## ANNOUNCEMENT & WARNING

### RESEARCH PAPERS ON THE PREVENTION & CURE OF COVID-19 & HIV-AIDS

#### Announcement dated 26 April 2020 & update

Urgent Attn: Institutions of Government of India, Medical & Research Institutions Involved In Covid-19 Research Worldwide, Journals/Media/Databases, Learned Medical Experts, Nobel Laureate Dr Luc Montagnier and Dr David Ho at Aaron Diamond Aids Research Center.

Respected Sirs,

I have researched Covid-19 from the perspective of Classical Homeopathy and Western Medicine (Toxicology, Biochemistry, Virology, Immunology, Pathology and Pharmacology) and am **PLEASED TO DECLARE THE FOLLOWING FOR THE FIRST TIME IN THE WORLD:**

1) There is a strange similarity of symptoms between Arsenic Trioxide poisoning AND Covid-19 AND HIV-AIDS. Apart from usual symptoms that are common between all three – example of rare symptoms common between all three are: Immuno-suppression / loss of taste or smell / Acute Necrotic Encephalopathy or Demyelinating Encephalopathy / the rare symptom of Rhabdomyolysis. This cannot be a coincidence!

2) All the phenomenon related to covid-19 that has baffled scientists till date – can ONLY be explained from the perspective of arsenic / arsenic trioxide toxicity.

[Requesting the forensic toxicologists to review my research and confirm the sinister connection. Their confirmation will compel the western medicine scientists to take my research seriously. For example – in covid19 cases it is not dyspnoea but, it is actually hypoxia and exactly as if mimicking arsenic toxicity. Putting everyone on ventilators is not the solution].

3) Genus Epidemicus (community prophylaxis): I propose Arsenic Trioxide in potentized homeopathic form (Arsenicum Album 200c - Potentized on K-tronic potentizer) as the preventive & curative remedy for covid-19 & HIV. Only one dose of 200c & allowing it to work undisturbed for 5 months. More details in my research paper.

4) My solution of Classical Homeopathic prophylaxis is the ONLY solution that will break the chain, stop human-to-human transmission, prevent covid-19 infection and prevent the acute & chronic manifestations of covid-19. It is very cheap, non-toxic & very effective and can immediately be deployed through the Government Healthcare setup to cover the entire population. No vaccine or Hydroxy-Chloroquine is required.

In fact the BMJ has said that use of Hydroxy-Chloroquine in covid-19 is "*potentially harmful*".

<https://www.bmj.com/content/bmj/369/bmj.m1432.full.pdf>

The present strategies of using Hydroxy-Chloroquine and lockdown are flawed and will completely paralyze the economy. Lockdown can only slowdown the spread of the virus but, cannot kill the virus. Moreover, it is not possible to be in lockdown for ever! Bill Gates & the pharmaceutical lobby will surely recommend vaccination! It's all about money, honey! But, at the end - it is truth that triumphs! After you see that nothing is working or HIV like immuno-suppression or cardiovascular/neurovascular/inflammatory complications of covid-19 have completely baffled the clueless scientists - kindly do re-visit my research and opt for the Homeopathic Genus Epidemicus solution!

I say with great responsibility and full confidence that community Genus Epidemicus prophylaxis with the Homeopathic remedy Arsenicum Album and gradual natural development of 'herd immunity' is the only solution that will work eventually. No western medicine drug, vaccine, ayurvedic/herbal formula or any other fancy idea will work to specifically prevent covid-19 or cure it.

Nobel Laureate Dr Luc Montagnier has said that SARS-CoV2 is lab made and that it has bits of HIV genome in it. No vaccine was successful against HIV and no vaccine will be successful against Covid-19. Moreover, any forceful attempt to suppress HIV or Covid-19 by any drug or vaccine will lead to severe antibody

dependent enhancement (ADE) and/or a pandemic of viral diseases including HIV and/or an upsurge of tuberculosis & cancer and will make Covid-19 a chronic pandemic with manifold complications.

The clueless scientists, oblivious of the Covid19-HIV-Arsenic connection and the Homeopathic law of *Similia Similibus Curentur* will not be able to save mankind & the economy from this international conspiracy and crisis. Time will prove me right.

5) I am enclosing my complete research in 3 pdf files (and the present research paper as the 4<sup>th</sup> pdf). I have given enough evidence & reference citations in support of my statements & the final conclusion. Time will prove me right.

Kindly download my entire research from these links:

**A) Genus Epidemicus Covid19.pdf**

<https://docdro.id/cc6zmsH>

**B) Covid19 arsenic connection.pdf**

<https://docdro.id/EQJZVKQ>

**C) Arsenic HIV.pdf**

<https://docdro.id/ofS4xA9>

OR you may download the 3 pdf files from this German website:

<https://www.anthropine.de/>

My 4<sup>th</sup> research paper provides more evidence connecting the new emerging complications in covid-19 cases (cardiovascular inflammations/thrombosis etc.) with arsenic and re-confirms my advice of using Homeopathic Arsenicum Album as a safe & effective prophylactic against Covid-19.

I pray to everyone who may be in any position of authority or power worldwide - Kindly see the truth with an unprejudiced mind-set and save mankind and the economy from the Covid-19 disaster.

With warm regards,

Dr Manish Agarwala, Kolkata (India)

*Then ye shall see the Truth and the Truth shall set you free.*

*- Bible. John 8.32*

**RARE INFLAMMATORY SYNDROME SEEN IN CHILDREN WITH COVID-19**  
**WITH OVERLAPPING FEATURES OF**  
**TOXIC SHOCK SYNDROME AND ATYPICAL KAWASAKI DISEASE**

Cases of children with rare life-threatening inflammatory syndrome linked to coronavirus have been reported in US and Europe. Experts warn that the virus may have second dangerous phase in kids. The mysterious condition is understood to result in high fevers and swollen arteries similar to toxic shock syndrome symptoms. It is said to be similar to Kawasaki disease, an illness that can also cause severe swelling in the arteries. The cases report with high fevers, red rash, inflammation of the arteries and heart, diarrhoea, cold hands & feet and red tongue.

