This is not Photoshop.
Not fake from the
Internet. It is the real
work of our students.

- 100% of our students are active masters who work for themselves or in top salons of the city
- Each work will be confirmed by contacts and customer reviews

How does multi-plasma cosmetology work?

The principle of plasma cosmetology is based on the use of the 4th state of the substance – plasma. **This is a contactless way of influencing** when a plasma arc occurs between the tip of the special device and the skin.

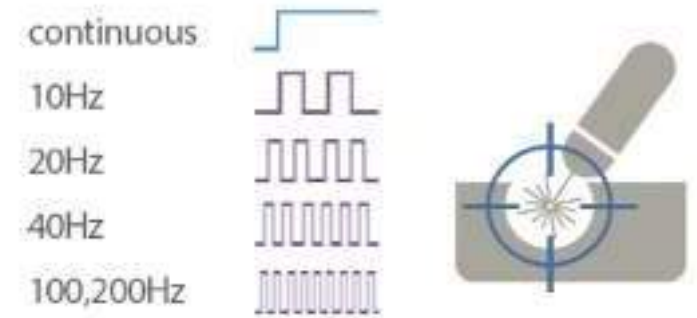

1. Instant effect that lasts more than a year.

There is a difference of potential between the "Beauty Monster" device and the skin. Due to ionization of gases in air (origin of plasma), an electric arc appears.

2. No side effects. Duration of procedure: 10-30 min.

The discharge is fed through the needle to the patient's skin through an air gap of 1-2 mm. During the procedure it is possible to **control the magnitude and depth of plasma exposure**.

3. Full recovery: no more than 7 days.

Under the action of plasma there is an artificial sublimation of tissues without heat transfer to the surrounding and underlying tissues, causing **active production of new collagen and elastin**.

Over 800 top masters from
17 countries of the world
have entrusted their
reputation to the “**Beauty
Monster**”

This is a new generation of multi-
plasma devices and the
undisputed world leader in the
plasma-cosmetology. More than
2 000 procedures have already
been carried out.

BEAUTY_MONSTERS_OFFICIAL

The kit has 3 functional tips that allow you to carry out a variety of procedures.

Plasma tip

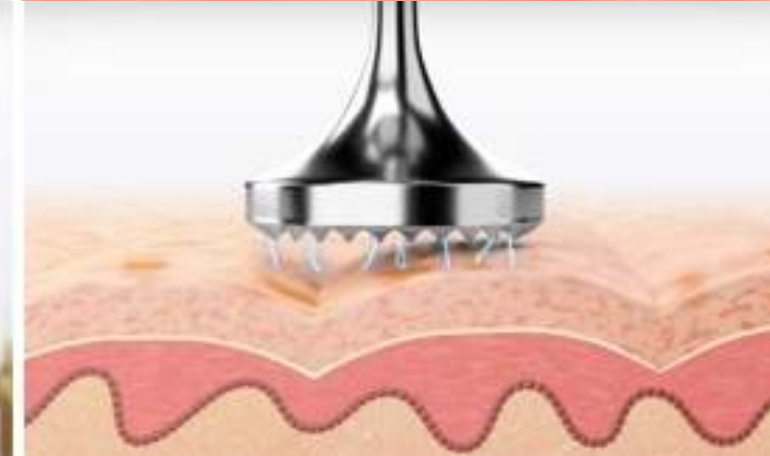

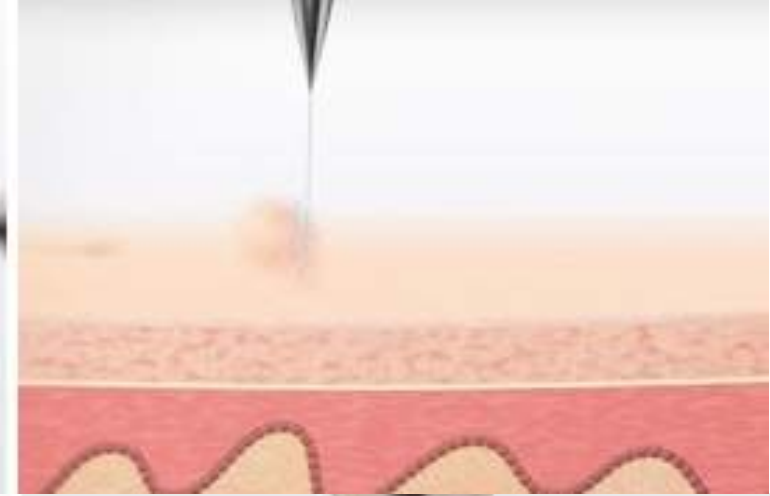

for non-surgical facelift, elimination of skin flabbiness on the neck, abdomen, removal of fibromas, warts, etc.

Fractional tip

for non-injection inserting of hyaluronic acid, removal of pigmentation, rosacea and dry skin.

Thermal tip

for working with large surfaces, aligning the face oval and lifting, peeling, including “Plasma shower”.

