

## **Record Travel May Mean Record Illness—One Company Sets Out to Change That**

ORLANDO, July 3, 2019 – According to a recent [CNBC Survey](#), this July 4 weekend—and through the summer—are slated for record-setting travel; however, these might make for record-setting sick days.

The CNBC Survey projects 45 percent of Americans are planning road trips this summer—including 41 million Americans traveling on July 4 weekend alone, surpassing summer travel for the last 20 years. According to a Boeing-funded study conducted by in-flight data scientists from Emory University and Georgia Tech, however, travel is not without its risks. According to the [Boeing study](#), airplane passengers have an 80 percent chance of getting sick on a flight if they sit in the wrong seat. Moreover, according to Cedar-[Sinai Medical Center](#), chances of becoming sick while traveling are also exacerbated due to weakened immune systems.

Mid-week July 4 weekends already cause [1 in 5 managers stress](#) due to employee travel. This, coupled with post-July 4 weekend illnesses, can reek havoc on work productivity.

Although there are numerous precautions that travelers can take to help prevent the spread of illness, there has been a lack of a singular preventative product, despite all we know about and the financial costs associated with both illness and travel. Orlando, Florida-based company Plane It Safe has changed that and introduced an innovative, new product that neither the travel nor hygiene fields have seen before.

According to Plane It Safe Founder and CEO Peter Cook, “Having fallen ill on too many trips and with no complete solution to protect me, I launched the Travel Safety Kit. This is a first-of-its-kind product that provides innovative and practical thinking with best-in-class hygiene, safety, and travel products.”

The Travel Safety Kit is designed to protect travelers every step of the way—from germ-laden TSA bins, tray tables, airborne illnesses, and physical touch—and includes carbon-filtered face masks, hand sanitizer, disinfecting wet wipes, tissues, foot covers, and a durable travel bag. The Travel Safety Kit is designed for flawless travel through security anywhere in the world. With FDA-approved products of the highest quality, the Travel Safety Kit is suitable for traveling by planes, trains, automobiles, cruises, stadiums, clubs, hotels, and even picnics. “It’s the perfect travel companion,” says Cook. “It offers a 6-in-1 total solution with FDA-approved, TSA-compliant products and all small enough to easily fit into a bag to grab and go.”