See here:

<https://www.dailymail.co.uk/news/article-8267721/Three-children-U-S-develop-rare-inflammatory-syndrome-linked-coronavirus.html>

<https://www.businessinsider.in/science/news/a-rare-condition-in-children-which-doctors-fear-is-linked-to-the-coronavirus-has-been-recorded-in-around-100-kids-across-6-countries/articleshow/75474598.cms>

<https://www.youtube.com/watch?v=HNXXptzG3A8>

[https://www.youtube.com/watch?v=-D5\\_0lwu6wA](https://www.youtube.com/watch?v=-D5_0lwu6wA)

AND

**Rare inflammatory syndrome seen in children with COVID-19**

*Britain's National Health Service first sounded the alarm over the weekend, warning about a small rise in children infected with the coronavirus that have "overlapping features of toxic shock syndrome and atypical Kawasaki disease."*

*Children have largely been spared the worst of COVID-19, but there may be a rare complication -- an inflammatory syndrome that one doctor described as causing patients to feel like "every blood vessel in the body is on fire."*

*Sunil Sood, a physician at Cohen Children's Medical Center in New York, told AFP he and colleagues had seen five or six such cases over the past three weeks, "and we've all been wondering why these somewhat older children, older than usually seen with Kawasaki disease, are coming in" with inflamed blood vessels. Kawasaki disease is a mysterious illness that primarily affects children up to the age of five and causes the walls of arteries to become inflamed, resulting in fever, skin peeling and joint pain.*

*...patients, who range in age from two to 18, have shown a range of "symptoms, including gastrointestinal, respiratory" and also heart trouble.*

*"Most need to be helped with drugs to support the functioning of the heart," he said.*

*Much in common with the cases seen by Sood: "They're coming in with sudden drop of blood pressure, or shock, sudden decrease in heart muscle function, which is myocarditis" -- though most of his patients are teens.*

*"The way we would explain it to parents is every blood vessel in the body is on fire," he said. Some have breathing troubles too, added Sood, "but not necessarily as dramatic or severe" as those seen in adults with severe COVID-19. Some patients are presenting with symptoms closer to "toxic shock syndrome," another rare disease seen as a complication of bacterial infection. One older child seen by Sood came in with low blood pressure and a rash caused by inflamed blood vessels.*

*Cases of Kawasaki disease, while rare, do appear to rise in springtime and in fall, for reasons that still remain a mystery -- and so it could be a coincidence in some cases that the patients also have the coronavirus. But there are some clues that the two may be linked.*

*"We are living in the COVID-19 epidemic, and we see an infrequent disease becoming more frequent. That raises questions," said Bonnet.*

*Its cause has long been a mystery, though scientists suspect it has a viral trigger that causes an abnormal immune reaction.*

*"It could well be that this virus drives the same inflammatory response that other viruses drive in Kawasaki disease," said Sood.*

*This ties in with what we have learned about how an abnormal immune response, called a "cytokine storm" in adult COVID-19 patients, can cause severe damage to their lungs.*

AND

### **Update: Can COVID-19 Cause Sepsis? Explaining the Relationship Between the Coronavirus Disease and Sepsis**

*“Now that more scientific data are available on COVID-19, the Global Sepsis Alliance can more definitively state that COVID-19 does indeed cause sepsis. Sepsis is “a life-threatening organ dysfunction caused by a dysregulated host response to infection.” In the case of COVID-19, the effects on the respiratory system are well-known, with most people requiring hospital admission developing pneumonia of varying severity; however, virtually all other organ systems can be affected. This is consistent with a combination of direct viral invasion and sepsis. For example, in a recently published case series of severe COVID-19 cases from the Seattle area in the United States, over 30% had evidence of liver injury and 75% had evidence of a depressed immune response; another series from the same region reported acute kidney failure in almost 20% of affected patients requiring ICU care, and both series reported septic shock severe enough to require drugs to support the heart and circulation in almost 70% of patients. A recent study from China reported that in patients hospitalized with COVID-19, 28% had evidence of significant heart damage (potentially from direct invasion of cardiac muscle by the virus), resulting in heart failure and abnormal heart rhythms – this damage was associated with a five-fold increase in the risk of death. As there are no proven therapies effective against the virus itself, it is apparent that the best COVID-19 care includes good sepsis care”.*

<https://www.global-sepsis-alliance.org/news/2020/4/7/update-can-covid-19-cause-sepsis-explaining-the-relationship-between-the-coronavirus-disease-and-sepsis-cvd-novel-coronavirus>

## MY ANALYSIS:

1. In my previous research papers - I have established that there exists an uncanny symptom similarity and sinister relationship between arsenic/arsenic trioxide toxicity AND Covid-19 AND HIV-AIDS and that all these three can aggravate each other. Therefore, on the basis of the fundamental law of *Similia Similibus Curentur* – I had declared potentized Homeopathic Arsenic Trioxide (Arsenicum Album) to be the preventive & curative Genus Epidemicus/homogenic remedy both for Covid-19 & HIV-AIDS.

2. Nobel Laureate Dr Luc Montagnier has said that SARS-CoV2 is lab made and that it has bits of HIV genome in it and that the body recognizes the SARS-Cov2 as HIV virus. The scientific community may debate the statements of Dr Montagnier but, the symptom similarity between HIV-AIDS and Covid-19 and Arsenic poisoning are no coincidence! Whatever be the cause behind this uncanny similarity – as per the principles of Classical Homeopathy – I confirm Arsenicum Album to be the Similimum for Covid-19 & HIV-AIDS because, I see the similar Arsenic ‘state’ both in Covid-19 & HIV-AIDS.

3. Now, coming to the rare inflammatory syndrome seen in children with covid-19 with overlapping features of toxic shock syndrome and atypical Kawasaki disease...

Kawasaki disease has a connection with mercury and I was wondering whether these cases need the Homeopathic remedy - Mercurius Solubilis. Are these covid-19 cases or any new kind of infection? Covid-19 can cause immune-suppression just like HIV. So, are these symptoms some kind of opportunistic infection superimposed on covid-19 cases with weak immunity?

