

"The life of money-making is one undertaken under compulsion, and wealth is evidently not the good we are seeking; for it is merely useful and for the sake of something else."

- Aristotle, alive in Ancient Greece around [300 BC](#).

I've read your research as one claims to be this, I hate to be the one to drain the lizard in one's cornflakes but that's a mockery of my entire roster over the history I operate as a publisher. *I published a school teacher at an Evangelical high school from British Columbia as his research he does.* To put it politely -- well rivals us or even me. LAKE FOSSIL is set in an era where young earth creationism was being forced in public schools.

I see that you blocked my author page and private profile from posting on your Facebook – *I guess what I said cuts to the heart.* This isn't an apology but consider this an olive branch to challenge the research my roster and some correspondence done over the years.

What I wrote in Lake Fossil – well the events in this science fiction yarn happened in 1990 over in New Lenox, Illinois. Then one will have this [blog entry](#) as I invite one to read – as what you're doing is [research beyond](#) what you did in college. Young Earth Creationism is an Independent Baptist/Seventh Day Adventist born mentality. I am going to be clear and say which the influence touched into the Assemblies Of God and other congregations through the poisoned logic of Jack T. Chick.

"How did you know about Jack T. Chick?" would be something I would be asked. I had refuted him in my science fiction and horror output.

I will leave this YouTube video as I am doing an anonymous project. My name will be left off this publication; there will be an open office document I am passing around; a few actually.

I am encourage young earth creationists and King James Only advocates to challenge The Ethereal Gazette: Issue Five.

One of [the documentaries](#) one will be looking at will be this and you will be done up like Lazarus of Bethany with modern technology and innovations within the information age.

THIS WILL BE OVERSEEN BY FOUR THEISTIC EVOLUTIONISTS, EVOLUTIONARY CREATIONISTS, AND A TWO ATHEISTS. Then one thing you will be watching is this [obscure presentation](#). The presentation is an artist rendition of Christ as forensic examination. Christ died for us and I will leave it at that but

I am going to explain that Illinois' history alone is older than the first writings of Genesis. That's where you get to challenge not only [THE ETHEREAL GAZETTE: ISSUE FIVE](#) but also the blog entry known as 'The Science Gospel' where I humiliated the entire collective when they were trying to reinvent the light bulb. What you will be using in your presentation in print will be a costume from a cosplay maker where I will be consulting the specifications – this is right out of my roster's near [future based material](#).

The costume will be based on the appearance of the classic Nintendo game Metroid with the 2000s era sequels. I see the logic of those who are young earth creationists, more or less.

They saw [my photo from 2007](#) they'd end up getting a collective puddle because I will be able to use some of the arguments they have against them. Think the scene in The Black Hole where they had a woman done up like this and under the table of a factory scene. And looking at that photograph – that's from the real museum campus; as this became how Issue Five fell together ultimately. So I am submitting this link from [LiveScience.com](#) of the Big Bang.

I suggest thumbing around and gathering information on [Quora.com](#) for what one will be doing. Everyone retains the copyrights of their contributions and will have an .odt to be passed around. Blocking me on Facebook meant I said something that touched a war nerve.

I am giving each willing to take part about 2300 to start and 6900 words max – the catch is minimal quoting of Scripture and see how much research one is willing to do. THE WHOLE USING SCRIPTURE TO PAY LAST RESPECTS TO STEPHEN HAWKING WAS WRONG.. Young earth creationism with investigative journalism is nothing short of gerbilism. That along with quote-mining in parts where I am the one who coined the term "piss blogger." To effectively pull this off you can't [parrot](#) every other paragraph or every other sentence. This is the writer's article on the subject:

Correction of religious parroting is not an advocacy for originality. Indeed, there can be no originality with the true believer. All his/her life must be from God who alone is original and His truth does not change. UNLIKE THE PARROT, THE BOY WILL BENEFIT IMMENSELY FROM THE SAME WORDS EVEN THOUGH THEY WERE NOT ORIGINAL TO HIM. He imitated this from the tutor who wrote or dictated the script. The benefit would come because he would apply his sense and moral value to the words and become a better kid. (Of course, if he were to totally block his mind and harden his heart against the message of the words then he would be just like the parrot - or worse.)