Fundamental difference from fakes/cheap copies

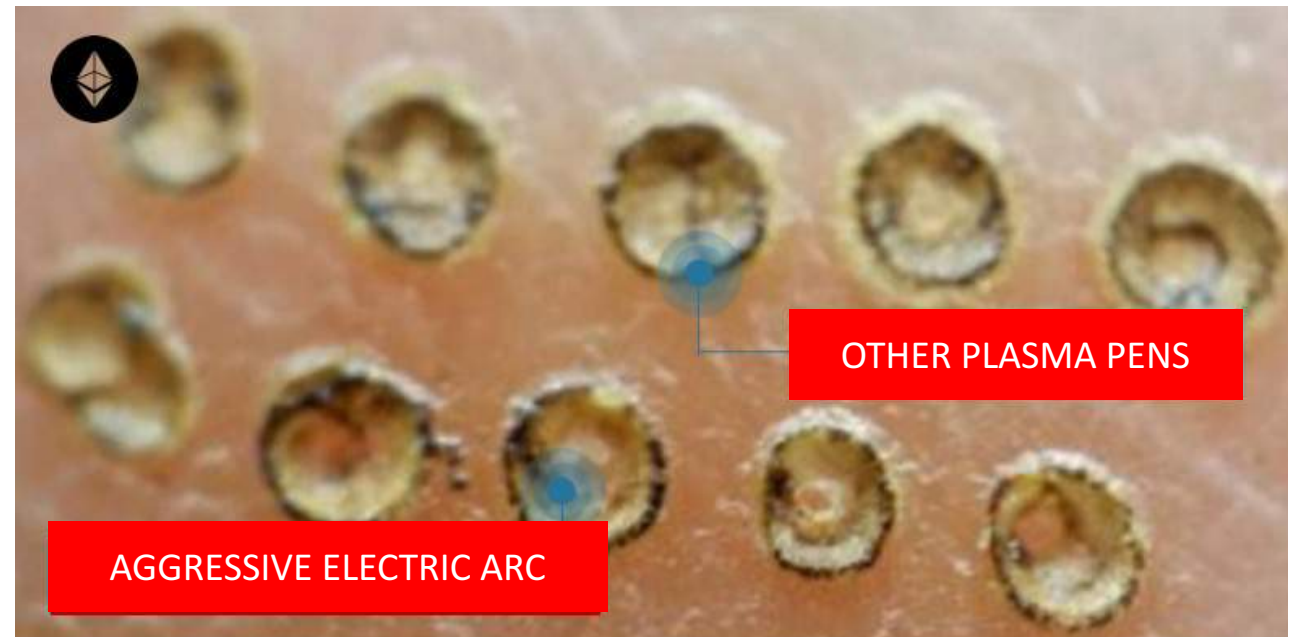

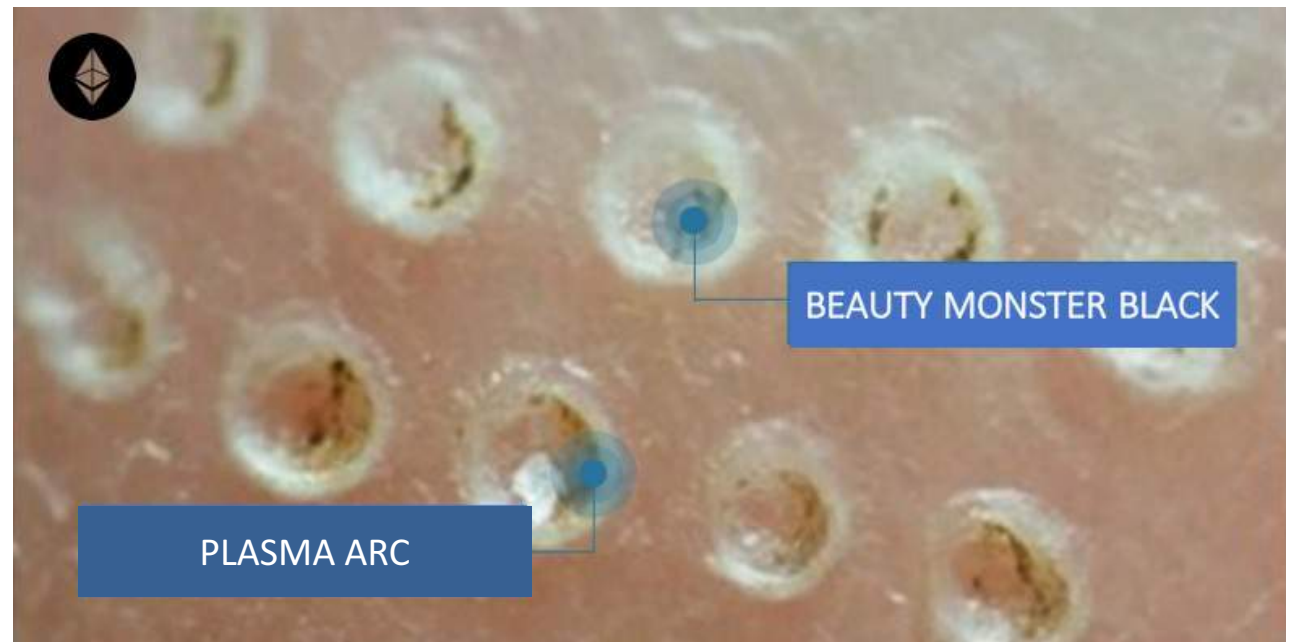

In the other plasma-pens (especially Chinese) the arc is extremely unstable and contains a greater number of electrons, which burn the skin, forming brown edging. Therefore, the work of such devices is likely to get burned tissue, scarring and post-traumatic pigmentation.

The size of the ablation dots of other devices is quite big and deep.

The color of the dots is **bright red**. As a consequence:

- 1) The probability of burn skin and leave perforated dots.
- 2) The process and period of healing from a strong impact up to 35% longer.

In the analogues tips are made of cheap zinc, iron mixed with heavy metals.

«Beauty Monster» is the **safest and effective** plasma pen on the market

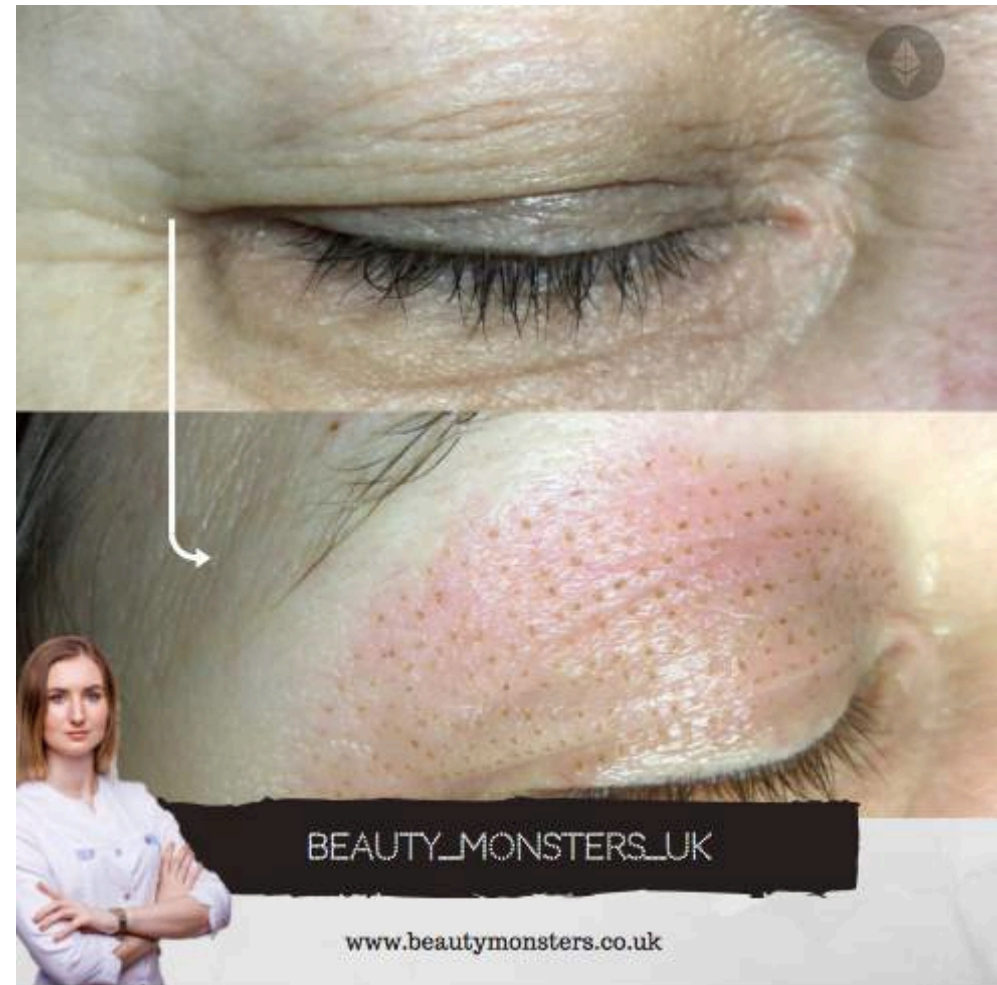

Most of the European plasma pens has only 1 tip and 1 power level without the possibility of selection for the type of skin/procedure. This leads to side effects in forms of tissue perforation and pigmentation.

“Beauty Monster” has 16 plasma exposure options for each type of skin/procedure, 5 tips and 2 safety modes.

