

with AN additional bonus module: Hemp in nutrition by daisy booth

One of the largest biodynamic farms in the UK, Shire Farm is delighted to co-host this residential course in the heart of the Lincolnshire Wolds.

Steve Allin's world famous three day Hemp Building Courses have inspired many people to go on to establish the system in their regions.

This course includes theory and practice to give participants an opportunity to understand how the material works and the economics of the process of installation

Students will have a chance to get hands-on experience with frame building, hempcrete installation, shuttering design and hemp plastering.

Popular with people from many strands of the construction industry, Steve's courses have been attended by architects, builders, interior designers, students and many other people interested in finding solutions to energy and environmental problems using hemp.

The course takes place over 4 days, on Shire Farm itself, where we grow our own hemp under license, beginning with an afternoon on the benefits on Hemp in Nutrition.

For bookings, contact: heatherm@aura-soma-academy.net

Course Information:

The course runs over 4 days and is inclusive of accommodation, and meals. You will be staying at the beautiful residential centre 'Dev Aura', which is expertly run by Shire Farm's sister company, The Aura-Soma Academy. Dev Aura is set among beautiful gardens and offers a delicious range of vegetarian dishes created each day from produce grown biodynamically in the garden and farm.

Lunch at Dev Aura

Dev Aura and gardens

Each morning transport will be provided to take you to the Demeter registered, biodynamic, Shire Farm, in nearby Hagworthingham, where the practical elements of the course will be held.

Location:

Dev Aura is located in the village of Tetford, in the heart of the Lincolnshire Wolds

Address details:

Dev Aura, Little London, Tetford, Lincolnshire, LN9 6QL

The Heart Pond at Shire Farm
