

PUNJAB AGRO'S

Punjab Agro Juices Limited

Set up in 2006 Punjab Agro Juices Limited (PAJL), is optimally turning the massive potential of the state's horticulture produce into a healthy and refreshing success, thereby providing farmers with crucial support to get higher and better returns.

about PAJL

Infrastructure & Innovation

PAJL has set up state-of-the-art facilities armed with machinery procured from CFTSPA Italy to process large quantities of fruits and vegetables. The machinery has the capacity to process upto 20 tonnes of citrus fruit per hour and upto 10 tonnes per hour of other fruits and vegetables with ready cold storage and deep freezer capacity of 1000 MT at each plant. The plants have the in-built capacity of handling and processing a variety of fruits and vegetables with quick changeover from one fruit/vegetable to another like mango, kinnow, guava, pear, melons, amla, aloe vera, tomato, bitter gourd, jamun etc. Aseptic packaging of fruit and vegetable extracts ensure that they are fresh all

through the process and storage under ambient conditions. The beverages are made preservatives free and have a longer shelf life.

Coming up with a no added sugar Kinnow beverage, PAJL is constantly pushing the boundaries of innovation. PAJL has also delighted the customers with its Kinnow Marmalade. A similar experiment is done with the king of fruits, Mango. The sweet taste of Dasherri mango is being made available in the form of fruit beverage by PAJL. Along with this, it has also developed a unique juice with an eclectic blend of fruits like mango, kinnow, guava, pear and water melon.

brand

With a legacy in the business of processing fruits and vegetables, PAJL has launched a range of its beverages and food accompaniments under the brand name Five Rivers. The company also manufactures fruit beverages, pulps and concentrates of different varieties which are supplied to national and multinational companies. The brand also exports Chilli paste to Gulf countries which is a promising market for the product.