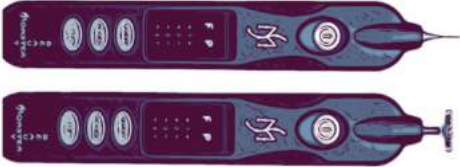

The size of the ablation points of european plasma-pens is quite large and deep. The color of the dots is brown.

The “Beauty Monster’s” points are light-red and very small. Under such influence, there is no possibility to obtain pigmentation or perforation of the tissue.

Plasma Pens	Levels of plasma arc	Types of tips and functionality	Price of trainings
<p>Beauty Monster</p> 	<p>16 levels (multi-plasma)</p> <p>that most suits specifically for the selected zone, skin type and depending on the procedure.</p>	<p>5 different tips</p> <p>1) plasma tip 2) fractional tip 3) thermal tip 4) mini-plasma tip 5) conic tip</p>	<p>~2 300 £</p>
<p>Plasma Pen by Louise Walsh</p> 	<p>1 level</p>	<p>1 plasma tip</p>	<p>~3 500 £</p>
<p>ACCOR</p> 	<p>1 level</p>	<p>1 plasma tip</p>	<p>~5 950 £</p>

Why BB GLOW – is a procedure, the dream of all the customers?

It's simple! What other treatment in a single session:

- will give a radiant, smooth color and the effect of light BB-cream
- lighten pigmentation, freckles, traces of post-acne and rosacea
- moisturize and refresh the skin
- smooth fine wrinkles
- and makes light camouflage of dark circles under the eyes

BB GLOW EUROPEAN SKIN

Beauty_Monsters_Academy

Without pain.
Without anesthesia.
Without rehabilitation
And seasonal
restrictions.

The visible result after the
first treatment.

The average duration of
treatment: **30 minutes**

**Absolutely safest.
Super-resistant
effect up to 1 year.**

Does not clog pores like
BB-creams.

For maximum and stable effect
– recommended course of 3 to
5 treatments with intervals of
20–25 days.

