

# Minecraft And Screencastify Install

Students will be able to login to Minecraft: Education Edition using their AISD email address. This information is located in the User Profile menu on the AISD Portal. After logging in to an AISD email account students will be asked their student ID number and password in an AISD Portal popup window. This will happen no matter which device the student is using.

Below are links to help you install Minecraft: Education Edition on your student device. Scroll down to the device you are using for specific directions. Students should always discuss the process of installing with a parent prior to trying to install the software on the personal computer at home.

After Minecraft: Education Edition is installed, you must login every time using your Austin ISD account: YouTube video

## Directions For Installing On Austin ISD Student Chromebooks

Austin ISD Chromebooks capable of running the Android version Minecraft: Education Edition will need to first access the Minecraft installation page in the Google Play Store. Chromebooks for students should be able to find the Google Play icon in the Chromebook Shelf at the lower right of the screen.

Only apps approved by the district can be downloaded from the Google Play store app. Click on the Minecraft Install button on Google Play.

This video will show the steps required to install and use Minecraft Education Edition on the AISD Chromebook.

## Instructions for Installing On Non-Austin ISD Windows Computers

Click the purple Windows button to download Minecraft Education Edition Windows Desktop Edition. You'll need to locate the downloaded file and then open it. It should be found in either an entirely new tab at the bottom of your browser, or in the Windows Downloads directory.

The Windows operating system will guide you through the installation process. Select your language and accept the End-User License Agreement. Continue clicking Next until asked to click the "Install" button. It is possible that the installation will take a while before you see the Finish button. This will end the installation.

## Instructions for Installing Macintosh Computers

Click the purple MAC button to download Minecraft Education Edition for Macintosh. The downloaded file must be opened and located. (It is likely to be in a new tab at the bottom of the browser or within the Downloads folder.)

The Macintosh operating systems will guide you through the installation process. Choose your language and agree to the End-User License Agreement. Continue clicking Next until you are required to click the Install button. The installation could take several minutes before seeing a Finish button which will close the installation.

## Instructions for Installing on iPads

Once the teacher has installed Minecraft Education Edition on an Austin ISD student iPad, students are able to access Minecraft. Locate the app in the Creator Apps group on the iPad during the school day.

Download Minecraft onto your iPad from the iTunes Store. The app is available as a free download. The button below will show you the app on the iTunes store.

## Installing the Screencastify Screencastify Capture Extension

A live demonstration of the learning is a great way to demonstrate it. Screen capture using video is a fantastic way for teachers to provide a demonstration of an online activity or for students to capture the digital product with their recorded voice that describes the product.

Screencastify is a Chrome extension that was approved by Austin ISD. Students and staff can add the extension to their Chrome Web Store.

## Screencastify for students: Student Instructions For Installing Screencastify

Austin ISD students have access to the Austin Independent School District Chrome Web Store from which any of the approved applications can be installed. This is the only way to install a Chrome app or Chrome extension on an Austin ISD Chromebook. Open the Chrome launcher on the Chromebook. Locate and open the Chrome Web Store App. Click the Austin Independent School District link to browse the app library that is approved. Locate and install Screencastify from this page.

The video below demonstrates how to connect to the Chrome Web Store and install Screencastify.

### Capture Your Video

Students can make videos of up to 5 minutes long once the Screencastify extension has been installed. Before recording, practice your group presentation. The presentation video should not exceed 2 minutes in length. <https://djw360.com/> This video shows you what it looks like when you capture the video of your world.

### Optional: Edit Your Video

Be as creative as you like when you create your world or making your video. Screencastify lets students edit their videos. Your free AISD account comes with a simple video editing tool. Learn more about editing video from Screencastify's help page.
