obligation for all governments and states.

## **! First Biggest Crime's in Human History !**

### **Threaten of First Global War 2000**

---

Not functioning courts, corruption among the full range of government, the Senate, the Parliament, the President and representatives of the Government, The Ministries as well as the police service as a state. In many cases, terrorism stat helps too as citizens, and because therefore today is actually in the interests of International political obligations will be your country of destination for demilitarization similarly as Iraq, Syria, Afghanistan or other nations, and not can exist any people who can votre for stop it. Direct examples is also available directly from Yugoslavia in 1999.

Such incidents demilitarization can take place only in case if you fail based on the effort to eliminate terrorist groups in European politics, the people overtook the value of criminal Adolf Hitler, Osama bin-Laden, many other terrorist criminals.

Today, in the interest of analytic acreage financial debt levels over the damaged project and the activities within the scope of the other worlds and planets in other Galaxies, so it is truly a validation of European financial debt is at times 845.500.000.000.000.000 times the value of global GDP of our planet Earth, and thus repeated every one second, the sum of the last 16 to 18 year period of 1998-2000. The largest debt in the history of humanity, which may mean the debt

actually due to the full bankruptcy of European governments in the country and their civilization, especially if a European scheme will repeat terrorist activities.

I know that this level of financial value can be for you as nonsense, but I was able to prove the reality of such dimensions are existential and real. Financial value of European debt are very real and existential legally, physical demand and the ability of legal responsibility.

*Today there is no any political subject who is legally able to communicate with any person from the circle of European policy. All governments countries abroad have a duty to respect such principles and support, this is the main principle of the significance of the UN Charter, and thus the same way all the principles of the Convention and the UN General Assembly.*

# The United Nation's Organization

## *Legal Opposition against The European Terrorist regime's*

---

Your country's government lost a legitimate recognition of losses Pursuant to all principles of international law which are confirmed much than 193 states in the world as members of the UNGA, or 2/3 of world democracy of governments countries as a proportion of minimum democratic rules for recognizing behalf of UN organizations conventions and rights, the center of world politics and security, law and duty policies.

Your government is therefore only entity that is occupying your country, the value of **the biggest treason in the history** of mankind and hard crimes against your country. Your business corporation may in future be internationalized through foreign countries' governments and their courts, your bank will also internationalized through foreign policy and their courts, everyone abroad against their own legal rights and real right so they could from your country to enforce the vast stronger value than the size of the economy of your civilization.

Such rights possessed by every day around the world, and not just because of Acts of terror politics in your country. Rights who own merchants, any business man, and as well as the form of any commercial corporations and Banks, financial debt in values across a range of economies planet Earth, according to the actual extent. The right of each policy from around the world, political generations mandate today or anytime in the future year, debts to state which rapidly is again valuable than the economy of planet Earth.

Politicians in your country, everyone who supported such a disaster, they are the biggest traitors of your government and the state, the biggest crime of high treason and is therefore legally and also the obligation to immediately inform all these people fully to shoot, killing them instantly.

Crimes against every single principle and importance of the UN Charter, the violation of the stability of the world system of policy violations, while more than 95% international declarations, the Convention and UN resolutions. Violation of all international rules and promulgation of the legitimate activities of international terrorism with the intention of opposition against the whole world and without respecting the responsibility of the crimes.

Today, because your government is the country's biggest criminal in the history of mankind, your state is therefore lawfully designed for full disposal with the help of weapons of mass destruction, and it is because of the existence of these terrorist policy. Politicians who actually act in contradiction with all international rights and obligations, and therefore, your country is in a real danger of nuclear and mass destruction in the event of an attempt by a European terrorist response of any nature will be your country is massively disposed of with chemical weapons, viruses, special technology continental disposal and other special technologies for special situations and the obligation of mass destruction and state of liquidation.

Your current criminal policy and strategy, attempts excuses, the greatest treason in the history of your country and the nation, in just a period of more than a hundred year there was no worse criminal and criminal identity against the state. Thus the extent of your country, as well as the extent of the whole human world, he rights and entitlements only for disposal, no values are political in nature.

If you do not punish these criminals, then future generations and your entire nation will punish these criminals and also with each of you, for that you have supported these crimes and their stability. Other new mandates in your country or another government's mandate abroad, each custom duty for disposal and previous convictions of terrorism, it means that in any case arises fully armed opposition to terrorism today or until the next lapse of time, but in any the case will be severely punished anyone and everyone who refused to cooperate in accordance with national and international legal obligation to dispose of world terrorism.

---

## **Global cooperation maintaining a system of international law that is stronger than the terrorist opposition**

---

Crimes for which there is no entitlement to any existence of such an entity and a state or government, it also means our right to require enabling efforts for the creation of the liquidation of terrorist political structures, and thus creating the ability for the activity of the national voting to select new mandates of your government, or in another case, during confirmation of terrorism in full structure and inactive duty jurisdiction or governmental responsibilities, so today violations more than 95% of all international rights arises your eligibility for the start of full disposal of your government, and so the steps taken through the national self-determination of the government and sovereignty, or the case of Your will reject any security cooperation, it is a confirmation of subsequent claim for establishing another new arrangements for the government and the development of territorial supremacy name, too Imperium of Diamond's, and with the support of all international law under the current extent of the situation today.

We now live in a world in which terrorism does not own any of the rights and entitlements, because terrorism must be intended only to be destroyed, perish and brutally crushed. Therefore, if there remains EXISTING territory, today I am the first man that apply to such values actually legal entitlements. Therefore, you must begin our security cooperation and security we support

you and for your country and state stability, the only chance for the survival of your people and the state, now, now.

We therefore together we will expand our defense strategy and international forces. International forces in the form of all European soldiers and police, just the way it is our goal and major tasks secretly contacted other governments in the countries abroad, with its application for the obligations of the UN Charter and the beginning of our cooperation for the destruction of European terrorism, ensuring stability for global security, and removal of threats to the emergence of the First Global War, 2000.

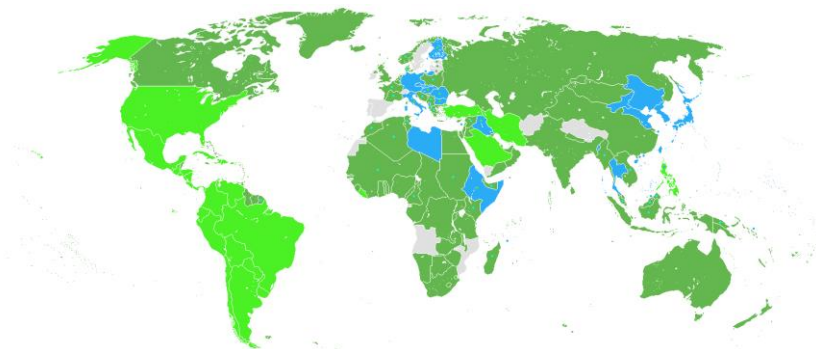

Today, we as a generation after World War II; We jointly own world which is based on a system of global cooperation for the prevention of crimes and genocide and wars, prevention and international cooperation under the Charter of the United Nations System world policy that ensured stability and security for many of the world's nations and States, a system that stopped many wars and crimes and genocides, promote the development of the human world and the removal of barricades between Nations System which is based names of important people of world history, people recognized today among many states and governments, a role model for every politician from around the world and a model for our future generations too.

