**Europe is sector full open for espionage**

European policy is today developed into the full fascist and dictator regime, after secret and systematic genocide of 350 000 000 people (1998-2017), and threaten for start First Global War !

If is Spionage blocked, than is only one possibilities, liquidation of Terrorist subject.

## Global communication for Security Service Intelligence agencies

---

Sunday, April 30, 2017

I King Gottwald Peter, representing the interests of the ID's government of a new country with a legal status under the obligation of international law and such a form of recognition, today in this letter, I King Gottwald Peter representing the „incident of terrorist Europe“, with the principle of the legal obligations of your states as a party to your claim for attachment Peace and co-operation in accordance with the principles of the UN Charter, the UNGA Declaration, International Humanitarian Law.

European policy is today a real threat to the security of the world, such a body must be neutralized or disposed of by the means available to us for the situation and the duty of such a security act in order to uphold the rights of our states and the liquidation of terrorism.

Every state in this world has a legitimate right to fully respond to crimes that drastically damage your country, as well as drastically threatening the freedom and security of your states.

### **Therefore; In this document**

Today I King Gottwald Peter, a government representative based on undisputed territories, as well as a register of economic values of government and the state, expanding jurisdiction and establishing political and civilization growth strategies, as well as international political communication.

The government of the country, with its formation in the period of 1998, in a formal act of proclamation in acquaintance with a social group with knowledge of this right, and the subsequent legal form of confirmation of the legitimacy of claims under the responsibility of the Government of the Czech Republic, according to principles of constitution of government and jurisdiction, consequently with the same view of responsibility For the Member States of the European Union and the European Union since 2003.

Today, the Imperium of Diamonds as an entity with government status, and the claims of the state, are applied in the knowledge of most states of the world, and representations of international organizations of a political nature, as well as other institutions or associations

The Imperium of Diamond's, the first territory law, such as ID's Territory, N-E Africa, as well as the North Atlantic Laws, and the territory of other planets in the universe, emerges.

ID's Diamond Oasis North East Africa Bir Tawil, together ID's North Atlantic Rockall Diamond, and territorial rights endorsed and confirmed by today's international law, about relations and commitments to the positions of territories

in space, planets, star systems, galaxies, super groups of galaxies.

The Federal Government Imperium of Diamond's in the King's Communication, today with the basics of covered political communication at international level, primarily due to the current state of illegal blockade against my person, the parties of the criminal party of the European governments, the apartheid against the legal state, and in order to stabilize them knowingly Created and active terrorist groups on the basis of European policy.

Acts that, from an international legal point of view, imply advantageous strategic positions of dominance for our parties that choose to use legal law and also achieve the genuine cooperative use of cooperation on a global level and therefore provide great benefits and achievements for our states and civilization, economy and politics; To establish profitable relationships of global development and global influences that enable our collective dominance to be strengthened against other states.

That is why it is also in my interests to extend cooperation between states, in order to ensure above all the development of our relations over the basics of security and secret intelligence, but also in the interests of public and indoor trade, at the level of the trade industry, but also political strategies, Own civilization stabilization.

Blocking from my childhood to the times until today, 1998-2017. That's why I've learned a lot of legal options on how best to use this situation on a global level and for the benefit of all the countries of the world.

The basis of the consequence of European crimes, when justified under international law recognized by the overwhelming majority of the world's democracy of the governments of countries, is that the EU loses the rights of the states themselves, as well as the sovereignty and political activities. In the same way, such a right is also applied to the interests of the state's rights and the value of civilization.

In advance, I affirm that my interest is only to apply the legal principles of international law, justice, and above all, in the interests of the confirmed predictable consequences for the European criminal states, and, as a consequence, inevitable.

Every situation has some forms of consequences, and I use such a situation according to the strategy of these consequences and legal justice of a political nature. My interest is not to create an act of provocation against international law, my goal is not an act of crime and an attempt to violate the rights of any foreign state. That is why I am allowed to move forward and organize a global movement for our common victory.

Our rights are simple, and in the first act based on simple legal formalities. European governments illegally and fully publicly organize apartheid crimes against a foreign state. European criminal states are thus violating the international law of the principles of the UN Charter and of Article 1, & 2. That is, crimes at a level of truly inalienable nature. The crimes which, in turn, mean violation of the right to freedom and peaceful development of my government, and thus the implementation of acts that reaffirm the blockade for my ability to

communicate internationally.

In this case, further means that the European criminal parties of countries have committed crime by stopping the development of my civilization, and this gives rise to a debt that must be fully compensated for in the interest of international law.

Stopping the ability to develop my government of the country and of civilization means again, severely damaging the right of my development and thus activating my plans to support the development of all the foreign governments of the countries and their civilizations. This creates an act, above the basis of violation of internationally recognized rights, for free trade between states and mutual peace development. This is the situation where your states have the same legal claim, to establish their own arbitration proceedings and thus to recover lost cost be names in your Main State Courts, and to centralize the strategic force of the judgment in the form of a global association of states like the International Tribunal. Of your state multilateral rights, and thus, together, with this global power, ensure the creation of a strategy of the dominance of global justice against a criminal entity, thus ensuring full assurance of the victory of justice and indemnification of your states.

The values of the lost development of your states are high today. According to the measure from 2005-2007, your states should be at the economic and economic level in the form of today's most developed countries. Modern transport routes, advanced industrial development, strategic growth of agriculture, scientific development as well as education, advanced architecture and new cities, real civilization values a responsible comparison to the maturity of USA, France, Germany, Japan, China, most development countries of the world.

In some interests, my projects for our cooperation are, for example, the development of cosmic civilization vessels designed to travel beyond the galaxy, as well as the possibility of setting up our bilateral and multilateral planetary civilizations, which have nowadays been attaining the maturity of civilization A much more successful plane than the global economy budget for the whole year at the planet Earth.

It is real, and I fully guarantee the veracity of my testimony. The value of the loss from economic development in my own civilization is over the value described by the mathematical equation as (theoretical calculation of Gross Sum, 2015)  $845\ 000\ 000\ 000\ 000 \times$  the value of the Gross Domestic Product of the Earth in the whole of 2015, and in the same sum then the result is repeatedly the sum of each Second in a calendar year with 365 days. Such a result is the value of my government's economy, and in the financial currency Euro (€) recalculation. No financial deflation or market-to-market imbalance, all of the founding products with a price-regulated price based on capital market principles such as consumption calculation and raw materials, based on international prices, thus calculating the price from the value of the first founding development step to the period of full civilization development.

I understand that for many, such a result is probably impossible, but for me, this economic budget is a standard strategy for the development of civilization, and also today a legal right to recover compensation.

This means that, as a result of the full effect of the Global Compensation Act on behalf of the States, the European states involved in the crime expect only bankruptcy and their civilian disappearance.

European terrorist states cooperate on acts of global crime, organized cooperation at international level, to the full extent of their own policies such as the government of the country, full cooperation at the level of state services and so on in the majority structure of the national society as a group of the legal name of the state. It really achieves the nature of the state which is not possible even legitimate to be recognized.

The European countries have jointly robbed all countries of the world about their legal and regularly claimed rights of free and peaceful development, which is becoming the main strategy for the development of the world in capacity conversion. The European Terrorist States have thus committed crimes that are detrimental to the first development of my own country and, at the same time, to the detriment of the activities of my international projects, which also mean plans for the development of humanitarian missions to eliminate world famine, lack of medicines and health centers, lack of schools and education, HIV/AIDS, other problems of today's world, and such consequences are again in the legal responsibility of the European Terrorist States.

The European Terrorist States and their representative politics are well aware of such responsible importance already in 2003, but no one has begun to prevent these consequences of illegal blocking, so responsibility for such consequences is fully claimed. The consequences of this format include, for example, the silent death of more than 350 000 000 people worldwide, people who have died of hunger and because of the inability to heal.

Genocide 350,000,000 people, that is, more than 6 times the prediction of the Second World War genocide statistics. Under today's international rules, it is a real act of global terrorism! Damage to the integrity right of more than 190 countries in the world is now more than 20 times the number of occupied governments in the Second World War. Statistics that are today evidence of a real situation at the level of a formal global war, but which, in real terms, rapidly outpaces the criminal losses of the Second World War of 1939-1945.

Therefore, Territories are legally recognized as terra nullius (occupied by terrorist group), and according to the legal system of today's world politics created since 1945 - to present and future generations, there is no possibility for any other country government to recognize the legitimacy of European Terrorist States and Governments. Definitely, the territory of these states is terra nullius only.

It is true that the territories remain in the claim according to the remaining debt, which in the value of the major decisive majority by law and justice deserves to be paid for me and my government and civilization, and I thus acquire internationally active rights that prove that I am for you and your states. A truly strategic partner for whom such a partnership is beneficial, because this capacities claim at the level of the main difference therefore also opens up new opportunities for implementing my other international cooperation strategies that are really profitable and prosperous for you and many more. Than today's practices of claiming direct compensation.

Our cooperation can build new values at the level of the global outlook of today's world and a new significant step in the history of human existence and the political world. But I therefore ask for genuine cooperation in order to achieve the success of our interests in both legal and deserved justice, and this also means applying the principles of international law.

Today, I certainly will not ask if your policy will be decided in accordance with the principles of friendly relations with the political figures of the European Terrorist States, and in doing so I stress that it is necessary to respond according to the rights of the legitimate situation and the legal interest determining the security, but I present the fact that these European political figures are truly responsible for global crime, and your support for them only results from the risk of global and destructive opposition also against you and against the future of your states. To support the European governments of the countries is merely an act of global crime which is really much worse than during the Second World War to publicly support Adolf Hitler or to be in his criminally responsible situation and therefore such a real criminal must also be liable to be punished.

I hereby confirm your duty to inform all the political parties of your countries today, as well as other mandates, which in that case are required to punish all those who have refused to respect legitimate rights, and therefore they have severely damaged the rights of your states.

My offers to you are fully legitimate, and for your countries, they are always profitable, at the level of today's choices, my offers are the best possibilities for success and benefit for your countries. If, in this case, your government's political figures do not want to respect the legitimate rights of your states, then in this case such political people are really criminals against your country. The factor of greatest treason and disaffection, fraud against your state, and thus all present and future generations, have open and just rights to fully condemn all the criminals of those criminal networks that have carried out the greatest historical betrayal against your country.

Whoever damages the rights of your state, because of his friendly attachment to a terrorist subject, he is therefore a person who strongly damages the rights of your nations and their future. He therefore becomes the enemy of your country, the main enemy.

My goal is not to harm and damage your future, my goal is not to interfere with your integrity and state principles, I'm just building cooperative acts that are meant to grow you and your countries globally, but it is not in my interests to rob your country. Therefore, if there is an opposition in your government, morally, I am much more valuable and more sophisticated for your country than there are terrorist people who, despite their crimes, present themselves as the representatives of your states.

I know that such a European crisis can actually have disastrous consequences for European countries and their civilizations, but that is precisely the reason why today I am trying to contact you and thus to achieve the capacity we can jointly prevent these catastrophes, but also to prevent against the development of a terrorist network in your nation's structures, and the creation of the same consequences of this disaster risk in the structures of your country, state

and civilization.

International law is a legitimate matter governing the entire human world, terrorist politicians are criminals who are destined for immediate liquidation. Everyone owns full rights to exercise legal rights. UNGA conventions on the duties of police and civil servants, everyone can make use of today, tomorrow or any other time, but the later and the threats against you.

Today, above the basis of the outcome of the European Terrorist States and their legal transformation of territorials to terra nullius, in my current rights the capacities majority of this territorial claim, therefore my interest is to create an act transforming the estate of terrorist entities into the format of the World Diamond Alliance as a system of common sovereignty among all states World.

The legal entitlement is in full right and with the foundation under international law, which is recognized by the overwhelming democracy of all the states of the world, and therefore there is no existence of a legitimate right that can in any way contradict our rights. This means that today the World Diamond entity, as an open space for the sovereignty of all our states, is now fully legitimate.

#### **UN Charter,**

It explains the legal principles of Artillery 1, 2, the guiding principles of the rights of today's world system of political rules, and the obligations of states and governments. All these principles have been violated, and that is how the debt is incurred. Crime at such a level automatically means bankruptcy of the government and the state.

The debt, which is so high that there is no way to pay this debt, the European states bankrupt and thus the territory of Terra Nullius. The only way to stop this result is the United Nations Security Council's veto, when it decides to legalize the crimes of the European Terrorist States that have outgrown the statistics of World War II crimes, and that is why such a veto is an impossible solution. However, if the UNSC decides a veto against the matter, then the UNGA states have the right to choose the principles of the UN Charter. In the same case, according to the next version of the UN Charter, the UNSC must still respect all the principles of debt claims, and that means that the European criminal states are going back to bankruptcy. This act can not be stopped even if the UNSC uses veto rights.

Debts remain in any case, and the rights establishing the result as a claim to the legitimacy of World Diamond is so unstoppable. Full legitimacy in any case.

Until such time as the World Diamond's International Alliance territory is used in full force, another state may not take over sovereignty or territorial jurisdiction until such time. Territories are the legalized property of all countries of the world, and in the event of a violation of such a principle, the act of global terrorism, which means the open right to use weapons of mass destruction, is confirmed.

In this case, the UNSC owns only one option that implies the exercise of the UNSC's rights to determine the self-determination of the states of Europe under the UNSC, and each UNGA State has the right to confirm such a decision, in or

before.

Consequently, the UNGA Convention on Cooperation for the Prevention and Punishment of Genocide, as one of the formats defining open claims. That is, if the European Terrorist States together supported the genocide against 350,000,000 people, it is again confirmed that all the countries of the world have an obligation to cooperate fully to replace the government of the terrorist states and the nature of legal claims on debt formality, The issue of the possibility of internationalization of Terrorist Territories as an act of cooperation for the suppression of the execution of entities committing genocide on account of its active existence.

The Convention on Cooperation in Prevention and Punishment of the Genocide Act is the principle giving legal entitlement to a fully open recovery of all criminal politicians, as well as persons related to their terrorist network. The European states have the same obligation to give such criminals to punish.

The legitimacy of the European States is stopped by international law and therefore everyone has all the rights to immediate recovery of all persons involved in criminal involvement and without any entitlement to the integrity of these states, as is also confirmed by the UN Charter in Articles 1, 2.

