

Swimming Pool Designs for Maximum Fun and Enjoyment

The first thing you need to think about when planning the pool is its usage. Do you want to swim laps, do physical therapy, exercise, entertain guests, let the children have some fun or impress your neighbors? You've decided to get a pool for a reason or a multitude of reasons to enrich your life. The pool's purpose has perhaps the most impact on the way it's designed therefore, the demands and expectations that the pool is designed to meet should be identified at an early stage in the design process. It is also useful to understand the primary purposes to help make the right design choices. In the next section, we'll review some of the most popular advantages that people can get from having a pool, and how they affect the design of the pool.

Fun and Leisure

The most common reason for obtaining a swimming pool is family fun and relaxation. A backyard pool is a fantastic place to cool off in the summer season, enjoy a good time playing with your children and throw some inflatable toys around. If this is your primary motive to get a pool, then the simplest, least expensive pools will do. If your budget is substantial it is possible to invest in some luxury pools, however an above-ground or shallow in-ground pool would be enough to meet your needs. A pool that is at 4 feet will be deep enough to play in and take in a few times however, it's also shallow enough to provide security for all the family.

Exercise:

If you want to use your pool for some vigorous exercise, then dimensions of your swimming pool must be taken into special consideration. If you want to swim laps in it, then a pool at least 25 feet in length and 3.5 inches deep would be recommended, with typically lengths of 20 to 40 feet. There are even lap swimming pools which are relatively slim, and thus are able to fit into tight spaces. Water aerobics requires more depth in order to avoid touching the the bottom. A typical section of the pool that is 5 to 6 feet deep is sufficient to serve this purpose. Another alternative for swimmers is the spa pool, which is a small pool, typically less than 12 feet long, which can create a powerful flow of water to swim against. You can then swim against the current while still staying put. Their compact size makes the installation of indoor swim spas a very practical option in many situations.

Parties and Entertaining Guests:

If pool parties are in your future you may have other design considerations to consider. These tend to be related to landscaping and design of your area surrounding the pool. You may want to surround the pool with a patio or deck, and add a pool home, gazebo, an outdoor bar, furniture or other items. Furthermore, you might like the pool to be designed to look good with a sleek design and not only for functional reasons. Carefully hiding pool equipment will add to the appeal of the pool. more appealing.

Relaxation:

A day spent at your pool can be relaxing With the right amenities, it will make it even more enjoyable. An addition of a spa or hot tub to the pool area is perfect for the swimming pool itself. Similar to pools, they come in in-ground and above-ground models that are portable and mobile. A spa in the ground is usually attached to the pools heating and filtration

systems. In the event that this isn't the situation an outdoor spa is an option that is much more affordable.

If you plan to spend in the sun by the pool, be sure to make space for it. If you decide to go with an above-ground pool type including large decks on the level of the pool is an excellent idea.
