Key Features of AVG Internet Security:

AVG Internet Security

Powerful new features that protect your business

- ✓ AntiVirus and Malware Protection
- ✓ Business Firewall Security
- ✓ Email Server Protection
- ✓ File Server Protection
- ✓ Remote Management
- ✓ Free Phone Support
- ✓ Always Updated

1. Advanced Security:

Advanced Antivirus: - This is an advanced antivirus because it thoroughly scans all the viruses, malware, and spyware etc. of the computer. But if you are away from your computer than you can schedule internet security to run the computer scans.

Provide All Detection: - It identifies the malware very quickly which have not been catalogued by the AVG defensive team.

Anti-Ransomware: - This feature stops the hackers from taking your personal information like private photos and files.

Email Scanner and Anti-spam: - It blocks the dangerous email and keeps your inbox clean. Spam to protect your computer and also reduces the chance of online spam.

Enhanced Firewall: - It acts as a wall between the hackers and the computer. It blocks the hackers from getting personal and valuable data from your computer.

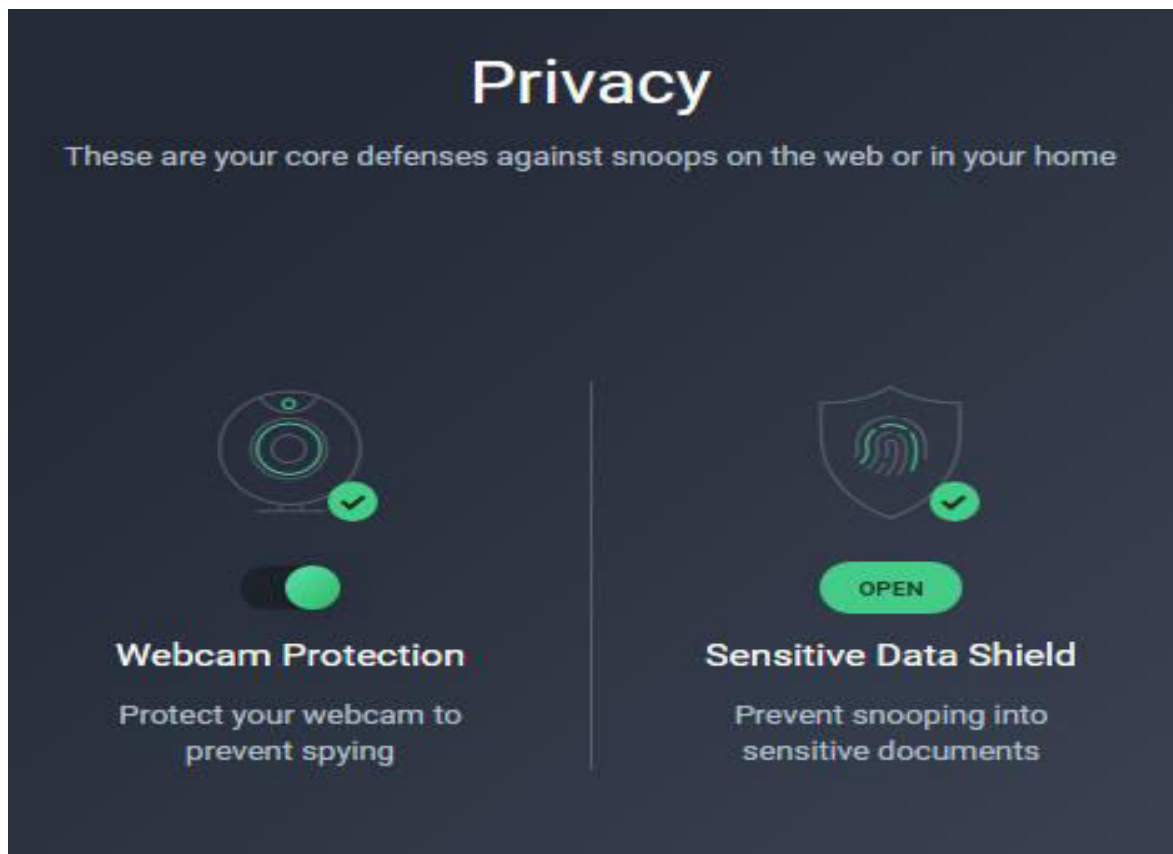

Link Scanner: - It blocks the dangerous websites and warns you by giving the alert sign. It also works as a link on the internet.

Online Shield: - It scans the downloaded files to protect your computer system against hidden malware.

WI-FI Guard: - When you connect to the unknown WI-FI network, it avoids the malicious hotspot.

It also has a feature of **Real Time Outbreak Detection** and **Software Analyzer**.