I carefully analysed the symptoms and reached at the final conclusion that these symptoms are not separate from covid-19 and that Arsenicum Album covers the entire symptomatology of this inflammatory syndrome along with the common symptoms of covid-19.

I have already analysed the common symptoms of covid-19 in my previous research papers and confirmed Arsenicum Album to be the Similimum

Genus Epidemicus remedy. Now, I will Repertorize the entire symptomatology of the inflammatory syndrome using Zandvoort's Complete Repertory:

Generalities; inflammation: **ARS** (grade 4)

Generalities; inflammation; acute: **ARS** (grade 3)

Fever, heat; inflammatory fever: **ARS** (grade 3)

Skin; inflammation: **ARS** (grade 3)

Skin; erysipelas: **ARS** (grade 4)

Skin; erysipelas; scarlet: **ARS** (grade 3)

Skin; eruptions; rash; red: ars (grade 1)

Skin; eruptions; rash; red; scarlet: ars (grade 1)

Skin; eruptions; red; scarlet: ars (grade 1)

Skin; eruptions; red: **ARS** (grade 3)

Skin; redness: **ARS** (grade 4)

Skin; redness; scarlet: **ARS** (grade 3)

Boger's General Analysis 7; blood, sepsis etc.: **ARS** (grade 4)

Fever, heat; septic fevers: **ARS** (grade 4)

Blood; septicemia, blood poisoning, pyemia: **ARS** (grade 4)

Rectum; diarrhea; septicaemia, in: **ARS** (grade 4)

Heart & circulation; weakness; heart; septicaemia, in: **ARS** (grade 3)

Heart & circulation; inflammation; septic, endocardium: ars (grade 1)

Clinical; auto-immune diseases: **ARS** (grade 4)

Heart & circulation; inflammation; heart, carditis; myocardium, myocarditis: **ARS** (grade 3)

Heart & circulation; inflammation; heart, carditis: **ARS** (grade 3)

Heart & circulation; inflammation; heart, carditis; endocardium, endocarditis: **ARS** (grade 4)

Heart & circulation; inflammation; heart, carditis; pericardium, pericarditis: **ARS** (grade 4)

Heart & circulation; inflammation; blood vessels, phlebitis: **ARS** (grade 4)

Heart & circulation; inflammation; blood vessels, phlebitis; arteria: **ARS** (grade 3)

Heart & circulation; inflammation; blood vessels, phlebitis; arteria; aorta, aortitis: **ARS** (grade 3)

Heart & circulation; inflammation; rheumatic, heart; endocardium: **ARS** (grade 3)

Heart & circulation; aneurism; arteries: ars (grade 1)

Heart & circulation; inflammation; diffuse, arteries: ars (grade 1)

Heart & circulation; heat; bloodvessels; arteries: **ARS** (grade 3)

Mouth; redness; tongue: **ARS** (grade 4)

Generalities; coldness, lack of vital heat; icy; body, of: **ARS** (grade 4)

Fever, heat; internal; chill, with external; coldness of single parts, with: **ARS** (grade 3)

Extremities; coldness, chilliness: **ARS** (grade 4)

**THIS CONFIRMS ARSENICUM ALBUM TO BE THE SIMILIMUM REMEDY FOR COVID-19 AND COVERING ALL THE MYRIAD VARYING SYMPTOMS OF THE PECULIAR INFLAMMATORY SYNDROME.**

After Classical Homeopathic repertorial analysis - Let's look at toxicological data to convince the western medicine doctor that there is indeed a connection between covid-19 and Arsenic.

## DOES ARSENIC POISONING SHOW SIMILAR INFLAMMATORY SYNDROME INVOLVING THE CARDIOVASCULAR SYSTEM?

THE FACTS WILL SPEAK FOR THEMSELVES...

A) *In acute arsenic poisoning, death is usually due to cardiovascular collapse and hypovolemic shock. Acute arsenic poisoning may cause both diffuse capillary leakage and cardiomyopathy, resulting in shock.*

<https://www.atsdr.cdc.gov/csem/csem.asp?csem=1&po=12>

<https://www.atsdr.cdc.gov/csem/csem.asp?csem=1&po=11>

### B) ***Arsenic and Cardiovascular Disease***

*Epidemiological studies have shown that chronic arsenic exposure is associated with increased morbidity and mortality from cardiovascular disease....*

*Furthermore, the livers of the arsenic-exposed mice have activated pathways involved in immune responses suggesting a pro-hyperinflammatory state. Arsenic exposure of mice after weaning shows a clear dose-response in the extent of disease exacerbation. In addition, increased inflammation in arterial wall is evident. In response to arsenic-stimulated oxidative signalling, liver sinusoidal endothelium differentiates into a continuous endothelium that limits nutrient exchange and waste elimination. Data suggest that nicotinamide adenine dinucleotide phosphate oxidase–derived superoxide or its derivatives are essential second messengers in the signalling pathway for arsenic-stimulated vessel remodelling....*

*Findings from mechanistic studies indicate that arsenic causes inflammation in vascular tissues and activates oxidative signalling. Observed endothelial cell dysfunction is likely a consequence of direct effects on the vascular cells and indirect effects on the liver vasculature caused by arsenic exposure–promoted inflammation, disrupted lipid metabolism, and increased lipid oxidation.*

[https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2639760/#\\_sec9title](https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2639760/#_sec9title)

### **C) Arsenic Exposure and Cardiovascular Disorders: An Overview**

*The incidence of arsenic toxicity has been observed in various countries including Taiwan, Bangladesh, India, Argentina, Australia, Chile, China, Hungary, Peru, Thailand, Mexico and United States of America. Arsenic is a ubiquitous element present in drinking water, and its exposure is associated with various cardiovascular disorders. Arsenic exposure plays a key role in the pathogenesis of vascular endothelial dysfunction as it inactivates endothelial nitric oxide synthase, leading to reduction in the generation and bioavailability of nitric oxide. In addition, the chronic arsenic exposure induces high oxidative stress, which may affect the structure and function of cardiovascular system. Further, the arsenic exposure has been noted to induce atherosclerosis by increasing the platelet aggregation and reducing fibrinolysis. Moreover, arsenic exposure may cause arrhythmia by increasing the QT interval and accelerating the cellular calcium overload. The chronic exposure to arsenic upregulates the expression of tumor necrosis factor-alpha, interleukin-1, vascular cell adhesion molecule and vascular endothelial growth factor to induce cardiovascular pathogenesis. The present review critically discussed the detrimental role of arsenic in the cardiovascular system.*