BB GLOW EUROPEAN SKIN

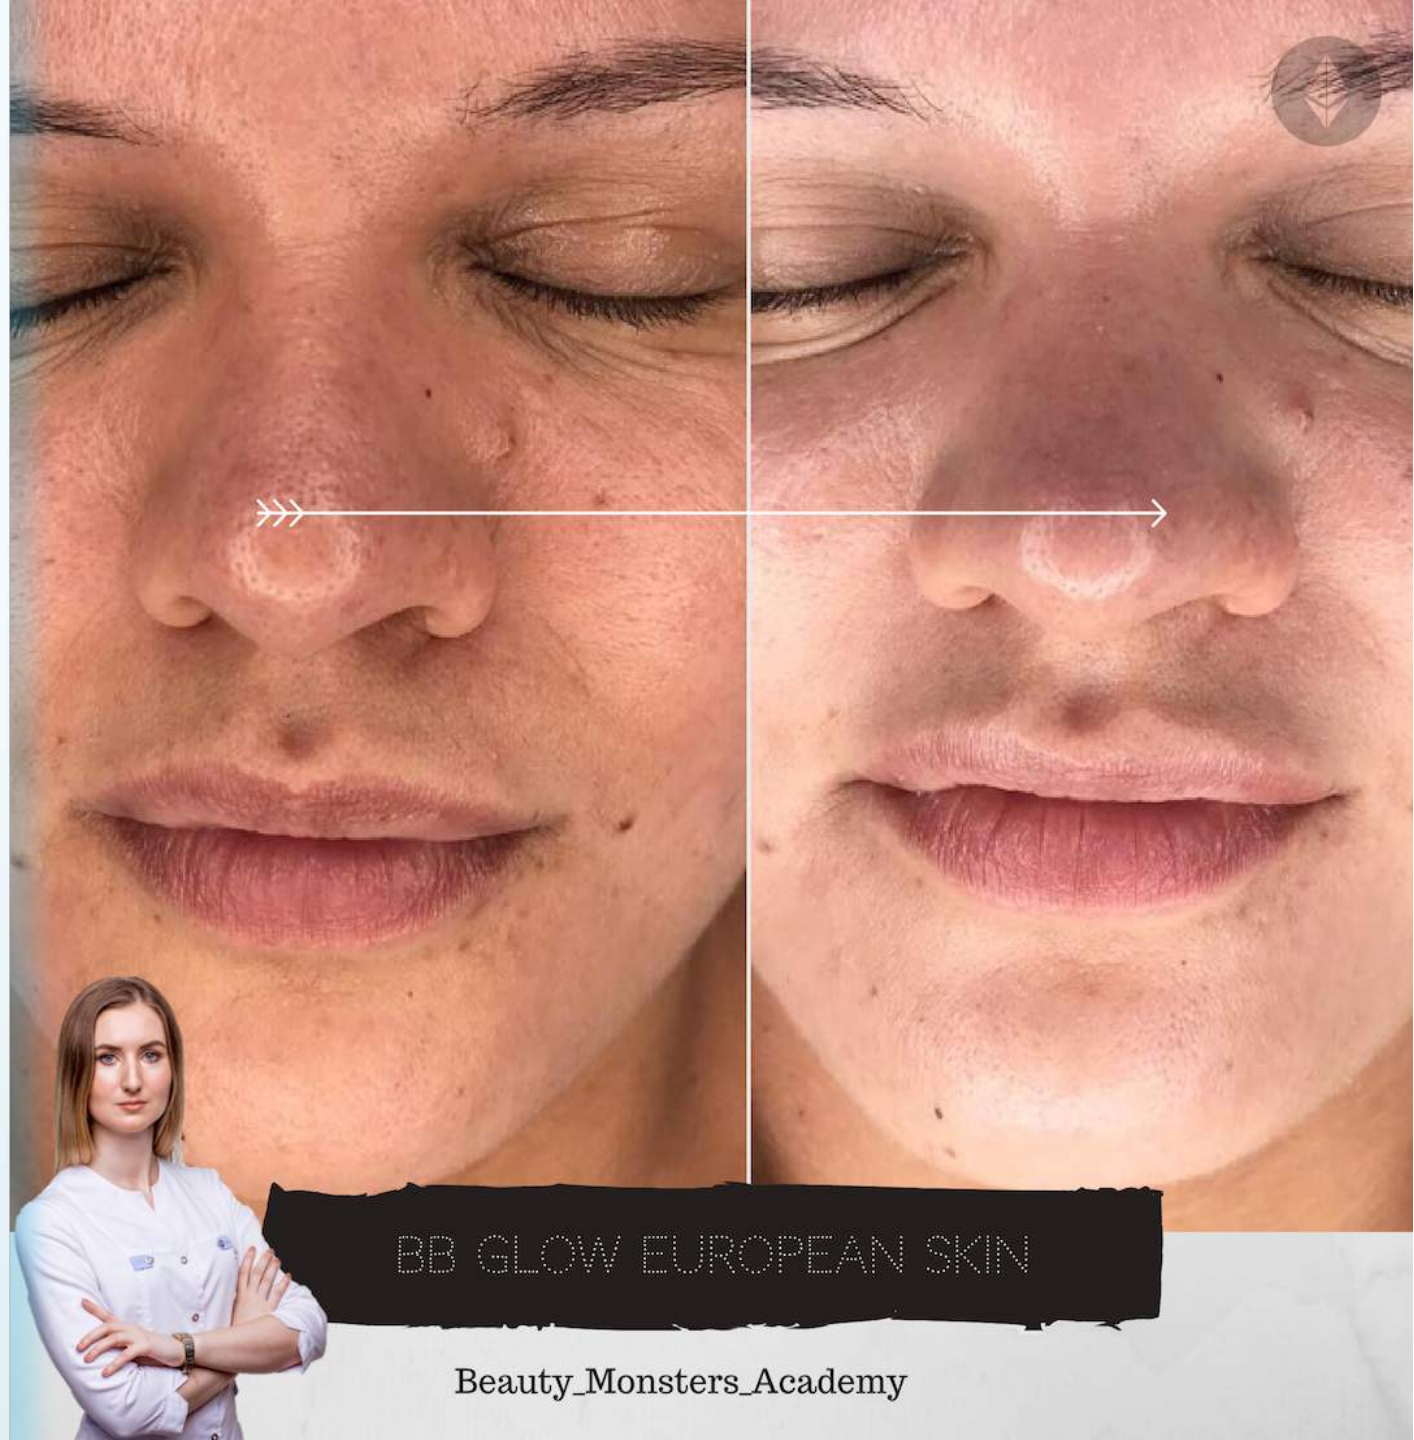

Beauty_Monsters_Academy

What is BB GLOW EUROPEAN SKIN?

Motherland of «BB GLOW treatment» is South Korea, originally created for the Asian skin type.

Their skin is thick, fibroblasts are larger, collagen in the dermis more and they age on muscle type.

Therefore, the existing Korean protocols of procedures and a number of serums are not suitable or completely contraindicated for European skin.

BB GLOW EUROPEAN SKIN

Beauty_Monsters_Academy

We do not teach "peg"

We tried dozens of serums and meso-cocktails, and we know what really works.

BB GLOW EUROPEAN SKIN TRAINING

THE MOST COMPLETE START KIT
FOR 20 PROCEDURES

The most effective and reliable derma-pen included

We worked on a variety of derma-pens. Someone has small number of turns, someone uncomfortable shift lever, someone slippery holder, which quickly tired hand, someone a needle radius of 2 mm.

As a result, we chose the most reliable and functional derma foam with the maximum needle reach on the market (up to 3 mm) and a speed of up to 7,200 revolutions /min.

Warranty service: 1 year

The starter kit includes everything you will need:

Serums for BB GLOW Treatment:

- 1) MESO BB (Matrigen) – 3 pcs.
- 2) DM Cell – 2 pcs.
- 3) Dermamax (MPS) – 1 pcs.

Serums for face and body:

- 4) Biphase Control Anti Aging – 2 pcs.
- 5) SRS Anti-Aging – 1 pcs.
- 6) PPC Matrigen – 1 pcs.
- 7) Post-care masks – 2 pcs.

Certified Derma-pen Dr.Pen Ultima A1 Cartridges – 20 pcs.

