RND Research Report

Accessing Case File: #[XXXX]-Gamma-Bravo-Alpha
Take. All. SCPs.

File Name: #131 Physical test#

Full Name: Tommy

Current Position: Assistant Researcher

<WARNING!>

<VIEWING THIS DOCUMENT AS A NON-RND COMMAND
MEMBER WITHOUT EXPLICIT PERMISSION WILL RESULT
IN TERMINATION!>

Date: 05/08/

Location: Site 05,

CI Personnel Involved: [none]

SCP's Involved: [SCP-131]

SCP Class: [Safe]

Hypothesis: Testing the possibility that 131 is more sentient than they seem to be, for example, test that 131 knows how to read, reactions of certain lights, and also to determine if 131 understand our language by asking a series of questions, also if it's emotional.

<Further Identification Required>

<Fingerprint Scanner engaged>

<Access Granted>

1Researcher: [Assistant Researcher Tommy]

Observation 1-A:

. *Crackling Noise*

.

.<Start Audio Log>

.

[Opening and closing of a door is heard, a brief sigh of relief and a sound of a person writing in a notebook with a pencil.]

.

AR Tommy: Alright, Addendum-1: I'm gonna draw a picture of a house with a garden and a family, and if you understand what you see, 131, I need you to blink 1 time, and if not, 2 times.

[SCP 131 stares watching the picture, without blinking, emotionless for 10 minutes].

AR Tommy: It seems SCP 131 is not capable to recognize the figures of the drawing I've made. I'm gonna try drawing SCP 131 and show him if it recognizes himself.

.

[SCP 131 raises his antenna, but doesn't blink, neither seem affected to the drawing of himself, but 131 raised his antenna, and that means maybe he recognizes himself or thinks it's another one like him.]

AR Tommy: Alright, although 131 didnt blink, I've seen a reaction here, so somehow it's sentient about himself.

Fisininish Addendum-1.

Observation 2-a:

.

AR Tommy: I'm gonna try using different type of lights, if SCP 131 is sensible or not.

.

[AR Tommy puts SCP 131 in the chair and turns on normal lights in front of SCP 131 eyes]

[SCP 131 retina of the eyes become irritated and turns around annoyed]

AR Tommy: SCP 131 reacts instinctively and turns around to evade frontal light.

[AR Tommy changes type of light to infrared]

[SCP 131 Doesn't have any reaction towards the light]

AR Tommy: Seems that 131 do not react at this type of light.

[AR Tommy changes to Ultraviolet light]

[SCP 131 acts the same way as the infrared light]

AR Tommy: SCP 131 has the same reaction as before.

Finishing Addendum-2.

Observation 3-a:

[AR Tommy opens his notebook with a little questionnaire]

AR Tommy: We're almost done. I'm gonna ask you a couple of questions, as before, blink 1 time if you understand, 2 if not.

AR Tommy: Do you know if there are other SCP 131 in the site where you have been?

[SCP 131 raises his antenna but doesn't blink, staring at Tommy]

AR Tommy: Did the foundation experiment on you with another SCP?

[SCP 131 keeps staring at Tommy, without any reaction]

AR Tommy: Alright, last question: Are you a creature born in this world?

[SCP 131 doesn't react, neither blink]

AR Tommy; *sighs* Alright, it seems that SCP 131 only reacts when it sees himself or hears about him, but I'm not sure that's all about SCP 131.

Observation 3-b:

AR Tommy: I'm gonna test about SCP 131 affection, let's see what reaction it has.

[AR Tommy Approaches SCP 131 and begins to pet it and hug him]

[SCP 131 Begins to go around Tommy in circles]

AR Tommy: SCP 131 is affective and tries to get attention for him, like a domestic animal.

[AR Tommy Returns SCP 131 to his temporary Containment chamber]

.<End Audio Log>

Conclusion: SCP 131 affection, reaction and intelligence are equivalent of a domestic animal, like a cat, and doesn't know how to read, talk, reacts to light like another normal creature. I don't have any idea in what SCP 131 could potentially benefit our cause, rather than be a pet and roam around and play with him.