[https://www.researchgate.net/publication/26854202\\_Arsenic\\_Exposure\\_and\\_Cardiovascular\\_Disorders\\_An\\_Overview](https://www.researchgate.net/publication/26854202_Arsenic_Exposure_and_Cardiovascular_Disorders_An_Overview)

==

### **MY ALTER EGO TIPTOES AND WHISPERS IN MY EAR...**

*“Hello! You are talking too much! First you talked about the connection between Covid-19 and Arsenic. And dammit! You have proved it! Not just by Classical Homeopathic Repertorial analysis but, also by quoting toxicological research studies, biochemistry etc! But, I will play the devil’s advocate and spoil you show now! You have mentioned the Covid19-arsenic-HIV connection and you have proved it in your earlier paper too. But, I want fresh evidence NOW! Can you show that HIV-AIDS patients show similar Toxic Shock Syndrome or Kawasaki disease like hyper-inflammatory syndrome? Can you establish a connection between HIV-arsenic-cardiovascular system? AND Yes, I want evidence from non-homeopathic source! Prove it or else admit defeat”.*

## MY REPLY....

Well...I was the first person to discover the covid19-arsenic-hiv connection. So, this is my unique discovery. No one has talked about it before me. But, I can definitely quote toxicological research studies that support my hypothesis.

THE FACTS WILL SPEAK FOR THEMSELVES...CHECK...

- Kawasaki-Like Syndromes Associated with Human Immunodeficiency Virus Infection  
<https://academic.oup.com/cid/article/32/11/1628/464583>

- Atypical kawasaki disease (KD) in an HIV-infected adolescent  
[https://www.jacionline.org/article/S0091-6749\(03\)03260-3/abstract](https://www.jacionline.org/article/S0091-6749(03)03260-3/abstract)

- Kawasaki-like syndromes in HIV-infected adults  
<https://www.ncbi.nlm.nih.gov/pubmed/17953991>

- Toxic Shock Syndrome as the AIDS-defining Diagnosis  
*Toxic shock syndrome (TSS) has been infrequently reported as a complication of AIDS. We present the case of a 24-year-old man, previously unknown to be positive for the human immunodeficiency virus, presenting in septic shock.*  
[https://journal.chestnet.org/article/S0012-3692\(16\)38902-4/fulltext](https://journal.chestnet.org/article/S0012-3692(16)38902-4/fulltext)

- **HIV, Cardiovascular Diseases, and Chronic Arsenic Exposure co-exist in a Positive Synergy**

*Recent epidemiological evidences indicate that arsenic exposure increases risk of atherosclerosis, cardio vascular diseases (CVD) such as hypertension, atherosclerosis, coronary artery disease (CAD) and*

*microangiopathies in addition to the serious global health concern related to its carcinogenic effects. In experiments on animals, acute and chronic exposure to arsenic directly correlates cardiac tachyarrhythmia, and atherogenesis in a concentration and duration dependent manner.*

*On the other hand, there are controversial issues, gaps in knowledge, and future research priorities of accelerated incidences of CVD and mortalities in patients with HIV who are under long-term antiretroviral therapy (ART). Although, both HIV infection itself and various components of ART initiate significant pathological alterations in the myocardium and the vasculature, simultaneous environmental exposure to arsenic which is more convincingly being recognized as a facilitator of HIV viral cycling in the infected immune cells, may contribute an additional layer of adversity in these patients.*

*Studies summarized in this mini-review suggest that chronic Arsenic exposure induces pathophysiological events relevant to the atherogenic potential including impaired vascular nitric oxide homeostasis, low Krüppel-like factor 2, 4 expression, and enhanced expression endothelial adhesion molecule like VCAM-1. These detrimental changes in the endothelial microenvironment, collectively expressed as endothelial dysfunction are the key molecular events in the cardiovascular system which are surprisingly common to Arsenic exposure and in the HIV infected patients on long-term ART. Based on the accumulating epidemiological evidences and experimental data, we conclude, arsenic exposure could be considered as an important modifying factor in the understating and intervention strategies of atherosclerosis and related cardiovascular diseases in virologically controlled HIV patients on ART, at least under certain circumstances (including genetic background, diet, co-exposure and geographical location). Also, we would argue that the considerable overlap with the worldwide exposure of Arsenic, incidences of HIV infection positively reinforce the initiation, persistence, and progress of HIV infection itself and the pathogenesis of related cardiovascular complications.*

<https://arxiv.org/ftp/arxiv/papers/1602/1602.05981.pdf>

**THE ABOVE ANALYSIS NOT ONLY CONFIRMS ARSENICUM ALBUM TO BE THE SIMILIMUM REMEDY FOR COVID-19 AND COVERING ALL THE MYRIAD VARYING SYMPTOMS OF THE PECULIAR INFLAMMATORY SYNDROME BUT, ALSO ESTABLISHES THAT ARSENIC TOXICITY, HIV INFECTION AND COVID19 SHOW SIMILAR SYMPTOMS AND THAT THERE IS A DEFINITE CONNECTION – A POSITIVE SYNERGY - BETWEEN ARSENIC TOXICITY, HIV INFECTION AND COVID-19 AND THESE THREE HAVE THE POTENTIAL TO AGGRAVATE EACH OTHER.**

## **“COVID TOES” MAY BE A NEW, RARE SYMPTOM OF COVID-19**

### **SPOTS ON TOES AND RASHES JOIN WEIRD NEW SYMPTOMS OF COVID-19**

A) Doctors have identified another rare symptom of covid19: purple or blue or red toes that look swollen and feel painful to the touch. Dubbed “COVID toes” by dermatologists, experts say the lesions have been popping up in younger people—sometimes as their first or only sign of COVID-19.

