

Can't Download The Minecraft Launcher

Support and Discuss: Can't download minecraft launcher in XBoX games and apps to fix the problem. After migrating my Mojang account over to Microsoft, I was required to start Minecraft Java & Bedrock Edition from the xbox application. I have no luck trying to download the minecraft launcher in XBoX Games and Apps. Discussion in 'XBoX Games and Apps' started by Aaron The Luck, Jul 21, 2022.

1. Aaron The Luck Guest

After migrating my Mojang account to Microsoft I've been required to start Minecraft Java & Bedrock edition from the xbox app. When I attempt to do this I seems to be required to get a game pass and when I go for that I am being directed to the page titled "Why can't I change my privacy settings?". What do I have to do to play again?

:)

Minecraft Windows 10 Edition is not updating to new versions on my PC.

Minecraft Launcher has released but anyway it's downloading 1.17.10 version (even through Minecraft Launcher). Of course i can download the newest version of Minecraft Windows 10 Edition through unofficial launcher but it's a little unpleasant when the newest version isn't downloading from official source

Cant play Minecraft after account migration

When I click buy from the Minecraft launcher it takes me to this website <https://www.minecraft.net/en-us/store/minecraft-java-edition?ref=Launcher> I'm not logged in and it has the option to purchase Minecraft but after logging in to the that website with same Microsoft account that I had logged into the Minecraft launcher with the purchase option is replaced with Already own Minecraft? Download it again. and the launcher download button.

Microsoft Store

im just downloading the launcher not the minecraft

MC Dungeons Unable to Verify Ownership Bug

Have you installed the correct version of it?

There are quite a lot of different versions of it, which could be confusing:

- The Minecraft Dungeons launcher version: You need the minecraft dungeons launcher to play it. You can't use the other versions. - The Windows 10 / Microsoft Store version: You need to open the microsoft store app and download it from there. The other versions can't be used. - The Xbox One Version: Won't show the download button if you're on the computer, which can be confusing.

Problem whit error code 0x800700E9

Hey DusanTutunovic,

The Java copy of Minecraft can only be obtained by downloading the launcher Here.

The MICROSOFT store will only have the 'Windows 10 Edition'

Please uninstall all Minecraft launchers, apps, and files. After you do this, download the launcher I linked above.