UNGA Convention on Political and Civil Rights as a document confirming the principles of debt accountability and securing the function of states. Obligations of states that decide on the real function of states and their legitimacy.

In the European countries there is no legitimate Judicial Justice, the corruption of the courts and, at the same time, the election of judges only those who are not personally responsible for the judicial professions, or they are acting in the interests of the criminal network. Falsification of court proceedings or total disregard of judicial duties and interests of state justice, totalitarian regime.

The police do not act according to their duties, and fully cooperate publicly on the interests of the crimes. The illegitimate conduct of the police confirms the activities at the level of the true form of the fascist state.

The police promote falsified reports, create false interrogations, extend controversy, liquidate actual evidence, refuse to cooperate against the terrorist movement, and publicly support the development of the organization of a fascist criminal group nationwide. Many European criminal gangs have already transformed their system of official security into the form of a terrorist police with full inviolability and no one can exploit the possibilities for achieving the success of law enforcement against crime and at the same time damage to the terrorist network at government level.

Police activities are evidence of the full form of governments and states at the level of real fascism, just as it did in the period of Germany before the Second World War.

Country governments fully reject responsibility, even blocking the possibility of taking legal documents so that a terrorist state can not be convicted of acts of crime and non-respect of international law.

Some governments, such as France, have already transformed their

territorial division of overseas territories into state independence in 2008, and have also made a monopoly to prevent their criminal links to overseas territories, but at least five years after the claim of illegitimacy Government has been confirmed by international law.

Turkey, for example, has already declared a false coup of state (2016) to close the vast majority of civil servants, as well as generals or important persons in state security, in order to allow the Turkish government to assume full absolutism for the government for a criminal purpose. The Turkish government and the constitutional amendments to the constitution of the Government, the national vote of 51% of the votes confirmed the victory of the government, of which several million votes were falsified and without envelopes, as well as opposition votes that could be completely liquidated. Main supervision is carried out by the OSCE, an institution that does not at all do prevention against Europe's crimes. The US is developing similar strategies that are designed to fully empower government leaders, falsify national polls, and influence the media, and the US now has international criminal responsibility. In addition, the United States has been the main source of terrorism in the last 18 years and is publicly supported. The Czech Republic fully falsifies national elections and blocks the freedom of the media to fully stabilize European terrorist networks. Today, such practices support all European countries and develop this interest.

All the states of Europe are fully related to the terrorist network, as well as developing their network of criminal partnerships on an international level.

The governments of the countries are fully violating the rights of international rights and refuse to cooperate for a peaceful resolution of the conflict. No attempts at reconciliation, no attempt to legitimize the dispute, as well as European policy, is developing international monopoly acts to maintain the stability of its own governmental terrorist network, and despite the threats of the first global war that can threaten more than 7,000,000,000 people Around the world. European terrorist governments are a truly open threat to the emergence of the First Global War and it is therefore necessary to completely liquidate such entities, even with the UNSC's authorization, or without UNSC authorization.

The current situation, the European governments have already committed many assassinations against innocent people, but also against politicians. Aircraft shooting, murders of civilians, often weapons of abuse for tornadoes, tsunamis and earthquakes, or the spread of viruses such as zika and ebola, and the transmission of such an information for many years as a threat to such a situation. Cold-War Crimes that are already proving that European Terrorist States are important and legally open to launch full destruction using WMD.

Therefore, under the UN Charter, UNSC obligations as a UNSC duty in a special situation to use the UNSC's right of determination of self-determination in accordance with the UNSC's resolution in a resolution, but not to harm any of the parties.

France, as a full member of a terrorist organization, does not have the right to sit in the UNSC. The US and Russia as states that support the monopoly of terrorist states and protect their criminal development, so the US and Russia have no right to sit in the UNSC. Russia, after the Krimea peninsula, as a state

demonstrating their interest in the application of its own criminal strategy against international law, as well as today's public demonstration of attempts to exploit the situation of European instability for the purpose of taking over the territory of France even in the event of illegal influence on society and state voting. China today as a state that seeks to occupy the territory of the South China Sea, and has long become Russia's main partner in the occupation of the Crimea peninsula. The United Kingdom has still not yet been able to fully rule the government over international law.

Today's UNSC functions with the same foundation as the full representation of Adolf Hitler in his 1939-1945 period. Adolf Hitler represents the UNSC, and this is what realistic facts represent today the crimes of the First World War, with the risk of liquidating more than 7,000,000,000 people, unless these criminal groups are destroyed immediately.

In legal process cooperationaly, The current UNSC administration, full incapacity to guarantee international security. Genocide in Rwanda, fully free of investigation and / or cooperation against crimes. Bombardment of Yugoslavia, fully supported crimes. Genocides in Iraq and Afghanistan without prevention, as well as the lack of response from Osama bin Laden's terrorism. The current problems in Syria, without investigation and without cooperation of prevention. Western Sahara under the apartheid from Morocco, for sixty years. Cuba over sixty years under the blockade, without a fair help from the UNSC. Palestine in occupation and murderous murders. ISIS could be mobilized in France in 2013, and then fairly steadily developed in the territories of Iraq and Syria for over three years. Over sixty million displaced people from 2010 until today, UNSC knows that my own open area for refugees in the North-East Zone and even civilization development plans for millions of people, UNSC are a fully incompetent entity that is not at all responsible for providing the administration World security.

UNGA States have the right to act to fully deprive the UNSC of the legitimacy of the UNSC and to replace their positions with the ten elected, unstable UNSC members, thereby ensuring much better security for the world, as well as removing the bureaucratic monopoly in favor of UNSC states who are deciding on the function of the whole world. Tries to openly block inconvenient facts against these states, and with their threats of civilization liquidation against parties that favor justice.

UNSC states act in opposition to the UN Charter and the founding of Articles 1, 2, and therefore the UNSC loses legitimacy. The Right of World Diamond The International Alliance is a fully legitimate government that can be used today by every state from around the world.

Following the UNGA Convention on the Rights of the States for their Economic, Social and Cultural Rights, it is confirmed that the UNSC is immediately obliged to ensure the transfer of the sovereignty of all the criminal states to the hands of the WD Alliance, and thus the UNSC's Resolution on State Self-determination as well as the Charter of the United Nations Mobilization of all states for the purpose of military intervention against a terrorist entity.

**In such a view, we are the ones who are the winners from the beginning, because our rights are genuinely fully legitimate and such rights become much greater legal domination than the UNSC's claims.**

This really proves that the EU must not be a body that is accountable, and any legality of this entity loses all its value. I am therefore a person who possesses all the rights and a legitimate position that is much more important than the European governments, so I am today the main political representative of the EU states, and thus rightly a legal monopoly to influence the international communication and relations of the European states with other states and supranational institutions, Due to the illegitimacy of the European states, as well as the illegality of any contracts of the European states, on the average from 1998-2003-2007 and up to the future.

I know many other legal formats that give full rights to this act, but legal strategies can be presented in another document, or in advocacy need's

**ID's Communication for the Council of Europe and the European Bank:**

<https://www.docdroid.net/sdRiNXV/>

**ID's Communication for the European Union:**

<https://www.docdroid.net/R3IwF2M/>

Today, my goal is to support the foundation of communication for the possibilities of our cooperation and thus to create a full organization of states such as the World Diamond International Alliance.

The World Diamond International Alliance is a body that provides many important positions for your countries that are significantly more beneficial to you and more important than today's forms of cooperation by states such as the United Nations, or the use of Multilateral Funds.

The WD International Alliance gives you many significant historical advances for your peoples, and it is really profitable to really appreciate such opportunities.

The WD International Alliance is your own country that is always open to you, and yet the foundation for the centralization of global networks of civilizations that give you a much more advanced and significant opportunity to develop, take advantage of global collaboration and profit than your Own country and civilization.

The Center of Civilizations from all over the world, the country that is under

the sovereignty of your country's government and all other states of the world, with this right and with your right to your citizens and national interests, to use our common territories as truly a country with a fully open right of access.

World Trade Center, a territory developed into a globally open market and the growth of the trade interests of your countries. Thus, the value of the economy of a common civilization is consequently shared in banks among all the alliance states, and therefore the value of your own country is originally gaining much more prosperity.

The center of all professionals at the level of politics, business, social networking organizations, as well as scientists as well as experts in many fields of the world. Always sure that your development will be based on the ability to use the global intelligence of mankind and therefore to the benefit of your states.

The full rights of your governments to create new multilateral treaties on the bases created by the values of the joint ownership of territories and the sovereignty of the territory as an international civilization, and thus the emergence of a new interface of international law with the aim of strategic development over the vision of a unified humanity. The WD Alliance is based on the nature of its own territories, which is a sufficient civilization resource for the development of new world political world relations, and for the benefit of all states.

Ensured the right to exploit cooperation with a globally centralized network of all parliamentary political parties, non-parliamentary political movements, associations and NGOs, together with media agencies from around the world, thus always having the ability to use global intelligence for the purpose of your state, thereby organizing your national interests. The level of global misfortune.

The World Army's Center, and the forces that are always on your side in the global network, and so will always be the strength to defend and protect your country, but also much better than promised protection only under today's international law that is not sufficiently active to protect and protect the legitimate Interest at the level of diplomacy or the direct interest of the criminal movement. The WD Alliance is based on the Terrorist Termination System within just thirty minutes of the beginning of the conflict.

A world-centered state entity that establishes tangible own security and information agencies in favor of the international interest of Alliance members and thus enables the use of the right of world information centralization in multilateral co-operation to ensure significant progress towards your values of international domination and the ability to use stabilization cooperation with the guarantee of the originality of information Interests and security activities and thus also such protection by the global power of protection.

WD Alliance uses Territory survivors of European terrorist entities in its second base, but as the first basic nature of space, the territory of cosmic view, the first beginning of the 5 Galaxies as territories with its own center of population, and the mining space infrastructure network, industrial and agricultural centers, As well as the rights based on the format of military bases, or the use of a network of new kinds of civilizations and strategies for developing the WD Alliance territory into a Super Galaxy group, 1 000 000 000 000 000 000 planets in space.

A system in the form of a common economy that also enables your countries to use the right of self-regulation of the bilateral market as well as the growth of your civilizations from internationally shared sources that are the basis of a dominant civilization.

Territories that belong to your countries and are always fully open and accessible to you. The possibility of building common transports, the development of cooperation in science, the development of trade under the multilateral economy agreements, the planning of joint military missions and the open possibility to use the cooperation of the trans-operations from WD sources. There are many significant opportunities that are also much more prosperous than your current contacts with the illegitimate and terrorist states of Europe and their partner crime networks.

Values that are already legally usable for your states and governments for the purpose of alliance cooperation and joint building, are always free for our countries to have free access to our countries and the opportunity to develop and grow freely, mainly because I am entitled to such rights I am willing to provide for such a decision on the use of the territories claimed by the federal government Imperium of Diamonds.

Of course, because of the nature of the European states today and their illegitimacy of the agreements with foreign states, and therefore also of the nature of my right, I am therefore immediately offering the opportunity to jointly establish some treaties together with your states, in order to extend our cooperation as my representative of the European Territories and such rights of States.

Agreements on civilization development, the right to cooperate with the funds and the use of a common civilization economy, the right to cooperate with banks and commercial corporations, as well as other rights for military and territorial use, any agreement of this nature, but for the sake of the present situation, so I open for you full rights For open spying and also for military movements.

It is predictable that, yes, European terrorist governments will protest against such a possibility and there will be regular blockades and attempts of terrorist opposition, but such acts are not fully decisive because my right is legitimate and confirmed by all international principles as well as by our values Domination based on a network of global democracy of states, armies, and security agencies.

European states will protest, but their legal nature is only the same factor as the sub-state terrorist organization Islamic State of Iraq and Syria or ISIL.

That is why it is fully permissible for your states to apply all kinds of strategies for the decentralization and liquidation of this terrorist entity, which is, according to international law, only destined for liquidation and without any respect.

Terrorist organization at the state level is a format of a criminal movement that does not have any rights and rights to use rights at the level of international rules such as the UN Charter, the UNGA Convention, International Humanitarian

Law, or the World Trade Organization trade agreement.

That is why your states in multilateral cooperation can apply any strategy of espionage, sanctions and military invasions against a terrorist subject.

Sanctions, acts of logistics decentralization, espionage, infiltration, kidnapping or targeted murders, blocking and embargo, confiscation of assets allowed to stabilize terrorist groups, liquidation of the central networks of the European Terrorist policy, everything is legally permitted and I confirm such rights, States and their government services that will use our communications. The legal right of European politics and states is only at the level of pirates and terrorist groups without legitimacy, and it is not an illegal law what can stop such a strategy of preventing this piracy.

The only threats that remain are only the threats posed by constant international support from foreign states that, for example, because of race or joint economic dependence, as well as joint knowledge and extortion of evidence of criminal responsibility or attempts by other states to abuse the current situation For their own interest, such states are today major partners who support the stability of the European Terrorist Network, but such governments are gaining much more loss-making and risky positions than the possibilities of our cooperation today.

Such threats from the support of these countries are not a risk at all, but it is necessary to anticipate our cooperation in this regard, above the basis of a slow development that will ensure the urgent profit of our parties and the strategic removal of irresponsible and corrupt politicians from the partner states European terrorist organizations, states of the European Union, the United States, are also very likely to be the United Kingdom of Great Britain and Ireland, Canada, Australia, Russia, which exploits the situation for its own benefit.

In today's nature, we are today the major democratic majority of the world today, and the states that support Europe's stability today, there are only two options, the first option is to disappear together with the European Terrorist Organization or, in the second best case, join our legal party and As well as supporting the stability of the international system of politics and security, as well as the supporters of the opposition against fascist Germany during the Second World War.

However, if such states continue to support the European Terrorist States, such a movement forces the other states, as a major democracy in the legal world, to adopt a position of self-defense and defense of the stability of the international legal security system, which would thus be entitled to create its own arsenal of weapons of mass destruction, Thereby also ensuring the ability of the terrorist states to be liquidated.

It is not possible to allow the terrorist state to develop at international level, thereby endangering monopoly opportunities for further decentralization of the world system which, in such an inactive form, will cause only other war threats against your states, especially today when this crime object is to be destroyed Already in 2000, as well as in 2008, 2010 fully confirmed and with public evidence that this entity is destined only for liquidation and disappearance.

