I am on trt and run very low dose tren (50-75mg/wk) cycles and always love the results. No sides. Testosterone is the aas standard. Tren is five time as anabolic and five times as androgenic as test. 400mg/wk of tren is the equivalent of TWO GRAMS of test. Tren's reputation for bad sides comes because so many grossly overdose. What is Trenbolone Acetate - 100 mg/ml? With its eminence, Tren A

helps us achieve goals like strength training, bulking up, a gain of lean mass, and breaking down excess fat. It made its way into the market with the brand name, Parabolan (in France). Tren belongs to the same class of steroids as Nandrolone, 19-nor, which refers to the testosterone hormone lacking the carbon atom at the 19 th position.