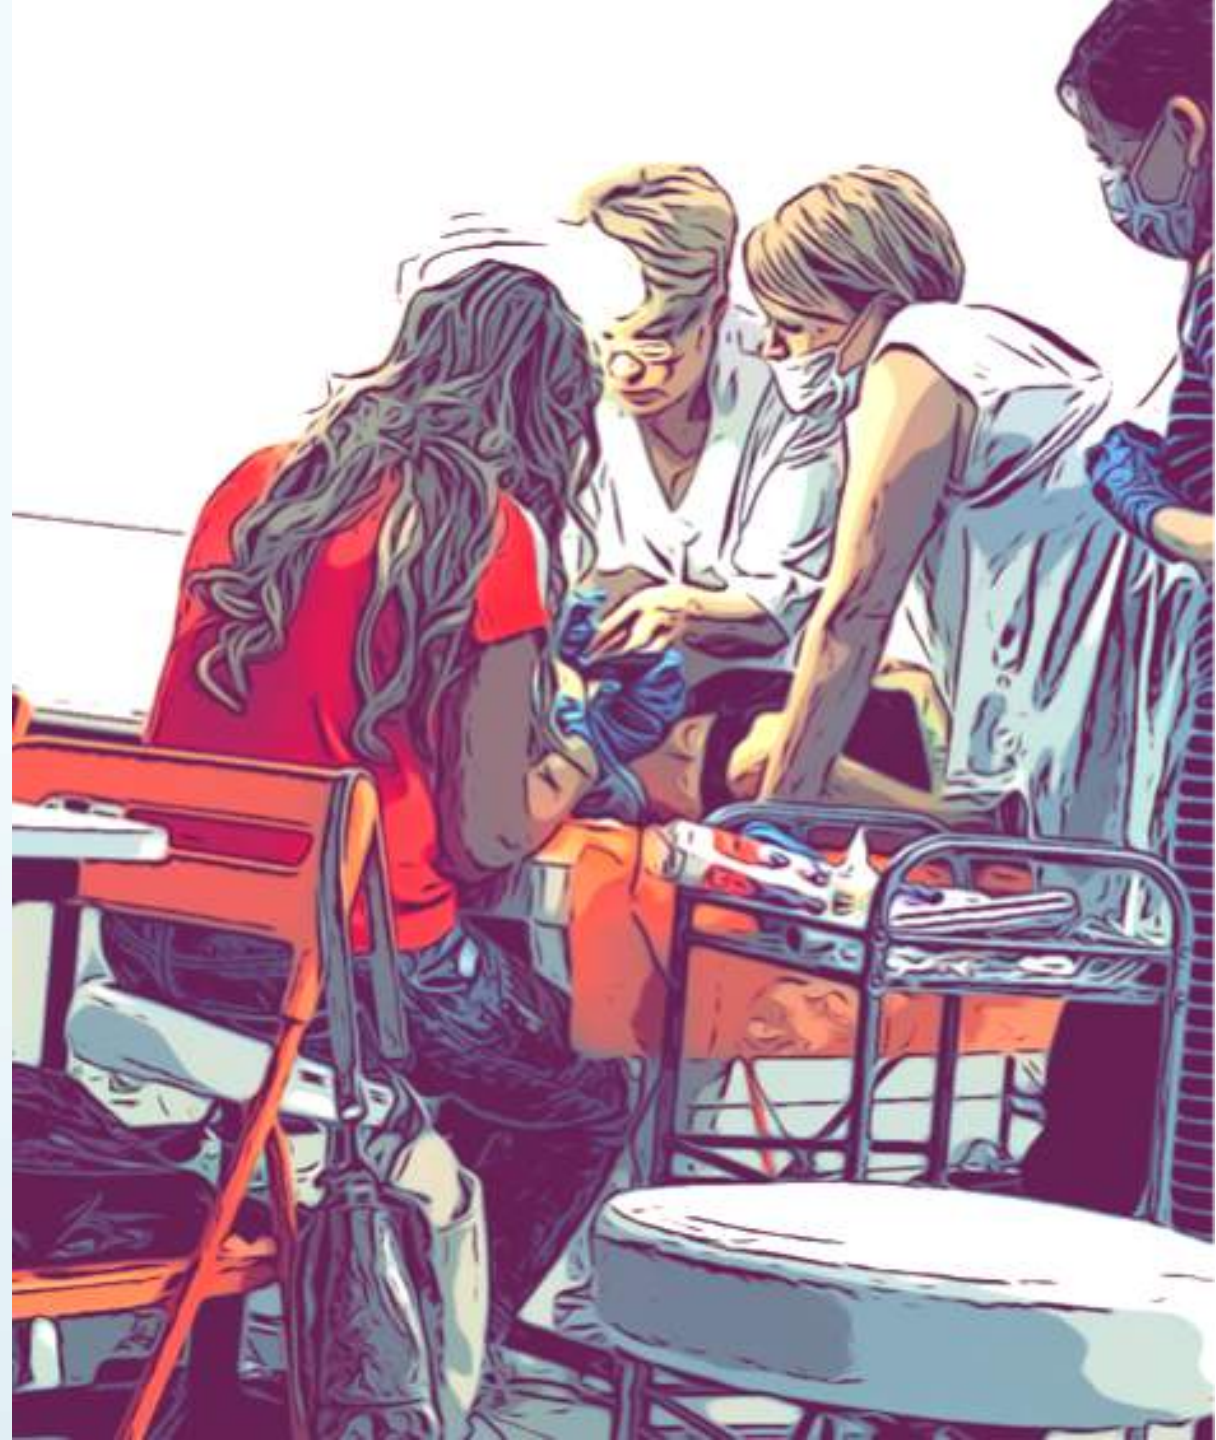

One ampule of serum lasts of 3-4 procedures

What is included in the trainings?

We took care about everything:

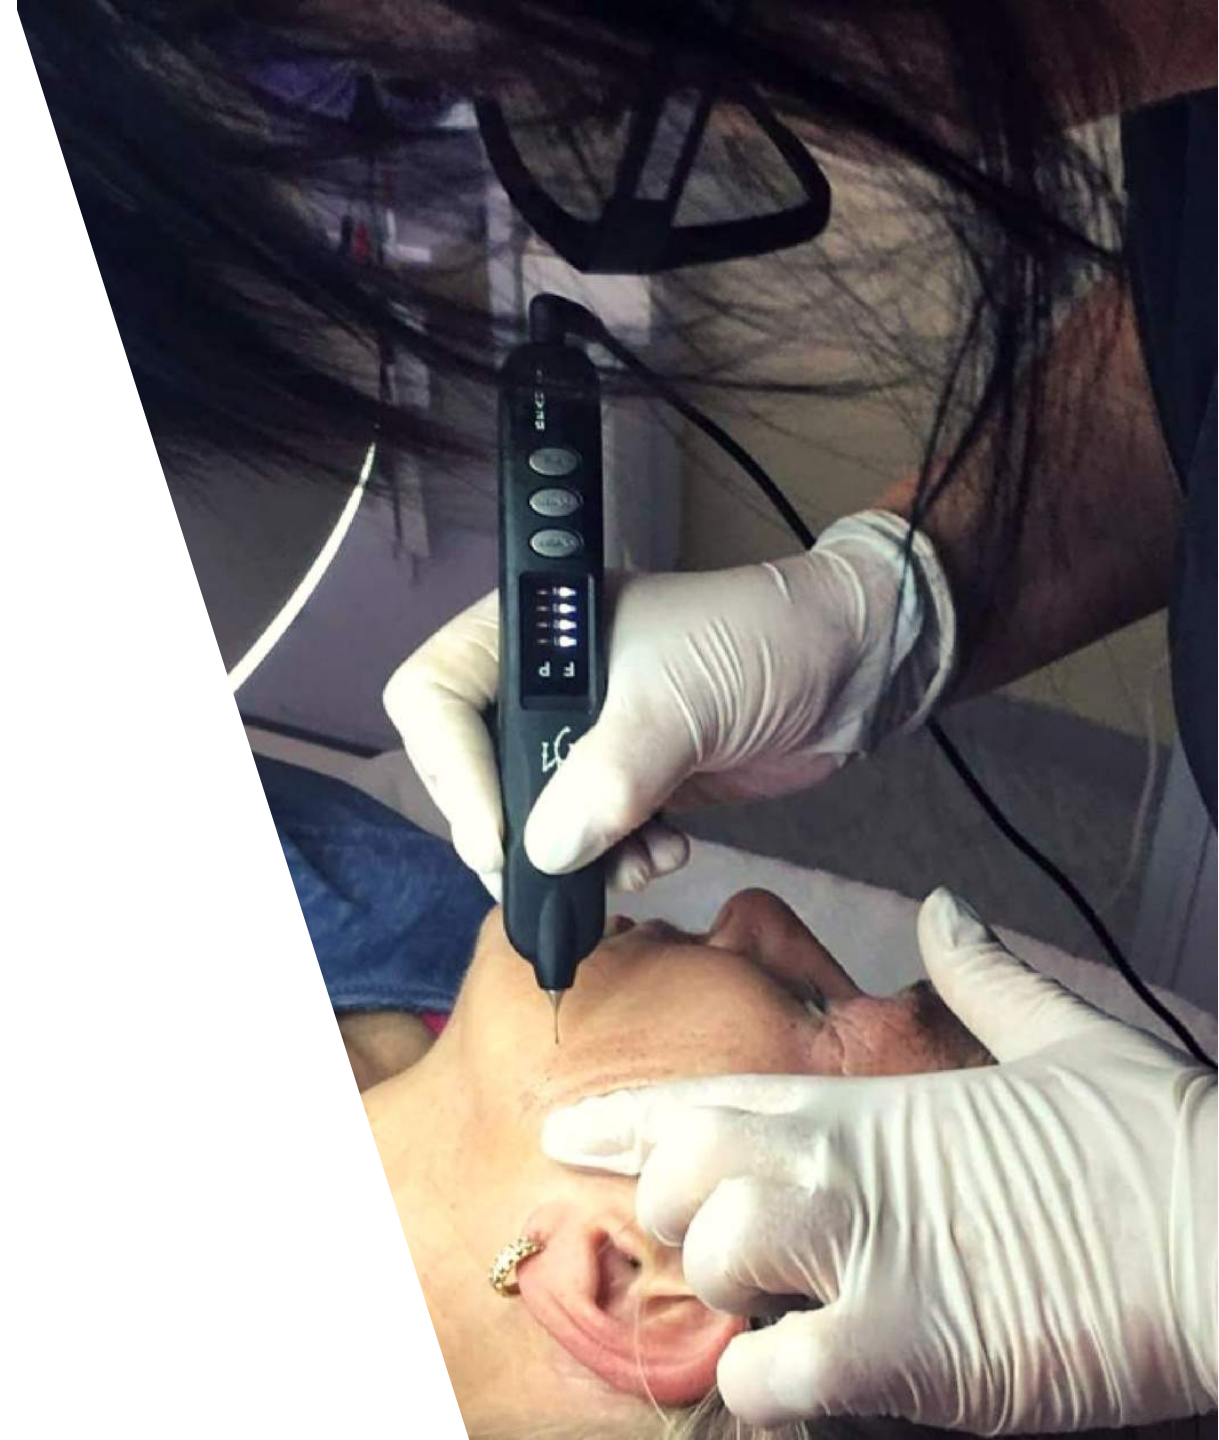

- the most **advanced training course**, developed in cooperation with Korean and England pioneers of cosmetology;
- **2 top trainers**, cosmetologist with 15 years of experience;
- **full starter kit**: from the original devices with a set of certificates and warranty service for 1 year to the master's work book and a colorful memo about post-care.

