

# Reverse Clip - Privacy policy

**WE DO NOT STORE ANY DATA OR IMAGES YOU SEND TO YOUR CONTACTS.**

We physically can't. We have nowhere to store it. We don't even have a server database to store it. So even if Justin Bieber asked nicely to see your data, we wouldn't have anything to show him. That's why, with Reverse Clip, what happens on your phone stays on your phone.

Whenever you want to send your videos to your contacts, your data only moves when you tell it to – over the secure connections of those services. No middleman is between your communications. We're proud to be able to say this.

We built Reverse Clip for you the way we want other people to build app for us: no more passwords, no more registrations, no more worrying about one more place where my data is and no possibility of anyone seeing our personal data.

Coconutdev team.
