

## Oral Tren Methyltrienolone

**→ VISIT OUR ONLINE STORE ←**

What is Methyltrienolone? | Oral Trenbolone. Methyltrienolone is currently one of the most powerful oral anabolic steroids that have ever been produced. This agent is a derivative of trenbolone (metribolone) that has been added the C17 alpha alkylation in order to make it possible to use it orally. This is a change which has created a steroid that is quite a lot much stronger than its ...

Metribolone (methyltrienolone aka R1881) is a potent, non-aromatizable androgen that is structurally similar to trenbolone and has been referred to as "oral tren." Methyltrienolone binds strongly to the androgen receptor (AR) and is a more potent agonist (activator) of the androgen receptor than is DHT. 17 $\alpha$ -methyltrienolone is listed at 30,000 times more anabolic than methyltestosterone ...

Abschließend gibt's 21 weitere Turkish Get Ups. That's where the Magic happens! Verdammt, im Techniktraining mit wenig Gewicht und Entspannung war das doch so einfach! Was hat der Coach da gelabert von Winkeln, Bewegungsprinzipien, Atmung, Rotation in der Schulter, Mobilität in der Brustwirbelsäule und so? Jetzt ist da diese schwere Eisenkugel über deinem Kopf, der hohe Puls und die müde Muskulatur. □

Methyltrienolone is, of course, a 19Nor compound (as is Trenbolone)...Thus, it will effect your sexual drive and performance in a similar way to both Tren and Nandrolone, meaning that Temporary Impotence and/or a lack of libido is highly possible (aka Tren-Dick or Deca Dick)(10).