The trainings include...

2 full days of practice

- Complete introduction to the profession;
- Guaranteed setting of the hands from A to Z;
- **Step-by-step analysis of the most popular procedures and all possibilities of plasma and meso cosmetology;**
- 100% strengthened practice and working out of plasma-lifting **on the model**

Original multi-plasma device «Beauty Monster Black» with full warranty service

- Multi-plasma device “Beauty Monster Professional System”
- Set of 5 tips
 - Plasma tip (10 pcs.)
 - Fractional tip (1 pc.)
 - Thermal tip (1 pc.)
 - Conic tip (1 pc.)
 - Mini-plasma tip (1 pc.)
- Warranty service: 1 year

The most effective and reliable derma-pen

We worked on a variety of derma-pens. Someone has small number of turns, someone uncomfortable shift lever, someone slippery holder, which quickly tired hand, someone a needle radius of 2 mm.

As a result, we chose the most reliable and functional derma foam with the maximum needle reach on the market (up to 3 mm) and a speed of up to 7,200 revolutions /min.

Warranty service: 1 year

Master's Workbook with step-by-step description of procedures

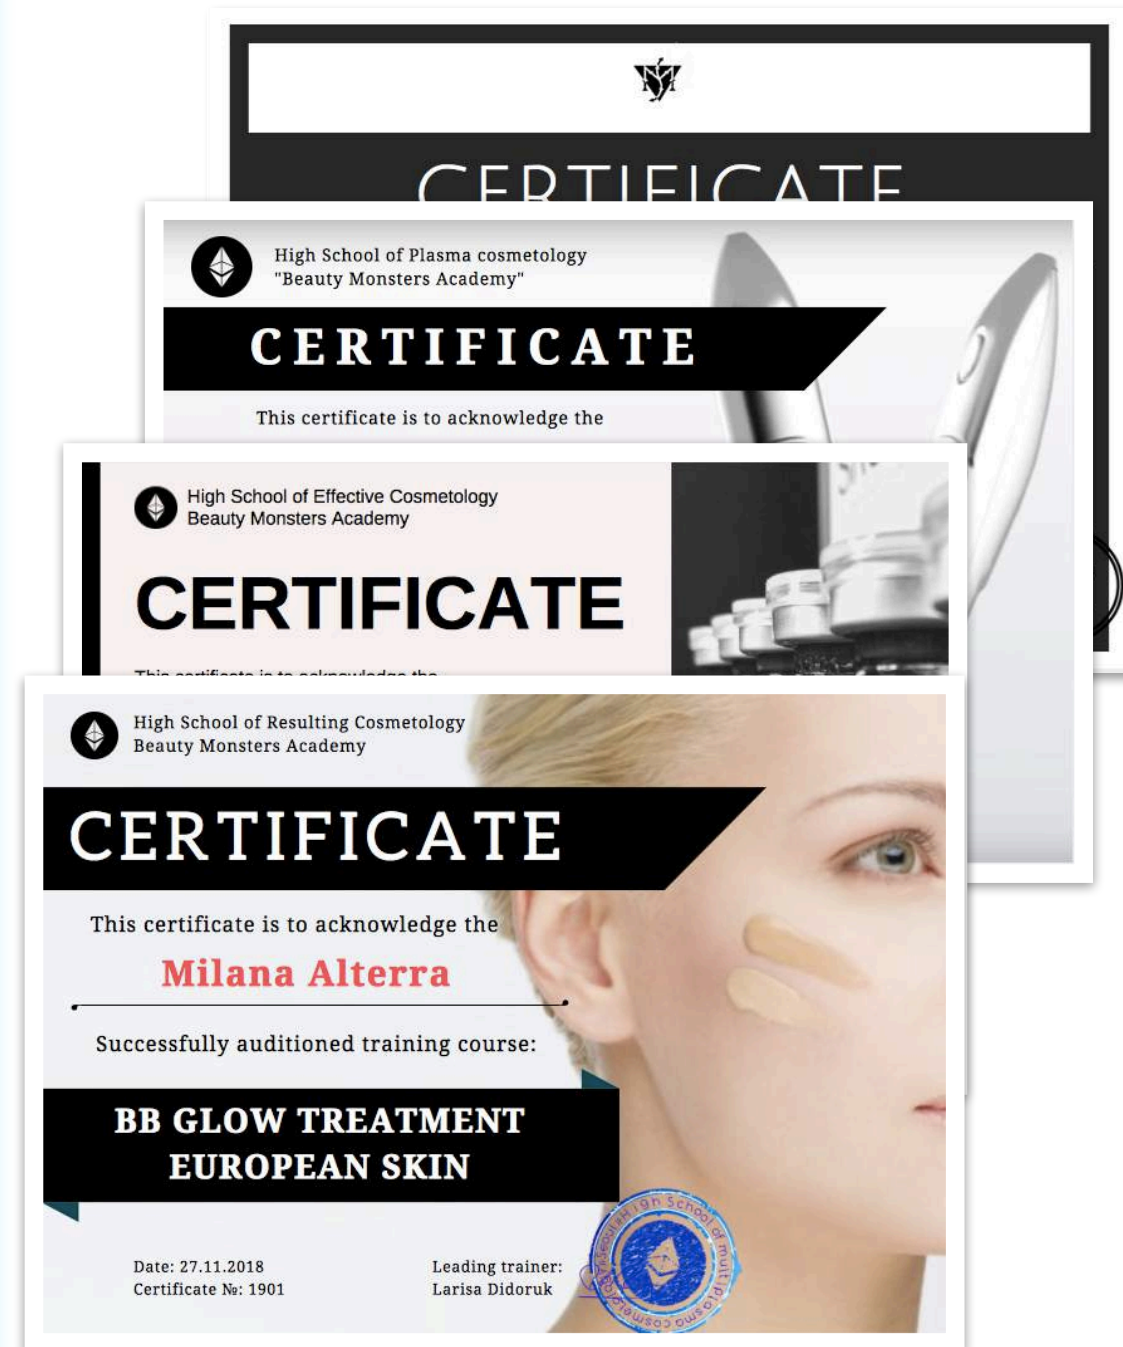

Full step-by-step guide with detailed description and illustrations of all the procedures, nuances, developed together with Korean and English masters-technologists.

the training includes:

4 international certificates

- Certificate from the “Higher School of Plasma-Cosmetology”
- Official certificate with a personal number from “Beauty Monster” (Seoul, South Korea)

- Certificate «Master of Mesoneedling»