Parroting makes one look like this as I'm tagging that word; as I seen this way too often in the YEC/IFB/KJVO sector. *That's why you're educating yourself on real social studies and actual science, rethink how you approach the interpretation of the Genesis narrative.* My reporting is on par to Matt Carroll from Issue Five as the author I Fired God rivaled me with the hard profanity. Parroting Scripture every other paragraph is bad journalism.

There's two schools of research that stemmed from Issue Five – The Wright Treatment and The Pacione Blast. Pacione Blasts are a lot more abrasive using

documentaries, Spotify or Bandcamp, then explicit hard language. Lake Fossil put the teach the controversy debate on the theistic evolution side when I had no idea I would end up voicing this. Keep in mind – the extent of my knowledge of existing science came from writing Science Fiction, I learned as I went along. If my contributor Deborah was willing to undergo being zipped into two layers for research and forced to watch young earth evangelists no less. ALL'S FAIR IN THE GAMES OF RESEARCH RIGHT?

Well where I'm getting for your research will come out of two places – but if you pull the col 2:8 speech on me I can apply this to Answers in Genesis because the guy who got is biology advice from the site; this happened. So with my open invitation this will be going to the College of DuPage philosophy department as I will inquire them to host it. According to this.

[Psychology Today](#) – it's written one should be prepared to give an answer as [Christianity Today](#) had also chimed in as well. Lee also [addressed](#) the uneasy relationship between the devote and the science educated. So I am trying to see if this pdf finds the right party I'm addressing with this as it's a unique perspective on research – as in Georgia must be willing to play herself up like an Egyptian burial or as Lazarus to gain the perspective of this particular social studies observation. My own research over the years about claustrophobia had me looking these up for a classmate who I worked with.

The *Ethereal Gazette*: Issue Five is notorious for [hard profanity](#) in some submissions including mine. This is not putting one's faith to the test, but putting one's skills on research and fact checking as a lot of young earth, King James Version only make for bad journalists and leaves it open or gerbilism. I provided the costumes on my own dime for what you'll be doing and you'll need this too – [LibreOffice.org](#).

You're invited to use these fonts and do not dismiss what was presented to you in terms of your costumes. *I had seen an exchange with your collective trying to refute the Scientific American and National Geographic with the Field Museum's findings..*

I am enclosing a link to the pdf that Professor Cooney contributed [an article](#) to this noted publication.

For me to quite fair – I also read one of yours. If the b-movie horror actress, Deborah Di Paulo had to undergo what she went with her photos it's known as being fair and balanced – then you have to as well. *Think of it this way you will have two outings to work with and written from a [narrative journalism](#) approach.*

In other words change up your approach for this; meaning you have to think your approach a little differently because if you don't take this to heart. You might end up laughed at even harder than you already are; has one even [seen this blog](#) and yes I have been bullied by misinforming as that's why my five year memoir [An Eye In Shadows](#) was written.

What you're going to be doing is a bit groundbreaking in terms of examining both how science, social studies, philosophy and theology interwoven seamlessly into a project. I already have the cover chosen as I will talk with a few in my sector to host this publication. My roster over the years really are this, "*Pay attention! I am sending you out like sheep among wolves, so be as prudent as snakes and as harmless as doves.*"

That would be Matthew 10:16 from the Complete Jewish Bible. Something when theistic evolutionists are suggesting one should rethink how they approach the Bible and the items will be in on your person from the publications to the costumes involved, *do not pull a return to sender.*

You're going to learn social studies and urban literature when doing something of this nature – the young earth mindset seems to be impressionable on Christians who've come from a set of denominations who see the literal narrative.

