Testosterone enanthate is an oil based injectable steroid, designed to slowly release testosterone from the injection site. Serum concentrations of this hormone will rise for several days and remain elevated for about two weeks. It may take up to three weeks for the action of this drug to fully leave your system. Testoviron Depot Bayer 250mg Description. Testoviron Depot Bayer is a long-acting ester. It was made to slowly release itself into the body. It is an oily solution with a 2-3 weeks activity in the body. This was possible due to the fact that the testosterone molecule was attached to the enanthate ester. #fitness #gym #workout #fitnessmotivation #motivation #fit #bodybuilding #love #training #health #lifestyle #instagood #fitfam #healthylifestyle #sport #instagram #healthy #like #follow #gymlife #life #bhfyp #crossfit #personaltrainer #happy #obiettivi #moda #esercizio #muscolo

Testoviron-Depot is administered• as a testosterone substitution treatment in the presence of male hypogonadism (diminished tes-ticular function) Testoviron-Depot may only be administered in cases where the testosterone defi-ciency has been confirmed in clinical and medical laboratory tests and where other possible causes of the symptoms and signs have been excluded (cf. also Section 2. «Special caution is required with the administration of Testoviron-Depot»).

Testoviron is actually a very decent anabolic, and is very rarely counterfeited any longer. Basically, what we're looking at is a nice pre-mixed blend of Testosterone with a long ester (Enanthate) and a short ester (Propionate).

This is why I love bodybuilding so much. You are responsible for who you become, good or bad, and you are the only person standing in the way of achieving your hopes and dreams. If you let a negative self image or doubts and fears stop you from trying then you can never succeed. If you are so full of yourself that you do not think you need to change at all then you are holding yourself back.