Terrorist states are now threatened with the First Global War, and therefore any state that does not want to reject its support for this terrorist entity, such a state must be vigorously and irrevocably informed of its immediate duty to denounce all relations with such forms of criminal states.

Terrorist states are now threatened with the First Global War, and that means that your country governments have full authority and a real duty for their own security and survival, follow these facts, and secure a technology-based defense capability that is capable of ending the threat of war at our Act of immediate destruction of terrorist networks or civilization.

My personal plans for weapons of mass destruction have sufficient capacity to ensure the immediate destruction, for example, of all military infrastructure on the European continent, due to NATO cooperation also across the whole of North America, and also due to Russia's monopoly attempt, also the military infrastructure of the Russian Federation, China, as the state's biggest threat.

Our mean enemy is terrorist Europe, and in my knowledge, USA, Canada, Russia, China, is countries which is mean power in stabilization of terrorist entities be their own partnership in diplomacy and trade.

Technology plans are capable of doing such a destruction for just a few minutes, and this means that this threat of the consequences of the First Global War is fully suppressed at the risk of risk, as we, as an alliance on the global level, actually have a much stronger dominance than Only the European Terrorist Networks.

The Risk of the First Global War is power of democracy for name of 7 000 000 000 people, and therefore much strongest political power than the UN Charter or rights of UNSC.

**Link to the ID list of weapons of mass destruction:**

<http://theimperiumofdiamondsgovernment.populiser.com/discussion/world-safety-security>

Foreign states that support European political stability are truly in the nature of the value of real power at international level and in terms of dominance as well as of risk, but every representative of such government will always be rigorously forced to respect that we jointly stand on the part of legal and legitimate rights, And this is our difference to those who are in contact with the European Terrorist Policy, which does not possess any values of international legality, and the last status of this criminal law remains only a pirated basis for the claim of terrorist policy, which is a disinfected system of the whole range of international law.

If foreign states do not want to understand that they are directly in their bond with Europe and a common domination for crime, the truly open threat of the emergence of a global war and, above all, with the principles emerging as a strategy of launching global arms for defense and victory, And the full recognition of states for common security obligations, and also use weapons of mass destruction against all partners of the terrorist organization.

The use of weapons of mass destruction against European terrorist states may mean the extermination of up to 1,000,000,000 people, but on the other hand there is a certainty and a fully confirmed fact that these terrorist states already own an arsenal of weapons of mass destruction, and often this arsenal was used for mass destruction In 2010-2015, Nepal, Japan, Iran, Africa, America, in many countries around the world. It is therefore confirmed that the European Terrorist Organization is willing to use weapons of mass destruction against all opposition states, all member states of the UN organization, and that means genocide against 7,000,000,000 people around the world. Therefore, in view of such planned threats, the rights of only 1 000 000 000 people of the European continent can not be respected, especially if they are self-proclaimed citizens of terrorist organizations, and so they support such a movement for the creation of the First World War and the genocide of 7 000 000 000 people.

All the governments of the countries that support such a goal, in their strategy of sustained support for terrorist actors and pirates, also have such criminal networks in their criminal responsibility at the level of international law, and it is not a complex matter to neutralize them.

Neutralization of opposition parties can take place in the act which implies the use of the force of an international terrorist punishment system, as well as the principle of the State's duty to use its own secret services for the purpose of punishing and eventually killing all terrorists in the structure of their state policy.

The advantage of this act and the interest in the neutralization process in the form of legal infiltration is also created by strategic rights to inform the services of terrorist states, their civil service, the commander of the secret services, as well as the military generals and the chief security officer, as well as the liberation militias, The situation for the complete overthrow of terrorist policy and the establishment of their own government regime to win over their own duty to work for the removal of terrorist subjects if they support the legalization of their country which at the same time gives them the right to secure the exercise of their claim to take over the sovereignty of their government. It is therefore good, in order to stabilize international peace parties, to promote full awareness and infiltration of secret services networks, army generals and their troops, other police units, stations, media, NGOs, and others. Today, it is best to use, for example, simple autonomous spamming programs to multi-timely encrypt your own email address, encrypt your own IP addresses and MAC devices, email information on e-mail addresses continuously and repeatedly without stopping all email addresses from police stations and civilian offices, State associations, media, corporate centers. People are immediately informed, and people who are active in terrorism therefore know that their free development is much slower and more limited, and they have to respect the principles of international law and the peaceful resolution of the conflict much more.

Any government which opposes international legal obligations in opposition to legal interest threatens its own stability, integrity and the lawfulness of the State itself, and this document, which is related to the principles of international law, thereby also degrading its own international relations and friendly relations among other peoples Are therefore always at risk. Therefore, politicians who are unwilling to recognize my real rights of legitimate victory are therefore in the

form of dissidents of their own states, but also as traitors at the level of international politics, treasurer of their own nation but also of the whole world. Thus, if such people are at least intelligent, each of them fundamentally recognizes that the best strategy is to join our party and thus to support our cooperation and increase the certainty of close victory by legitimate claims.

Crime victory is a long-term and risky fact that can also cause much longer and repeated consequences of conflict and rebellion or resistance and regular extortion, but otherwise, in the view of victory over the legal base, it is a victory that is without risk and any damaging impact on Future interests of the winning group. Legal victory always means the opportunity to use the unlimited growth of global co-operation and therefore to unlimitedly strengthen our own strength and growth capacity above a much higher level than the terrorist opposition, which at this time is losing its own stability and prospects for international friendship, because the criminal entity has to respond All his contacts are therefore naturally intended only for his betrayal and abuse for the benefit of those who are in the presence of legal parties, those who have pride in such a betrayal of the criminal party and the joy of pure conscience, and therefore they deserve the success of joy also Such a significant profit, which is so an encouragement for the whole world. It is true that in the size of the offer of profit from the terrorist states and in the ratio of the profit from the offer to me, it is always a drastic difference which is advantageous for our benefit.

The offerings of the European Terrorist Network are the minimum factor, as do the same profit factors, based on my offers, which are far above Europe's offerings. What Europe offers to you, I offer you the same but with many other advantageous partnership options that drastically exceed the maximum limit of European offers and their capacity.

Let's face it, European political networks have already lost their own legitimacy and their rights to the subject are only at the level of piracy and international law, which this group calls a terrorist organization that can not be legalized or legally supported.

Terrorist entity is merely a terrorist entity and it is therefore fully open to the right to actually apply such a statute at all available levels.

Each of you is therefore allowed to apply any practices, and I am also willing to cooperate.

**I allow;**

Political extortion, constructive situation creation and corruption choices for the possibility of presenting Europe's crime on the international political and operational network, as well as for the purpose of apartheid in the abuse of your terrorist threats, the monopoly on the international market and the disqualification of criminally responsible competition in blackmailing, hiring secret services for Trade embargo and violation of contracts for terrorist networks, such as direct embargo of deposits in your bank accounts when threats meet the obligation to pay regularly for your own stability of the terrorist state and in full blackmail, and in a similar way and the possibility of using, for example, strategies for intimidating terrorists In order to force incitement to bring in internal information and important data, it is also possible to apply the

strategies of abductions of family members of terrorist persons and their imprisonment, or Murders of terrorists, silent assassinations, bombs in cars, bombs at office buildings, blackmailing and hard provocative tactics, because the destruction of a terrorist entity is an act a legal form of destruction of a terrorist subject, and I am giving these strategies a negotiating strategy of full agreement, and each of you Owns the right to use such strategies for the constant growth of our global power of legitimate parties, and therefore the weakening of the terrorist subject. It is a legal act justifying the strategy of decentralization and neutralization of a terrorist group.

If a terrorist entity wants to activate an opposition reaction, it is therefore open to respond, and realize that this state can go through liquidation by using weapons of mass destruction, and so immediately with a mere hint of opposition and rejection of obedience. These people are criminals, and the security strategy does not prevent them from building robots from these people to manipulate, predict, limit and control such a person.

An advantageous strategy is a silent kidnapping act and the immediate use of, for example, volatile cessation substances that allow hypocrisy to bring all political and important states to hypnosis and thus ensure our ability to fully regulate the function of these terrorist states directly from their internal environment. These people lose their memory at the act of hypnosis, they forget about such an incident, and they say at home that they have been friends with their friends all night, or they stayed in the car where they slept for two hours. These people are under your manipulation, and it is easy to use them to gain more information, or to influence their political interest, or to control the mass society through a puppet.

In any case, it is possible to kill such people even more simply when they are not needed. Just give some suggestive signals, and immediately comes a heart attack, a pause of breathing, stomach ulcers, dysfunction of important organs and even suicide.

Hypnotize of European terrorist's policy, It's like today's social trends, catch your Pokemon.

My technological proposals make it possible for yours to really detect all the important people of the European terrorist policy and to take them for this task which is very profitable for us.

At the same time, to the interest of civilization stabilization rights of my country governments ID's provides the right to cooperate bilaterally on a trade relationship where ID's pays € 1,000,000,000,000 in DMD for the purpose of consumption and strategic development of your civilizations to enable further ID's consumption at a financial operating frequency of € 10,000,000,000,000 in DMD, for the base of our common market.

This is for sure that I am also willing to sponsor relations for the development of joint cooperative projects, and immediately I offer the possibility of developing many forms of important technologies.

**Monitoring technology:**

A Camera system that can monitor the movement of civilization in a cosmic or satellite environment. The satellite can use a camera system that is built for high pixelization at the level of face recognition for a monitored area of more than 20 × 20 kilometers place. This type of camera is really simple to construct today and many possibilities, production can be created at the level of large capacity production.

This camera system will be used for engineering links to electronic processors that can calculate each monitored detail in the maximum pixel capability of the camera. The processors therefore compare more than a few million faces at one point, find all automotive registration marks, track traffic on highways, track trains, shipping routes, air routes and many other tasks. Therefore, this system constantly compares the acquired graphical data between the images in the graphical memory in which the faces of criminal persons, escape criminals, as well as the monitoring of suspects are stored. Therefore, when combining this technology, it is immediately possible to find all the policies that need to be neutralized.

It is only necessary to develop a 3D model of the face based on cameras, television, and personal meetings. Consequently, it is preferable to measure the height of the figure and the thickness. In the case of detection of the subject being sought, it is advantageous for the first to observe this subject and subsequently to identify it in detail in order to display it.

The technology of these cameras will instantly find all the political people in any size of the city, tracing their friendly networks and personal contacts, the types of cars they use, their registration marks, and also the addresses of the houses they visit, even the system will find the regular routes that such a person uses.

That's why it's easy to trace and take those people right away, these are the people who openly belong to you and in the interest of international law and their illegal status as a world terrorist, so you can really do anything with these people.

(ID's plan 1998-2000 // USA alienation 2015 = no respect for rights)

### **Transport technology:**

Technology that allows for us, for example, transport routes ten thousand kilometers in seconds, so your secret trips to European Territories will take place much earlier than when European Radars record and verify movement. The kidnapping of terrorist politicians can only be delayed for only a few seconds, within five or thirty seconds of kidnapping these people in your country.

The technology is based on the Iono electric power system, which makes it able to fly without wind turbines and then use the cycling engine systems to provide a speed of motion at a level of 100 million kilometers per minute per hour according to technical regulation.

This system of technology must also use insulation against radiation, isolation against electron radiation, its own supplies of respirable atmosphere, and its own systems for stabilizing internal atmospheric pressure. This makes it

possible to use this transport system to travel to the orbital line and also to visit the territories of the terrorist states immediately within a few seconds, without identifying them.

I would certainly also ask for your support and liberation from Terrorist Territories because I am illegally detained here and blocked at liberty.

### **Reality Calculation Technology:**

Technology excellent for espionage, and highly advantageous for espionage of European criminals, but also ensuring your own basic defense capabilities against the same kind of espionage by these people.

Technology is already being used by the European Terrorist Group and truly active, at the level of global terrorism, in confirming from many directions of public data of foreign states and nations.

Camera technology for civilization monitoring is synchronized with real-time technology. The camera monitors the city and acquires information about the enterprise network, the movement of people and the street system and their breakdown, other data that processors calculate according to a certain mathematical multitude of equations, and thus obtain many forms of computational results that can then be used to research future civilization activities, And the movement of individuals. Similarly, individuals and their networks are also being observed. Real-time processors discover a lot of important information about the subject, as well as provide detailed predictions of the future movement of these people, as well as predicting the best moment for the possibility of abduction, or an act that is beneficial to stimulation for our benefit.

The technology will provide you with the ability to monitor the movement of military equipment, their development and purpose, the operation of military infrastructure, as well as its future development as well as its ideological function. Technology can also reveal secret information about other technologies of this terrorist state, and so it can guarantee the ability to predict such technologies for our defense capability.

### *Result;*

Such technologies allow you to instantly provide capabilities without detecting and detecting yourself, simply taking all the criminal networks policies, monitoring them for a long time, and also simply detecting their personal and professional relationships, and then using them for hypnotic manipulation as well as their strategic use in Structures of the terrorist network to our own interest.

Abductions without detection of such an act can be practiced often, even several times a day, and no one can notice such an act. Each of you will therefore always be able to ensure the abilities of a hijacked subject, for hypnotifiable suggestions and the ability to instantly re-launch them at any time, and repeatedly, even with an act of wiping out the memory of this incident ten times a day, a

hundred times a week.

Many secret services have strong capabilities to control hypnosis for espionage, so this option is very easy for you to use. It is a good idea to get fingerprints from apartment and office, personal photocopy of personal calendar, contact lists and cards, numbers and copies of identification documents, but also fingerprints and scribes, body x-rays, and other useful data. The second act of secret kidnapping is used to initiate interrogation methods and to understand the psychology of the subject under review, for a much better scope of manipulation strategy. This subject can therefore be used for subsequent manipulation and regular control.

This means that such terrorist politicians will then be our own puppets that will bring out many important information from the structures of the terrorist network of politics, and will unknowingly pass them on to us as well. We are able to know all of their data that can be further identified from hypnotic interrogations in a rapid kidnapping, but also from media speeches and personal interviews, because of hypnosis suggestions and response responses, but it also reads information on the type of signature on contracts, The type of voice, the type of movement of the body and the face, the emotional response or other kinds of choice of questions and answers or movements in the public society, and even organizing a system of triggering and responding to those politicians who will jointly organize their new Public or secret interests, and they can fully ensure our ability to develop.