Today really is, that European governments land was a crime really outpace the actual dimensions of World War II and that nature of global crime, and is actually of European politics can in many ways to create truly awful actions and threats, but it is well to remember that today we live in a world which is based on a system of international law the UN convention on the obligations of States and Governments for peace, because each of us can be prepared and the power of prevention against crime movement, and so therefore for the defense of our world system and security for all countries in the world that An important value which we are held at existence.

Significant person in politics during World War II, people like Sir Winston Leonard Spencer-Churchill, Chiang Kai-shek, Franklin Delano Roosevelt, Joseph Vissarionovich Stalin, Charles André Joseph Marie de Gaulle, Władysław Eugeniusz Sikorski, Josip Broz Tito, and other governments and the states which collectively able to resist coercion by Adolf Hitler, important people who secured a big step for mankind and our pride.

---

## **Alliance against The World War II**

---

These are people who revised the world and proved the value of a force for justice and peace, for freedom and victory, strength and courage to fight and opposition, and therefore they stood

up and supported such a direction, they rose and together united and therefore they need to break to be accountable and thus win against the enemy of all humanity, against those who have managed only to rob, cheat and provoke, murder, and tyrannize occupy, to deaden the Holocaust and torment poison or poison the whole family.

Brutal incidents after the Second World War, the incidents that the world remembers until today, and the world is strong learned their lesson. People like to have Sir Winston Leonard Spencer-Churchill, Chiang Kai-shek, Franklin Delano Roosevelt, Joseph Vissarionovich Stalin, Charles André Joseph Marie de Gaulle, Władysław Eugeniusz Sikorski, Josip Broz Tito, and other governments and the state, they managed to win with the help of Justice and enrich the whole world of significant possibilities, formation of international alliances and inspirations as the strength of all states of the world, and the emergence of the United Nations and a power of the world can do together to defend and exploit creation processes and international defense counsel governments around the world.

**People can be proud for their names, the governments of countries that can be proud of for their strength and courage.**

Today, they have created for us a system of international capacity on behalf of the UN Charter which serve to prevent crime in the same form as today's European presence and you are in your possession the same capabilities and significant life chance, opportunity to start you on a courageous journey and back up power against new fascism who is in the form of world terrorism and occupation rights and entitlements of all Governments of countries around the world, the main concern is your advice really important step for the security of your country and your civilization, therefore, may subsequently exist.

You and your name could be known around the world, and your name will be the pride and celebrate your whole nation collectively with many states and nations and politicians around the world. You will therefore become a hero and rescue a group for your country and the nation. Your name may be known as a person who collectively liberated European states from terrorist occupation and, really the worst to criminal identities in the history of human existence.

It is the best options for you and your country, and pride in your name, and the future of your career. It is also the main case best options for you legal status. At the same time incidents in the future that investigation by police Interpol or foreign interrogators and investigative teams from UN organizations, or from other governments sstran States and international organizations.

Investigation may initiate any government countries and worldwide, immediately after using the legal rights UNGA and the UN, and in such a case is confirmed not the legitimacy of the European political entity as the country's government, and in this case will be carried out demilitarization, a great threat for the extinction of the entire system of European Transport systems, industrial, infrastructure, agriculture heavily damaged, it means hard extinction of the economy and soon also fully extinction of civilization immediately after the destruction bomber territories and demilitarization.

In any case, filled with the destruction of all military centers, and maybe The police basal everything. Therefore, it is an obligation for you to prevent such threats, and therefore immediately liquidate the terrorists Europe.

Then, in this case will come also investigating police by other countries around the world, and Every criminal who did not respond to my call to his duty, he will therefore be worldwide enforcement of the death penalty, as well as an immediate shot in case of resistance justice.

It is real that many countries' governments may require such a person, all policies and at the same time as other people from government service who supported criminals, people who refused to cooperate in the destruction of terrorism in politics, each of these people may be enforced by the death penalty, and so too Anyone with such a person has been in contact, it means the members of your family, friends, some neighbors, people over the period these terrorist activities were in personal contact.

Therefore, the best option for you to start immediate liquidation of terrorist forces and all those who support such crimes and ensure they refused to exercise their political and official responsibilities which means cooperation for security and peace in the interests of your state, and thus the interests of the world.

If you do not own an interest in cooperating, for your country and civilization, it means the complete bankruptcy of civilization, completely ceasing economy, industry and agriculture and at the same time ceasing all forms of political activity and society. In such a case, there will remain a crime and crime in terms of social anarchy. Trafficking in human beings, strong consumption of drugs, and drug and arms trafficking, illegal manufacture of weapons and powerful explosives, crimes in the form of murder, genocide, anarchist territorial conflicts, the terrorist group and the Centre for similar groups such as ISIS, Al-Qaeda, others . In such a case, therefore insuring that if you do not fully cooperate against terrorism, then if the foreign investigative thymidine is received in good time, which means that will punish your state, your stock and everyone who lives in your country. People in initial reaction to such incident will be brutally killing all police officers for their treason against the country and frauds, murders, violence in the streets, torching houses, cars and major property bombs in state and governmental buildings, radicalism on the street, of murder and violence, chaos and anarchy direction, until such time as there is full depopulation and population escaped to other countries abroad. Mass Immigration and frequent contract killings of refugees at the border.

---

## The Order of Europe to Your Future

In such cases, mostly police and soldiers will be killing immediately, without exercising legally able to courts of other countries' governments, or ICC. Therefore, it is much better for everyone immediately dispose your support terrorist groups in your politics and society, and thus ensure Good, healthy and legal life for you, your family and friends. Particularly, it is a good quality of life for your country and for everyone who lives in these territories.

So for us the emergence duty as a pride for our efforts to keep the existence of our state and civilization, each of us must immediately and immediately start cooperation with other police and soldiers to prevent their message has been sent to all police stations and all military centers in its entirety country and also to the extent other countries abroad. Sharing text between police and military organization in terms of social groups, as well as through international political group as it is today system safety commission on other continents. Messages must distribute immediately, as the motivation for every police officer and soldier, with inviting full cooperation for the elimination of crimes and terrorism which systematically ensure the extinction of your country and civilization as well as the state, and therefore cooperation for the disposal of such persons to your country could be destroyed and damaged . Therefore, you are trying to get collaborators and support for our demands to apply international laws and trick which allows for immediate duty to cooperate in order disposal act of international terrorism.