Full practice of the procedure on a several live models

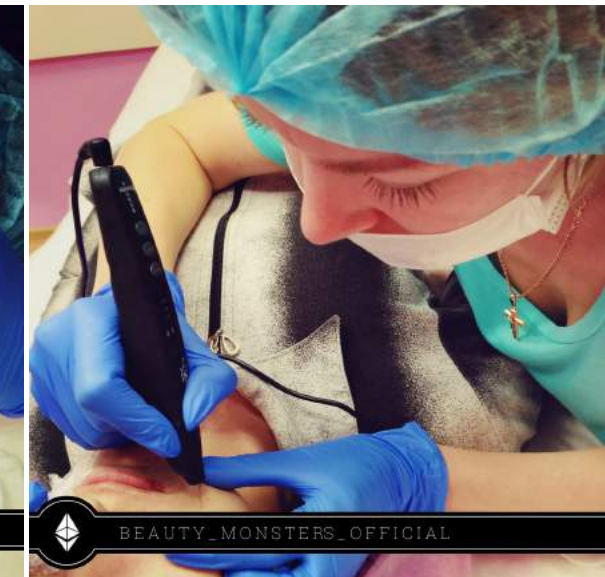

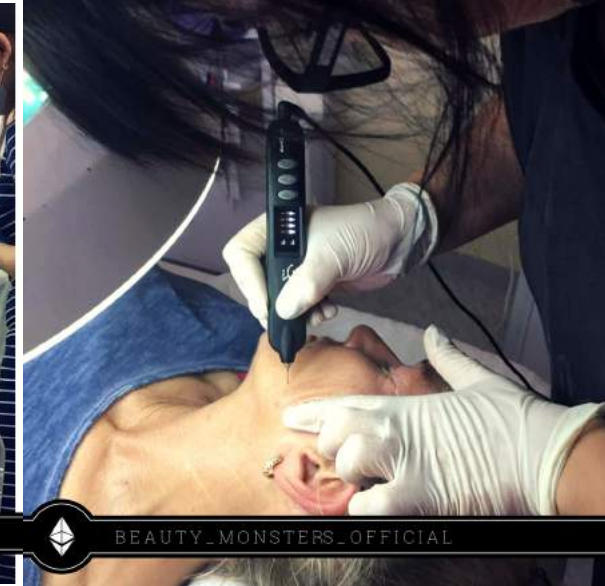

The procedure is worked out on the model completely: from A to Z.

That is you are not just watch when others work, but do everything by yourself, memorizing and practicing all the mechanics of movements

Full analysis of the most popular cosmetic procedures

- non-surgical face lifting (blepharoplasty);
- elimination of skin flabbiness on the neck; abdominal (postnatal bellies);
- alignment of the contour of the face, wrinkles around the ear;
- elimination of wrinkles: around the eyes, around the mouth, etc.

Step-by-step treatment protocols

- We have prepared in a convenient step-by-step form the protocols of all the main treatments.
- The most important is always at hand.

24 LESSON 9. FEATURES AND NUANCES OF PROCEDURES PROTOCOLS

LESSON 9. FEATURES AND NUANCES OF PROCEDURES PROTOCOLS

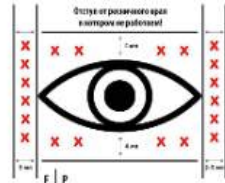

1. Non-surgical blepharoplasty/eyelid lift

DEVICE SETTINGS:
 the recommended power level (P) is 3
 the recommended frequency level (F) is 2

MAIN SEQUENCE OF STEPS YOU CAN SEE IN LESSON №8

NUANCES OF THE PROCEDURE:

- 1) Using the device, carefully apply small ablation dots in areas with excessive skin. Recommended distance between dots – 2mm.
- 2) When working on the eyes, do not forget to indent from the edge of the eyelashes – 3-4mm. Safety first!
- 3) The procedure for the lower eyelids is carried out only in the presence of excess skin.
- 4) We do not process bags and dots under the eyes with a plasma (only thermal or fractional).
- 5) Repeat the procedure is possible not earlier than in 7-8 weeks.

wrinkle area, it will only become deeper.

- 3) Ablation dots are applied on top and bottom of the wrinkle in several rows. The number of rows depends on the depth of the wrinkle.
- 4) When we are working on the eyes, we make an indentation from the edge of the eyelashes at 3-4mm.

To achieve a persistent, pronounced result, from 1 to 4 procedures may be required with a frequency of once every 7-8 weeks.

Three ablation eyes by 1cm line
 Fullness on separation (0.5cm) 1cm
 0.5cm eye

2) After that we move on to the stria. With each we work individually. To do this, squeeze the skin area so that the stria is on top between the fingers. After that we start dotted processing along the lines of the stria itself. Distance between points: 1-2mm.

- 3) After processing all the stria, go to the abdominal lifting. We continue the rays of the "sunny navel" made by us with the diffused dots format. At the same time, the ablation dots you should make not crowded close to each other, but diffused. Distance between dots: 5-8mm.