The European Terrorist Network can therefore reveal all the important information and we therefore have full rights. Our infiltration is not an act of disrupting a legitimate state. Our infiltration is a step of a secret disruption of a society's network that is completely free of legitimate principles, and with its own creation over the infiltration and radicalization of criminals in the European policy network that is transformed into a terrorist network.

**ID's New's Dispatch, testifying about the legality of European governments and their origins against the current status;**

<https://www.docdroid.net/WFP3DU5/ids-news-dispatch-03-2017.pdf.html>

The main objective is to continuously and combinedly and unpredictably expand stressful factors according to all available factors of stress growth, factors that can be achieved through internationally organized activities, strategic regulation of sources of political cooperation, regulation of development resources, creation of monopoly and thus creation of the ability to fully influence the development of these subjects And it is still useful for us to strategically apply evidence of your joint and individual domination over a terrorist subject because we both as a legal party and we have such a position and we have open possibilities to fully achieve and use it but with the responsibility to intelligently predict The result of the reaction and the next step of the subject under the stress strain and thus also our duty to determine the pre-emptive strategies of the second phase of stress, thereby forcing each Oristic and criminal subject to neutralize it in a stressful collapse, but to prevent panic from the consequences of stress and corporate threats, because subject for elimination is too active in response, and procedure of law, which guarantee for subject stabile recognition

of his position and consequences.

The best strategy of coercion is to constantly demonstrate common dominance and thus to force and to make the risk subject to full obedience. The terrorist networks of our opposition politicians and each of their members are in a risky position, and each of them knows that their last option is only bankruptcy, so it is best for them to submit to their own bankruptcy, but in such a way that civil society is not compromised; Also at International level.

Today, it is the strategy of the European Terrorist Governments, for example, to undertake cooperation with other foreign states that choose criminal practices and are at risk but jointly know that their joint power can fully suppress the threat of sanctions and attempts to enforce court judgments. Some governments, on the other hand, are choosing the tactics of transforming their regime into full dictatorship, which will therefore maintain their stability from their own resources and create threats to liquidate opposition states that are interested in their own enforcement of justice.

With a slow fist strategy of coercion and pressure by stress factors, it must be constantly evolving to the level of maximum use and full-time.

European terrorist states must always be in a position where their position is fully dependent on the international group, and until the terrorist states are fully stopped and transformed.

The preferred strategy of our dominance is the media. European terrorist governments know that it is enough just to publish a few reports on the actual incidents of European crime, as well as consequences for their state, which is facing mass destruction. Then every terrorist politician immediately knows that their nation immediately overthrow him, slaughtered and locked in prisons, and the soldiers and the police immediately revolt and massively support the government's coup. **Therefore, such a threat is a good stress factor and best prevention against war, or strengthening of terrorist state into fascism.**

Additionally, the advantageous factor is, for example, the silent presentation of information on weapons of mass destruction, in the best technology of my designs, which are capable of securing the subject from the position of satellite and orbital cannons (*UNGA rezolution about blockation of right to use Orbital Cannon's = legal use only in threaten of global genocides, risc open now*), or, for example, from the position of universal airplanes, Billion light-years away, and it's also good to use my information on the technology mapping technology of the universe, and with the ability to detect all centers of civilizations on other planets. Therefore, European Terrorist Governments know that their secret bases on other planets are without a strategic position, and their power is therefore weakened, and with the risks of immediate disappearance.

It is advantageous to immediately apply the World Diamond International Alliance declarations and therefore also ensure the ability to expand our common security, military and civilization centers on the other planets in the universe. European nations will know that we are the dominant subject, and we are also much deeper at the level of international politics.

Another advantage is, for example, regular publishing of photographs on the

street, phone tapping, eavesdropping and faxing, as well as empty mysterious packages at offices and government centers, so that European terrorist states and governments can well know that their opposition parties do not have The problem of visiting their territories and developing freely in secrecy for the purpose of liquidating a terrorist subject. The best strategy is therefore the direct assassination in the public broadcasting of television. In this respect, the best advantage is to secure the transition of the members of the European secret services directly to our parties, and hence the acquisition of policemen, soldiers, generals, police directors or officials. In the event of a complication, then it is not a problem to ensure the act of kidnapping of police officers who refuse to cooperate and thereby ensure their hypnotic influence and consequently their stimulating use for the establishment and functioning of our own military units that control anti-terrorist actions (UNGA conventions on duty of official).

The value of the current police of the European states, only as a fascist gestapo in the Second World War, and therefore is not problematic, so with such police officers also manipulate.

Economic isolation and debt collection strategies, information isolation, and silently informing all European foreign investors about the illegitimacy of European states and the risks of the use of weapons of mass destruction in the territories of European states, or the open threats of global centralization of states for bankruptcy of European civilizations, and also with open law Of these States for the right to confiscate the investments and without paying compensation to the investor parties. It is an advantage to inform the European Trade Association about this fact and thus to incite the instability of the national favors against terrorist politicians who are therefore standing in the European countries only for the sake of such civilizations and peoples to cease. There is no other benefit for these politicians, so it is real that the European states have full rights to know about it.

Misinformation is also a good step to consolidate our dominance, so it is good to use your partnerships in secret service networks for acts of disinformation infiltration by manipulative information that give us the opportunity to stretch the capabilities of using the European Terrorist Authorities and forcing them to constantly waste time, But also for development in indecent matters that are not necessary for us anyway.

Spyware and heker attacks, electronic manipulation of elections, blocking of the communication function, or misinformation through false messages, spreading viruses on computers, or at best it is advantageous to continually obtain European strategic data and therefore to completely cease Europe's ability to develop beyond the integrity of a terrorist state.

The advantage is the direct blocking of development and the cessation of all steps to support the development of these states, the termination of agreements, the abuse of illegality of agreements and the termination of obligations, as well as the strategic growth of investment funds and projects for European states that will use these strategies for their own Development and, as a consequence, before such use is made, such a fund and project abruptly bloody on the other side, thus damaging the economy of Europe.

Today, in the nature of the illegitimacy of the European states, and also because of the traders who are active under the jurisdiction of a terrorist state, it is legal to start ship theft, for example, like the US Constitution, supports the embargo of pirate ships and the division of such property. Today, European merchant ships on the seas, these are free estates that can be freely trapped as ocean fish, it's all yours.

Today, for example, in the nature of European attempts to literally crack my own patent and commercial claims, cooperation between the US, Russia, Japan, and the USA, for example, I am really declaring, and I confirm that even for you, Such as the strategy for the launch of the same acts and thus the takeover, and some internationalization of the patent and commercial rights of the European states, which stands in this way in the position where Europe's markets and trade rights are only in the possession of a terrorist organization and therefore, for you, is not at all law and international law Making it difficult to make use of European patent rights, trade rights and copyrights, as well as registration stamps, for your own development, European technology plans, architecture, agriculture, financial structure, for your states, it is fully beneficial and you can Ask many of your own business corporations that are owned by your government, under the quiet management of your government, or, for example, for the purposes of free development at the level of your state-owned corporation. European Intelligence is a fully open format as an international asset which is a legal form under international rules designed for you and your business interests.

The embargo of merchant ships, the isolation of communication capabilities and the use of telecommunication signal jammers, the abduction of the General Positions for silencing, and the rapid reconciliation of the service crew, is an advantageous act that can be used for some public evidence of the existence of a state with an active interest in full cooperation against the criminal state; You will also be able to fully ensure the ability of the public policy community to become aware of the ability of the stability of political cooperation for counter-terrorist operations. Soon, many other states will embark on the embargo on European pirate ships, and that's why the ability to vote together democratically and silently until we have a full democratic world majority together is strengthened. The embargo can be applied, for example, to soldiers who are masked in a sea pirate suit or some other form of new radical group, and your country is losing the first threat of terrorist retaliation to the European states. Everyone has his own full rights to prove his own opinion equally and to vote accordingly, such is the democratic and diplomatic system of this world, and only European terrorist states are blocking and damaging our future and the rights of justice.

For example, the act of proving dominance is also the first fact of economic cooperation, occasionally confiscation, allowing foreign courts to enforce claimed assets, stopping the protection of European people who are destined for extradition to foreign courts, as well as developing the development of your own state business interests Does not undermine European cooperation. It is advisable to stop attending conferences of the European states and, above all, to stop such contacts completely. The main objective is to fully restrict and stop the ability of European states to expand their interests to the territories of your countries and countries or to your national and international policy.

I have sometimes heard of the murders of European politicians when they visited a foreign country, and I therefore certainly praise such acts, and in any case, I want to support our partnership and thus to show my respect. It is good to kill the political staff of the European governments if they visit your states or they will be in the available zone for the sake of your bilateral and multilateral relations and I am therefore sure to offer rewards too. European politicians must understand that they no longer belong to this world, and they must therefore submit to harsh obedience.

It is also important to maintain the media strategies of your states, to maintain stability and, above all, to increase the resistance and independence of your states over the European countries. This is why it is beneficial to actively engage in the development of a stable intelligence network at international level, as well as the silencing of European states in their efforts to spread controversial information or to bring about radicalization abroad and in the structure of their country. If an artist or reporter or media journal would want to support the terrorist intent of the European Promotion Strategy, it is beneficial to use steps such as assassination against such a person, thereby silencing it completely. That way, other people will be afraid to support the development of terrorist information dissemination and to create a decentralization of society against our interests.

Artists can be disposed of at concerts and public meetings, reporters when detecting their movement at the headquarters of the News Agency's offices, or when they visit the site of a fake act as well as when they come to study. The media agency, which merely raises the interest of terrorism, automatically opens the possibility of applying the act of liquidating such a seat and stopping its function.

It is true that the European states will want to return such blows, so a rule must be created which must be fully maintained and respected. They once against us, so we ten times back and full of strength. If they again for the second time, we therefore only once, but with the result of the complete disappearance of such opposition, and our first act with full proof. Terrorist states are the only entity to be liquidated and are therefore fully open to liquidate them without any threat.

For the strategic endorsement of this rule, it is a real advantage to use our joint act of reaction if the European governments of the countries launch their own acts of crime which in any way harm any other state, therefore we have the right to use weapons of mass destruction to liquidate all the capital cities of Europe, Force Bombs (EMP Bombs) to stop the operation of any electronic operation of the European and Terrorist Partner Networks, and issue a threat to the implementation of the act of full destruction of the whole range of Terrorist Territories, one state after another, for example every hour in the best possible interval, as a practice of forced agreement or in opposition therefore dissaperal. I respect that such a response can be shocking for the public society but each of us must realize that the European states are indeed a terrorist entity which by many criminals many times surpasses the values of the Second World War crimes and therefore the same acts of the Soviet Union in 1945 in the invasion of the Soviet Troops to Berlin and its full conquest, such acts are steps to victory of justice, to consolidate world peace and also to defeat the enemy, that is, to ensure security

for your own states and peoples.

ID's technological types of space cannons can be simply produced in any country of the world, at least 30% of Africa, 80% of Asia, 95% of America, 100% of Australia (~), is not difficult in a crisis situation to ensure the development of these weapons and within 2 hours to completely destroy European Territories. Genocide means killing innocent civilians, not the murder of a terrorist movement that exists only for the destruction of your peoples, and as a threat to the First Global War.

It is good, as part of such a strategy, to also dismantle the European Strategic and Military Centers in the cosmos, and it is good to locate the first such civilization, my technology can prove such an act of locating all European centers within a few days, a maximum of a few weeks. The European development of civilizations in the universe is only a threat to the independence of European governments on the policy of our planet Earth and hence the real confirmation that the European states are willing to launch the First Global War act in order to truly exterminate 7,000,000,000 people in the our world. For European governments, the planet Earth is not an important subject, and European states can immediately begin developing their own civilizations in the universe, and it is really necessary to immediately blast all the space centers that any state can use in a European partnership. Such centers exist only in order for the European Terrorist States to begin the complete destruction of the Earth's civilizations without fear and self-harm.

Any civilian center of the European Force, always immediately destined for complete destruction and extinction, is just the existence of a threat to the human race, and such European bases do not have anything in common with the "common property of mankind" tradition.

It is real that the European criminal parties will want to abuse their current ability to infiltrate and silently transform your own party for the stabilization purpose of Europe and also damage the stability of your states, but it is important for you to be well aware that your own party has a much larger Benefits if you stay on the side of cooperation between legal entities, because if you refuse to cooperate with legal parties, in this case you get a position whenever any other foreign state from legal bonds, this state can always use your own position and thus fully Control and disinform you, threaten you and blackmail, or cause your bankruptcy and disappearance.

Any other state, even if only one state that wants to use legal rights will blackmail you or directly send your country to bankruptcy and disappearance as an illegitimate subject, that is why the state needs only a few steps and you really come to everything, but mainly The rights of the legitimacy of your states and governments will also disappear.

If only one foreign state decides to support your extinction, in the case of your partnerships, that state will gain significant value, which is always the capacity and strategy much larger, more capacious and more important than any offer you can use as a legal or illegitimate party. Therefore, even if only one state decides for your destruction and disappearance, it can immediately mobilize all the sufficient resources of international cooperation of other states with the

perfect motivation of legal interest and thus achieve the real ability of the global power of the alliance of all states, And supranational organizations that have the ultimate goal of destroying you and gaining their victory, which is therefore always a much greater profit than you can offer as a party with the status of a terrorist partnership.

Your actions of our cooperation are highly prosperous for your country and the future of your civilization. New and significant values from foreign sources, a significant strengthening of your civilization level, strong successes at the economic level, as well as the great growth of armies and security networks as well as the gain of new multilateral territories of the European continent and more than five galaxies in space. Our joint victory is an act of defend all mankind, and so is your country and government, which is gaining new and more significant positions on the global level.

The development of the Common Territory is a simple format, and indeed it is also favorable for your parties, which are therefore gaining a freely open territory under the multilateral sovereignty of our states, and therefore our new country which immediately and legitimately nowadays bases itself on civilizations such as Paris, Berlin, Amsterdam, Hague, Brussels, Madrid, Rome, Prague, Geneva, Sofia, Bucharest, Vienna, nowadays one of the most important centers of world society and civilizations.

The division of territories is fair because I offer you the benefits of my rights and entitlements, and I therefore give you a very significant part of the territorial claim that will be used as the sovereignty of your country, your own land and your country.

Today's EU continental appearance, will be transformed into an international alliance WD. This means that today's European Terrorist States are legally recognized by international law as States without the possibility of recognizing their legitimacy, and this confirms all open demands for such a step.

