Restandol Testocaps are soft oval glossy capsules which contain 40 mg of testosterone undecanoate. The active substance, testosterone undecanoate is turned into testosterone by your body. Testosterone is a natural male hormone known as an androgen. It is produced in the body by both men and women.

BANDED SQUATS: idk what it is about the band but it breaks my squat form. Which I oddly love because it helps me focus on making that mind muscle connection which I have never truly been able too on traditional squats!

Andriol is a unique oral testosterone product, developed by the international drug firm Organon. One of the more recently developed anabolic steroids, Andriol first became available in the early 1980's. This compound contains 40 mg of testosterone undecanoate, based in oil (oleic acid) and sealed inside a capsule. Lo que va a definir que ganes o no ganes peso es el balance calórico neto. Es decir, si comes más calorías de las que gastas, tu cuerpo va a almacenar grasa, si comes las mismas calorías que quemas, te vas a mantener, y si comes menos vas a perder peso. NO importa la hora de las comidas. De hecho un estudio hecho en el 2011 que comparaba dos grupos sometidos a un déficit calórico, donde el primero comía sus carbohidratos a través del día y el segundo comía el 80% de ellos en la noche, demostró que no solamente no había diferencia sino que además el segundo grupo perdió más peso.

A close-up photograph of a brown and white dog, possibly a Border Collie, being watered by a person. The person's hands are visible, one holding a clear plastic water bottle and the other supporting the dog's head. Water is dripping from the dog's mouth. The background is blurred, showing green foliage and a light-colored surface. The text is overlaid in white, serif font.