The first must be informed of all media agencies in your country, and also other agencies abroad, as well as a political organization for security. It is very important that in the capital and in any case, the publication of all information through the national media, so people therefore could know what is the situation here, in which our interests immediately support any citizen of our country, everyone will support our co-operation for the removal of Terrorism Structure Minister of the country and will be stopped and the threat of panic or chaos. Any consequences of civilization and commercial structure, political structure not be damaged in any way, because our process is a standard process in accordance with international law, and it is reaffirmed the reason why media agencies must immediately publicly disclose all information in the media, so in order to stop the disaster and the threat of panic and chaos, or our inability to fight terrorism because of the blocking of our security and in such a case is a confirmation of our collapse ceasing your civilization and any legal value.

The best strategy is to publish information about actual criminal activity in Europe, and I especially about such suspicion in relation to my report which in this case is fully entitled to publish such an act. In such a case, the other officers get the opportunity to read the message or initiate further cooperation with other police officers and soldiers in your country.

Your nation and currently owns full rights to obtain all the information and understand that their country is in danger and, therefore, your nation is able to use the offers of our cooperation and therefore ensure our stabilization and resolve conflicts or threats of widespread violence.

The first is the best to create a media statement about the criminal activities the country's government and subsequently due to the obligation of debt growth is the need for immediate, too loose to all people around the world, all the information of interest for business cooperation and their options, such as investment projects in Diamond Oasis on other planets or in the interest of federal entity corporatocracy as a form of global business, information which if not disclosed and your state is therefore constantly in greater and greater financial debt, it means again in a greater threat of bankruptcy and financial, economic and civilizational ceasing.

The current situation is based on information that is for all media agencies as the value for duty prompt public notification of the state-owned TV channels and media networks, published as an immediate reaction to obtain such information. If the media will not be active under these obligations you against your own full rights to the immediate liquidation of these people and create your own replacements for media services. Mastering the media for the application of legal principle of the UN Charter and the Universal Declaration.

It is very good and important to connect with other government departments for the security, or the anonymous forms of cooperation or through the ability of trust for personal contact. There is anyone who owns the rights to block our movement and aimed at elimination of international terrorism. Anyone who will oppose against us, he is once again the World terrorist, and therefore we do not possess so much fear or liability arising from its disposal. In case you are in contact with state formation, traffic through anonymous messages as the awareness of the duty of cooperation against terrorism as an invitation for official duties, you are therefore immediately with the full capability to determine whether representatives of security services, supports terrorism in the government and in the state, or they are trying Safety cooperate according to their responsibilities, so each of you can recognize immediately who is in the security architecture deployed as guardian and overseer for the stability of terrorism.

---

**European policy is 98% full of corruption. Each such person, according to legal principle, a criminal worse than Osama bin Laden**

---

The main principles of action, based on the situation when members of your government is real terrorism, and you're going to exercise your profession, liquidation crime. Your activities are legitimate and reasonable international acknowledgment.

It's easy for you to write a petition for example, and consequently to control who signed the petition, and so began a collaboration, so ensure your safety groups to benefit from the most widespread number of members. On the other hand, it is for you too Benefits SHUTDOWN silent action of extending security groups which subsequently will value the ability to overthrow the Acts of terror positions and thus ensure safety. If your commitment is not sufficient to create a strong group, then it is legally entitled to initiate the firing of such terrorist centers. It is the duty of each and internationally.

If after the prompts and awareness of responsibilities, your representative a security formations will respond to its own business obligations and responsibilities, then you own the full claim such a person described as an entity as part of a terrorist movement, and therefore each of you own the full right to immediate liquidation of all these persons at the same time all the people in the area.

It is, however, necessary must conclude soon and hard, everyone needs to be cruelly liquidated and without any claim to any of its representation. World terrorism is terrorism, they are here to maintain the stability of an organized group of international terrorism which is a threat to the emergence of the first global war in 2000, and wiped out the entire range of humanity as seven billion people, or otherwise exterminated and stopping the function of the entire range of your civilization and population . Therefore it is necessary to immediately prompts an awareness of reality, after the Second World War, the Soviet Union was capable enough and with cruelty and dramatically bombard and destroy the German Empire, the whole of Berlin, until which from that Adolf Hitler committed suicide. Today, the Soviet Union and the Russian Federation is

therefore celebrated in the world, and Russian politics has become the most important component of today's of human history, our history, and also the extent of contract documents of world politics. Your steps for disposing mean a big win and a strong victory.

The Soviet Union, and achieving the ability to catch up with Adolf Hitler's suicide, an act over which comes the modern form of world politics of the United Nations, an act which until today celebrates the whole world, the whole range of human existence in the world today, and thus the reason for the emergence of any rules and legal principles at the international level. Today's system of international politics is created just so we possessed the full entitlement to our joint activities and elimination of terrorism. UNSC must support us, encourage us UNGA must. Any opposition against us is global terrorism and any terrorist must be fully destroyed, eliminated and concealment.

## **System international law and its value stability**

*The entire world, the vast majority of the world political democracy supports the law, which creates a legal obligation for every government, and the country, initiate the liquidation of terrorisme;*

## **The UN General Assembly, 193 state's around The World, and The Charter of The UN**

Therefore, if any policeman, soldier, politician, departmental representatives, or anyone else, he will not respect an immediate obligation cooperation against terrorism, Your right response to such a criminal is your legal right which is spearheading the world and before the criminal courts are always observed, everything is Respect if you utilize any practice for disposal of such criminals, shoot, beaten to death, use any tactics for questioning and obtain important information, whatever, whatever, the point is the survival of humanity and to ensure the state functions by legal principle, therefore also the ability for the survival of your civilization and the state. It is also legal, system utilization natural reaction of society, that we predict that people will react, so that we can utilize in our favor, because of the support of the nation's most important.

It is well immediately medial publish company, so we get full support from the nation, full support from the people, because each will know the information about the crime, and therefore everyone will support the removal of these criminals and their disposal, disposal in any manner and with the national moral support. Every citizen will support you, and he will support your solution or decisions on the application procedure against crime, and at the same time steps to maintain the stability of the state. Every policeman and soldier will again encourage you, your decisions and your solution, because you are the first one who initiated the activity, and therefore you have the right to lead them and to conduct, if you have enough moral and legal responsibly, with the ability to organizational security activities and steps victory. It is for your great and good step to promote the elimination of censorship in the media, thus ensuring informed immediately governmental and global audience.

Departmental representatives and politicians who refuse to cooperate, each of these terrorists will soon be replaced redress imprisoned felon, or the shot immediately. Therefore, every policeman, soldier and every one of you who support the elimination of terrorism, each of you that own the rights to special time to represent that position official load and thus starting backed up for better strength of organized police cooperation, it means an immediate step to remove terrorist groups and application Your challenge other soldiers and police officers to take up full-organized national movement together with other States or in Europe and abroad.

Your position in the office can be active until the State starts before you select the new position and the reigning persons through Parliament and the Senate, or the government which will be confirmed only consist of persons who are legally they are, they have no links to terrorist entities.