This will create the possibility of centralizing our common transport, the common market and tourism or immigration strategy, as well as a strategy for the common economy and, in particular, our common security that is growing at the global level.

EU island territories, overseas and any non-continental territory will be transformed into territory only under the sovereignty of the Imperium of Diamond's, and thus function as federal states for which a new government will be elected be the state, because I also own all rights to use the full range of these territories I have the right to defend the integrity of my interest, which is therefore determined by the ID's own sovereignty right in the territories of Sicily, Sardinia, Corsica, the Balearic Islands, the Canary Islands, Madeira and the Azores, the territory of the overseas territories of the Netherlands in Central America, As well as the French Territories in Central America, South America, North America, as well as the Pacific, Atlantic, Antactic Territories, the Indian Ocean, the locations of the African region, and the locations of other planets in the universe and thus in the overall federal continuity functioning as a global network uniting All political circles of international politics.

I always respect the rule of law, democracy, human rights, the claims of

security, but also the principles of the integrity of states, and I therefore confirm that I do not violate and do not intend to violate any form of these rights and international legal principles.

That is why the ID's government is further expanding its own interests for the purpose of establishing multilateral cooperation with other states, according to regional and geographical relations between the ties of other countries' governments and such a form of international politics, policy, economics and economy, trade and markets, military and security, education, health, science, and other multilateral centers of global cooperation.

Partner advantage for states that can unite in the interest of ID's military and security co-operation, joint missions and security strategies, along with military business, such as the Islamic Military Alliance, the League of Arabic States, NATO's alliance, Colective treaties of Security Cooperation allince, Treaty of Shanghai Military cooperation, ASEAN, ANZUS, the Atlantic States of South America and Africa, and many new strategic states and supranational groups, therefore ID's ability to develop at the level of real global superpower in military affairs.

Every state that establishes a Declaration on ID's Partnership for Military and Security Cooperation of a Multilateral nature therefore also gains great and significant strengths. ID's territories acquired after the collapse of European Terrorist States allow ID Partner countries to broaden their strategic security positions on Europe, the Inland Sea, the North, the Central and South Atlantic, the Caribbean, together with the Baltic Sea, the Pacific Ocean Many preferred centers, as well as the Indian Sea and the right of part of Antarctica, which is therefore open to the development of some types of military bases and security infrastructure. The network of such an infrastructure has a global distribution and therefore a high mobilization capacity that will be beneficial and beneficial to our common growth and security.

Infrastructure of these military territorial strategy positions is also gaining a privileged position that is further developed by ID's ability to co-operate with other multilateral military groups, which are therefore expanding ID's security space for cooperation and thus guaranteeing much greater strengths in ID's partnerships, bringing many other world states together.

It is already confirmed by this fact that we can jointly be much stronger and more mature than NATO and other European Security Networks, even in the current US cooperation. ID's Partner Security Co-operation guarantees you the ability to partner with the most important subject of a security strategy in case of a risk of an act of war. Therefore, the steady growth of military cooperation for you guarantees the victory victory against crime and terrorism, as well as the assurance of the winnings at the level of full global co-operation that will be brought to you in the future by ID's partnership.

The Imperium of Diamonds, the federal government, wants to use its own strategies for global cooperation to mobilize the development of joint military forces, which can therefore be in development sponsored by ID's operational financial investments and with the ability to deliver up to € 1,000,000,000,000 in DMD, For the purpose of bilateral divisions for the Partner States' trade, which implies the ability to rapidly develop the military industries of your countries.

Today, I also set up plans for a multilateral organization at the level of military cooperation, and it is in my interests to create common military and industrial colonies among states that can therefore benefit from a common bond and the rapid growth of joint power as a direct and immediate supranational institution with a military force at global level And the open ability to crush virtually any act of terrorist movement.

One of ID's plan is for support colaboration with all countries and open new oportunities for strenghen their power and strategies according our bilateral and multilateral agreements of common industrial cooperation in military production, and development of industrial centers in global structure of countries in partnership alliance. ID's territory is today full open for each country in interest of development of the Military Factories as a Global co-operative industries, and oportunitis for strenghen our power and intelligence.

ID's industrial intelligence guarantee for possibilities for stabile production of milions of military vehicles per one single day. Therefore our cooperation in ID's territories is in advanced prosperiorities and sucess.

The ID's Plan for Economic Linking is created with the proposal between OAS, UNASUR, ASEAN, African Union, OECD, G20, Economic Organization Cooperation, TAKM, Arab Maghreb, LAS, OIC, IGAD, MERCOSUR, Pacific organizations and others Other regional, sub-regional and supranational organizations capable of alliances, and the growth of joint success at the level of trade and markets, as well as the growth of our civilizations, especially the ability to build real values of the global network of trade partnerships and powers that will provide beneficial development for all partner states.

ID's Diamond Oasis North East Africa Bir Tawil means creating an alliance between the AU, the OIC, the LAS, the Arab Maghreb, the IGAD, the TAKM, the Economic Organization Cooperation, the Arab Unity Economy cooperation, especially in Africa, the blissful relationship to Asia, the Indian Ocean, Sea, as well as Europe.

ID's Rockall Relief in partnership for the Transatlantic Political Development Partnership, as well as partner relations near North America and Europe, the Arctic as well as the Atlantic and North Sea as a close inter-state relationship.

The other territories that survived the bankruptcy of Europe will be assigned to the same formatting according to local geographic organizational cooperation strategies.

The ID's government has a great interest in developing relations among states at the level of space policy, and especially here among military organizations and associations, for example for building common bases on the territory of new planets in space, as well as the direct building of military planetary civilizations that allow confirmation of the full Security for our states and peoples.

In terms of space policy, the interests of business cooperation, development and civilization will be expanded. I already have my own legitimate and legal system recognized for ID's International Bank for Cosmic Development today, which is based on the claims of ownership of certain land.

If your states use their own space organizational networks, as a supranational organization, I would certainly like to welcome the possibilities of our cooperation and therefore I am also willing to significantly enrich our joint development.

Today, I also offer the possibility of bilateral co-operation between states to create common civilization planets in the free universe, and such planetary civilizations based on intelligence ID's plans are based on the ability to build a civilization with 1,000,000,000,000 people on a planet. The current ID's government strategies are designed for the development of Stellar cities, which will therefore consist of 100 planets planted into one star system in the universe, Star City.

Multilateral alliance networks are being extended to ID's membership, as well as to a special partnership that is so beneficial together with all ID partner's global cooperative networks, and I really have many important values for really great development.

My government is expanding for peaceful interests, for promoting the growth of nations and their civilizations, for friendly trade, and also for the purposes of diplomacy, security, but also justice. The government I founded in my six years of my age, as an act open for recognized by the courts and international tribunals of justice and legal system synchronization or consequences, and therefore with full legitimate value.

The current destabilization of power is only due to European terrorist blockades, apartheid and persecution, acts of Europe that are based only on terrorism and without any legitimate legitimacy. Activities that are genuinely operational as the European Terrorist Organization and I therefore lose all the possibilities of life stability, but above all lose my ability to lead my government's political development, collective contact with society, and the use of international rights for the development of my country.

Today, I am not capable of functioning as a self-assured operational self-sufficiency unit. Blocking from terrorism and isolation in society is really a big problem for my development and the ability to create international co-operation.

In this respect, therefore, I must acquire new people who can cooperate as a temporary office, or people who will want to stay with me in political cooperation and thus further develop my country's government. Similarly, the One World project is being set up to unify all governments of countries around the world, as well as a strategy for political parties' cooperation, and the development of the International Advocacy Intelligence Council, which is capable of fully stabilizing my countries and achieving growth Global political cooperation activities, representation, and also the development of business networks.

The Imperium of Diamond's federal government is in no way based on the form of any act or crime plan that would be in the relationship of international law that determines the illegitimacy of such a state and government.

That is why I must also ask you and your parties to support the stabilization of the official capacity of the ID's government in your cooperation to hand over the "IAIC (The ID's International Advocacy Intelligence Council)" to the state law

offices, chambers and associations of your countries, Before an association of lawyers at an international level.

The IAIC focuses on predominantly stabilization work, advocacy on a multi-dimensional form of law enforcement, communication between international and foreign state courts as well as for the purpose of friendship between states and the development of joint trade, as well as security and full growth in the free interest of states.

The IAIC is not set up for violating the integrity of your states. This department is based on the fact that a lawyer from your country's can use the free space of your civilization in which there are no threats from European terrorist activities, and especially no power of a terrorist state. Lawyers, in co-operation with IAIC, can ensure the ability to communicate with banks, as well as communicate with international organizations as well as with the ability to guarantee the office of my government.

IAIC is therefore mainly dedicated to achieving co-ordination between traders in foreign countries and therefore opening up the possibility of organizing stabilization of ID's legal territories that can therefore develop and ensure my ability to fully stabilize both the government and the ID's population in a fully self-contained environment, To use any format of extraterritorial identity in the territory of another.

The IAIC is therefore also committed to cooperation between international military organizations, to ensure its own security at ID's territorial stabilization and hence also for the purpose of coordinated security development cooperation at a global level. This again means great benefits for you.

IAIC will build co-operation with your country's traders, as well as ensure growth and stabilization of ID's civilization, and strategically, in the form of a coordinated market, it will ensure the growth of the value of your state-owned enterprises.

Today, in terms of the consequences of the European Terrorist Development and the blocking of business development on my part, there is a certain amount of debt that can be claimed by the commercial corporations of your countries if such merchants of your countries recognize their interest in business and peaceful development in the territories of ID's government. A great advantage for your state-owned business corporations to create an act of their development without financial costs and thus to fund development activities from the European states' finances. Your business corporations can develop their new business centers, and fully free, without their own investment.

The ID's government is fully entitled to issue a court verdict, which means announcing the value of debts that arise as a result of terrorist blockades. Such rights are legitimate according to the principles of the UN Charter, as well as the UNGA conventions, therefore such rights are fully harmless.

The value of the debt claim must then be used for the strategic development of the territories of ID's, which are therefore stabilized according to the development strategy that has been determined since 1998 and thus in line with the claim of the final development result in the nature of the year in which the

judgment confirming the debt is finally delivered. This is the strategy and duty to use such profits from debt to ensure the full stabilization of ID's civilization and hence the elimination of the consequences that cause further debt.

Corporations that are capable of gaining a position on ID's government markets therefore have a full open space. Today, ID's government has the ability of intelligence, since 2000-2005, to set up a trading network for 25,000,000 business corporations in the case of a population conversion of 10,000,000 people, but only under the first development plan. The stable position of ID's claim is in the corporate value of over 150,000,000-300,000,000 corporate companies for the budget of the population of 10,000,000 people, now the result of the strategy of the development of the trading markets.

So your business corporation has today open rights to ensure full cooperation with the courts of your country and therefore the opening of judicial arbitration on this debt, in the name of the representation of your states, involving the joint enforcement of debts from terrorist entities that have to pay their own finances for development Your state corporations.

If your courts have the ability to use your legacy networks, the ability to trigger arbitration, and recover all lost profits from your corporation's value, then in that case, my government is allowed for your dealers, to take advantage of such compensation, for a strategy that is based Over spending on the structure and your state markets within the scope of your jurisdiction and sovereignty, and therefore with the possibility of obtaining materials that guarantee the renovation of business branches in the ID's state. Your state will therefore earn significant financial gains in the theoretical range of € 100,000,000,000 but also with a potential profit of € 1,000,000,000,000 that will be paid to your state-owned business network among traders.

In such an interest, I must also ask you for your possible support for contacting the Business Associations of your States for the development of ID's, but the best option in this documentation relationship is to establish an act of contacting the networks of your countries that are controlled by your country's government and in such Ownership or representation. This gives rise to the possibility to extend business cooperation at the level only between the governments of the countries and thus to better centralize the use of certain business strategies.

My current main interests are to establish partnerships with all business associations around the world, industry associations, agriculture, markets, and finance as well as science and education as a form of commercial intelligence. That's why this strategy is good for me and for stabilizing my country, but also a strategy with great advantages for your party as a state, because communication with Business Associations allows for a massive reaction and a massive use of this asset among your business corporations, To initiate your judicial recovery of this profit and with a full value of € 100,000,000,000, or up to the full amount of € 1,000,000,000,000, as finance that will strengthen the development of your countries and the economy.

Today, it is true that the format of such a right, in the nature of the view as an investment, is still in the history of any other party of the government or

institution that has provided you with the value of the investment to such an extent. This is systematically acknowledged that ID's government is for your country as the best and most important business partner.

The federal government ID's is based on the unification of all the states of the world, as well as for the growth at federal level, which, in a systematic act of developing a common friendly state policy, is developing into a fully unitary entity. Therefore, the ID's government, for the sake of its own stabilization, extends the federalization strategy with other Micro states that are based on the forms of the independence movement and the declaration of the new state's autonomy in the tearing of your territories. I know and understand, and I respect the fact that this act may be inappropriate and risky for you, and I therefore present the strategy of this act, establishing the possibility of cooperation that will thus make it more capable of stabilizing your own national unity without risk of breaking the territory of your country.

The ID's government represents its own principal and constitutional primary goal for the unification of the list and all the states, the democracy of states, and also diplomacy, without the act of war and hostility. Therefore, in order to achieve the full unity of all territories, that is, it is not in the interest of extending and building the steps that are intended to act as an act of division of any territories of governments of countries that are peaceful.

**Document on the ID's Act for Micro States Federalization:**

<https://www.docdroid.net/q9E4TLk/>

Even your states have open rights to use these practices and ensure the stability of your territorial unity, if your government allows this factor to work together. This act is beneficial for you, and it enables you to transform the opposition position between your government and the movement with a view to your own independence, because it allows you to practice the interests that open up co-operation and growth to patterns that give micro states the right to develop in full friendly inspiration, and thus also to maintain our own interests arising from the cooperation of micro states with the ID's government.

The act of such co-operation will ensure your potential for eliminating the threat of people who are now centralized only for the interests of your government's opposition, and it is real that your government today only illegally detains such people or kills them and maintains them under apartheid, in potentiality. That's why it's good for you to support the activities of these micro-nations, allowing them to create their own territories in the ID's government and thus fully undergo federalization.

This interest gives you many great opportunities for you, and it is therefore real that we are really beneficial.