"I don't want to hear this from a community college drop out," well this one outsmarted Eric Hovind with his own young earth arguments used against him. When he complained about swearing he never heard Cram it Clownie played up. As in I said, "*If you're going to preach how humans and dinosaurs co-existed then you're a*"

I will say I held my own with Poochie Jackson of The Wiener's Circle and she wasn't doing explicit barbs until after 8 P. M.

Don't borrow your language from Latter Day Saints when approaching this. I am going to make this clear: one must be able to go at least 2400 words with their journal or letter; even include dialog too when doing so. *You should really be careful taking aim at those who are Philosophy minors and journalism majors.* More so – ESPECIALLY WHEN THEIR RESEARCH AND OBSERVATIONS ARE GOING TO END UP GIVING ONE AN IDEA OR FRAMEWORK TO EXPLORE. Some of your submission I am encouraging you to respond to this piece. If you will notice with Stephen L Anderson – he got the finger from the Daily Mail Snow Monkey. The poor creature isn't going to understand Ephesians but it understands Greek Philosophy – complete with the scowl that comes with.

This is an exercise in academic honesty as you're really making a mockery of those who really do the research. I'm showing [this pastor](#) all my findings for her possible short form material as well as I suggested a challenging photo visual. The costumes will be based on what was written on an article featured on Psychology Today – the reasons she did are not these reasons. *This also plays up*

put on other congregations. Here's another part of what you're using as Issue Five will be employed in the sessions leading into what you're eventually doing. The influence on what your collective is doing [entirely has ties](#) to Independent Fundamental Baptists. I am going hijack one of the bastard's memes for this particular download as this is under fair use. The Message has the part calling such who bash on philosophical and academia well applies to what's in the last part of Romans in this wording,

"Since they didn't bother to acknowledge God, God quit bothering them and let them run loose. And then all hell broke loose: rampant evil, grabbing and grasping, vicious backstabbing. They made life hell on earth with their envy, wanton killing, bickering, and cheating. Look at them: mean-spirited, venomous, fork-tongued God-bashers. Bullies, swaggerers, insufferable windbags! They keep inventing new ways of wrecking lives. They ditch their parents when they get in the way. Stupid, slimy, cruel, cold-blooded. And it's not as if they don't know better. They know perfectly well they're spitting in God's face. And they don't care—worse, they hand out prizes to those who do the worst things best!"

When one sees this; keep in mind when reading over what I presented as this what one is doing will be a change in print venue and the [world weird web](#). *That one piece will be submitted for Christian Nightmares as a multimedia presentation paired with this particular release* – as in you will be paired up with an instrumental presentation of Circle of Dust's material as well.

This is the word count in this presentation – if one can go here, then you're in good shape. I will leave you to your thoughts and with the props you have to work with.

What I have arranged (*with every bit of my limited budget – and this being said,*) you will rival what my correspondents did when they were active in the 1980s. So the research one will be doing – this is nothing you ever did when you were getting your papers to be a researcher; but in the rest of the science front and in Professor Kooney's field. You'd be dismissed on par to that of someone who wrote fan fiction from established media properties – don't look at me like that because you see Amos 5:10 played with and discussed in my roster. Keep this in mind – I am published for being explicit but this I am showing control and being gentle in my invitation but Issue Five; it operated in a hostile climate. I took my time to gather all what you'd be using for this research exercise – and a venue change so you don't get treated like a [fan fiction writer](#). All one will be working with – you're facing the unknown, and keep the scriptures I presented with this with your visual aides and [don't ignore](#) this, "FOR THERE WILL COME A TIME

WHEN PEOPLE WILL NOT PUT UP WITH SOUND DOCTRINE. INSTEAD, BECAUSE THEY HAVE ITCHING EARS, THEY WILL ACCUMULATE FOR THEMSELVES TEACHERS IN LINE WITH THEIR OWN DESIRES.” Ω
