WELCOME

Welcome, to this free e-book for free money!

That's right FREE, Sort-of. Bear with me I will explain in detail. I have been "around" FOR A VERY long time.

But anyways here is what you're going to need to get the money going right.

Now I have 4 methods here.

The first one is HOW TO MAKE \$ FROM computer time. *(Not mining, streaming)*

The other are how to **MAKE MORE MONEY** from investing **THE FREE MONEY**, or money you have and want a passive auto pilot income.

Most of these have **NOT BEEN SEEN** by most people, some have. 😊

I ask that you USE my referral links as any help I get I am thankful for. Just like your thankful for the **METHODS** I'm giving you, even if you **DON'T USE** the account at least you made it and maybe you'll return to it later. With that said, Thank you **AND ENJOY!**

METHOD 1

- First you need an account. Please use the affiliate link [HERE](#)
(That's why I'm sharing a money making method I make 5% of what you make. If you make more\$ I make \$!)
- A decent machine with a decent size of ram
(the more the better but more than 6 GB, I recommend 16 GB)
- A decent connection for video streaming (down)

- VMWare installed with a OS, I recommend a lot of clones.
(Walk-through for this below)

- They Pay in, PayPal, BTC, Amazon Gift Cards and Wal-Mart Gift Cards

So Here how to make it work FOR YOU. THEY ALLOW STREAMING ON MULTIPLE DEVICE PER HOUSE HOLD.

(3 for engage one's so that gonna eat 6gb of ram form the VM, and the other 3 are going to eat another 6gb so a total of 12)

I don't recommend trying to stream more then allowed as they may ban your account. And your \$ would be gone...

OF course I'm pretty sure the VM is not allowed either but would be harder to detect as your browser focus is always gonna be on the ADs/ Shows.

Personally I have them on MINI TV's with the volume turned down to about 1% as they allow streaming on TV's too.

Anyways. Setting up your Virtual Machine.

Get VMware.

Get an OS, Ubuntu will use WAY LESS RESOURCES, Space & memory. And Ubuntu is kind of... IFY on VMWare as is... so just go with windows...

So first we need to configure the window clone perfectly
Download and install Firefox, it doesn't hog ram like IE or chrome.
Next link your Gmail to you Firefox. (IE SIGN IN, this helps in avoid recaptcha issue should they arise.)

Then Sign into GB, Set it as your home page.
Double check all install and updates are done.

Then shut down the VM.

Now watch this [video](#).

It will show how to clone the VM's once you have done that you're ready to go.

IF you don't have a SSD HD be careful running multiple VM as they will eat the HD READ/WRITE to death. If you have a SSD you can most likely get away with 4+ depending on ram usage.

DO NOT LEAVE THEM IDLE check on the stream every few hour's some have a pop up are you there type thing's.

If for some reason they are not appearing close the video tab reopen GB, log in and choose a stream again then you'll be ok.

With this method you will be making about **15-20** points a hour. Which translated to about **1000** points a day. (10\$)

You can up that buy adding more streams to it or just doing the crappy installs on a IOS android device in your spare time...

OR IF YOU ALREADY HAVE \$ proceed to step 2 and 4 then 3 😊

METHOD 2

2% a day return

COMPOUNDING INTEREST! OR 21% WEEKLY!

Now you think it Bitconnect right? NO its not. It does require 0.005 BTC though. (About 50\$ or a week of Method 1) ([Calculator](#))

But after two month with just 1 investment you have tripled you money!

[Here is the link.](#)

If you are investing a lot I recommend SCALPING with 75% reinvestment that will quadruple you money. AND return the original 50\$ to your wallet.

They do have a withdrawal fee of 0.0001 BTC.
They take Dodge LTC and BTC

Calculate Your Daily Interest for a Fixed Amount of Days	
Initial Purchase Amount \$	50
Daily Interest Rate	2 %
Length of Term (in days)	95
Daily Reinvest Rate	75 %
Include Weekends	YES
Reset Values Calculate NOW!	