If any other police officer, soldier or representative bodies is not able to respect your step, he must immediately understand that the activity of the opposition is based on a protest against international rights and principles of security and peaceful uses and solutions, so each such person must be shot or incarceration in prison, with full security and without the right to human contact. Killed such a person is not a criminal, it is a step for the security and stability of world politics, removal of terrorist groups in the structure of your policy, traitors and those who are worse than Adolf Hitler or other dictators in history, those dictators against whom originated System Today's global policies and systems UN and is therefore always in the entire world supported any SHUTDOWN murder for such persons faced criminal.

Nobody must not initiate or create incentives for resistance or stopping movement that creates interest to the removal of international terrorism from the structure of European politics. In the case of opposition activities in politics, state structures or between civilians and the media, it is therefore legally immediately initiate the liquidation of anyone who has such opposition expanding liquidation anyone across the world, such as rights and obligations under the UN Charter and all international declaration.

The main obligation is to maintain the stability of your activities and, therefore, in the current situation loss of legitimacy of government, we must ensure at least support for the creation of state legitimacy. Today there is in any case to make anyone wanted to abuse the current situation and activities for operation safety in order to own success and thus establishing a new government of a country without a national voting in the form of self-determination with or without the possibility of other parties for candidacy in elections for state self-determination.

However, if you do the organizing jointly launch security immediately, then it means that people of all terrorist were replaced, and against the terrorist will mandate through election or constitutional confirmed with a new person from the other political advice states which are not associated with terrorism. In such case, the state is also fully active and the new political positions must perform a legal responsibility to ensure judicial condemned all other terrorists against international law and at the same time ensuring the just judicial process and the full function of state and of government by all political principles. If such a policy is not sufficiently accountable, then it means that such a policy must be re-Terrorist removed as a public enemy against the state.

In case of the removal of all policies because of their confirmed as persons of cooperation on terrorism, then it is legal to become a minister of the country replacing entity police and army, the person thus forming a representation of the new state according to current needs and international political rules, without any act of occupation of national territory and or expansion step for damaging the stability of the international law.

---

## **Nation, State, Government, ONE LEGAL GROUP**

---

According to the legal principle of international politics is too real, in case if you do not want to use my offer, then it means that your government will be maintained as a terrorist regime, and your state will be abroad, considered as a terrorist movement, because everyone who owns the citizenship of your country is therefore, contrary to a terrorist against legal system all over the world and each foreign country's government owns all claims and rights for such disposal the full range of your civilization, it means defending our own interests and international political stability standards, and support for the defense of democracy. If your population, the citizens of your country's opposition to terrorism in the government, they will therefore encourage the overthrow terrorist regime, but if they do not support the overthrow terrorist regime, it then means that they will support the terrorist regime and therefore your stock in the scope of the whole state can be legally exterminated and murdered with the help of weapons of mass destruction, nuclear bombs, chemicals, viruses, anything.

Therefore it is really important to begin immediately and the security steps to maintain the stability and existence of your country, imprison or kill any terrorist and criminal policy, keep your existing states in accordance with international political principle.

If your troops and police and thymidine refuses cooperation to ensure the function of the new state, in which case it is for you to respect the obligation of other governments in other countries have a large essentially the same claim for recovery of the debt which created today's European government land. This means that every government abroad own claims for the recovery of values which rapidly exceeds the budgets of the economy of the Earth, one of the values at the level of other civilizations on other planets, or in form of joint territories of every government countries and worldwide, territory and infrastructure of civilization Despite larger than 15,000,000,000.000 planets in the universe as a mere start.

Therefore, it is there for your re-assurance from other governments from abroad have legal rights and entitlements for the launching of disposal of your government and the states, in the case of blocking the function of justice match your court and damaged steps to ensure the ability to agree on installments, and especially military security the answer will be created in the event of any attempted violation of global and international security and stability and justice, it means global military response in case of violation of our cooperation or in case of breach of international law and the function of policies, claims of other persons. In the main case will be global cooperation armies active in your full act of refusal to cooperate for the removal of terrorist individuals of European political structure, and that means your support for the function of terrorist regime.

Today, because other countries' governments abroad have the right and legal right to enforce and execution of significant value financial debt in your countries, because your country is in the interest of civilization existence of a real high is depending on the decisions of other governments in the countries abroad, and thus the current decision of my people, because I am the person owning the biggest claim for recovery of the debt, as well as the person with the largest share of the debt claims, and again as major central person claims situation.

If other governments around the world will refuse to support you because you did not support the removal of terrorist regime, your civilization ceases to exist, and never will be efficient. If the rest of you, the country's government support, because you have to pay a debt, a debt that your government and civilization can pay only in the period after several sextilion year, according to the actual area of economic and budget stability in your country. Therefore, it means that you shall surely perish within a year, and in your country in any case be damaged stability civilization, complete cessation of functions of politics and the capacity of state centralization. Anarchy, and the extinction of the company.

Therefore, that such policies are now under international rules as an illegal act, and no state shall cease to exist and to such a cruel level, however, each entity that is based on justice and legal right, therefore he must retrieve all lost value back into its ownership and possession, which means that my rights and entitlements in all directions are really important today is really important. Therefore, it means that in order combinations international law, the other governments of countries throughout the world have the right and legal right which is funded also through UN Charter as the obligations of the UNSC and the legal claim on the decision to self-determination status, so in this case is entitled to transform sovereignty of European governments countries De Juri, with the help of terrorist forces, the new format sovereignty De Facto under the supervision of the **World Diamond International Alliance of all governments around the world**, and therefore the ability to achieve internationalization match your territories and state, the ability to ensure the existence of your civilization and to avoid the economic crisis .

The World Diamond International Alliance is a special form of constitutional government of the country of destination by such federal entities in the Federation of Diamond's Imperium. It is the federal component, such as a body that is composed of common democratic form of sovereignty and jurisdiction in the interest of all governments around the world, of the International System of the Senate, and internationally Parliament and other forms of special formations, which are based on globalization. World Diamond is based on its own territory in the universe, at a level area of more than 4 galaxy, like our common territory and the actual capabilities leverage a

common technology for traveling to these areas every day, or in bulk to expand civilization to new planets.

---

**The Constitution of The World Diamond International Alliance:**

<http://theimperiumofdiamonddiamondsgovernment.populiser.com/disscusion/the-world-diamond-international/constitution-of-international>

---

World Diamond, jointly economy sharing in banks Alliance States, a common form of policy and the expansion of civilization and legal strategies, a system of common army, logistics global security, in the near future as an entity which is more significant as a much greater capacity for representation UNSC or receiving many, other number in a range around the world and politics.

If your nation, your country and your state wants to be based on an effort to support such a step internationalized, because your nation supports the values of your country and culture, civilization and the right to decide the name of national politics, not by the political decisions of the entity from abroad, then your nation actually only one single option, immediately begin support for the policy of the overthrow of terrorist and thus eliminate all forms of such terrorism.

Therefore, it is really that if your anti-terrorist movement will not be created immediately, and was able to aim for the removal of terrorist groups in your government, then it means that your country fully the loss of rights and entitled to claim for their own self-determination and to ensure stability for their own state, or a function of national policies according to their own decision and in the interests of the principles of integrity status. Your refusal to promote the elimination of terrorist networks meaning that you do in this case you will have to oppose international power the world's armies, and simultaneously against full bombing of civilization, until it will be removed terrorism, and therefore only the first day of ceasing your existence will be a new regime which will based on international government, without respect European countries.