<https://www.prevention.com/health/a32237221/coronavirus-symptom-covid-toes/>

B) In one report from Italy, 20% of the patients had a skin rash, half at the onset of illness, and half later. There was not one specific type of rash; some were like hives, others a lacy pattern called livedo reticularis, and others were described as “chilblains” or “pernio,” with frostbite like lesions, and some were even like chickenpox.

Dr. Ramon Grimalt, dermatology professor at UIC-Barcelona, also provided early reports from Spain noting that children and teens were being seen with pernio, or chilblains, of fingers and toes. These lesions are caused by cold, which causes inflammation of blood vessels in the skin in some people. These kids generally had no or few respiratory or other symptoms of COVID-19. The Spanish General Council of Official Colleges of Podiatrists opened a registry to collect all these unusual cases. They warned that while these skin lesions were benign (not a problem, in themselves) they were notable as a sign of asymptomatic infection with coronavirus.

The lesions were described as “pseudo-frostbite” by the National Union of Dermatologists-Venereologists (SNDV) (another European group), because these sometimes painful lesions popped up without cold exposure. In one interesting case in “Amici DermPed,” □the child’s mother and sister had more classic symptoms of COVID-19, with fever, cough, and shortness of breath the week before the boy developed skin lesions on his feet.

A more unusual rash was noted in Bangkok. There, a patient presented with a skin rash called a petechial rash (like tiny bruises) and low platelet count. These symptoms are typical for dengue fever, a common mosquito-borne viral infection there, so it was assumed that was causing the patient's symptoms. Only later, after the patient was admitted to a tertiary medical center with breathing problems, was the COVID-19 diagnosed.

Clinicians are warned of one other masquerader. The pernio type rash, especially if there are painful pustular blisters on a reddish base, might be mistaken for community-associated MRSA (methicillin-resistant *Staphylococcus aureus*) lesions.

COVID can cause a wide range of symptoms in people, but we don't know why there is such a variety. Blood vessel inflammation appears to be a common denominator.

#### **MY ANALYSIS:**

The doctors of western medicine continue to be baffled with Covid-19...

*"The clueless doctor who cannot see the hidden satanic dual-face of Arsenic-HIV behind the Covid19 drama will be completely baffled, frustrated and will fail to understand what is going on and why and what to do about Covid-19".*

-Dr Manish Agarwala

I have already analysed the common symptoms of covid-19 in my previous research papers and confirmed Arsenicum Album to be the Similimum Genus Epidemicus remedy. Now, Repertorizing the peculiar dermatological symptoms of covid-19 using Zandvoort's Complete Repertory:

Generalities; inflammation: **ARS** (grade 4)

Generalities; inflammation; acute: **ARS** (grade 3)

Fever, heat; inflammatory fever: **ARS** (grade 3)

Skin; inflammation: **ARS** (grade 3)

Skin; erysipelas: **ARS** (grade 4)

Skin; erysipelas; scarlet: **ARS** (grade 3)

Skin; eruptions; rash; red: ars (grade 1)

Skin; eruptions; rash; red; scarlet: ars (grade 1)

Skin; eruptions; red; scarlet: ars (grade 1)

Skin; eruptions; red: **ARS** (grade 3)

Skin; redness: **ARS** (grade 4)

Skin; redness; scarlet: **ARS** (grade 3)

Heart & circulation; inflammation; blood vessels, phlebitis: **ARS** (grade 4)

Heart & circulation; marbled bloodvessels; reticulated, netted: **ARS** (grade 3)

Fever, heat; dengue fever; hemorrhagic: ars (grade 1)

Skin; eruptions; chicken-pox, varicella: **ARS** (grade 3)

Skin; eruptions; urticaria, nettle-rash; nodular, wheals, hives: **ARS** (grade 3)

Skin; eruptions; vesicles; blood blisters: **ARS** (grade 4)

Skin; eruptions; pustules; red: ars (grade 1)

Skin; redness; spots: **ARS** (grade 4)

Boger's General Analysis 7; vesicles, blisters etc. **ARS** (grade 4)

Extremities; chilblains: **ARS** (grade 4)

Extremities; chilblains; inflamed: **ARS** (grade 3)

Extremities; bluish; toes: **ARS** (grade 3)

Extremities; purple; toes; toenails: ars (grade 2)

Generalities; blueness of parts, cyanosis: **ARS** (grade 4)

Generalities; swelling; inflammatory: **ARS** (grade 4)

Generalities; swelling; red: **ARS** (grade 3)

==

**THIS CONFIRMS ARSENICUM ALBUM TO BE THE SIMILIMUM REMEDY FOR COVID-19 AND COVERING ALL THE MYRIAD VARYING DERMATOLOGICAL SYMPTOMS CAUSED DUE TO HYPER-INFLAMMATION OF THE SKIN AND CUTANEOUS VASCULATURE.**

Very soon, the media may report about Peripheral Arterial Diseases in covid-19 cases because, such Peripheral Vascular Diseases are common in Arsenicosis cases and Arsenic being the similia to covid-19 – similar symptoms will surely be observed in covid-19 cases sooner or later.

### **Arsenic Exposure and Cardiovascular Disease: An Updated Systematic Review**

*In epidemiologic studies, high-chronic arsenic exposure has been linked to cardiovascular disease (CVD), including coronary heart disease (CHD), stroke, and peripheral arterial disease (PAD). In particular, arsenic has been established as a cause of blackfoot disease, a form of PAD endemic to areas of Taiwan with extremely high levels of arsenic in drinking water. Experimentally, arsenic exposure can induce atherogenesis and endothelial dysfunction in animal models. Proposed mechanisms include up-regulation of inflammatory signals, enhanced oxidative stress, endothelial and smooth muscle cell proliferation, vessel remodelling, and apoptosis.*

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3483370/>

## **COVID-19 CAUSES HEMORRHAGE AS WELL AS THROMBOSIS**

### **BAFFLING THE DOCTORS**

Covid-19 can cause hemorrhage as well as thrombosis and thereby making the management of the patients very difficult & prognosis very uncertain.

