## Locating .minecraft[]

Below is a table exhibiting the default directory for .minecraft.

Locating the .minecraft folder can be vital for putting in a useful resource pack or to locate any made screenshots.

The Windows location within the desk above is just the default case. Launchers can set the .minecraft at any path.

If you are a Home windows person and are unfamiliar with how to find your appdata folder, observe these steps:

1. Click on Start Run. If you do not see "Run", press Windows + R.
2. Kind %APPDATA%\minecraft and click "Okay".

If you're a Mac user, you can open the folder through Spotlight:

1. Open Finder and press Shift + Command + G or open the Highlight popup by way of the magnifying glass icon on the correct of the Menu Bar.
2. Sort ~/Library/Application Assist/minecraft and hit Enter.

On Linux or macOS, the ~ in the path refers to the home listing. Folders starting with a . are hidden by default. In most file managers, hitting Ctrl + H toggles their hidden status. In minecraft-survival-servers , since model 10.12 (Sierra), the shortcut Command + Shift + .