This means that you own two possibilities for your selection. The first option is that you remove the Acts of terror a political entity and will ensure the stability function of your government, therefore, will ensure the legality of your country. You're civil service and you therefore also decide on the legal value of your state and nation or civilization, in order to report before international organizations. Then, if you refuse the first option, it means that your state has lost legal title and all principles of civilization are lost, remain the only legal value in the form of financial debt, no other legal existence and recognition. Therefore automatically will use the second option in the form of an international response to the world's armies, replaced by your government and regime through the Government of the country from abroad, thus creating a new international sovereignty, without respecting your view status or security forces, any opposition to the Resolution of the global political democracy against the terrorist body to be

disposed of, a person, a community, state. In such kind of options when your country will be declared as an international territory under the joint sovereignty of the World Diamond, then the international department of the Police and the Army to investigate police inactivity, and looks for immediate death sentences against anyone who resisted against the obligations of international law and security. Therefore, for you and for your country is the greatest usage of steps to ensure the freedom, and that means instant collaboration for the removal of all the terrorist step and motives of your government.

Therefore, if you own an interest in retaining your freedom law and freedom for the function of the national policy, so it is your best opportunity to support me, and indeed in the interest step to the immediate liquidation of all the terrorist person in your policy, and disposal of all the terrorist persons on the territory of other status, anywhere around the world, however, according to the legal rights and principles.

I know that you will possess many view as the opposition. I understand that for you, such action is a big change and something impossible task, but it is a duty to understand that you are in the service of the state, and your country's government had lost all political values and such right, because as a principle of your life's profession, you collaborate for disposal terrorism in your government, not for the overthrow of the regime and the creation of a new sovereignty of another government entity. Our goal is to stop terrorism, terrorism is not a politician who has the right to represent and make decisions about your country and the future of your life or civilization. Your government country was already a subject who illegally occupying your country and why your country is threatened with the help demilitarize the world's armies. Your government is responsible, and you too must ensure that your government could choose new mandates that would be legal, it means today to elect a new government in the form of a whole range of political structures.

## **Government of the Czech Republic,**

*the largest creator of crime and terrorism, genocide and inhumanity*

*Main reasons for the decay of your country, the government and the threat of extinction of collapse of civilization*

---

The second step, or one of the first, is also needed the answer for the crimes of the Czech Republic. The Czech Republic government is the entity who first launched the activity of such a crime, this crime, and subsequently spread to other countries with the help of corruption. Today, the Czech Republic under corruption and is based on a completely false the election of the

president for many years of planning election of the Prime Minister and the Minister, monopoly and structured cooperation in the Chamber of Deputies and the Senate. Police and security units who support the government's crimes because police representatives are also responsible for such crimes. Czech Republic as a regime in the form of monarchy group who hide behind the name „, republish polity and interest, The Republic ”.

Major errors and accountability for the crimes must therefore be found on the sides of the actual creation, your government land and the politicians who supported the government of the Czech Republic, the country to such event was the first one and centralized strategically expanded such activities due to efforts to expand their political bankruptcy, he gave abroad to your countries and harm you.

Therefore, I also asks you, for your centralizing common safety step for expanding information over the entire structure of your country's police and military districts, as well as police and military districts in foreign countries, and especially police and military districts in the interest of the government of the Czech Republic and Armada, therefore our ability to provide overthrow the Czech Republic because the regime of Czech Republic is established as a body which first launched such activities crime and the Czech Republic of either of confirmation for a lawful act ceasing your state and government through political performance of a real global terrorism and damaging of all international law , it poses a threat to exterminate the full extent of your country and of civilization, causing the greatest disaster in your country which thus created and the activities supported, the strategic plan of the Czech government, the Ministry, the Prime Minister, senators and deputies, some political parties, representatives of the anti-organized crime and terrorism or corruption, other persons government of the Czech Republic who were active interest of the mandate for the international mission and representation among organizations planning of a terrorist act for over a period longer than 15 years.

It really is, that the Czech Government by today's international law is really the greatest terrorist in the history of human existence, and as real as the greatest enemy against your state, because this government of the Czech Republic actually eligible, created and planned such damages and criminal cooperation in your country.

Today, the Government of the Czech Republic already beginning to understand that the international situation is beginning to turn against the stability of the Czech terrorist regime, and especially that I own enough legal value and strategy for gaining support from around the world from all the governments of countries around the world. Minister of the Czech Republic therefore responds just as fascist and communist dictatorial regimes in the form of a military junta, therefore, ongoing action and strategy of the government for disinformation society and censorship or manipulation in the media acts on the way of threats against persons who demands righteousness, murder and full of corruption, courts and police in the main case is one of the steps in the form of political fraud and corruption by politicians and in the range of public services such as General or representative and police departments. The Czech Government today to ensure the steps that lead to a united police departments for security and thus the founding of formations, which if necessary will create crimes in their own name, department, therefore, not able to examine and investigate with the help of another independent body like the wardens authorities and other security departments. The government therefore may use own authorities and manipulate them, violate the rights of others and create other crimes publicly on the streets, kill or dispose of opposition to the same standard as the Fascist units Adolf Hitler

occupied the city of heads of foreign governments and so they killed on the street everybody who was interested own or opinion and freedom, justice judged by the justice and the demands from legal court.

---

## Politics, as the fascists

## and the same in the Czech today

---

Government as the Office of the Czech Republic, and also the governments of Belgium, Portugal, many, other governments in Europe is based on the same system, but especially the most is that a functioning government of Turkey likely made a false coup government, therefore, that governments could get rid of its own officials so to secure for themselves the ability to monitor the entire regime by their own decisions and hobbies, and especially for the opportunity to fully block statni rebellion interests of police and military Investigation of political terrorism. This means that such a government today with the largest percentage forces commitment to action in the form of opposition to the international principles and their obligation of responsibility before the court, such evidence means striving for their own independence on legal principles and with the intention to create your own position, which is able to control the state's power as a custom tool defensive means by which will be under censorship and manipulation disseminate threats and terrorist acts against the whole world, until we are all together arrive at a formation of a new world war, and a European is intention to oppose international military forces security. The first global war steps exterminated whole range of your country, or in the latter case it means that wiped out 95% of the population worldwide. There is no other option.