**e) COVID-19 recognized as thromboembolic disease affecting multiple organs**

<https://www.contagionlive.com/news/covid-19-thromboembolic-disease-multiple-organs>

**f) COVID-19 and its implications for thrombosis and anticoagulation.**

<https://www.ncbi.nlm.nih.gov/pubmed/32339221>

**g) The Great Invader: How COVID-19 Attacks Every Organ**

*“A new finding suggests there may be another deadly culprit. Many doctors are discovering that abnormal clotting, known as thrombosis, may also play a major role in lethal COVID-19. Doctors are seeing clots everywhere: large-vessel clots, including deep vein thrombosis (DVT) in the legs and pulmonary emboli (PE) in the lungs; clots in arteries, causing strokes; and small clots in tiny blood vessels in organs throughout the body. Early autopsy results are also showing widely scattered clots in multiple organs.*

*Adam Cuker, MD, a hematologist at the Hospital of the University of Pennsylvania who specializes in clotting disorders, says these clots are happening at high rates even when patients are on blood thinners for clot prevention. In one study from the Netherlands, 31% of patients hospitalized with COVID-19 got clots while on blood thinners”.*

[https://www.medscape.com/viewarticle/929284#vp\\_2](https://www.medscape.com/viewarticle/929284#vp_2)

**h) Broadway star Nick Cordero has leg amputated after complications from the coronavirus**

*“Cordero, who has been in the hospital since March 31, was being treated with blood thinners to help relieve clotting in his leg, but doctors had to stop the medication because it was causing internal bleeding, the Associated Press reported. On Saturday, the decision was made to amputate...”.*

<https://www.washingtonpost.com/nation/2020/04/20/nick-cordero-leg-coronavirus/>

i) *This seems a bit surprising to me, since we now are seeing that one common thread in more severe cases is abnormal clotting. This is why use of anticoagulants for COVID-19 patients is increasingly recommended. Yet people are developing clots even while on anticoagulants □. Severe strokes □ in young adults was just described as yet another complication of COVID-19, though this was in otherwise healthy young adults.*

*Mild clotting is seen in the lungs, kidneys, heart and extremities. Broadway actor Nick Corduro □o had to have his leg amputated from clotting from the virus and has had quite a few complications.*

*We don't understand clearly why these clots are happening. We do know that the receptor for SARS-CoV-2, the virus that causes the COVID-19 infection, is found on the lining of blood vessels (vascular endothelial cells) □. The receptor is called angiotensin converting enzyme 2 (ACE-2). So perhaps this is why so much heart involvement is being seen with COVID-19. In a small study from Washington state, a third of the patients □ developed heart involvement.*

*While our understanding of COVID-19 has been progressing relatively quickly, there is still so much we don't know. This virus appears to be acting like syphilis, "the great imitator," with so many different manifestations in people—and we don't know why that is true.*

<https://www.forbes.com/sites/judystone/2020/04/27/spots-on-toes-and-rashes-join-weird-new-symptoms-of-coronavirus/#6e82af1157da>

### **MY ANALYSIS:**

Covid-19 can cause hemorrhage as well as thrombosis and thereby making the management of the patients very difficult & prognosis very uncertain. However, this confusion is because of the fact that the western medicine clinician fails to see the similarity of the Covid-19 picture with Arsenic.

I would like to add that the present state of confusion is just a beginning of the things yet to come. Thrombosis/hemorrhage and the flip-flop in the same patient and varying presentations in different patients is likely to leave the western medicine physician very perplexed and at his wits end.

No treatment or treatment strategy will satisfactorily work. The western medicine haematologist will fail to establish the normal homeostasis equilibrium and also not be able to explain this variable haematological phenomenon. The cause, explanation and solution of all this paradoxical phenomenon is what I concluded while discussing the Hypoxia conundrum in my previous research paper: the entire symptomatology mimics arsenic poisoning – whether it is hypoxia along with the strange tolerance towards hypoxia or whether it is the paradoxical alternation/presentation of covid-19 cases with haemorrhage as well as thrombosis – the symptoms of covid-19 and its different manifestations are similar to what is seen in arsenic poisoning cases. And there is only one solution to end this drama – reverse the story by the application of potentized arsenic! Yes -Arsenicum Album!

Kindly allow me to emphasize that the urgent need of the hour is to make the western medicine experts see the similarity of the covid-19 picture with the peculiar symptomatology of Arsenic poisoning and apply Arsenicum Album (potentized Arsenic Trioxide) to reverse the vexed phenomenon.

Zandvoort's Complete Repertory lists Arsenic under hemorrhage as well as Thrombosis.

Heart & circulation; embolism: ars (grade 1)

Heart & circulation; thrombosis: **ARS** (grade 3)

Blood; hemorrhage: **ARS** (grade 4)

**POST SCRIPT:** It is interesting to note that Judy Stone, the author of the article quoted before and an infectious disease specialist herself, observed thus: *“While our understanding of COVID-19 has been progressing relatively quickly, there is still so much we don't know. This virus appears to be acting like syphilis, “the great imitator,” with so many different manifestations in people—and we don't know why that is true”.*

As I have repeatedly stated – the specialists of western medicine will remain confused until and unless they are able to clearly see the hidden dual face of HIV-arsenic behind the covid-19 drama. The similarity of the entire symptomatology of covid-19 with arsenic poisoning is the mother of all explanations and rationale behind this entire otherwise perplexing

phenomenon. Moreover, what really caught my eye was her observation: *“This virus appears to be acting like syphilis”*. She is right! Covid-19 symptoms reflect the syphilitic miasm. Obviously, miasms are neither the monopoly of the homeopaths nor a figment of their imagination. Any astute observer, be it an allopath or a homeopath, will notice the same truth. Miasms are the basic constitutional template or predisposition that defines or drives the pattern of the entire symptom phenomenon in a particular way. Ayurveda explains it in terms of *dosha-prakriti*. The destructive symptoms of covid-19 reflect a strong aggravation of the *vata dosha* – it is the same as the syphilitic miasm of the classical homeopaths! Arsenicum Album is miasmatically a perfect choice for covid-19 because it is a powerful anti-syphilitic remedy!

Dr. Roger Morrison, in his famous book - *Desktop Guide to Keynotes & confirmatory symptoms* and Zandvoort’s *Complete Repertory* confirm that Arsenicum Album is, miasmatically, an anti-syphilitic remedy.

