Actuarial Memorandum
Florida

Tesla Property & Casualty, Inc. is submitting for your approval a new program for Private Passenger Auto, with a proposed effective date of October 20th, 2022.

The program will be distributed through the digital InsurTech platform from Tesla Insurance. The purpose of the product is to use the technology in vehicles to lower costs and improve the customer experience through automated underwriting, rating, and claims, including direct data feeds with customer permission, that eliminate frictional costs and inefficiencies inherent in traditional insurance processes. The digital approach to purchasing insurance by the consumer will streamline and enhance user experience throughout the policy lifecycle, beginning with the quote through online bind, renewal, and in the event of a claim. The use of vehicle and consumer data, with the consumer's affirmative consent, will allow for lower costs to acquire and service the policyholder.

The proposed program will incorporate our Safety program, which uses telematics data to provide safety discounts. Details about the Safety program are included in the safety program rules and telematics model documentation. Through technology driven insights, savings resulting from the safety features on the vehicle and how the vehicle is being driven are passed onto the customer.

Since this is a new program for which Tesla Insurance does not have any Florida PPA data on which to develop rates, Tesla Insurance is basing its program on industry data, including major insurance carriers' approved programs in Florida. The proposed rating algorithm is a multiplicative algorithm, further detailed in the attached proposed rate tables. We are keeping our rating algorithm and product design consistent with our product in other states.

Rate Support Exhibits:

Exhibit 1 - Competitive Analysis

The Tesla target average rate level for major coverages was determined by analyzing competitor rate levels. We have selected a target in the range of competitor rate levels to ensure our rates are adequate and not excessive.

Exhibit 2 - Increased Limit Factors

Tesla evaluated the increased limit factors from several competitors, rebased to Tesla's proposed base level. Competitor factors were only considered where competitors offered a multiplicative factor for a given limit. Consistency test was performed to make sure the selections were appropriate and actuarially sound.

Exhibit 3 – Deductible Factors

Tesla evaluated the deductible factors from several competitors, rebased to Tesla's proposed base level. Competitor factors were only considered where competitors offered a multiplicative factor for a given limit.

Exhibit 4 – Territory Rating Factors

The proposed Tesla territory relativities are the average of competitor territory factors, excluding the highest and lowest competitor factor for each territory. We believe by using the average factors we will guarantee our rates are adequate and not unfairly discriminatory since extreme values from any single competitor will be tempered.

Exhibit 5 – Tesla Symbols Adjustment

Tesla is proposing to update the ISO symbol assignments for Tesla vehicles. The goal of these adjustments is to simplify rating and eliminate reversals.

Exhibit 6 – Annual Mileage Factor Support

The proposed Annual Mileage factors are based on Tesla's internal countrywide frequency loss data as of 6/1/2021.

Exhibit 7 – Autopilot/FSD Discount Support

The proposed Autopilot/FSD Discount factors are based on Tesla's internal countrywide frequency loss data as of 6/1/2021.

Exhibit 8 – Multi-Car Discount Support

The proposed Multi-Car Discount factors are based on competitor factors as detailed in the exhibit.

Exhibit 9 – Group Discount Support

The proposed Group Discount factors are based on competitor factors as detailed in the exhibit.

Exhibit 10 – Vehicle Age Support

The proposed Vehicle Age factors are based on competitor factors as detailed in the exhibit.

Exhibit 11 – Monthly Trend Factor Support

The proposed Monthly Trend Factor will be used for new and renewal business and is determined by the effective date of the new or renewal term. Please refer to the Rule Manual for further details. The selected trend amount is based on our expectation of changes in costs due to inflation and other market conditions.

Premium Breakdown

Premium breakdown is based on targeted Tesla Insurance countrywide data, as no business has been written in Florida yet.

Rating Example

Rating examples are based on the nine examples requested by the state, with adjustments to the closest coverage limit/deductible options when the requested options are not available from our rate plan.

Applicability of Manual Rules

1. This manual provides rules for the Tesla Personal Auto Program.
2. A motor vehicle that is a pickup, panel truck, or van shall also be considered a private passenger auto if it meets the eligibility requirements under Policy Program Rule.

**Tesla Property & Casualty, Inc.
Personal Auto Program Rules**

Binding Instructions

Coverage will be bound in accordance with eligibility guidelines and rules. It is not possible to provide an all-inclusive list of risks or exposures on which coverage should not be bound. Detailed rules and guidelines contained in this manual must be followed when binding coverage. Contact your underwriter before binding coverage on any unusual, questionable or high hazard risk.

Binding authority may be restricted in the event of natural disasters including but not limited to flood, earthquake, wildfires, etc.