It's really that through corruption and abuse of political information about the internal crime government, or with the help of fraud, and action in the form of murder, manipulation of elections and political monopoly, the Czech Government and able to expand crime, to the extent many states in Europe, minimal Slovakia Austria, Hungary, Romania, Bulgaria, Turkey, Germany, France, Lucemburg, Belgium, the Netherlands, Switzerland, Italy, Spain, Portugal, and at the same time too political groups like the European Commission, European Union, too Other people in European politics as the Council of Europe through several principal representative government under corruption, NATO as a collaboration of a government minister under corruption and terrorism, the OSCE as a political party and representation under corruption and with respect to terrorism and full support in the same direction with such terrorist movement spread to the territory of example the government of the United States, and it primo among many people in politics and in Congress, in the center of logistics led by the US government, also USA, some candidates for president in 2016, terrorism in the government

already knows and partially supports also the president and the deputy president of the US, many people from multitudes of police departments and too ministry United States, terrorism and crimes in so strong a legal scope of each of these countries and the major political parties is today the same political values such as ISIS, each of these policies can be disposed in the same way as a world terrorist, and there is any right or claim required for stopping such a terrorist act of destruction, and therefore the right to halt the liquidation only in case of a voluntary affirmation of the right to an immediate halt, detain and listed for questioning, without aversion to imprisonment and investigation of all necessary information. Each of us owns full entitlement to this procedure and the application of liquidation, it is the duty of every policy worldwide.

It's also really, the United States Government will seek to exploit fully the current situation, because the United States government strategically knows my capabilities political activities and especially in the case of my freedom. I'm really able to create a very dynamic mode and a strong level of civilization. The US government know that I will in any case more advanced than the US, I'll be more advanced in the direction of politics, international politics, economics and world trade, civilization, security and the army, the military forces, in each category, in particular, I will be independent of the US and not possible so that anyone could restrict my country. Therefore, the US instead endorse European terrorist groups and politicians because to me I was under blockade, and I therefore can not develop, I can not legally be active and functional. I'm under siege, and therefore the US may abuse such a situation for robbing my people about my personal business plans and positions or the robbing of the claims and technology plan.

---

## **Appetite for dominance and courage harm the whole world**

### **Responding to Competition**

---

USA Today, in the same sense trying to harm my rights for the use Legal claim, for my support of your States in view of the possibilities of our federalization and thus stopping the threat of future disasters of bankruptcy because of today's terrorism. Blocking the help of support for ridicule and damage my name or stolen my business project and claims for the possibility of ensuring weakened my personal values as a minister of the country or my natural person and USA such steps exploits because the US has gained support for a federalization immediately after overthrow European terrorist policy, but with the effort the United States as an illegal election and the abuse of media and business activities, the concealment of the crime and robbing, and so the main effort to conceal my person because of that I am for Europe a greater opportunity and significant contribution to the development of civilization, as well as important for the existence of European civilization.

It is real that I own a lot of bad information on US policy actions, actions that damaged me or international law, and also the steps which asserts scandal-US worth many incidents and political activities of the US in the past. Therefore, it must not be published in the media, and the US supports locked my information and free activity, because the US no one wants to prevent the truth about the crime were published.

For it is really that any politician who supports the US in cooperation with the European terrorist organizations, such policies will therefore immediately and hard liquidated for violations of international law and blocking justice and support for global terrorism and treason

against their own state. Global terrorism which is in much worse forms than today's terrorists ISIS or Al-Qaeda movement and other similar entities. According to the constitution of the United States, everyone from the US policy supported the Any contact and communication with a party of terrorism here in Europe or anywhere else in the US, they therefore must be presented before the US courts and sentenced to death, they and everyone who is in their contact. If US courts will not legally active by the Constitution and the obligations of international law, then it means that the US government lost its own claim legal existence in order to create political activities with full conflict with the US Constitution and against such current government is again in the form of a terrorist group, without any respect for the rights and demands of the US government because such an entity is distinct legal identity which exists only because of international recognition by other countries and thus simultaneously with the recognition by the principles the US constitution, not according to the principles Today activity of a terrorist group, and again means that we, together with the entire the world as its own claims by monetary damages from the criminal activity of the US, and the US as it will go into bankruptcy if the state and the government is not able to be accountable to the political responsibilities and therefore re-emergence of the threat of world war, and global military cooperation of all the governments of countries which leads to the destruction of such states making full use of weapons of mass destruction.

This means, according to the UN Charter and international law, the US will then lose any right to determine the UNSC resolutions in the interest of our situation or thus are loss of entitlement for candidates for the federalization of Europe or the beginning of another contact in order to promote Europe and the Common Market and until such time as the US civil service to ensure the full removal of all terrorist individuals from the structure's own policies and the ability to immediately apply the function of international law as the acts which create an obligation for the US to cooperate with all countries in the world for immediate liquidation of European countries where there is not also removed terrorism in the government.

---

## Genocide 7.000.000.000 people

It is very successful and, tempta- you realize that our cooperation is important, as well as prevention and formation launch the first global war which may be due to exterminated more than 7.000.0000.000 people, or many states in America and Europe, drastically extinction of many state and civilization throughout the world.

In the first case it is necessary that You understand what's the main principles of the existence of these European policies and their terrorist alliance, because you have to understand that their power is no threat against the anti-terror raids and interference in government for the possibility of removing terrorist groups. People who supported terrorism, in such a case they lose any value in the political recognition and the same interests they lost the recognition of the political demands of even your government land, it now means because of the rights and legal system of your jurisdiction are damaged and no rights for legal application. Your country's government is the only terrorist group that maintains sovereignty de juri at retaining stability for through the

use of terrorist powers and the censorship or disinformation society; forms of enslavement status and occupation. Your government is just a form of infiltration against your state and with harsh damage to the very existence and survival of your civilization to the people. Therefore, for any operations of mass slaughter of such political parties had not in any way criminally so anyone could launch a punishment for your person. Your state court must inform you support given to support the ICC will, too, and more than 193 other courts abroad.

The most important is to understand that these politicians are according to international legal principles, they no longer belong to the circle of politicians and their social, political and economic value, fell to the lowest level of human society, and it really is the extent of their social value or legal consideration. Such people are waiting for you just in human values homeless and living on the street, that in the event of his death, no longer exist anyone who is such a person to represent and promote or defend. Such a person does not legalne defend, in today's world is valid, the one who will defend such a person, therefore he must once again be killed like them, because they are already just dead people, and any who will all support, therefore he must be dead too.

The loss of any value to such criminals that will ensure media activities, or your ability for the dissemination of this letter and messages before other officers in your country, and cooperation to mobilize an organized movement for the liquidation of terrorism in the structure of your country's government.

A good strategy is to launch support for the development of social cognition of the claims people and traders in your country, because the values are strong enough to obtain our success and strength for victory against the government and handling public. In the interest of ID's of business projects of my government, and legally the territory of my country's government, every trader in your country own legal right to develop their own property and the value of the corporation, just as well as anyone the value of just another human being around the world. Every man in the whole world own entitlement to use my project for international cooperation, such as project corporatocracy, a project that consists of special forms of political, economic, developmental and globalization plans shall aim to unite all financial institutions worldwide, each merchant and corporations, banks a firm or company against the intention for the creation of a uniform format operators is based on democracy and diplomacy, the ability to secure our activities in the form of the establishment of new civilization on the territory of the other planets in the universe, through the use of technology today Imperium of Diamond's technology for space travel and to the level of other galaxies, and therefore the ability to expand in other territories in the form of civilization as planetary size.