Zandvoort’s Complete repertory:

Generalities; syphilis: **ARS** (grade 4)

Good to note that an allopath with a sharp eye for detail, observed the fundamental nature of Covid-19 but, sad to note that the allopaths fail to connect the dots.

**THIS CONFIRMS ARSENICUM ALBUM TO BE THE SIMILIMUM REMEDY FOR COVID-19 AND COVERING THROMBOSIS AS WELL AS HEMORRHAGE.**

**CONJUNCTIVITIS WITH PINK OR RED EYE  
MAY BE THE FIRST AND A RARE SYMPTOM  
OF COVID-19 INFECTION**

**a) Coronavirus (COVID-19) may cause pink eye or conjunctivitis: But it's rare**

<https://www.expresshealthcare.in/blogs/guest-blogs-healthcare/coronavirus-covid-19-may-cause-pink-eye-or-conjunctivitis-but-its-rare/418103/>

**b) Is there a correlation between red eyes and coronavirus?**

*New evidence is emerging that eye redness might be a symptom of COVID-19, the disease caused by the novel coronavirus.*

*On March 23, 2020, CNN reported that a nurse at a nursing home in Kirkland, Washington, recalled red eyes being a clinical sign in some elderly residents who had developed COVID-19. Twenty-nine people associated with the nursing home died from coronavirus complications, including 18 residents of the nursing home.*

*"It's something that I witnessed in all of them (the patients)," Chelsey Earnest told CNN. "They have, like, um — you can describe it like allergy eyes. The white part of the eye is not red. It's more like they have red eye shadow on the outside of their eyes.*

*"But we've had patients that just had red eyes as the only symptom that we saw, and go to the hospital and pass away in the hospital," Earnest said.*

*Health officials believe conjunctivitis develops in about 1% to 3% of those who've been infected with the virus, the group says.*

*The American Academy of Ophthalmology cites two recently published studies suggesting that there's a connection between conjunctivitis and COVID-19....*

*As explained by Rady's Children Hospital–San Diego, viruses are the most common cause of conjunctivitis. Viral conjunctivitis may affect both eyes.*

*Symptoms normally last five to seven days and include: Redness in the whites of the eyes, Eyelid swelling, A sandy/gritty feeling in the eye, Tearing, Watery or slightly thick, whitish drainage... Keep in mind that pink eye is highly contagious. It's spread through contact with the eye secretions, which contains the virus....*

<https://www.allaboutvision.com/conditions/red-eyes-coronavirus-symptom/>

## **MY ANALYSIS**

Let's Repertorize using Zandvoort's Complete Repertory:

Eyes; inflammation; conjunctivae, conjunctivitis: **ARS** (grade 4)

Eyes; redness: **ARS** (grade 4)

Eyes; redness; canthi: **ARS** (grade 3)

Eyes; redness; lids: **ARS** (grade 4)

Eyes; redness; lids; margins, edges: **ARS** (grade 4)

Eyes; swelling; lids: **ARS** (grade 4)

Eyes; irritation: **ARS** (grade 3)

Eyes; discharges; thick: ars (grade 1)

Eyes; discharges; acrid, corrosive, excoriating; watery: ars (grade 1)

Eyes; lachrymation: **ARS** (grade 4)

*"The symptoms of slow arsenical poisoning are these: Oedematous eyelids; the patient suffers from slight conjunctivitis; the eyes are always red and injected, and smart and burn. Associated with these symptoms is dim sight".*

- Farrington's Materia Medica, Chapter: Arsenicum Album

**THIS CONFIRMS ARSENICUM ALBUM TO BE THE SIMILIMUM REMEDY FOR COVID-19 AND COVERING THE 'RED EYE' SYNDROME.**

## COVID-19 UNUSUAL PRESENTATION - 'TINGLING' IN ARMS AND FEET

### a) Coronavirus warning: Woman reveals the 'tingling' in her arms and feet

*One woman has explained that her COVID-19 infection caused "tingling" in her hands and feet... she explained that one of her first warning signs of falling ill was a tingling in her hands and feet.*

*She was sent home from work at midday after developing a headache and a fever. Later that night, she had a very high temperature, but was still shivering.*

*"And at that point, I started to shiver uncontrollably,"*

*"I was getting tingling in my hands and feet."*

*The tingling may be linked to the body's natural immune system trying to fight off the virus, scientists have claimed.*

<https://www.express.co.uk/life-style/health/1276092/coronavirus-symptoms-covid-19-infection-signs-tingling-hands-feet>

### b) What is the coronavirus fizzing symptom?

*Another day brings another round of possible new coronavirus symptoms, this time involving unusual sensory experiences. Some COVID-19 patients have reported "tingling" all over the body, or feeling like their skin was "on fire," "burning" or "covered in Icy Hot." People have also taken to social media to complain of an "electric feeling" on their skin, a "buzz" in their body or "like bubbles fizzing inside my ribcage." There's no definitive explanation for these reports as of now, but it's likely a patient's immune response, including a high fever — rather than the virus itself — would cause such sensations, said Dr. Waleed Javaid, director of infection prevention and control at Mount Sinai Downtown in New York.*

<https://www.today.com/health/do-coronavirus-symptoms-include-fizzing-tingling-or-burning-sensation-t178475>

### **c) What Does Covid-19 Do to Your Brain?**

*DURING THE THIRD week of March, as the pandemic coronavirus that causes Covid-19 was beginning to grip the city of Detroit, an ambulance sped through its streets to Henry Ford Hospital. Inside, a 58-year-old airline worker struggled to understand what was happening to her. Like hundreds of other Covid-19 patients flooding the city's emergency rooms, the woman had a fever, cough, and aching muscles. But something else was happening too—something that had made her suddenly disoriented, unable to remember anything but her name.*

*Doctors at Henry Ford tested the woman for Covid-19, and she came back positive. They also ordered CT and MRI scans. The images showed a brain aflame, its folds swelling against the patient's skull. On the computer screen, white lesions dotted the gray cross-sectioned landscape—each one filled with dead and dying neurons in regions that normally relay sensory signals, regulate alertness, and access memories. On the screen they appeared white. But in the electrical grid of the patient's brain, those areas had gone dark.*