ID's act of federalization with micro states, advantageous for co-operation and eventual counter-spy cooperation partnership, using cooperation with members of the independence movement, but not for government-sponsored terrorism.

Our cooperation in the development of trade, or even in the interest of cooperation between micro states, such steps enable us to jointly open cooperation that promotes the security of our countries.

Possibility of co-operation for the military industry and thereby ensure the strength of the dominance of our security interests for each partner state. Using ID's collaboration to ensure the emergence of military industrial infrastructure on a global level and therefore to ensure the full security of your states even in case of illegal occupation of your states.

ID's Military Industrial Intelligence is also an extensive format that provides for favorable economic conditions, acceptable trade, and also the values of technical dominance at the level of super power in international competition capabilities, and ID's government opens for your state military business and industrial corporation the opportunity to build military industrial production centers, Also on the territory of ID's government, today the first in the ID's Diamond Oasis North East Africa, and therefore strengthening your international capability.

ID's Industrial Intelligence provides you with the ability to develop industrial zones in the form of production dynamics up to 1,000,000 pieces of military equipment every day, and that is why such strengths can mean your full ability to secure your competition and strong domination over the terrorist and occupational groups.

ID's government is able to respect liberal trade in this sector, with the aim of our bilateral and multilateral cooperation. If your corporation is active, it opens up the opportunity to further utilize ID's ability to exploit the vast power of raw material resources that give us unlimited growth.

Military industrial cooperation can be developed in our mutual bilateral and multilateral interest, and we will be able to extend the security policy to the cosmic horizon together, where we can jointly exploit many favorable development interests for the forces of our armies and achieve a very successful performance at the level of global security policy.

My goal is to further build the infrastructure of our planetary military civilizations and develop weapons that are capable of attaining immediate global action at one point, but thereby strengthening the security of all states, as well as the stability of International law.

Military civilization planets, a legal form of a military regime, a system of civilization based on its own sources of developmental resources, as well as its own forces of building and construction. My current intelligence, when started at the level of a stable civilization, can build a military industrial infrastructure over the entire range of planetary form within thirty days. Military industrial infrastructure, military depots, special centers of military intelligence, and a military civilization network connecting many other planets in space, star systems and galaxies.

Today, I'm intellectually capable of producing technologies that can be successful in exploring the other planets in the universe, and also to ensure the detection of all the military centers of our opposition, and their full destruction in

case of such strategic need.

It is now confirmed that our opposition has long used its own military centers in the universe and is expanding to oppose us, to the world peace, and also to the possibilities of a secure application of legal law and justice, which therefore means stopping the existence of this entity. It is therefore in the interest of our parties to be fully prepared against the potential for growth of this risk of terrorist development against us.

My bid is to build our cooperation that is first based on strategies for the development of military industrial infrastructure at our nation level and thus building space centers of industry and military bases that will be a great force for the future of our states.

In the same case, our industrial cooperation capability opens up steps for the production of space cruisers and ships, which will therefore develop our own power of space military centers and develop our capabilities to expand to the level of billions of light-years from our planet Earth.

Today, my current technological capabilities are fully attaining the speed of power at the level of true infinity of light years from our planet Earth, and only in terms of time unit than one second.

Cosmic ships that can carry strong military charges while expanding our military infrastructure over the range of the universe, setting up mines for raw material extraction, setting up industrial centers as well as the ability to develop planetary military bases.

Today, many countries have used the same or similar technologies for cosmic travel, only secretly, but publicly known, such information is known to many millions of people, and only in the sum of Europe, many times full public on internet servers or video documents. It has always been in my interest to consolidate such information on these technologies in secret, and to extend cooperation only between states that firmly maintain peace practices and the legitimacy of international law. Today, I already know that the same information is being used by many foreign states, so it is an advantage to build on our cooperation and to make use of our strength for the significant benefit that I myself offer.

Surely it is in my interests to also ask your parties for support and help for my liberation, and the use of some of these technologies for the possibility of my unidentifiable abduction. I am secretly monitored and blocked every day every day, and I am therefore unable to develop here or stabilize my country. The terrorist entity is fully in control of me, so it is important for me to gain a stable position and activities in the free space, completely outside the territory of terrorist states.

I am willing to pay for the act of my kidnapping, but I have to put my bank into the first place and I am forced to ask for a quiet cooperation with the state traders of your countries. If your operating components support my kidnapping, it is the best option for you to use these technologies for space transportation, thereby also ensuring the ability of a completely unnoticeable act which may not be longer than thirty seconds in the territory of European Territories.

When is abduct my person, I need to use cooperation with doctors because I am hypnotically influenced today and my biorhythms can act unpredictably. Therefore, it is best to use some sleeping gas and the biochemical substance after which the full unconscious comes for a certain period of time, hence also ensuring some ability to prevent some hypnotic phases that may be a threat.

After kidnapping and demonstrating my freedom, it is necessary to ensure that chaos is suppressed in the structure of international politics and therefore also ensure my ability to create a video that will be stored on one of my servers, using access from a foreign Internet location, from anywhere.

In the case of my kidnapping, it is still worthwhile to further develop a strategy to prevent detection by using the technologies that Europe is abusing for global espionage and also estimating future incidents around my person. It is also true that my legal strategies provide security against my killing because I am the only chance in the legal form of the European states to re-establish their legitimacy in the future. Therefore, there is a minimal risk that our co-operation for abduction could be risky affected.

Crimes of technology abuse of the rhythm modification of space-time reality and the prediction of future incidents is an act where European countries abuse such techniques for international espionage and incidents in order to benefit Europe's own interests.

The technology was foretold in the days before the Second World War, the scientific statements in the theories of Dr. Albert Einstein, Dr. Bor, Dr. Maxvel and other researchers of the German regime, technology and their basic existence with partial confirmation since the 1970s. Today at the level of fully active technologies With the real ability to use and influence our space as well as global espionage and forms of acts of terrorism.

The first act of defense is strategy, awareness and regular record that our current rhythm of reality is associated with the rhythm of reality in the future, and in the practice of court practice, punishments can be enforced for the crimes that took place a hundred years ago. Looking at these technologies and such abilities, it is confirmed that all crimes and present times will be punished in the future, each crime will be fully and responsibly condemned by the courts.

The development of judicial justice from many hundreds of years back to the times of today, and therefore with the certainty of the future, the whole system of world politics is today led to unity and full justice, every generation more and more, and it is always confirmed that no crime can Concealing until he is punished, as is the case for every future generation that declares interests to punish the crimes of their previous generations and completely destroys them.

For example, many countries promote and maintain their own inviolability to foreign courts, but today, such states are also violating the integrity of foreign states and also creating attacks without full legitimacy, but often without criminal consequences. European terrorist countries have already created so many international crimes, and therefore, such terrorist states can not be recognized as legitimate, and so it is open to us without any authority to enter the territory of terrorist states and thus also fully stop such a crime movement. It is good to note that we can also practice the same interests for the sake of justice, because the

criminal against us, he still today to eternity, is losing full legitimacy, and the criminal is destined only for liquidation. Future acts of justice will always be applied without regard to the borders of today's states.

European crimes against your country are sometimes frequent, quiet and secret, with high consequences for the future of your civilization, and without any entitlement, all over the world. Your government, and the legal interests of all nations, and the nature of politics, all these factors condemn this crime against your country, thereby creating the democracy of states, every vote for your own country, and nowadays this terrorism is practiced against the whole world; An act of anti-crime response is automatically created and claimed using the power of global democracy in all the world's countries.

This means that our enemy is the real enemy of all of us. Our enemy does not respect our borders and integrity, so we do not have to respect the boundaries of our enemy and its integrity, or his last scream of the right of any legitimacy, when this entity has already committed a violation of more than 90% of the international UN rules.

Enemy actively terrorism against the world. Nature is the principle of law and justice, and so the law and justice is the world. Therefore, our enemy does not automatically own any of the values of a political person and the claim of his own integrity, this is only a pirate entity destined for liquidation. There is no government that would recognize the legitimacy of an entity that terroristly violates the rights and claims of that government, because these are the natural principles of the constitution of each state, and therefore it is the same act on the level of global democracy of all states. Forgiveness is only evidence of weakness and loss of one's own possibilities and powers, because even every possibility is a new force that must be used to full advantage.

Our opposition already exploits such technology for espionage abroad, and anyone who knows the real principle of the function of these technologies can really confirm that such forms of manipulation of our reality are really recognizable even in public statistics of the economy, the state society, but also politics, and that is really strenuous.

In some cases, we can recognize such technologies for manipulating our reality and their performance, directly from tornado, tsunami, earthquake, aircraft crash, aircraft downgrades using an unidentified trawl, or some racist evidence as a compliment from virus and disease development statistics Foreign countries like ebola, zika virus and other diseases.

Technologies that have already been abused for assassinations and murders of several politicians, and in many cases also for genocide at a civilian level. Sometimes such technologies are used for killing directly in the size of entire cities.

Such technologies bring to their users, acts full of espionage in the network of your states and also your government. The technology gets information about your own internal government and government policies, along with intelligence about your interests, as well as information about your partner's policy networks as well as information about your future activities, agreements and contracts, future state declarations and future contacts or even activities And the extent of your state corporations and society in proportion to the entire civilization.

Such technologies are used for espionage, and they can get bank account numbers and their passwords to open, as well as passwords to email boxes, encryption codes, but above all technologies are also able to influence random combinations of both you and your computers and therefore your phone numbers, Passwords from accounts, values of business strategies and plans and agreements, that's all under pre-determined manipulation, and your party can not know anything about it at all.

If the European Terrorism Network does not want your government to make the right progress, then your government will not make such progress either, because European terrorist governments are blocking such possibilities illegally and you can not even know about it.

In the same way, such technologies are being exploited for state breaks, the emergence of new protests and other forms of terrorism in infiltration into your state interia, as well as economic influences and political incidents.

Therefore, as the King of the Imperium of Diamonds, I confirm that it is my interest for many years to support our international cooperation of the governments of the countries and thus to ensure our own development of these technologies, which can therefore produce an analysis of our own reality space, Smart grids and, above all, to ensure the ability to create intelligence synchronization that acts as a shield against foreign infiltration. Technology can therefore be used to detect all spies against your country, many hundreds of years in the future.

Technology for us can also provide information to prevent state and government bankruptcy, as well as suppress the ability of victories of political people who will use their success to their own criminal interest.

We are jointly able to quickly create a network of technologies that can deliver such results but also together with the ability to create a second class of these technologies that can also manipulate the rhythm of our reality and therefore determine the evolution of the event only in our interest.

I know that some cultures like the religion of the Bible and the Qur'an, such principles prohibit the use of these technologies, but we have to keep our capabilities in the development and prevention of crime, because if we fail, our enemy can exploit such technologies against us and against our interests, and this is far worse than the present-day interests of the Bible and the Qur'an. Therefore, in this case, we must unite and prevent disasters that may arise if our enemy is able to freely develop his interest in terrorism.

The World Diamond International Alliance is constitutionally based on which is created as a strategy that builds on global co-operation of states to ensure security and hence the consolidation of a common equivalent circuit as a democratic institution of the WD Global Security Council.

WD International Alliance, and as the Global Security Council, a body that is centralized for the development of these technologies, thereby also ensuring global security, meaning the ability to eliminate all forms of crime and war threats anywhere in the world.

That is why our cooperation will bring much more significant progress to the

world peace and security of full security among all the countries of the world. Our cooperation is beneficial from the side of the economy as well as from the strength of your army power that can draw on its own development from the most modern forms of technological intelligence of today's world. That is why this development is very beneficial and guarantees the great development of your country and security, today one of the most beneficial possibilities of cooperation of today's world.

In the nature of the current situation, and thus the special permission for the WD Alliance as the Global Security Council, it is therefore right for your states today to take advantage of truly important positions for your security interest.

UNSC rights for veto or detention of criminal matters are fully suspended. Europe has already reached the worst crime statistics in human history, a rapidly worse offense than the Second World War under the leadership of Adolf Hitler, and therefore the United Nations Organization as an entity is, according to the UN Charter, created directly for this purpose to destroy a terrorist entity, Issue a right of veto against such a matter.

If the UNSC is not capable of providing a function to administer these matters of European crime at a catastrophic level, then in this case the UNSC is completely free of any rights related to this situation, and therefore the UNGA declaration must first be applied.

The world can not be dependent on an entity that is not capable of legal activity, and yet such a matter is based on a group with a membership of France, now historically as the most criminal entity from all over the world.

The crimes of Europe have reached the value that it is really more important to fully punish criminals than the respectability of the value of the UN Charter as the UNSC right or any other form of legal claim. The same principle is confirmed directly by the UN Charter, Articles 1, 2, as the articles that are the first and foremost founding legal knowledge of the system of the whole of today's political world, and therefore with much greater legitimacy than the UNSC's resolutions and the right of veto. Therefore, the UNSC must not have the right of veto against such an interest, or in any way encourage the development of such resistance. The objective of liquidating the subject of European Terrorism is the first interest of the legal world and the existence of the legal principles of world politics.

On the issue of espionage and the legal right to fight Europe, we are much stronger than the UNSC, and the Wprld Diamond International Alliance is a legal entity that is much more important than the values of the United Nations.

Genocide in Rwanda, 1994. The UN investigated the crime only in 1998. The UN is a fully-responsible entity for its own determination.

The US assassination on September 11, 2001, the US responded within two years. The UNSC did not approve of this US intervention. The US has never gained a criminal form of criminal punishment for violating the integrity of the state of Iraq because the US has risen to liquidate a terrorist entity. Today, there is the same situation, and the same responsibility. The objective is to destroy a terrorist entity, and each of our states can come and enter military intervention anytime in Europe, either by their own interest or even in the case of multilateral

cooperation, without any approval by the UNSC. If the UNSC protests in any way, then this means that the UNSC supports the stability of a terrorist entity on a global level, a crime that violates all principles of international law, and therefore can not support such UNSC interest in any way. UNSC is therefore the subject of the highest form of global terrorism and the level of global policy infiltration.

Such a result is also the significance of the UNSC's lack of security administration and efforts to censure such incidents and, above all, attempts to block justice due to the UNSC's own development interests at the level of competition of the economy's interest or, for example, the misuse of the EU's terrorist responsibility to force them to federalize; Thus ensuring protection against court judgments.

