Professionalism and Humanity

Professionalism and Humanity

Health services at both the national and international levels take their place today on the basis of their diversity, quality, specialization and scientific rigor; provided internationally, they have grown in strength and projection as part of the infra-structure development of services and human resources on the largest island in the West Indies.

In Cuba, visitors to our island receive highly competent medical care while they feel comforted by the other strengths that have made Cuba an exceptional destination; its hospitality, security for its citizens, the beautiful scenery, the environment and the proverbial culture of people who are joyful and charismatic.

Basing its work on the prestige and solidity of the National Health System, the Comercializadora de Servicios Médicos Cubanos, S.A. was incorporated, assuming experiences and virtues of more than two hundred years of medical practice in Cuba with the aim of guaranteeing the providing of care, teaching and epidemiology in the cases of disasters in other countries, and on a grand scale. This organization broadens its universe of services and products, excelling in complexity, scope and its commercial and institutional range.

Adding the key attributes of human competence and inherent ethical-humanistic values to its management capacity, the Company offers the following business lines:

- Medical care services in Cuba.
- Academic and teaching services in health sciences.
- Quality of life, health and welfare services in Cuba.
- Border medical and health services.
- Health services associated with optical, pharmaceutical, natural and traditional medicine products.
- Services associated with scientific events.
- Professional services abroad in the field of medical and health services.

Academic services

Our Academic Services provide a broad range of levels, in accordance with the quality and position Cuba has earned in the realm of teaching, both general and specialized. Traditions, knowledge and competence accumulated from the onset of the eighteenth century have been added to more contemporary experiences; this is a clear contribution of the robust and secular professional sector.

In the past 50 years, Cuba's medical sciences universities have prepared more than 100,000 medical doctors, both Cubans and foreigners from more than 80 countries on every continent.

On the basis of its abundant teaching experience, SMC offers the following academic programs:

- **Undergraduate programs:** university careers in specialties of medicine, dentistry, nursing and health technology with profiles in medical imaging, medical Radiophysic, Clinical Bioanalysis, Health Information systems, Optics and Optometry, Health Rehabilitation, Nutrition, Hygiene and Epidemiology and Logo-phono-audiology. For undergraduate studies with also offer courses, internships, teaching practice and pre-med course (including Spanish language and specific subjects).
- **Postgraduate programs for academic preparation:** specialties (residences), masters and doctorates.
- **Postgraduate programs for professional development:** courses, training, diploma courses, seminars, workshops, specialized conferences.
