**FIGURE 12.23** **Signal transmission at a chemical synapse.** Through exocytosis of synaptic vesicles, a presynaptic neuron releases neurotransmitter molecules. After diffusing across the synaptic cleft, the neurotransmitter binds to receptors in the plasma membrane of the postsynaptic neuron and produces a postsynaptic potential.

At a chemical synapse, a presynaptic neuron converts an electrical signal (nerve impulse) into a chemical signal (neurotransmitter release). The postsynaptic neuron then converts the chemical signal back into an electrical signal (postsynaptic potential).

always saved me from myself. I think a lot of us have lost touch with our intuition, our inner voice, our  
ability to see beyond but this 6th sense can be developed. Just as dance needs physical practice to perfect  
a single spin , developing your intuition requires patience, meditation and introspection. In the words of  
Carl Jung, who looks outside, dreams, who looks inside, awakens. It is this inward journey that  
intrigues me , unlocking my potential, envisioning my purpose, creating my reality. Searching... [original