Policy Program

Tesla Personal Auto Program Policy

Autos owned by or titled to corporations subject to these provisions:

- a) The corporation must be solely owned by an individual, by a husband and wife, or registered domestic partner.
- b) Such individual, husband and wife, or registered domestic partner must be shown as named insureds.

Tesla Property & Casualty, Inc.
Personal Auto Program Rules

Financial Responsibility Filings

1. Subject to statutory regulations, filings certify financial responsibility for individuals required to show proof of financial responsibility. Such certification will be made promptly.
2. When canceling policies with financial responsibility certification, notice to the appropriate authority is required in accordance with the financial responsibility law and regulations of the state.
3. A \$25.00 SR-22 fee may be imposed per filing per policy term.
4. A \$25.00 FR-44 fee may be imposed per filing per policy term.

Tesla Property & Casualty, Inc.
Personal Auto Program Rules

Policy Period

1. Personal Auto Policies may be written for policy periods for 6 months or less.
2. For policies issued with an effective date of the 29th, 30th or 31st of any month, the first policy period will be extended from the effective date to the first day of the calendar month following the usual expiration of the policy.

Tesla Property & Casualty, Inc.
Personal Auto Program Rules

Policy Changes

1. All changes under the Personal Auto Policy requiring premium adjustments shall be computed pro rata, excluding fees, and on the basis of the rates and rules in effect on the policy effective date.
2. Suspension of coverage is not permitted. Instead, coverage may be added or deleted if desired and permitted.

Tesla Property & Casualty, Inc.
Personal Auto Program Rules

Policy Cancellations

1. All cancellations under the Personal Auto Policy shall be computed on a pro rata basis, excluding fees.
2. Flat cancellation will be offered if the request for cancellation is received on or before the effective date or there is adequate evidence of replacement coverage with another insurance company.
3. We reserve the right to waive refunds due the insured that are \$5.00 or less.

**Tesla Property & Casualty, Inc.
Personal Auto Program Rules**

Minimum Policy Premium

The minimum premium for a six-month policy is \$100, which cannot be reduced except in the event of a cancellation.

**Tesla Property & Casualty, Inc.
Personal Auto Program Rules**

Premium Determination

Please refer to the rating algorithm in the attached rate tables.

**Tesla Property & Casualty, Inc.
Personal Auto Program Rules**

Classification

The factors for each rating step in the rating algorithm are determined as follows:

Territory

Territory factor is determined by:

1. Principal garaging address of automobile.
2. If a territory is zip code rated, and a zip code splits or new zip codes are introduced, apply the territory in which the prior zip code falls.
3. If a territory cannot be determined considering above, then assign the territory to an adjacent zip code.
4. Automobiles principally garaged out-of-state are unacceptable.

**Tesla Property & Casualty, Inc.
Personal Auto Program Rules**

Vehicle Age

1. The model year of the auto is the year assigned by the auto manufacturer.
2. For rebuilt or structurally altered autos, the model year of the chassis determines the model year for rating.
3. The vehicle age is calculated as the policy effective year – vehicle model year. A vehicle age less than 0 will be rated at vehicle age 0.

**Tesla Property & Casualty, Inc.
Personal Auto Program Rules**

Mileage

1. Annual mileage is calculated by prorating the average historical verified mileage.
2. For vehicles without sufficient historical verified mileage, self-reported annual mileage will be used.

**Tesla Property & Casualty, Inc.
Personal Auto Program Rules**

Monthly Trend Factor

To determine the trend month for a policy, take the policy effective date less the new business rate revision effective date, divide by 30.5 days, and truncate the number to an integer. See the Monthly Trend Factor table for the appropriate factor to be applied. This factor will be used for the duration of the policy term. The Monthly Trend Factor applies to new and renewal business.

Notes:

(1) CW ECY as of 6/1/2021

(2) Claim frequency as of 6/1/2021

(3) Indicated frequency calculated based on a line fit to the raw frequency data. The line was fit using an intercept of 0.0568 and a slope of 0.0031 per 1,000 annual miles.

(4) = (3) / [(3) for 16,000 annual miles]

(5) Rebased the indicated frequency relativity to the total Average Factor using ECY as weights

(6) Selected factor is based on the rebased indicated frequency relativity, and by grouping the annual mileage into bands of 3,000 miles for significance.

(7) Selected factor for rating is a rebased version of the selected factor

Source for CPI data: <https://www.bls.gov/charts/consumer-price-index/consumer-price-index-by-category-line-chart.htm>

The selected value is an annual figure; the equivalent monthly factor is derived by taking $(1 + \text{selected})^{(1/12)} - 1$

The proposed trend factors shown in the rate plan are derived as the $(1 + \text{monthly factor})^{(\# \text{ months})}$

The proposed trend factors from months 0 - 6 are 1.00 as the factor is intended to apply starting one full term after rate change.
