

DEXSNIPEBOT.COM

ABOUT US

We're a team of experienced blockchain and smart contract developers since 2019, during our journey we decided to develop a tool for the community that could help them snipe tokens as fast as possible. With our Bots not only you will notice a huge speed compared to any Bot you ever used but we will take care to also provide you the best Node for free to make sure your Snipes are never delayed. Since this wasn't enough for the community we decided to implement a contract scanner before entering any project, Honeypot, Rugs, High Tax or anything else won't be a problem anymore since our Bot will warn you before your Snipes. We will try to collect and listen to every customer for ideas to improve our products to make this the safest and fastest Bot ever.

Snipe and Front Run capabilities

Dex Sniper the only Bot fully supporting MultiChain network with over 30 DEX