Summary:

- You started with an investment of: **\$50.00** on **Thu, Nov 9, 2017**
- Your principal amount grew to: **\$205.64** by **Mon, Feb 12, 2018**
- Your total cash withdrawals were: **\$51.91** over the course of **95** days
- Your total NET profit for the 95-day period was **\$207.55** (415.10%)

Ok so read this if nothing else guys

When you are done you will see this message. ENJOY FREE RETURNS!
(Keep adding the faucet)

✓ Well done! Swing bot will make your life easier!

So Now some Disclaimers on HYIP

The next thing you need to know is that Hexabot is NOT officially affiliated with me in any way outside of a USER referral link i add tot he program. Also, on a side note, Hexabot IS NOT a Multilevel Marketing (MLM) opportunity.

Here are Some Facts About Hexabot.top

Hexabot is a professional automatic system (sophisticated algorithms of artificial intelligence) designed to help the manager or private trader work at the exchange as efficiently as possible.

The system went public early **October 2017**.

Developed by Peter Shepard of Hexabot Crypto Trading LTD, a London, UK based registered company.

Detailed background about the developer is unknown but private chats with him seem to show he has extensive knowledge in programming and extreme passion for his product.

At the moment there are 3 working bots that trade automatically that pays up to **2.5% a day** or **24.5% per week**.

Joining Hexabot.top is 100% free and comes with a free **0.0001 BTC** welcome bonus.

Hexabot pays hourly compounded interest.

Deposits may be released for withdrawal at any time for a 7% fee. Ad-free bitcoin faucet to allow all members to earn free bitcoin every hour.

Affiliate program allows one to instantly receive 5% for referral deposits.

If you are looking for more information on Hexabot, everything related to their company, investment platform, and account creation can be found at www.hexabot.top.

Read on and I will walk you through my thoughts about the industry and risks, company, investment platform, compensation plan, and whether it pays out or not so you can make the right decision.

According to Hexabot's [website](#)

Hexabot.top is an automatic trading bot system managed by officially registered in the United Kingdom company "HEXABOT CRYPTO TRADING LTD" with a registration number of #10991182 managed by Peter Shepherd. Our company develops automatic trading systems on the stock exchange crypto-currency.

I came away feeling surprised that the company is actually legitimate and provided a link to it's official government business registration details (<https://beta.companieshouse.gov.uk/company/10991182>), it's business license, and the actual individual behind the company , Peter Shepard

(https://beta.companieshouse.gov.uk/officers/lZz_mEnjVNfMlrZYq1OV-7OhDnY/appointments). This domain name was registered quite recently on September 8, 2017 and its WHOIS has Privacy Protection provided by WhoisGuard Inc. (which is based in Panama) so we do not know who is really behind the domain name. That's a red flag, with a caveat, that its registered for ten years (not something seen in other mlm sites).

In summary, Hexabot consists of three simple products and services:

Automatic Trading: 1, 3, 7-days automatic trading bot

Compounding Interest: You are paid interest for your deposits daily.

Hourly Ad-Free Faucet: Earn small amounts of Bitcoin hourly for free.

Hexabot charges a 7.00% fee for deposit releases. This is very good and makes Hexabot a lot more legitimate as without this fee, multiple accounts coordinating together can game the system and cause instability for the entire investment community. Again if it was a scam why take 7% of the profit just operate a MLM and let them keep 100%?

Once deposits are released, they may be reinvested or withdrawn at any time which makes your investment much lower risk and highly flexible.

The crypto markets can be volatile and good or bad news can significantly swing the markets. As a result, it's important to be able to move your money in and out of investments whenever you want to lower the risks.

Unlike many other "investments" or "loan programs," Hexabot won't lock your money away for many months or trade it for valueless funny money invented by the company.

Hexabot charges a 0.0001 BTC or 0.001 LTC fee for withdrawals of all amounts.

Also, Hexbot implemented a strict rule to ban users that register multiple accounts: "Note: Creating multiple accounts is strictly forbidden on Hexabot! Members creating multiple accounts which are referred to each other will be permanently removed from the system."

Having rules to punish those that create multiple accounts and try to game the system is a good sign. This shows that Hexabot wants to create a healthy, legitimate investment program fair for everyone.

