- Our mission is to pave the growth of decentralized P2E marketplace adoption - this happens when the users feel confident to explore the blockchain are supported to build the future of decentralization.

LOCKED LIQUIDITY

The liquidity secret is a decentralized and automatic LP. The math in this contract automatically adds the tokens from both owners and buyers and provides a stable price floor. It also provides an automatic penalty to solve slippage which helps with volatility. Liquidity providers receive LP tokens for providing liquidity. The primary goal is to keep the holder informed about the Toon Inu performance by avoiding whale dips when they are used in a mass trade-off. Toon Inu's secret is automatic LP. We have a function here that serves as a dual-beneficial implementation for holders.

To begin, the contract collects tokens from both sellers and purchasers and adds them to the LP, establishing a stable price floor.

Second, the penalty serves as an arbitrage-resistant mechanism, ensuring that the volume of Toon Inu remains safe as a reward for the holders. In principle, the additional LP provides stability by adding the tax to the token's total liquidity, thus raising the token's overall LP and maintaining the token's price floor.

The price stability of the Toon Inu LP mimics this function, with the added advantage of a firm price floor and cushion for holders. The aim is to avoid bigger drops in the price when whales opt to sell their tokens later in the game, which prevents the price from changing as much as it would if the automated LP mechanism wasn't in place.

Toon Inu NFT

TOON INU NFT is a vital part of our ecosystem dealing with NFT's. TOON INU Non-fungible tokens (NFTs) are unique, non-interchangeable assets, minted on-chain. These tokens can be linked to anything from digital TOON INU. The core attributes of TOON INU NFTs give them unique value and categorically separate them from other types of assets. These properties include being verifiably unique and indivisible. The transparent nature of the underlying code means that the scarcity and ownership of any given token are evident without the need for a trusted intermediary.

We view the emergence of NFTs as a continuation of a paradigm shift from centralized to decentralized systems. This framework is now unlocking fresh business models for the creators of digital and physical collectibles. TOON INU is a widely known NFT project. The underlying token for each TOON INU encodes a unique genome that defines its appearance, traits, and hereditary lineage. TOON INU cannot be replicated and cannot be transferred without the user's permission.

TOON INU NFT are one-of-a-kind, transferable assets created on the blockchain. We are going to revolutionize the world by releasing the NFT's. NFTs' basic characteristics provide them a distinct value and categorically distinguish them from other forms of assets. These characteristics include verifiably uniqueness and indivisibility. Because the underlying code is transparent, the scarcity and ownership of any given token can be determined without the use of a trusted middleman. The rise of NFTs, in our opinion, is part of a larger paradigm shift away from centralized to decentralized systems.

Toon Inu NFT

Our NFT holders will get the following rewards Some of the advantages of Toon NFT include:

Ownership Rights

The primary benefit of non-fungible tokens is the ability to prove ownership. NFTs can assist in linking ownership to a single account because they are on a blockchain network.

Authenticity

The advantages of non-fungible tokens are essentially determined by their rarity. NFTs are created on the blockchain, which means they are tied to one-of-a-kind data. The particular qualities of NFTs reveal their ability to add value. Simultaneously, NFT manufacturers have the option of releasing a restricted number of NFTs to create supply scarcity.

Fraud proof

They are easily transferred and unaffected by fraud.

WHAT DO WE OFFER?

- We are endeavoring to meet the expanding and differentiated requests of the investors.

WHY INVEST IN OUR COMPANY?

Our company and token enable you, as artists and investors, to buy and sell without the involvement of a third party or middleman and the risk of fraud. We want to create a token that does not rely on rug pulling, a new type of exit scam in which criminals posing as crypto developers abandon a project and flee with investors' money by removing purchase support or a DEX liquidity pool from the market.

This distinguishes our token from others. Because intelligent contract validators entirely validate mining, you will never lose your tokens. The Toon Token provides our users with many opportunities to earn, invest, and work for the greater good. Interest in digital forms of money was primarily limited to frequently encouraging yet genuinely crude instruments like carrier resources and tokens. But cryptocurrency has completely revolutionized the world. Now a layman of society can hold a certain token and earn an immense profit.

ToonToken works on the Binance blockchain which is a completely decentralized and secure blockchain. Toon is a decentralized token—which means no government or bank controls how they're made, what their value is, or how they're exchanged. Because of that, cryptocurrencies are worth whatever people are willing to pay or exchange for them.

Similar to buying an index fund when investing in stocks, Metas token offers diversification, simplicity, less volatility and it will also change holdings over time,

Toon Inu Wallet

The TOON INU wallet version is supported on both Android and iOS. The vault is highly focused on enabling users to manage their coins and interact with the ecosystem. The private keys for the vault are stored on the user's device and are secured through Secure Enclave and biometric authentication technology. Users can complete all the normal functions that a vault provides. They can monitor their balance as well as send and receive coins. P2E Gaming

Play to Earn is a modern type of game that has been brought in trend for video gaming rewards where all the players are supposed to complete multi-tasks that are based on cryptocurrency. The players can use these rewards in gaming and they can use rewards for trading in an open market. They are not bound to do rather are free to use them wherever they want.

