About Treatment of ED

- Unrelatedly of the cause, one must remember that ED is a fully curable condition.
- Going to a doctor is vital as your doctor can identify the precise fundamental cause of your ED
- Treating the underlying cause can treat erectile dysfunction.
- Goals of treatment is to enable patients sustain erections for a long time

About Vilitra 20mg

- Vilitra contains Vardenafil, famous by its brand name Levitra, is the 2nd member of the pharmacological class PDE-5 inhibitors.
- This medication is more potent than Viagra and works to some extent in the treatment of premature ejaculation or PE also.
- Hence, while taking this medication, there is no need of taking extra medication for PE.
- Vardenafil is the active ingredient of the brands of the product Levitra as well as [Vilitra 20mg](#).

A point to remember

One must remember that Vardenafil does not create an erection on its own, a thorough sexual stimulation is required to get the best effects.

Side effects

Mild side-effects include-

- Warmth or redness in the face, neck, or chest
- Stuffy nose
- Headaches
- Stomach pain, upset stomach, nausea, diarrhea
- Memory problems
- Back pain
- An inability to see properly
- Loss of hearing, ringing in the ears
- Dizziness.