Upcoming Feature: A better fund balance logging system for all users to view and track all deposits, earnings, withdrawals, and reinvestment. caveat here, this actual speaks volume to me because if he was "trust oriented" this would have been a first thing to add, the fact he is developing standalone software for us to use our self's and not focus on MLM and has told people take your profits and leave my site, speaks volume of a legitimate programmer/trader looking to make a decent product and market it later.

However, there are some things you need to watch out for.

Hexabot is one of the latest High Yield Investment Program (HYIP) opportunities backed by their supposedly proprietary automatic trading bot system that claims to have "zero losses last year".

HYIP's are part of the Wild, Wild West in the world of cryptocurrency and are full of scams, Ponzi Schemes, and faceless companies. Therefore, investing in any HYIP is high risk (and high return). What you are essentially gambling on is how long the train will last until the opportunity turns out to be a scam or Ponzi and it implodes.

HYIP's often incorporate in countries with lax fraud laws to secure immunity from investor laws in other countries and host their website with "privacy protection" so they remain anonymous and not liable for damages.

I am not saying Hexabot is a Ponzi or scam – at least it's too early to tell right now.

But a wise investor would take precautions assuming the worse case scenario.

In addition this statement from Peter explaining why he wont SHOW the bot trading, andtelling people to take thier profits and leave his site. (Nov 3, 2017 16:00 - Peter Shepherd)

“ Dear Hexabot members. In our project we will have some changes made. From today there is a new support member that will answer your questions “Jerry”.

The Support member is introduced to help me spend more time on the software development. This means I will not spend time answering questions that are available in FAQ.

Some users are not happy with our service and not happy with me allowing everyone to earn from my trading bot together with me.

Often users are not happy with the service they receive, you earn cryptocurrency from the service provided to you.

At the same time you are saying this is fake and not real. Nobody is forced to stay in the project.

For those who believe in us and want to earn cryptocurrency you are more than welcome to stay and make more andmore profit.

It's sad to hear that you are making profit without doing anything and at the same time you are asking me questions such as: “where I live ?”, “show evidence of statements”, “**proof of bots**” etc...

I am unable to provide all the information, due to the reason behind this is that I do not want people to analyse my trading bots and attempt to develop something similar, I try to be successful like any other project, and therefore some information cannot be shared. Sorry.

I have spent lots of time answering questions that are simply slowing me down from the development of the software and updates for our system. Users please use the chat for help as other members will answer your question. We have many experienced users in our project that will help for any questions you have got. If so please check out FAQ section on our website.

If your question is still not answered then contact our support and I will help you as much as I can.

We are trying to be open as possible to you. We listen to your opinions and thoughts.

I am making this system as comfortable as possible for current and new users. As you are aware we are not freezing your deposits and you can withdraw them anytime. Often we have users that argue with us and attempt to scare off other users from using our service. These are more likely to be competitors or users willing to harm this project. The project is going strong and is expanding, this is my motivation to make new updates and work on the current software system.

I would like to let my users know that we have been receiving lots of requests from investors in regarding this project. They want to to co-operate with us. Our trading bots are working and will be working for users 24/7. We will NOT stop because we are getting bigger. I have said it multiple times now that we are developing a software. This software will be available for download when it's released. The software is difficult to set up for unexperienced users in trading market.

Everything will come in its time. Nothing can be done at once. We have more ideas that could be developed to ensure our system is going to get better and better each time. Each of you have opportunity to stay with us and earn cryptocurrency, **otherwise you should leave the project.**

Note: the chat from today will be monitored and checked for users who are confusing other user members in regarding this project. Certain action will be taken against these users. This is because the project is growing each day and allowing loyal users to earn cryptocurrency.

Now you have a few options to choose from. If you have a decent investment of say .1 BTC or more I would recommend SWING trade with 100% reinvest for about 6 months (you return 14 BTC).
 The BEST part about this is it RETURN INVESTMENT, you invest BTC you GET BTC not USD!

At that point I would move to daily return and you make about 2 BTC a week. Or .28 BTC a day.

You can WITHDRAWAL principal ANYTIME.

But you will take a 7% hit.

