

PRESIDENT TRUMP:

EPA's Scott Pruitt isn't protecting

our health or the environment.

He's protecting polluters.

IT'S TIME FOR SCOTT PRUITT TO RESIGN, OR BE REMOVED.

Since taking over the EPA, Scott Pruitt has systematically undermined — or removed altogether — bedrock protections that Americans count on to safeguard clean air, clean water, wildlife, rivers, oceans, parks, public lands, a stable climate, and the health of our families and communities.

He is selling out our future.

Pruitt has put the health of communities last, recruiting insiders to oversee the polluting industries they came from. His policies are dramatically increasing the amount of mercury, arsenic, lead, and other toxics that can be dumped into our air and water, putting millions at risk.

Pruitt is stamping out science by gagging EPA's scientists, purging the agency's scientific advisory boards, and suppressing scientific evidence.

For example, Pruitt overruled his own scientists and rejected a ban on the toxic pesticide chlorpyrifos, which causes neurological damage in infants and children.

He's caused all this damage while spending lavishly on himself, wasting taxpayer dollars on first-class trips and prompting at least six ongoing investigations into his luxury travel, lobbyist condo deal, reassigning of key personnel, and secretive operations.

The Environmental Protection Agency has had many great leaders in its history, both Republicans and Democrats. By sabotaging the agency, Scott Pruitt has demonstrated that he is not among them. It's time for new leadership at EPA before more — potentially irreversible — damage is done to our health and environment.
