How does Sildenafil Citrate 20 mg Tablet Act?

- Sildenafil Citrate is the active component that works to antagonize the PDE5 enzyme; it is an enzyme that triggers contractions in the blood vessels.

- Besides, Sildenafil Citrate 20 mg tablet also helps to stop cyclic Guanosine Monophosphate (cGMP) degradation, which causes contraction of the arteries.

- cGMP works to dilate the blood vessels because it is a vasodilator.

- Nitric oxide is another vasodilator that acts to dilate blood vessels and relaxes smooth muscles.

- It helps to increases the blood supply when a man is sexually stimulated.

- This whole process results in an erection.