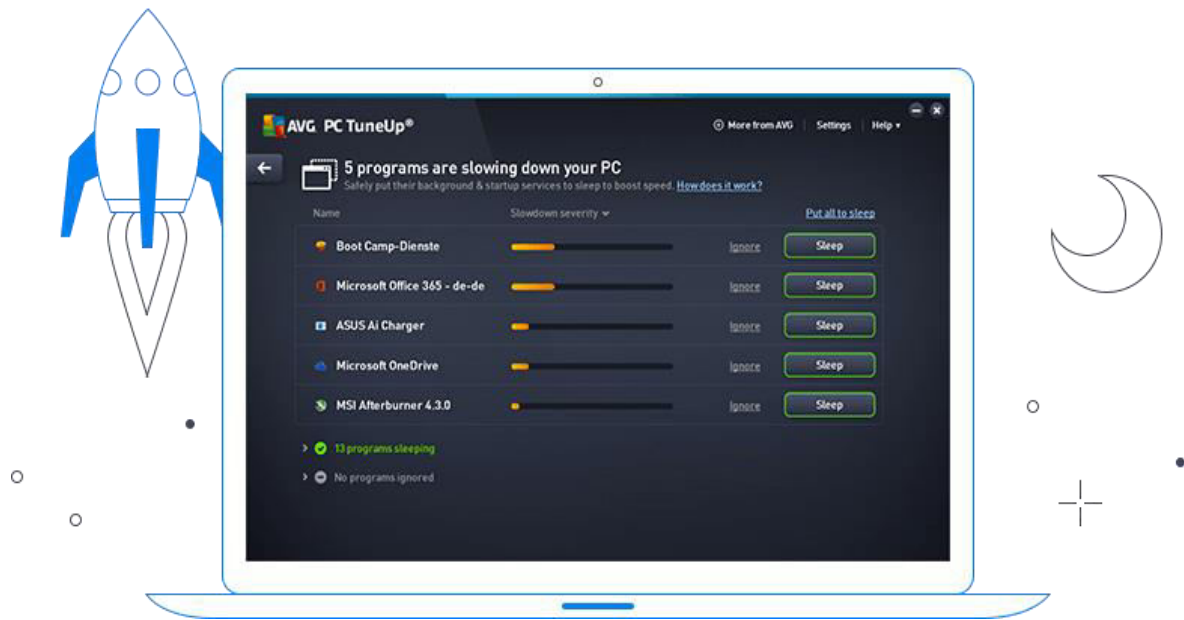

2. Privacy:

Data Safe: If you don't want anyone else to see your valuable data and document, then use Data Safe to hide your documents.

File Shredder: The files which are deleted from the recycle bin can be recovered but file shredder deletes data to prevent unauthorized recovery.

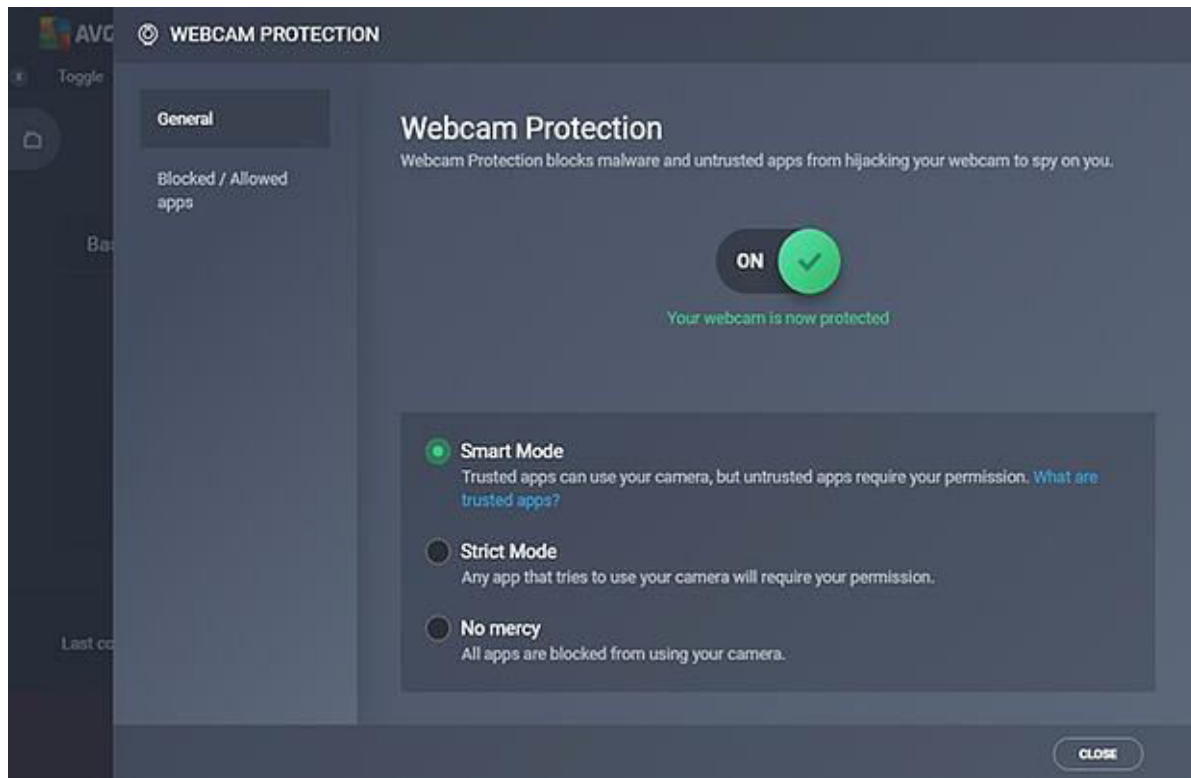

3. No Slow Downs:

Smart scanner: - It avoids interruptions and scans the data of your computer when you are not using. But as you start working on your computer Smart scanner drop down to low priority mode so that the program run smoothly.

Turbo scan and Game mode also helps in No Slowdown.

4. Remote Protection:

All in one Dashboard: - You can remotely check its dashboard for the security and performance of your AVG enabled devices.

Remotely Scans: - It remotely scans the viruses of your computer. If there is a threat found, it gives the alert sign.

Share Your Protection: - You can share your paid internet security feature with other personal devices at no extra cost.
