

The Amazing 3 In 1 Vaporizer Kit

At the lower temperatures the flavors are good and the smoke quite thick. At the highest temperature the herb can taste a little burnt, but wax and dabs taste great. The range is a compromise between what is good for herbs and what is good for wax or concentrates. Most herb users will use the middle three settings whereas the concentrates users will probably use the top four. Starting from water bong, the Black Widow has a cutting-edge stainless steel mouthpiece to maintain the smooth vapor quality. This mouthpiece has a magnetic connection for fast-access to the chamber and it is equipped with an unique cooling chamber for improved vapor quality.

There is also an air path that cools the vapor and enhances the flavor. For using dab concentrates, there is a separate pod that can be put on the battery. Overall, this is a very durable and portable dry herb vaporizer. The body is made from aluminum, which is light, making it easier to transport. However, it is quite large, so stowing it in a pocket is not practical unless it is a cargo pocket. The mouthpiece is made from metal, too, and it stays in place thanks to a strong magnetic connection.

The device consists of a sturdy aluminum alloy casing and stainless steel of the mouthpiece to take the heat and the beat. However, everything your herbs or concentrates touch is ceramic. Charging is taken dab pen of by the supplied micro USB charger and means that you can plug it in for a quick boost pretty much anywhere. The Black Widow gives you five different temperature settings to choose from which means you can tailor your vapor levels and flavour to exactly how you like it.

These Device are not designed to diagnose, cure, prevent, or treat any disease. Those who are seeking treatment should consult a licensed doctor before using a Device.

I purchased this product after reading the reviews of most of the people but this product is not so good as I thought. The chamber got clogged after use and don't produce many vapors. The size although bulky does fit into your pocket, the shiny casing and red Black widow symbol might make it stand out a bit more than some of the other devices. I have mixed feelings about the mouthpiece on the Black Widow. The mouthpiece is a step in the right direction as it is not made of flimsy plastic. However, it is also not made of glass either like the LITL 1, which helps to deliver the best flavor while also cooling down your hit even if it is only ever so slightly.

The Black Widow vaporizer is one of the latest additions to our vape lineup and so far it has impressed everyone here at The HotBox! The vapor quality and flavor are easily as good as plenty of premium vapes, some of which cost five or six times as much as the Black Widow. The Black Widow Wax Pen provides a homogeneous and continuous conduction ensuring that there is no shortage of vapor created from the very first inhalation. The ample filling chamber, which is seamlessly integrated into the vaporizer itself, is easily filled with packing tool. The stainless steel mouthpiece is easy-to-clean and allows for great tasting, enjoyable vapor. silicone bong provides a homogeneous and continuous conduction ensuring that there is no shortage of vapor created from the very first inhalation. The Kingtons BLK Black Widow Vaporizer is made of Anodized aluminum and stainless steel for robust and wear-resistant. It is almost hard to fathom how it is possible for a \$59 vaporizer to work as well as it does, but most of the time we're just paying for fancy labeling and marketing apparently. The Black

Widow puts an end to this by providing a quality vape experience with dry herb for a reasonable price. The one-button interface on the Black Widow is easy to use.
