Muscle Fuel Anabolic contains 26g of sugar out of a total of 81g of carbs. This is quite a lot of sugar, considering the daily cap for simple sugar for adults is 30g per day. The Carbohydrate matrix will cause

a spike to your blood sugar. Not just from the sugar content but because there are no low GI carbs listed. Anabolic steroids build muscle rapidly due to three important factors: 1) The Anabolic Factor, meaning the building up of muscle tissue by better use of dietary protein and higher nitrogen retention. 2) The Androgenic Factor, meaning development of masculine characteristics such as aggression, strength and muscle mass.

World Malaria Day is observed annually on 25 April, to bring global attention to the efforts being made to bring an end to malaria, and encourage action to reduce suffering and death from the disease.