persistent, pronounced procedures may a frequency of once

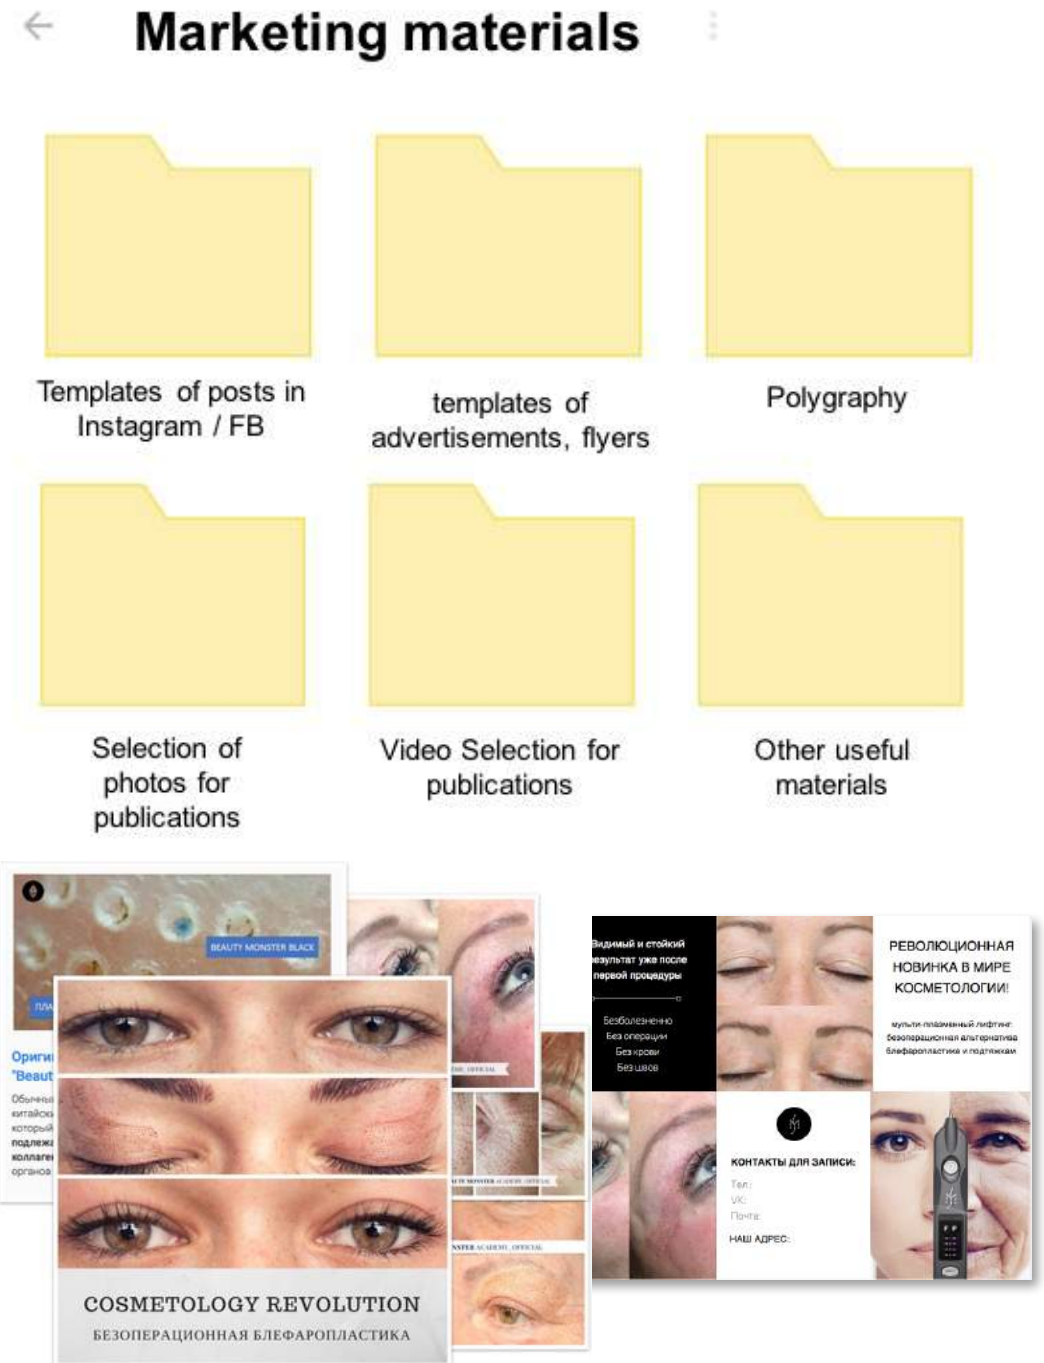

ОН НА ЖИВОТЕ (СТРИИ)

A set of marketing materials

To each student we give ready-made:

- advertising posts;
- photos and videos of work done;
- poster designs for the decoration;
- templates for Instagram
- templates of advertisements, flyers

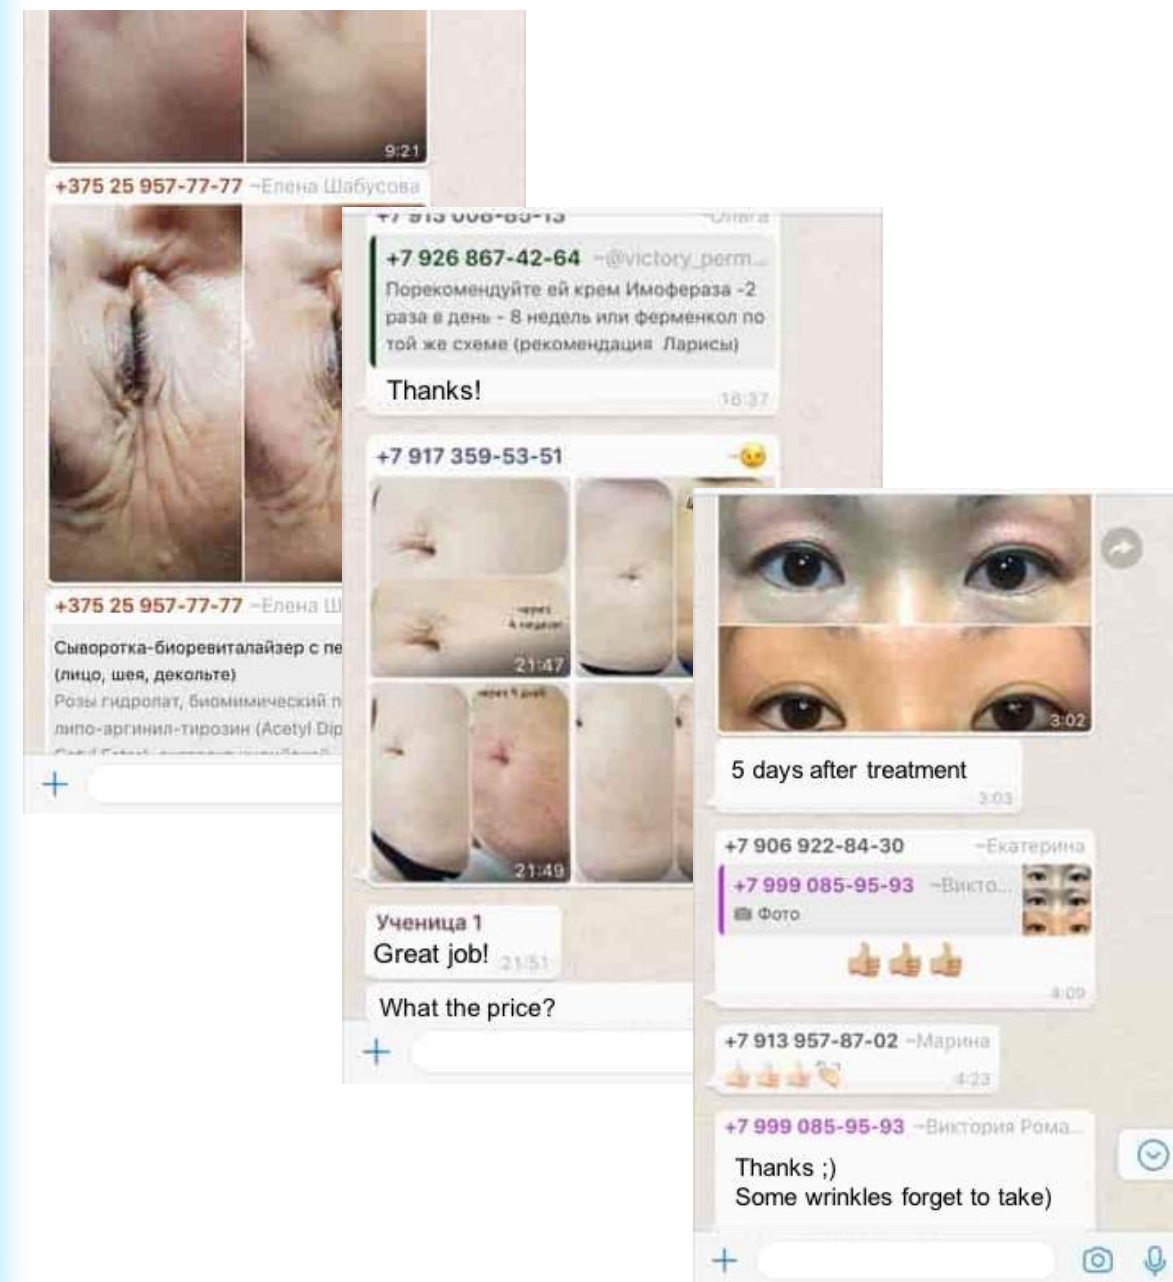

the training includes:

365 days of supervision and full online support after the training course