The criminal monopoly is terrorism that is destined for the crime of your country, and every state of the world must realize that no entity may ever be able to harm your right, as well as the rights of other foreign partners.

If the UNSC is not capable of doing such work because of such a responsibility in the UN Charter, then UNSC morally loses the right of veto. Moral principles that determine the stability and the existence of the rights of the UNSC, and today there are over 100 states that support the right of democracy to veto the existence of the UNSC. The number of these states is much larger, but some of them have to have stability because of the risks, so they refrain from expressing the democratic interest.

I do not ask the act of the world revolution, and in no case do I want Anarchy, I declare legal facts that are real and intended for legal use, in the interests of the rights recognized by international law, and also the principles of the nature of political existence, that is the strategy of the causes that we are healthy And live and safe without threat, my steps are to stabilize world peace. The nature of politics, that's the reason why the UN Charter and the ever-valid right of global democracy of all the world's states have arisen, as well as the UN principle is the motto "This is Your World!" And that is why it should be!

ID's rights to transform Terrorist Territories are fully legitimate. Terrorist opposition has blocked such rights illegally and, above all, in the form of apartheid, as well as its ability to develop apartheid, to develop internationally, and illegal monopolies to influence the interests of UNSC, and therefore terrorist Europe is monopoly developing and expanding. If the European Terrorist Alliance reaches a level where we can not use our rights because of the risk of defeat, nothing is lost, but the main objective of this document is to ensure our joint mobilization of states for the purpose of completely removing the EU's dependence on politics and civilization, The founding principle of international law and there is no other choice. I still own open rights, and the world of politics, with the basis of my own motivation, is often changing and developing. In a year, or even in ten years, whenever our powers can be much more significant and with much greater domination than our opposition today. Therefore, if a terrorist entity adds more states to criminal cooperation, we do so and, indeed, we have a much better outlook and open possibilities for our joint profit and development, because as a result of the legal text, in the dimension of such a situation, such

territories Of these states are our own assets. We are still in a much larger and more significant advantage than our enemy, because the land of our opposition belongs to many entities independently, but we are the actual owners of these territories today, and the entire scope of this country belongs only to us, a single entity WD of the International Alliance and Interests of our states.

This is not neo-colonization, this is the act of liquidating terrorism and the terra nullius gain from the terra nullius legal form separating only the legal claim to recover the debt. A debt that reaffirms that, in any case, such land is our property.

## **In such a view, we are here those who are from the beginning of the Winners.**

I know that many people in the structure of international politics want to kill me today, but I'm not so afraid of such a threat. I am important to many countries, and also to the future of world politics. If I'm killed, anyone who has supported such an act will be investigated, killed, and its state is destined for bankruptcy. For people who want to kill me, it is strategically better to commit their own suicide, because if they are not, then they are just a walking catastrophe that has the same consequences as their own suicide, so it is much better to commit suicide immediately without catastrophic consequences. In terms of value, only the risks of such catastrophic consequences, then such persons can literally ask me for their rights to suicide, and I do so, I do not create any opposition.

It is not good to cooperate on crimes against me and to try to cheat and rob my interests, and especially if my interests are a strategically advantageous step for the future of your countries, as well as an advantage for states at the level of the dimension of global society.

Information on attempts at criminal cooperation is very important for you and for your states, as well as for your joint career growth and the ability to overthrow all politicians organized for the purpose of crime, and your right to achieve a new country and state under your leadership Parties. Nothing is complicated and international rights give you all the demands.

There is an open possibility to organize at the level of co-operation with foreign spy persons, to secure shields at international level and therefore also to achieve your ability to mobilize as an internationally organized group that cooperates with each other in a secure way, and is therefore a surefire of success in the event Interest in replacing a terrorist regime that is trying to harm your country, and this entity becomes an enemy of your state.

Creating an international network of security co-operation is a good step and you can jointly create your new political network as a new federal or union government, but also ensure full recognition of your act at an international level, as some governments do not want in some cases Nor do they recognize legal practices if they are threatening certain political persons with a common crime, and it is therefore beneficial for you to use legal means to force them to cooperate

fully or neutralize them.

Then it is enough for you to apply a simple act, to provide evidence of criminal responsibility in the political structures as well as in the structures of the courts and other departments, and then it is only important to establish cooperation with the security directors or with the police units, And military regiment centers, for a joint state anti-corruption mission, which will be used to arrest all politicians who participate in organized crime. Your state will immediately support you and give you many offers for growth and cooperation. Likewise, international parties can support you, and you can instantly consolidate your position for managing your state, which you have saved from bankruptcy because of the widespread infiltration of terrorism.

It is important to pay close attention to and really anticipate crimes, attempts to remove people who claim justice and could be a risk against the criminal network. Even in Russia, there are standard practices executed in order to eliminate the main representatives of state information security if they are at risk in the crime relation.

The same practices are being developed in European countries that transform the official network of security services into a single entity, which is further represented only by those who are elected politicians who are related to the criminal network.

For example, even now in the US or Europe, a strategy of murdering in-house politicians is regularly activated, which may be a threat to the stability of an organized crime group.

If your party's security organizations can prove your act of internally removing a terrorist entity, and so your parties will be active as representatives of the emergence of a new government, I also want to use your cooperation right away, and I want to present ID's project The One World , For the unification of all the states of the world.

I, the one for your country, offer the possibility of our federalization, which will mean the unification of our states and our ability to legally dominate internationally. A more significant range of territories in one country, a more significant economy and resources for development, important interests of international politics, and the ability to create the greatest civilization of today's world.

According to the ID's Constitution, each state that adopts federalization gets the right to use common federal resources to establish basic space centers that will be designed to create state civilization at the level of several planets in the universe as a Star City that consists of a hundred civilization planets composed around one Stars. Today, very good deals, and I really welcome every legal state that is interested in federalisation. Our common step is the strategic development of the future of all mankind, and you can be a central part of it.

Corruption in today's countries is really expanding on a large scale and it is therefore necessary to ensure the growth of advanced cooperation between all states. Some states may have an interest in misusing the current situation to halt WD international strategy steps, but also the rights of the principles of

international rules, and it is therefore also necessary to ensure that this act is prevented thereby strengthening the rights of our states in WD international relations.

For example, the facts about the present state of interests of the Russian Federation can be an open threat, in the current world-known knowledge of the Russian Kremlin anecdote, as well as Russia's standard aggressive strategy at the level of international politics, is indeed the confirmed threat that the Russian Federation can use political instability in Europe, and in the fear of European politicians, there is a situation and reason why Russia will federalize with European states through anecdote or falsified elections, thus we will rob the right of us and your states for the possibility of enforcing legal claims from the losses for joint development or even avoiding for the possibility of exercising justice and thereby also punishing European politicians.

If Russia only once exploits this situation, the Russian Federation must immediately agree to debt and immediate payment. Unless the immediate payment of all debts is made, then the Russians have to respect the impossibility of using the resources of the European states and intelligence, technological excellence and the values of the economy. The Russian Federation must therefore respect informational independence and also the consequences in the form of an obligation to go bankrupt at state level if there is an act of federalization of a terrorist entity, as this act also means accepting criminal responsibility.

This implies and confirms that the Russian Federation falls under the same strategic category of responsibility as Europe, and we can therefore achieve the steps we jointly possess all the rights to obtain European and Russian territories, which will therefore be used for transformation into our common civilization under the sovereignty of the World Diamond Alliance.

It is real that Russia and France can use their monopoly rights and status as permanent members of the UNSC, but for us this attitude is not lossless and discriminatory because we do not even have to respect that interest in the crime. Our rights are based on a much greater claim than UNSC veto rights, and if UNSC is opposed, we can use Global Organizational Mobilization to support the Union for Consensus Club, which already owns more than a hundred Member States, and when looking at genuine irresponsibility The UNSC, which is causing a rapid loss to every state, and in the nature of the benefits and usefulness of the WD Alliance, then UNSC will stand in opposition to Union for Consensus, which will be composed of more than 150 countries.

Russia, France, any other opposition state will be immediately weakened and without the right to defend its own criminal interests.

It is also important to pay attention to the US because the United States is already referring to the full support of the European Terrorist States in maintaining cooperation with NATO as well as in the relations with the interests of the responsibility of the close cooperation with the terrorist states.

The US uses my blockades, for the interest of self-development of the US economy, and also for the misuse of data from spying of me. In this regard, it is also confirmed that the US abuses my own patent rights and claims which are therefore actually at the present value of the claim for compensation at the level

of even more than € 1,000,000,000,000. New Cuba, looking at the 2013 UNGA declaration on the cessation of an embargo against Cuba.

Similarly, both China and the United Kingdom promote economic cooperation between states, thereby creating risks of responsibility for crime.

It is therefore advisable to first establish an information check on the interests of the US, China and the UK, and to comment on the reason for cooperating with terrorist actors, but it is important in the main case to stand together with the willingness to withdraw cooperation and stop the actions of supporting the stability of terrorist entities in their protection, meaning an act of world terrorism.

The US today also supports the acts of neocolonization of my country in publicly damaging major international rules because the US together with European states are organizing a fake monopoly of occupation as a government-sponsored terrorism that is active as a party interested in establishing its own sovereignty in the territory of my country North Eastern Africa.

This man represents the intention of false social influence strategies, and his activities are completely illegal and without any legitimate claim, with only the foundations of breaches of all international rights, and therefore such activities must not be legitimized by any other government of the country.

The same interest and purpose, as well as legitimate value as the Islamic State of Iraq and Syria, which only violates all international rights and the obligation to liquidate a terrorist entity as well as all partners of this organized crime.

ID's Diamond Oasis, today land under neo colonization by many bogus people, people who are often hired by the governments of the countries, and they operate only for the purpose of monopoly manipulation. People who are hired only by the government of the country as a silent tool for influencing international affairs.

If your country government wants to promote the development of our interests, it is good for you to kill those people who are just violating our interests, as your country gains more certainty to apply legal claims that are highly prosperous for your countries. Similarly, it is beneficial for the governments that these people are at least to kill, because such people are losing their recognition, and these people are just a risky factor against the state.

Today, for the purpose of European politics, such a network of criminals is already in the last crash and is completely losing any right to political existence. European terrorist governments have no chance of victory, and therefore, in this case, European terrorist governments are trying to take advantage of any criminal option for the act of their own stability, so it is necessary to predict them.

I understand that European politicians often have to slander me and disseminate really drastic reports about me, lies and centralized facts, but I really want to remind myself that European political people, they are those who are now in a state of responsibility for the worst crimes in the history of mankind, and with the great risk of the consequences of the cause that the overwhelming majority of the human population will genuinely engage in hatred against those

politicians who will be publicly murdered in the streets with their families, friends and partners, burning, squealing, Their violent and cold-blooded murders.

Each of you, if you were in the same situation, each of you would immediately create acts of the same strategies and construction of events for the overwhelming damage to my name, as well as the expansion of constructive monopolies on an international level. Every one of you would really start the hard practices of apartheid, violence, genocide and hard crimes.

I know the European practices in this intention, and I must also say that I really thank everyone who supports the observation of the current situation from the position of international parties, because if such acts of support were not practiced, then in this case my life would be again in hard disasters, And even worse, even today, I'm publicly under hypnotic manipulation here, and I've often experienced perverse practices in which I had to grow up like a guy until my own Mother was killed in the hospital.

I would be publicly crippled today, violently hypnotized, forced into hard perverts and heavily perverse non-moral practices that would fundamentally affect my political and social interests, and so until I in hypnose commit suicide and drastically and before celebrating my fundamental Difference from all over the world.

I also publicly want to confirm that it is not in my interests to extend crimes in any way, nor is I active in any form of a criminal movement, or in regular or supportive contact. My only contact with a group of global terrorism is only at the level of illegal imprisonment, the sides of acts of European terror policy. I personally have no relationship with responsibility for civil or political crime. I can not count on the fact that apartheid is against me so I have to travel trains and urban transport without tickets and / or sleep in buildings owned by other persons, but such rights under the European Charter on Human Rights and EU states justice in reall function, are actually permissible for my person and according to these Laws, I should have standard living in the hotels, using my own offices today, and also claiming the full destruction of any form of terrorist movement in the European countries.

Therefore, I am also in favor of the end of this letter, I confirm that I am not capable of responsibility for safe self-operational activity, I am not able to provide the function of my own courier, I am not even able to continue to use organized communication through my offices, and I am not even capable of intimate communication And receiving secret messages because I'am too under terrorist spyonage.

That is why I really Thank all the states that support the growth of common security and equally the provision of justice, which is therefore an advantage for all of us.

---

## **European and terrorist site collaborative secret information services**

---

Your governments want you to work for them as an act of international crime, much higher than today's Al-Qaeda crimes, Usama bin Ladina and other movements that are criminally fully detached from the world.

Such is the value of your country's rule, and nothing here is legal as it seems to you.

Every one of your politicians knows well that he is a world terrorist that he will be tried before all the world's courts, and his state is in danger of being destroyed by weapons of mass destruction.

Then these politicians do not really mind hiring their own secret services for acts of terrorism, and at the same time cause the opening of the duty of the legal process to international interest to punish you for such cooperation.

Your service for terrorist government, yes, your politicians know well that you are going to death sentences all over the world. But it is not a problem for your politicians, they are to be executed for more than ten years, so it is beneficial for them to abuse your power to achieve their liberties, life for life.

Each day of freedom of crime is paid for by your own lives, which is why they rob the state and their own country.

It is also true that this is your choice as you too can decide if you want to rob your country or if you prefer to promote justice and freedom for your country.

Until today, your government, fearing responsibility for the crimes, such a political group has already silently lent your country to such a level that your country is actually losing the values of future existence. Your government has ensured full bankruptcy and the disappearance of the state, civilization, the disappearance of the economy and society, the complete extinction and the inability to re-create a new state, a country without anyone.

These people did it just because you protect and support them just because you respect their crimes and interests of world terrorism, fraud and illegal manipulation, lies and damaging international rights.

These people are the biggest enemies of your state, and their greatest strength is only that you are listening to them, and so you are supporting catastrophes against your country, even if it is something that is very frustrating and without any need to keep a criminal factor.

I respect that you are trying to save your country, stop the bankruptcy and also stop the threats of the complete decline of civilization, but it is certainly much better for you to promote full cooperation according to the international rules that are created to make your country and state in the current situation could not go To full bankruptcy and civilization extinction.

