Potternomics

No Disappearing Acts

Potter Inu values our security and confidence we want to instill in our community. That's why we have completed various measures to prove our integrity and dedication to the longevity and security of Potter Inu.

- **LOCKED LIQUIDITY**

The Potter Inu team has locked liquidity for an extensive period and will continue to extend locks to showcase our desire for longevity.

- **CONTRACT RENOUNCED**

The Potter Inu team were quick to establish the contract renouncing to relay our integrity and determination to prove our intent.

CONTRACT NAME

Potter Inu

TOKEN TICKER

POTTERINU

TOTAL SUPPLY

1,000,000,000,000,000,000

CONTRACT ADDRESS

0x10f9EA5180816D26e28D4E8e12278001B752c455

Token holders will be granted particular benefits in relation to playing our upcoming game! Stay tuned for more details!

**Our soon NFT
WizPott v WizPott battle game**

Battle it out with the community, prepare for the incoming SniffEaters and the great battle with He Who Has No Nose. Earn points and rewards with interactions with our up and coming game!

**Who will catch the Golden Ball?
Play Quizzitch with your House**

Only the fastest Brooms are able to reach the speeds needed to catch the flying Golden Ball! Win awards for your House when you answer correctly!

How to Buy

STEP BY STEP GUIDE

I. Create a wallet and buy ETH

Create an ETH account on Trust Wallet, MetaMask or Coinbase or another Decentralised wallet. You will need ETH to buy \$POTTERINU on Uniswap. Start by buying some ETH from exchanges (like Binance or Coinbase) or from third-party providers in your wallet. Once purchased, transfer the ETH to your Wallet. Please keep in mind you will need to leave an amount of ETH for the gas tax when swapping.

II. Connect your wallet

Connect your ETH wallet to Uniswap. When connecting your wallet, choose the correct protocol used by your wallet - i.e. Wallet Connect for Trust Wallet, or MetaMask for Meta Mask, and confirm the connection in your wallet app.

III. Adjust Uniswap Settings

On Uniswap, click on the cogwheel icon on the upper right corner and set the Slippage tolerance between 10-20% (12% usually works). This is important to keep your transaction from being overrun by other orders.

IV. Swap ETH for \$POTTERINU

Input the \$POTTERINU contract address. Then click to import the token. Enter the amount you want to buy leaving some for the Ethereum network gas tax. Click to swap and approve the transaction on your wallet app. After a few minutes your \$POTTERINU balance should be showing in your wallet. If not, go to "Add Token" and paste our contract address.