An important and significant makeshift has been introduced by this project which was traditionally bound to be centralized and were confined to gaming assets only in lieu of spending according to one's own choice. As in traditional gaming, it was not permitted to use these rewards out of the gaming premises.

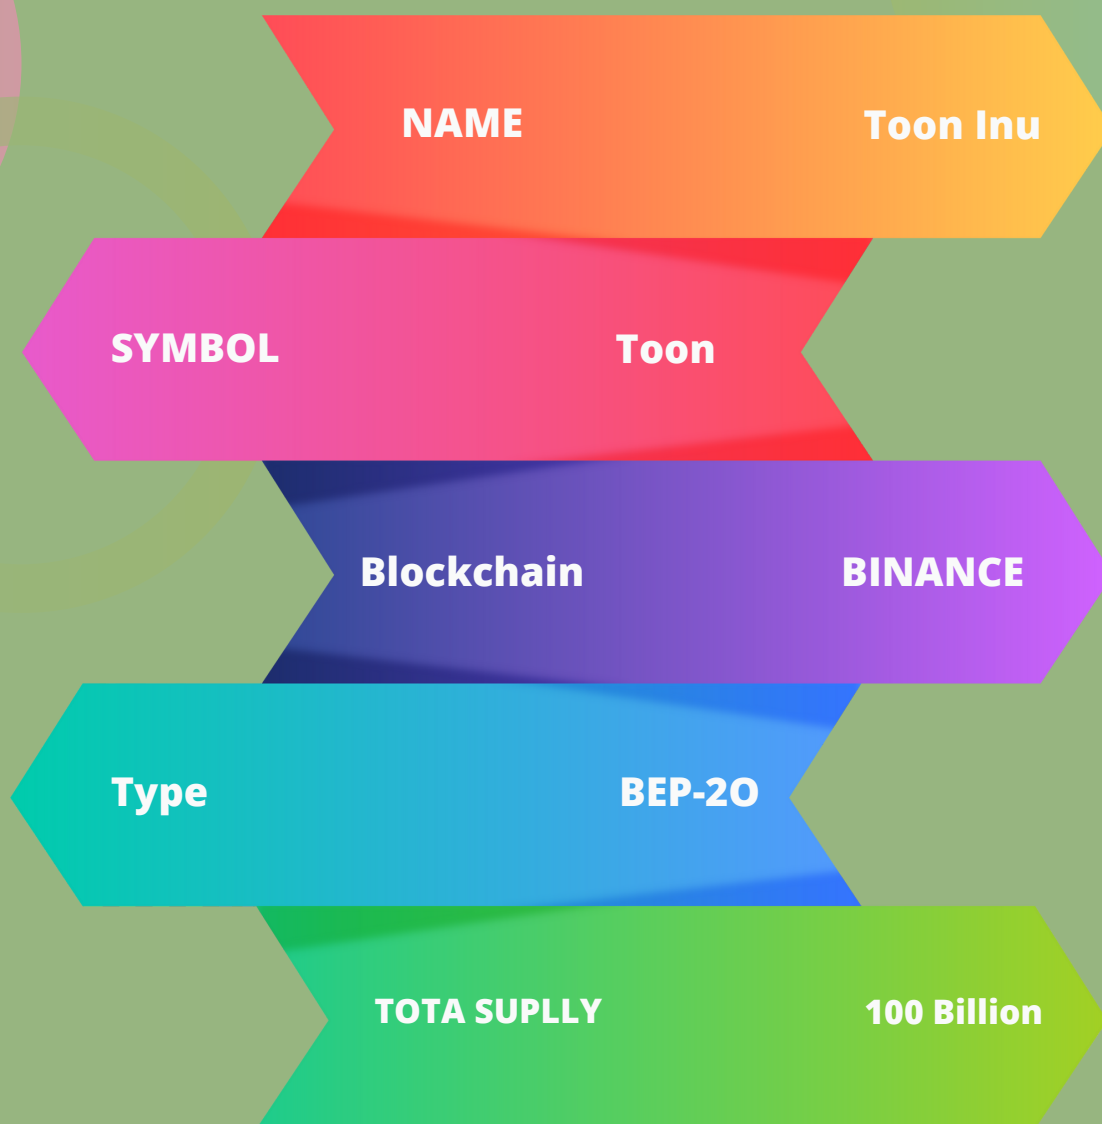

We hereby anxiously anticipate that at Toon Inu, play and earn and blockchain all-encompassing will be the upcoming modern era of gaming for the people. It has already been proved potential by Axie infinity along with the impacts of gaming which, it will impose on the lives of its players. Many people are getting involved and enjoying themselves by playing Axie infinity in the Philippines and they are supporting their families by earning handsome amounts of money.

Play to Earn is a subdued and breeze conception that has been thoroughly transformed into reality. It is no more a scam, rug pull, or any pyramid scheme. It is totally free of such fraudulent onslaughts which tend to penalize its consumers. What the players have to do is to undertake many tasks and accomplish them in the appertaining part of the game by doing this a certain part of those earnings is pigeonholed into a Pool and which then revert back all those its holders. We are familiar with the observation and impact of paly to earn ecosystem can lay ahead. Whereas we come across this that people Axie infinity has retained many people and users globally.