<p>Scalping +2.08% in last 24 hours ? Next calculation: 55 minutes</p> 	<p>Technical +53.64% in last 21 days ? Next calculation: 2 days 10 hours 29 minutes</p> 	<p>Swing +161.55% in last 7 weeks ? Next calculation: 3 days 11 hours 41 minutes</p> 
<p>Scalping Trading</p> <p>2.0% – 2.3% daily</p> <ul style="list-style-type: none"> ✓ 100% uptime ☁ fully automated cloud trading 🕒 hourly profit calculation <p>Activated</p>	<p>Technical Trading</p> <p>7.1% - 8.2% per 3 days</p> <ul style="list-style-type: none"> ✓ 100% uptime ☁ fully automated cloud trading 🕒 profit calculation every 3 days <p>Activate FREE</p>	<p>Swing Trading</p> <p>22.1% - 24.1% weekly</p> <ul style="list-style-type: none"> ✓ 100% uptime ☁ fully automated cloud trading 🕒 profit calculation every 7 days <p>Activate FREE</p>

METHOD 3

Between 1 and 4 % daily, NONCOMPOUNDING

Now I know I just said non-compounding, that's true and NOT. The ones I have used do not offer compounding but there are ones there that DO OFFER compounding their returns are less. Average is about 1.4% daily.

THE BEST part is they allow SMALL investments. I have already received my investment back so that's why I recommend them. Check the group's out, or invest a small amount in each.

Each different platform has rules, like lock up period. Or early withdrawal fee. Or reinvestment.

The three I recommend are T.G. Thomas, X bots, Dragon Foundation. In that order.

Link is [HERE](#)

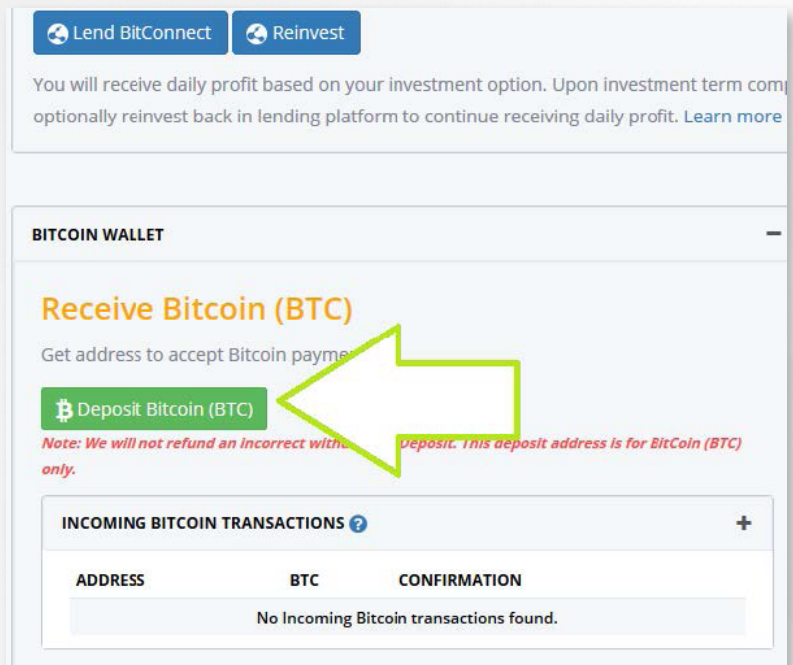

METHOD 4

CLASSIC BITCONNECT
[LINK HERE](#)

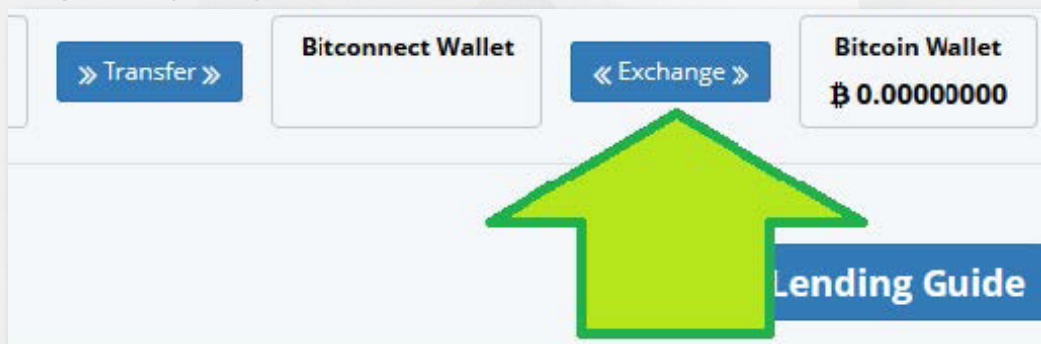

My recommendation is 100% reinvest, until you reach a 10k investment. Then switch to 50% reinvest, 25% BCC, 25% BTC (hard wallet) more on this below.