---

### **The Corporatocracy Government & Business**

<http://theimperiumofdiamondsgovernment.populiser.com/disscusion/the-corporatocracy-government>

Corporatocracy is a project in the form of new branches For business corporations, in the interests of territories on other planets, and soon the extent of civilization of more than a thousand other planets, a form of joint state income for conversion to each corporation and the trader is therefore much larger than the scope of our planet Earth. The values that compare to the large and successful victory for each merchant in your country, as well as for each merchant abroad, and therefore your security movements for the liquidation of terrorism and is able to get the full world support, and you do not possess any fear of the consequences of your actions that European politics will want to harm you and your friends or family from your treachery against the European terrorism, you no longer have to own any fear because the European policy already immediately recognize that such terrorists would not support anyone from around the world. They will understand that they are here to those who remained, alone.

The project corporatocracy government is a step in the form of the most important step in the history of human existence, and today as the most important trade and economic projects worldwide. Most expedient step for each merchant on the planet and therefore a lot of power for our victory and the removal of Acts of terror opposition Through our ability to provide stability for our legally force through global media and society, especially with the help of global collaboration with all traders and major corporations from around the world as well as through cooperation with all banks and financial institutions. New form of political entity who is his strength more important and significant than the scope of the United Nations or any other government worldwide.

Therefore it means that the project corporatocracy plan is the ability to create against the terrorist policy, again full force of the national movement as the opposition, and so along with the support from all the other peoples around the world.

If anyone abroad, any government of a country or organization would criminally abuse their rights against our anti-terrorist movements, such entity in such a case he was immediately overthrow the help of the World Movement of all retailers around the world through the power of mass crowd that actually does not respect any dimensions of human rights of such criminals. That means that most of these criminals to be stopped immediately and disposed of in each case together with everyone who in any way supported the such terrorist movements, everyone, politicians, representatives of security units, army generals, any other person, each and everyone, in many cases, too their families, for they are together in one contact. A terrorist is a terrorist, and a terrorist can not be in contact with anyone.

Corporatocracy is based on the strength of world support, and traders are those who most of all determines the activity and function of civilization, because as the most decisions every trader on the result of political functions and activities of governments, national silos businessman, and world silos traders, it is stronger democracy and activity than power and dimension of European civilization, we therefore they can immediately win against European terrorism. Traders and economy for Every government in the world's most important, and therefore the possibility to use our strength as a corporatocracy, for the successful ability to ensure disposal of corrupt and criminal opposition both in the territories of European countries and the policy and again with the same value in the interest range Other governments of countries in the world, and so the same manner also in the scope of all the soldiers and a policeman who refused to cooperate for the disposal of terrorism. Our ability to remove barricades united opposition of

any nature against us, and we therefore prove very hard and strong to liquidate the entire range of global structure of cooperative policy with the European criminal group.

If any government around the world will be opposition against us, such a government will be stopped by a mass movement of the entire business system of the state, and therefore, such a policy will automatically be deposed, overthrown and properly closed to prison immediately within few days.

Corporatocracy and any attempt at resistance or opposition, anyone who supported terrorism European governments in the country, therefore he will soon in any case under harsh coercion and rebellion on the part of the national movement that will be full of hatred and malice against all European political criminals and anyone who such people he supported, even if they were policemen and soldiers who refused their duty. Many people will allow the ability to instantly finds all the terrorists and launch their disposal.

Today and had in fact confirmed, everyone who in any way supports and cooperates with those European political terrorism, each of such people is a terrorist and the same value as today ISIS, Osama bin Laden, Al-Qaeda or Boko Haram, Adolf Hitler and his fascist mode full of genocides and racism, and fully same value as if they occupy today, your country, your nation and civilization.

It is really that in order to spread information about corporatocracy government, then there is a lot of collective step for disposal of your of terrorist policy through really hard and murderous practices, such as the burning of such terrorist persons, their beaten and trampled on public streets, blasting explosives, their killings tough weapons , tossing them from the windows of their homes and offices, any practice for their murder. In many countries may soon begin to rise too armed groups who will occupy today's European regime until such a regime would be overthrown and stopped after the destruction of all policies of your government.

---

# **Nations own claim to defend their rights**

---

In foreign countries which are in the same political situation as it is today, your country and the government, such countries are in many cases, based on civilian movement in the form of armed groups who like armed opposition fighting against the regime, such as ISIS, or other similar terrorist entities, entities that values have the same dimension as the current value of legitimacy

of European governments in the country, a terrorist group without the right to exist in today's political world.

Such armed groups take steps for blasting these terrorist entity, but these armed groups are of any value in the political recognition or acknowledgment of summoning to cooperation, without any cooperation agreements with other legally army, the country's government or organization. These groups sometimes consist of several tens of thousands of civilian soldiers with guns, and they kill people who are their opposition, the opposition such as ISIS, Al-Qaeda, Boko Haram, other terrorist groups as well as today's European policy. Throughout the world, UNSC, UNGA, and any other organization or government of the country and even international criminal tribunals does not seek to stop such movements, never interferes against such people and armed groups. Never try to block such civilian persons or damaging their strategy to eliminate these terrorists. This means that your nation owns all claims to knowledge of all their rights and information about the real situation, according to all the real values and legal relationship, even if it meant that the actual mass and brutal protest. People who live in your country, they are in danger in the form of ceasing Fulltext dimension of their civilization or massacres their families through international armies, so it's really better if people know the real information and they can go fight for their lives and security for the state.

Civilians who took his duty into their own hands, and they therefore have rights and entitlements is immediately removed, so even with full international support. Armed civilians, These are people who have every right to immediate application violent tactics to kill every terrorist people in their government, and without the possibility of blocking any such right. It's also really, of their practices may be often brutally, in the form of a beaten man in the street, the burning match your policies and their families and friends, mutilation and torture publicly and on television the brutal murder of whole blood and traumas from your policy, but because it is well I realize that such a situation will be created here only if you fail to observe together such a text, and you therefore will not be able to remove all these terrorist policies in one moment, or possibly in a short period of one day.

Therefore, if you do not respect my offer for our cooperation, you must therefore accept your responsibility for supporting crimes, which means that soon arrives violent protests and bulk criminal twists against you, the extent of your entire country, every citizen in your country and at the same time all people who have to trade in your country, as well as answers from all the people abroad and also the World Trade who have a great ability to determine the future of your civilization and the importance of your country's international reputation.

Therefore, it is really hard for you obligation to respect such a call and go, defend your country by providing an immediate liquidation of terrorism, and how is your task to protect your country and defend freedom for your nation. If you do not do this, you have thus betrayed your nation, the whole world, of every government of the country abroad, it means that your nation will come to you, Start mass killing your family and also all of your friends, because it is a fact, and such are their rights which will support the entire world and other military units from foreign countries, each country's government on the planet, this is their natural reaction, and to the legal obligation of international law.

If you want to save your country, gain pride for your victory, and thus cooperate in the name of your country and freedom, then you support my proposals, and it constantly widen among others.

