57% of Republican Primary Voters Say More Likely to Vote for a Donald Trump-Endorsed Candidate...

**11 Weeks Until Missouri GOP US Senate Primary, Eric Greitens Ahead of Eric Schmitt, Vicky Hartzler, Though More Than 1 in 5 Have Not Decided; On Democratic Side, Lucas Kunce, Trudy Busch Valentine Out in Front of 9 Other Candidates, With Nearly 2 of 3 Likely Voters Still Undecided; Greitens, Despite His Lead in Primary, is Weaker Than Schmitt and Hartzler in Hypothetical November Matchups Against Democratic Opponents:**

Former Missouri Governor Eric Greitens leads a 21-candidate field in the **Republican primary** to replace outgoing United States Senator for Missouri Roy Blunt, according to SurveyUSA polling conducted exclusively for Gray Television's Missouri stations (KMOV-TV in St. Louis, KCTV-TV in Kansas City, KYTV-TV in Springfield, KFVS-TV in Cape Girardeau, WGEM-TV in Quincy, IL; KYOU-TV in Ottumwa, IA) and for KRCG-TV in Jefferson City and KOAM-TV in Pittsburg, KS.

Greitens today takes 26% of the vote; incumbent Attorney General Eric Schmitt is at 17%; incumbent US Representative Vicky Hartzler is at 11%. Another current US Representative, Billy Long, takes 7% of the vote today; each of the other 16 candidates on the ballot is at 2% or less, with 28% of likely voters undecided.

Greitens draws significant strength in Southeastern Missouri, where he takes 46% of the vote, more than 4:1 ahead of Schmitt; among "very conservative" voters, where he polls at 38%, compared to 14% for Schmitt; among voters who say the endorsement of former President Trump makes them more likely to vote for a candidate (34%); among the 21% of likely Republican primary voters who say abortion should be illegal under all circumstances (31%); and among men, among those with lower household incomes, and in rural portions of Missouri, each of which give Greitens 30% of the vote. Among those likely voters who tell SurveyUSA they are "certain" to vote in the Republican primary, Greitens leads Schmitt by 13 points, and leads Hartzler by 16 points; among those who say they will "probably" vote, Greitens and Schmitt tie with 18% for each, 11 points ahead of Hartzler.

Schmitt does better among voters who say Donald Trump's endorsement makes no difference to them, where he takes 25% of the vote; among those who say abortion should be legal with some restrictions (25%); and in suburban parts of the state (24%). Schmitt and Greitens are tied in greater St. Louis.

Hartzler, at 11% overall, takes 23% of the vote in Northern Missouri, just behind Greitens at 29%. Hartzler is also strong among the 15% of likely Republican primary voters who consider themselves to be politically independent, where she takes 19% of the vote, effectively even with Greitens at 20%.

Long significantly outpolls his overall average of 7% only in Southwestern Missouri, where the 7th Congressional District is based; Long has represented the 7th district since 2011.

In the Democratic Primary for US Senate, Marine veteran and attorney Lucas Kunce takes 10% of the vote today; registered nurse and philanthropist Trudy Busch Valentine is at 8%; 9 other candidates each take 3% or less of the vote. 63% of likely voters are undecided; an undecided vote that large typically signifies that voters are not focused on this contest, and that many of those who today say they are certain to vote in the primary are doing so with a focus on other, more local contests on the ballot.

The contest should be characterized as even at this point; each candidate has advantages. Kunce leads Valentine by 11 points among voters who describe themselves as "very liberal," by 8 points in Greater Kansas City, and by 7 in rural Missouri. Valentine leads by 6 points among the 15% of likely Democratic primary voters who describe themselves as political independents, by 3 points in greater St. Louis, and by a nominal 2 points in Southwestern Missouri. Businessman Spencer Toder, at 3% overall, has 10%, leading the field, among the 1 in 10 Democratic primary voters who say they are conservatives. Kunce leads Valentine by 5 points among those who say they are certain to vote in the Democratic primary; Valentine leads by 7 among those who say they will probably vote. Among men, Valentine leads by 3; among women, Kunce leads by 6 &ndash; a 9-point gender gap. Kunce leads Valentine by 5 points among voters over age 65, typically the most reliable; the race is tied among Kunce, Valentine, and Toder with the youngest voters, typically the least reliable.

Looking ahead to the November general election for United States Senate, SurveyUSA asked likely November voters how they would vote in hypothetical matchups between the leading Republican and Democratic candidates. Republicans lead in each of the six potential races. Should Trudy Busch Valentine be the Democratic nominee ... Eric Schmitt defeats Valentine by 13 points, 47% to 34%, with 19% undecided. Vicky Hartzler defeats Valentine by 11 points, 44% to 33%; 23% are undecided. Eric Greitens leads Valentine by 6 points, 43% to 37%, with 20% undecided. If Lucas Kunce is the nominee, a similar tale: Eric Schmitt defeats Kunce by 12 points, 46% to 34%, with 19% undecided. Vicky Hartzler defeats Kunce by 14 points, 45% to 31%, with 24% undecided. Eric Greitens leads Kunce by 6 points, 42% to 36%, with 22% undecided. Greitens consistently underperforms Schmitt and Hartzler among three groups: Among those with

**Statement of Methodology:** SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principles of disclosure as recommended by the National Council on Public Polls (NCPD). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