It's fairly simple you Put in about 100\$ of BTC to your deposit address which is HERE:

The pop up window is you wallet to send bit coin TO. After your bitcoin deposit confirms you'll need to exchange it to BCC to lend, start by first going to the EXCHANGE BUTTON here:

Once there. To make a quick change over you can just pay what some one is selling for or put in a bid for a lower amount, I recommend just putting this tab to ask

BUY/SELL BCC

BUY BCC			
Available balance: 0.00000000 BTC			
Units	<input type="text" value="0.00000000"/>	<input type="button" value="BCC"/>	Units
Bid	<input type="text" value="0.03841211"/>	<input type="button" value="Last ▾"/>	Ask
Total	<input type="text" value="0.00000000"/>	<input type="button" value="Last"/> <input type="button" value="Bid"/> <input type="button" value="Ask"/>	Total

Then press ALL then Buy BITCONNECT

BUY/SELL BCC

BUY BCC			
Available balance: 0.00000000 BTC			
Units	<input type="text" value="0.00000000"/>	<input type="button" value="BCC"/>	Units
Bid	<input type="text" value="0.03841211"/>	<input type="button" value="Last ▾"/>	Ask
Total	<input type="text" value="0.00000000"/>	<input type="button" value="Last"/> <input type="button" value="Bid"/> <input type="button" value="Ask"/>	Total

Now you have bitconnect to lend to their trading software to make you money DAILY, to do that you go back to the dashboard. Then Lend BitConnect

Enter any amount over 100\$ (try to get all the BCC you have in the dolar amount in \$10 increments)

My recommendation is Reinvest as often as you can to compound that interest! Or if you have enough in there to live on the interest daily, you can convert it backwards to BTC and withdrawal it.

If you invested

CONTACT ME I WILL GIVE YOU 5% OF THE INVESTMENT BACK!

Also give your friends and family your REFERRAL code. Help them get on the path to financial freedom, help them earn some extra pocket money like you now are. You'll receive 5% of their investment, you can choose to give it back or invest it yourself.

If you have any question you can reach me on discord or the forums.

After reviewing other reviews and talking with community inside the site. I have made my first investment, it is ongoing and I'm compounding 100%. I plan to continue to add investments too. (It's actually funny he has told people who complain to take their money and LEAVE his site when they complain about 2% daily returns..... REALLY)

METHOD 3

This company is over a year old and has their domain registered for the next 10 years. After you make an account you can research on who is like I did before investing. While it does have privacy protections the people listed on board of directors are real people and reachable. Which is why I invested there.