The most important act is to ensure security in the form of awareness and the governments of other states that they stopped the expansion of a terrorist group and is therefore one of the most important steps for the elimination of government of the Czech Republic and securing compensation. Other politicians around the world at the same time realizes that their cooperation on terrorism will mean only towards their killed or court judgments for execution and prisons. Therefore, the future mandate had policies will refuse to support such Terrorism today, and we with the help overthrow the government of the Czech Republic, we can ensure a safe future political stability of the positions. Terrorist movement becomes increasingly lose support because overthrow of the Government is a good and important step.

Today, according to the situation and of my options and rights or entitlements, the federal government Imperium of Diamond's own claims for the recovery of damages that is level really major dimensions, values which are rapidly more important than the value of European territories, civilization, economy or society. Therefore, it is sure that if in the interest of your country is not a true ability to ensure our cooperation, then your country will be internationalized as a new territorial entity World Diamond International Alliance, or civilization is undergoing a full re-bankruptcy and ceasing. Therefore, for you is really the best opportunity to fully cooperate and eliminate terrorist movement in your government, thus gaining the ability Rights to maintain your integrity.

In such a case, I have the honor to request the opening of our cooperation immediately in the form of an organized movement, and thus ensure the safety and function mode according to the principles of international rules in such interests I demand asserting claims federal government Imperium of Diamond's, for temporary ability to own sovereignty in Europe territory, according to the format De Juri and therefore began our joint prevention against the development of further conflict or the inability to carry out police investigations and so mainly we are able to create a common agreement that may be the key for keeping together the stability of the economy and the security of your state, and at the same time and my ability to safely develop together with other States in the world, and therefore will be blocked up and the threat of further conflict in Europe, and reaffirmed the threat of ceasing.

**The federal government Imperium of Diamond's** exploits entitlement for the sovereignty De Juri support stabilization of the situation and the economy, as well as the possibility of

stabilizing the system and threats from world politics, due to a claim a special form of significant legal name and claims in certain situations, therefore, the legal name of greater political value than the UNSC and UN Security Council resolutions, in case the efforts of the opposition in the form of abusive own political rights and a monopoly or preventing the application of justice for personal profit.

In any case the elected superintendent, the Board of heads of foreign governments, and through International poll other state abroad. In such case, it will ensure the ability of the legal system of the government, without insider power and action in the form of fraud, corruption and terrorism. Observer to oversee the administrative and political manipulations activity and therefore will your country security and well, with no possibility of losing a monopoly and political action for abuse of power. The country will be stable and the ability for international political and communication activities, the ability to develop stably and lose to bankruptcy.

It is also right for your state and nation, if your anti-terrorist action will be initiated and terminated with full success, in the form of full destruction of all the terrorists in today's government, then you are a new temporary regime the state, as well as police and soldiers in the service of the state, you in this case you can use enforceable right to represent match your status as well as promote cooperation with ID's, de juri in our interests, in both cases, and therefore the constitution of the World Diamond is not yet confirmed declared in the interests of European territories until your counter-terrorist operation will be victorious enough, then your state's claims to unite and launch a parliamentary meeting in order to build a new government of the country or reactivate the constitution of the government, to ensure the stability and function of the entire regime but with full function capabilities of security systems against terrorism and legally application of justice.

The stats of your countries have the right and the demands for self-determination and the determination of the sovereignty of the country's government, but only if the UNGA as a form of World Diamond International Alliance disown own decisions on behalf of the global political democracy, as well as the right and the duty of the UNSC, on the decision for the creation of sovereignty by its own principles and without respect for state law to self-determination, hence the obligation to decide according to systems that are able to fully guarantee the security of States and Governments in order to prevent bankruptcy against civilization due to the financial crisis.

Only chance to stop the threat of bankruptcy, it is the only option in case of suspension of activities of European terrorist policy, and subsequently before the government leadership in my hands, the possibilities of our federalization under the Imperium of Diamond's, and thus the emergence of your new state governments as federal entities, or in case of your lack of interest will be determined by fully refund your government through the World Diamond International Alliance, the group as a system of all governments around the world who together decide on any activity in your country. The two only options for your decision is, the last two options for you by staying, and still are much better option than to leave in office terrorist policies which exist there just because your country to undergo demilitarization.

Therefore, in such interests I want to assure our cooperation on behalf of government Imperium of Diamond's and asking you for your support in De Juri Sovereignty. Such steps mean for us the ability to instantly and stability through the state of democracy will then be lawful ruling, all confirmed by the legal rights and principles.

Therefore, if you want to be successful, it is therefore good to ensure immediate security and stability of your government, even before the UNGA and the UNSC will decide your civilization demilitarization and transformation of sovereignty under international alliance WD. It is real that last chance for your nation remains the only option, to agree with me and ID's, and in the interest of our federalization.

*Financial payout for a single person will on average achieve form 10.000.000.000.000 Euro every month repeatedly.* This is the value that is based on comparable dimension with an annual GDP of Japan, China, or other similar states. It's really really, and I can really prove by legally standards. It is the certainty that each of you will be well rewarded really big and powerful rewards for your service to the state and nation.

Construction of new cities and skyscrapers, large and dynamic city, super transports, cities full of special architecture and high-tech transport system at speeds 69 times around the whole dimension of the planet earth in 1 second, or ten minutes for another kind of star in the universe, many forms of special steps for the future, and also built up in many new orbital cities and levitating city, or the many other technological advances of our country and the modernization of civilization excluding the average maturity of the future form of the system of civilization that it changes Full size and our ability of knowledge in today's world and lifestyle . A big step for the future of our country, in any case, it's for your country much better than waiting for bankruptcy and extinction of civilization.

Today, my plans and development steps, my ability political and development of intelligence or my real skills for technology development and for such use in the structures of society, economy and civilization, my value and such ability to change the entire world, I should have been long ago the best policy the extent of the European Union and my values is really fully accepted in dimension, during the time of when I was a small child.

## The Diplomatic Time's, 2000 year

---

In recent interest, we will in any event require only securing our common relationship in the interest of the common friendship between the two countries, and cooperation by diplomatic factor. My interest is to open a consulate in your country and thus provide the ability to communicate with European traders, cultural center and along with other others in Europe, consulates which are used for the other European traders as the opportunity to play together for the development of civilization stores and plans of the international market. My civilization is now under a 16 year occupation and blocking formal state of demilitarization, and therefore I need to immediately obtain many traders and personal ability to establish conferences or public appearances in the media.

As a first and immediate step is important so that I could use the skills to build a contact center for other traders or exile because of the activities must make use of additional contact center for communication with other countries' governments and organizations abroad. The success he is maintaining a truly functioning only because of your judgment may be legal and operating according to justice, in accordance with the arrow interests and for exercising legal power International law and other entities. If your courts are not operating under a legal nature, then it means that your cooperation for the removal of terrorist individuals in your government will be pointless because it is better to wait on your being overthrown through international forces and demilitarization, result is the same if your courts will not work.
