

How to set up a Verizon email in outlook?

Using multiple emails has become very common nowadays. So, if you are also a user who is using two email accounts then it is very common. And it becomes quite challenging when a user has to use multiple emails in different devices. But, if you want to make two emails manageable then it can be done when you use it in one place or one device. Hence, if you have Outlook email and Verizon Email then they can be used together with hand in hand without creating much confusion. And this is possible when you set up Verizon's email in Outlook. But, if you do not know how to proceed then before contacting [Verizon customer service live person](#), you can follow the steps stated below.

Simple Steps to Set Up Verizon Email in Outlook!

1. Launch a web browser and head over to Outlook.com from its search bar.
2. Enter the username and password on the sign-in page and proceed further.
3. As you enter the emails, tap on your name and then tap the “Settings” option.
4. Select the “Add Account” option and choose the Verizon email account as the email.
5. Now you will be required to enter Verizon email settings manually hence you need to start by entering the username and then password in the box and tap “Next”.
6. In the next step, you are required to click on the “Server” tab and find the box labeled as “SMTP”. Here you are required to enter outgoing server details.
7. In the same way, you need to enter incoming server details labeled as IMAP and tap “Next”.
8. Check the “My Server requires Authentication” box and tap on the box of “Settings”.
9. Now check on the “Log on using” box and enter the Verizon email address once again and tap “Save”.

So, with the help of the above steps, you can add Verizon's email to Outlook. For any further help, you are free to contact [Verizon customer service](#) that is 24/7 active to help you.
