This ended Superdrol's reign as the best legal steroid in the USA. But I digress. Obama's new prohormone law also went further to say that any product considered similar or to have similar effects to the list of banned prohormones were also illegal and subject to similar controls and enforcement. I couldn't work out what was going wrong when only 5kg below that weight would feel fine - once I started training a little smarter, the numbers started to fly up now that weight is comfortable ☐

Now while Superdrol was taking the bodybuilding world by storm, it was banned by the U.S. Food and Drug Administration (FDA) in 2006, which forced its manufacture and distribution to halt. However, the ban did not stop the production and sale of the methasterone compound in both legal consumer over-the-counter market and underground channels.