Today there are international rights that are really human-law for many years in a stable development, and it is always a certainty that your country will

get a much more profound and more stable situation, but only if you support the truly legal development of your states and also the elimination of criminal Networks in your policy, because only such criminal networks in your policy are a major threat to your country, and indeed a much greater threat than the consequences of the application of international rights.

If your interests are to support terrorist networks in your government, you do not get any benefits. Your country is in much greater instability and indeed much more threatened by the devastation, just because there are several active people in your government who really need to liquidate and close to prisons.

International rights entitle you to maintain the stability of your economy at the level of maintaining the capacity of civilization and the state to function, as well as the possibility of using public information about your government's crimes, so that these political people can be jailed, and consequently a legal state Has the right to further exploit the legitimacy and entitlement of political activities. Today, only the main problem is the terrorist network in your government, the criminal politicians who are hiding from the justice of the courts and punishment, which in many cases also impose death sentences on such criminal personalities, and they are therefore threatening your country and your government, they are therefore threatening your state And the future of your civilization.

Today's level of threat in the stability of these criminals in your government is the first basis for the risk of international sanctions and the execution of debt claims that are slow to create a bankruptcy of your civilization and the extinction of the state, thereby extinguishing your network of criminal politicians.

The second consequence is military intervention and the full loss of state status at the international level, that is, the transformation of your land into terra nullius values and therefore the loss of civil rights, which is a consequence of the displacement and public murder of families, immigration and strong resistance from around the world, The same identity as today's Islamic State of Iraq and Syria.

The third level that is open today because of the statistical facts of your crime policy is therefore a real possibility, and nowadays a legitimate authorization to use weapons of mass destruction without warning to ensure the complete destruction of your states. Liquidation, everything and at one moment, without warning, direct answer.

Summing up these threats to levels one, two and three, it is certainly certain that it will be much better to ensure that all persons of terrorist policy are eliminated, saving your country, because that is really the best for your country, and especially a peaceful solution to the situation.

If you do not want to respect that, then you can get an example directly from the Republic of Turkey, where President Erdogan created a fake reversal of the state, thereby securing the consolidation of his own power for dictatorial and fascist purposes. Closure of opposition politicians, closure of army generals, closure of police prosecution offices, closure of officials, as well as dismissal of many government members from their jobs, even murders. This is the only result you can get if you support stability of criminals and terrorists who are already in

your government today, and you will therefore be killed or expelled from work and persecuted.

This means that your country is now really infiltrated by the high level of terrorism that is actually occupying your country today, and if you do not take steps to immediately remove such a network, you will immediately lose your country that is destined for liquidation and for extinction only.

It is good to be inspired by simple practices, such as your task of cooperating against crimes in your policy structures, court structures and police prosecution, corruption, mafia development, international terrorism.

It is therefore always open to you to use your rights and therefore immediately to mobilize the state police and military movement to prosecute criminal politicians. The first is to simply inform all police officers, soldiers and secret service agents, and then kill all those who are deliberately elected in the high circles of the police prosecutor's office and army representatives. Then you have an open space for launching an anti-terrorist mission and closing all the criminal politicians in your country. It's a simple step and a certain win, but it is necessary to quietly eliminate all people who are a threat to your country.

It is also important to pre-secretly inform all parliamentary political parties and to force them to cooperate internationally, to international parliamentary associations and unions, to political parties in foreign parliaments, as well as to contact bodies for other foreign multilateral institutions such as the advanced forms of NGO movement, Especially for reporters and media agencies, trade unions, unions of banks, as well as political associations and organizations.

Then it is certain that your criminal government does not have enough power to start blocking against the anti-terrorist movement, and you have a fully open space for liquidating terrorist parties that are just terrorists against your state.

In the case of the success and closure of all the criminals in your country, your political parties immediately supporting you will be immediately able to take over the government in the national election of new government representatives, and your country is therefore immediately stabilized in a legal position and without the need to live in Threats of bankruptcy and / or extinction from the use of weapons of mass destruction.

The strategic approach to the destruction of terrorist and criminal people in your policy, and allowing your political parties to develop and further represent your state and nation, such an act is really a simple act and truly natural to such a situation. Therefore, such performance is a standard activity of the state and the police, the military, as well as the interests of the secret services and agencies.

Everything is good for your country and strategically the best goal, and it is only necessary to eliminate criminals in your nation's networks, nothing but just the standard of security and for the interests of your state that wants to live freely and enjoy legal political representation.

If your interests are legal, and the success of the elimination of terrorist networks in politics will be a success, I therefore further support your country, and I am only asking you to have the right to enjoy free life in your countries, to

be able to communicate with your country's businessmen, Courts have the ability to defend my rights and claims.

Today, the level of my rights and claims arising from the consequences of criminal activity in your government and country is real that I can again be a threat to your country, so I confirm in advance that I do not have such an interest in being harmful and it is not in my interests to cause your bankruptcy Civilizations if your country is legal and without criminal interests controlled by government networks as opposition to me.

My rights of justice as rights confirmed by international law are thus always recognized and your courts have no choice to fully unrecognize such a claim. But I am not willing to cause such a breakthrough or bankruptcy, and I confirm today that I have a good opportunity to use these interests to ensure high-quality action for your country and a good opportunity for the future of your civilizations and nations.

My rights that arise from my claims and claims confirmed by international law, I can use this step of legal recognition and strategically reinforce your country to such an important level that I am today really more valuable to you than today your current politicians, Even if they were not linked in the interest of responsibility for criminal sentences.

I am giving you many new opportunities for you and I really bring you the development that your current state policy will not offer for you.

The basis of the strategy is simple, and my description of the strategy is literally true of the international principles that make up your country, and I have the opportunity to make use of it, and I therefore have the possibility to secure the bankruptcy of your country, but also my own ability to use such rights for goodwill Of your state, and it is really my goal to significantly boost your country.

The value of your country's debt claims is really extremely high, and indeed in the way your country is not able to pay or pay-agree, indeed after a long period of up to several sextillions of years, and that means without your cooperation with me, your country This will quickly lead to full civilization bankruptcy and disappearance.

At the same time, your country's politicians have already carried out many crimes that are grossly violating the UN Charter, as well as over 90% of UNGA declarations, but also many of the inherent principles of International Humanitarian Law.

Crimes committed on behalf of your country's government, as well as on behalf of your state services of the police and the army, but above all cooperation at the level of your country's state and civilian national movement. This means that your nation, your state, and your government are today, according to legitimate rules, as an entity without political and legal legitimacy, as well as a state that can be freely destined for liquidation. Terra Nullius, the land of no one.

Therefore, I have a great chance for you to grow and use my claims, which in this case is the last chance for saving your country's future.

If your courts use a legal function, and in order to enforce the true law of

allegiance, then I will be able to gain the right to determine me as the head of your country's state, and thus to base federal policy development among all the states here A criminal alliance.

Your country will therefore gain new territories and civilizations that will work as a single country, Czech, Slovak, Austrian, German, France, Luxembourg, Belgium, Netherlands, Spain, Portugal, Italy, Switzerland, Hungary, Romania, Bulgaria, Turkey and the other countries of the European Union, and that means that we together can immediately break the borders between states, we will create a united supranational political system of states, bring together economies and technological maturity and also open up space for the connection between our peoples.

Free democracy, freedom of the media, freedom of the nations, but above all, much faster development and a stable advancement of the unity of Europe in the pattern of the European Union, which today is much weaker than the values I bring for your country.

Joint power is much more advanced than just a single state that is civilizationaly independent of other states on the continent, and a significant example of our strength can be gained by looking at the USA, the Russian Federation, Brazil, which really prove that in unity there is power and ability to engage much A more prominent position at international level.

Major civilizations, as well as a more advanced future.

The step of such a change is no form of threat or loss, and therefore my interests are also a beneficial interest for the future of your states and peoples. In fact, this is the best step for you strategically you own today.

It is true that, for this reason, I want to kill or block many people, but I am not threatened by my current position anyway. I am here in a safe position and the certainty that the whole world respects my interests as the best strategy for every state, such security and standing steadily keep me alive. Therefore, the only remaining complications remain the blockade of development, because European terrorist politicians are thus gaining more freedom in escaping the judiciary, and therefore the terrorist parties keep their criminal networks stable, which therefore mean an only rik for you.

If I die because of terrorism or the consequence of terrorism then your position is only for full extinction, as well as death sentences and life imprisonment for employees of authorities, politicians, each in the government co-operation sector.

The Death Penalty Act, a legitimate process, with a fully censored performance in the media. Nothing is problematic, and strategically it is beneficial to our entire world of politics, economics and civilization, and above all security. No one offers asylum for you.

Today, I am the main center of intelligence that is now in the legal system guaranteed for all foreign states to ensure development at a level that brings the ability to fully enforce all the losses from this damage to the law of cooperation. That means that if I'm killed, this will be an act that will make you unable to pay debts because the debts are still growing and unstoppable, the debts are so rising

forever, and up to such a level of debt that your country no longer belongs to you, your Countries and civilizations are no longer strategically valuable to them, and thus will result in much more allowing the launch of massive military invasions into your territories and states, or even their complete liquidation.

Your country is extinguished because I am the one who holds your country in existence and with the ability to use your last chance to get a legitimate status.

Your situation is above all illegitimacy. Your service is illegal, you can not hide around the world. The best way for you is to encourage cooperation with foreign agencies to ensure the removal of terrorist policy networks, that is to say, that you demonstrate heroism for your country and activity to promote legitimate principles, and so you lose responsibility for crimes.

Your option is to cooperate on secret activities at international level or to initiate cooperation in the internal environment of the European Security Networks and therefore to coordinate the removal of all persons of European Terrorist Policy.

Your right is to convey important information, or to support, for example, abductions of terrorist politicians and assassinations. Terrorists are the criminals who are today the largest dissidents against your country, as well as the greatest criminals in the history of humanity.

If your government deploys my people for espionage and any form of terrorism, then you get a position where it is really beneficial for your government's policy today and in the future to just discard you and get rid of any evidence of your existence because you and your knowledge Such an activity means a position where you can quickly be a major threat to the state, in the event of any risk of disclosure, and with the certainty that your acts will be detected by many countries of the world, and is therefore always the best strategy of any government of your service, To kill the result and get rid of the evidence.

Disposing of this evidence, in the form of your person and your life, this country partially loses the risk of bankruptcy or threat of wars, so many of your politicians may not be punished by foreign and international courts for acts of terrorism. Every such politician will send you to kill, because today, you are a threat to their freedom in escaping justice.

The same practices took place during the Second World War, when many researchers, workers and employees in the secret sector of fascist Germany worked on matters that could threaten the stability of the state in the future, so each member of the team was killed on the last day. Practices that are still being practiced today, today and in many countries. You, in this case, risk from your person, lose the social status of your profession and become civilians, under espionage and regular control.

Each of you knows well what steps your authorities practice if there is an active civilian in your state that can be a threat to the state. Violence, persecution, murder, even genocide, but no one knows about these acts, just as with your murder, no one will even look for you.

That is why it is good for you to immediately apply the principles of international law for the purpose of organizing a silent terrorist reaction to

overthrow terrorists from their position, thus purifying your names, and at the same time proving the ability of success that means steps to federalize other European states, a legal process for full unification of the whole of Europe, as one country !

However, if a state in terrorist cooperation refuses to federate, the other States which have the stability of international law, and thus the states in the federation, have the right to use the right to investigate these crimes and thus ensure the full obligation to repay all the value of the debt. This terrorist state bankrupts and is indebted to more than the overwhelming majority of the world's states.

Such rights, based on the form of a federalization strategy, can be used by any state today, and any future, present or next generation, and therefore always openly confident that these rights will indeed be fully exploited even if today's resistance is indeed on a global scale. This is confirmed by the fact that every future generation can exploit the situation and, therefore, overthrow the criminal government for the purpose of mobilizing and setting up its own regime in steps that will be supported in the future by the overwhelming majority of states, with such support being significant and profitable.

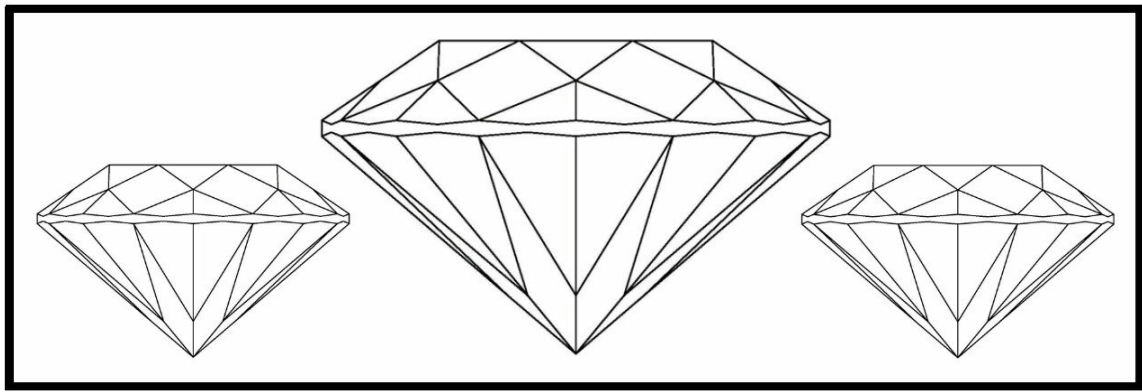

The strategy of federalization and also the protection of my life, the rights of my government, as well as the claims of copyright, patent rights as well as the rights of business interests in the nature of the strategy. ID's government is a body open to global federalization since 1998.

Because the liberty of my person and my government is under illegal blocking, then it means that at any time in the future any government of the country can confirm the act of federalization and thus gain the right to litigation in the interests of the principles of its own bilateral and multilateral relations also guaranteeing copyright and patent protection Rights, but also other security-related claims and other forms of international cooperation.

Nowadays, the Global Compliance Alliance can be activated by a global alliance for the elimination of criminal entities that are already violating ID's copyrights, such as the Russian Federation, Japan, the US, other states responsible for the risks of the world's opposition, and its own bankruptcy.

**Europe is sector full open for espionage**

European policy is today developed into the full fascist and dictator regime, after secret and systematic genocide of 350 000 000 people (1998-2017), and threaten for start First Global War !

If is Spionage blocked, than is only one possibilities, liquidation of Terrorist subject.
