

After a frustrating waiting period, we finally got all the answers we need. It's really exciting we can finally start moving forward. To implement Master Nodes perfectly is not easy. We needed some support and cooperation from our exchanges. Unfortunately, we can't get that support from them since they're very busy and it doesn't fit their policies. Quite understandable from their point of view, but it brought a stop to our developments as we needed to know what would happen to our markets. Our priority is keeping them open at all time.

We were prepared for this scenario and will move forward according to our plan B, which was more preferred among several members of the team anyway.

First of all, we want to ensure our community that OPC will keep existing and will go on staking until the max supply is reached. No updates are required and all markets will remain intact. The current OPC supply is more than halfway it's maximum but this will soon decrease a LOT. How? It'll all be crystal clear when you're finished reading.

## OPCX

OPCoinX is a cutting edge cryptocurrency, with many features that aren't available in most other cryptocurrencies. Anonymized transactions using coin mixing technology, we call it Obfuscation. Fast transactions featuring guaranteed zero confirmation transactions, we call it SwiftTX. Decentralized blockchain voting providing for consensus based advancement of the current Masternode technology used to secure the network and provide the above features, each Masternode is secured with collateral of 37500 OPCX

OPCoinX is an open source, peer-to-peer, energy-saving, community driven, decentralized and modern PoS 3.0 Masternode-Cryptocurrency. OPCoinX has active wallet development, brings new features and offers active community involvement. Details of the swap are mentioned below, but first we would like to sketch the many benefits this will have. By creating a new blockchain we can also adjust the block rewards, which are now fixed. This will decrease inflation and increase stability. We need this stability to build a durable product and as many of you know the OPC store is still under construction. We want to build for the longterm and therefore everything has to be right. OPCX will be a very big step towards a working product, which would basically mean you could buy almost anything game related directly for OPCX. Of course another benefit of the new blockchain is that it will have Master Nodes. We are running some extra tests on our testnet to absolutely make sure everything works as it's supposed to work. We expect the wallet to be fully operational and available within a few weeks. Hoping to set a hard deadline soon which will probably be in our biweekly update.

Last but not least, OPCX will play a big part in reducing the supply of OPC. All coins that are swapped will be burned. We expect over 75% of the current OPC supply will disappear out of circulation. OPC will remain completely intact, but with a much lower supply. OPC is still a good coin with fast transactions and great network stability. A wallet update was never needed from the start because we didn't have any problems!

OPCX will also include something important that will help us grow a lot easier. In the premine we included a dev fund, which means that 5% of all earnings go into a fund, of which the team holds the private key. This fund will be used for the benefit of OPCX. OPCX needs to be listed at exchanges and we'd like to begin with Kucoin, tradesatoshi, cryptohub, crypto-bridge and CoinExchange. Especially the last one has our priority but it costs a lot. With our fund we can raise more attention and steadily do more and more with marketing and commercials.

The official Master Node specs for OPCX are:

**Swap 20:1 OPC to OPCX**

**OPCoinX - OPCX - Your modern POS3.0 MasterNode coin**

**BIP 38 tool**

**Modern POS 3.0**

**Blocktime: 5min**

**3 MB BlockSystem**

**Algorithm Quark**

**Port: 18051**

**POS3 6h staking maturity**

**MasterNode Amount 37,500 OPCX**

**Staking 20% / Masternodes 75 %/ 5% Budget**

Phase	Block Height	Reward
Initial	0 - 2016	1 OPC
Phase 1x78840	78840	375 OPC
Phase 2x78840	157680	160 OPC
Phase 3x78840	236520	140 OPC
Phase 4x78840	315360	120 OPC
Phase 5x78840	394200	90 OPC
Phase 6x78840	473040	70 OPC
Phase 7x78840	551880	40 OPC
Phase 8x78840	630720	30 OPC
Phase 9x78840	709560	20 OPC
Phase 10x78840	788400	10 OPC
Phase 11x78840++		5 OPC

**Max supply: 350 mil**

**Premine: 80mil (swap + exchanges + dev fund)**

Swapbot opc --> opcx : 15 days (using discord bot), all opc coins will be burned

We will do a presale of Masternodes and coins to support new exchange listing fees!

More to come very soon, as it's less than a week until our biweekly update. Stay tuned and we hope you're just as excited as we are. Onto the next level!