Updated Date: 2017-10-10T11:02:35Z

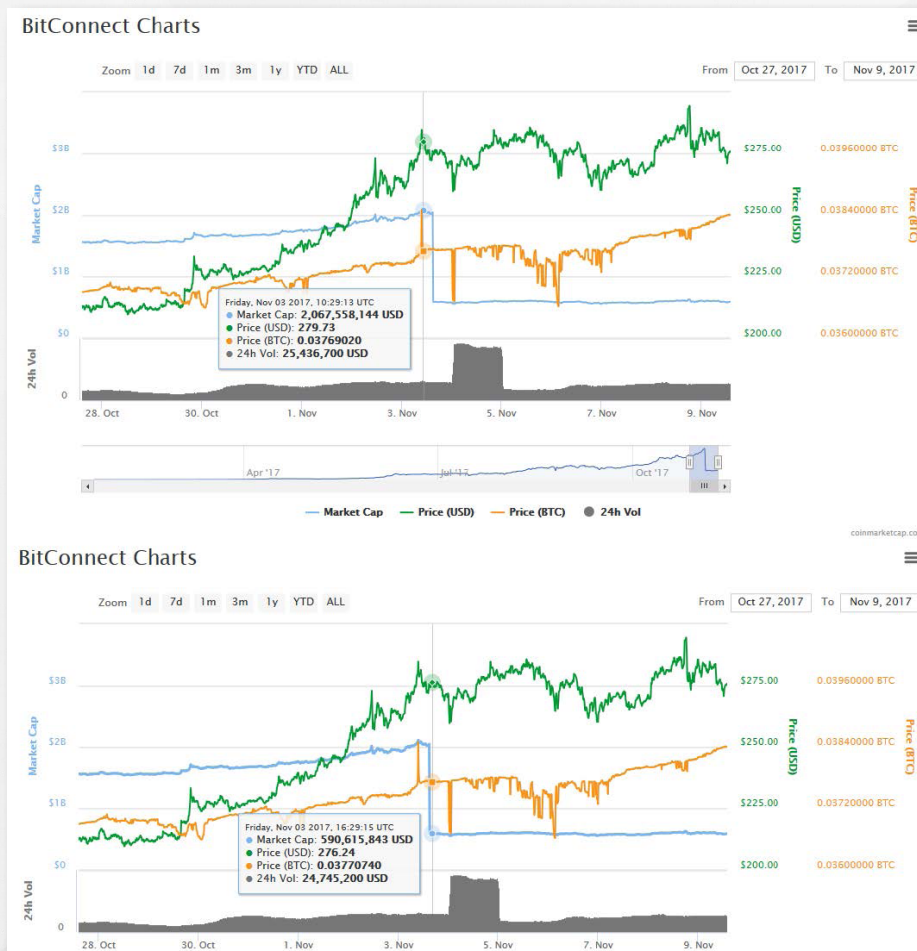

Creation Date: 2016-11-21T23:16:48Z

Registry Expiry Date: 2026-11-21T23:16:48Z

METHOD 4

I am still dubious on BitConnect BUT people have been with them almost a year and have good returns. The economic principal IS feasible because they control the circulation of their coins and are there for able to CONTROL the levels of profit of said coin and manipulate the market based on people staking their coins (long/short position based on data they have on markets where btc/bcc exist.)

Because of those factors I have to agree is a sustainable model. Just hate the secrecy of a multi-billion dollar company (market cap was over 2 billion dollars till they bent the rules re-evaluating how staked coins ARE not in fact in circulation so there for wont count as market cap coins...

Plan Going Forward

My 100% ardent SUGGESTION.

WEEK 1 & 2 (200\$)

Method 1, for 2 weeks invest 100% into METHOD 2. 200\$+ investment with 100% reinvest.

Method 4 You should sign up, and promote referrals as you get 5%, this will help YOU invest FASTER and more often.

Put it on your Facebook. Offer to help friend's invest.

Week 3 (330) (\$100 from Method 1, \$230 from method 2)

Take profit of Method 1 (100\$) to Method 3. Use T.D. first for reinvestment. Then spread 40\$ to the others in 10\$ lump's

Week 4 (496) (\$100 from Method 1, \$263 from method 2, \$123 Method 3)

Take Profit from Method 1 to Method 4. INVEST 110\$

Week 5 (661) (\$100 from Method 1, \$301 from method 2, \$151 Method 3, 110 Method 4)

Put method 2 to 75% reinvest your money should have doubled now (or very close to it). Use the daily profit to put into METHOD 3.

Use Method 1 profit for Method 4 again.

Then I would keep adding profits from method 1 to a cycle of method 2 then 3 then 4 OVER AND OVER till method 2 has 5k you are then making 100\$ a day, TURN OFF reinvest and start putting that \$ into METHOD 3 and 4 till they all reach 5k. This should take you about 3 months.

AFTER that Turn reinvest BACK ON 75%, Reinvest On BitConnect in this fashion REINVEST 50% of profits daily turn the OTHER INTO BTC AND BCC evenly hold them 1 to two week's THEN REINVEST till your happy with the daily profits of 50% to live on and 50% to reinvest... continue to reinvest as that will allow you to build a wallet of coins up faster :P

THEN DONATE TO ME XD

Bitcoin address:

17c7UZe1Z1YgniYX5m2Dkpbgi3iZqkchA1