*Her doctors diagnosed a dangerous condition called acute necrotizing hemorrhagic encephalopathy, or ANE, which they detailed in the journal Radiology last month. It's a rare complication known to occasionally accompany influenza and other viral infections, though usually in children.*

*But stories of other, stranger symptoms—headaches, confusion, seizures, tingling and numbness, the loss of smell or taste—have been bubbling up from the frontlines for weeks. Published data on how frequently the disease manifests in these types of neurological symptoms is still sparse, and experts say they likely occur in a minority of the 2 million officially tallied Covid-19 infections worldwide. But for physicians, they are important because some of these new symptoms may require a different line of treatment, one designed for the brain rather than the body.*

*“The medicines we use to treat any infection have very different penetrations into the central nervous system,” says S. Andrew Josephson, a neurologist at UC San Francisco. Most drugs can't pass through the blood-brain barrier, a living border wall around the brain. If the coronavirus is breaching the blood-brain*

*barrier and infecting neurons, that could make it harder to find effective treatments.*

*Right now, many doctors are trying a two-pronged approach. The first is finding antiviral drugs that can knock back how fast SARS-CoV-2 replicates. They often combine that with steroids, to prevent the immune system from going overboard and producing inflammation that can be damaging on its own. If doctors knew people had coronavirus in their brains - that would alter the equation. Unlike the lungs, the brain can't be put on a ventilator.*

<https://www.wired.com/story/what-does-covid-19-do-to-your-brain/>

**d) Three NEW mild coronavirus symptoms that you shouldn't ignore – according to people who've had it:**

*= One woman from North Tyneside said she felt like she had been "dunked in an ice lake" after feeling the strange tingling feeling. Tracy Clark, 49, said: "I describe it differently in three ways: like being dunked in an icy lake, like being struck by lightning, like pins and needles all over my body. No pain though, just terrifying." Liam Gardner, 40, from Surrey told the Sun Online said after four weeks of experiencing coronavirus symptoms he recently started feeling a "tingling pains" in his hands and arms.*

*= A new study, published in the American Journal of Gastroenterology, analysed data 204 patients with Covid-19 in China's Hubei province and found nearly 50 per cent had diarrhoea, vomiting or abdominal pain.*

*= Testicular pain may be a third rare sign of Covid-19, according to experts at Harvard Medical School.*

<https://www.thesun.co.uk/news/11392606/three-mild-coronavirus-symptoms-shouldnt-ignore/>

## MY COMMENTS:

1. I have already discussed the usual symptoms of Covid-19 and the loss of taste/smell and Acute Necrotic Encephalopathy (ANE) in my previous research papers and established the similarity with Arsenic/Arsenic Trioxide poisoning on the basis of Materia Medica, Repertory and Toxicological references. These references are enough to confidently declare Arsenicum Album (Homeopathic potentized Arsenic Trioxide) as the Similimum for Covid-19 and also the Genus Epidemicus.

2. The peculiar sensory experiences may be due to the reactions of the immune system and/or due to neuritis and/or due to the change in thermodynamic homeostasis by the virus.

Nevertheless, kindly allow me to repertorize all the peculiar sensory and other symptoms reported in this section and thereby confirm Arsenicum Album as the Similimum and Genus Epidemicus of Covid-19 covering all these symptoms.

### From Zandvoort's Complete Repertory:

Extremities; tingling, prickling: **ARS** (grade 4)

Generalities; inflammation; nerves, neuritis: **ARS** (grade 3)

Skin; pain; burning, smarting; fire, as from: **ARS** (grade 3)

Generalities; pain; burning, smarting; internal; coldness, with external: **ARS** (grade 3)

Boger's General Analysis 7; burning stinging: **ARS** (grade 3)

Extremities; buzzing sensation: ars (grade 1)

Generalities; humming, buzzing and whizzing in body: ars (grade 1)

Generalities; icy sensation; ice needle: **ARS** (grade 3)

Skin; ice; needles, as of ice cold: **ARS** (grade 3)

Skin; pain; stitching; needles, as from; hot: **ARS** (grade 3)

Skin; coldness; icy: **ARS** (grade 3)

Extremities; electric current, like: ars (grade 1)

Extremities; numbness, insensibility: **ARS** (grade 4)

Male; pain; testes: ars (grade 1)

Rectum; diarrhea: **ARS** (grade 4)

Stomach; vomiting: **ARS** (grade 4)

Abdomen; pain: **ARS** (grade 4)

Stomach; pain: **ARS** (grade 4)

Stomach; nausea; pain, with; abdomen, in: **ARS** (grade 4)

**THE ABOVE ANALYSIS CONFIRMS ARSENICUM ALBUM AS THE GENUS EPIDEMICUS COVERING THE PECULIAR SENSORY EXPERIENCES.**

3. There is a mention about the Blood-Brain-Barrier (BBB) and scientists are still not sure about the virus crossing the BBB and how to handle such neurological complications of Covid-19. They are talking about *“a different line of treatment, one designed for the brain rather than the body”* and *“Right now, many doctors are trying a two-pronged approach. The first is finding antiviral drugs that can knock back how fast SARS-CoV-2 replicates. They often combine that with steroids, to prevent the immune system from going overboard and producing inflammation that can be damaging on its own”* or are perplexed and not sure about what they are saying when they say – *“If doctors knew people had coronavirus in their brains, that would alter the equation. Unlike the lungs, the brain can’t be put on a ventilator”!!!*

Let me put the facts on the table...

- The scientists will remain clueless till they see the HIV-arsenic connection and accept Arsenicum Album as the ONLY remedy that can prevent and cure Covid-19 worldwide.
- The use of steroids with antivirals or any kind of NSAIDs will lead to deep suppression and in these advanced neurological cases – it will be the road to suffering & death.

- No different line of treatment is required. Both the western medical doctors and many Homeopaths are also in dark (unfortunately). These neurological symptoms are a part of the Covid-19 symptomatology and so, a holistic approach is required. As discussed in my previous research paper-the western medicine doctors have confused Hypoxia with Dyspnoea and are mindlessly putting people on ventilators and surely only the dumb guys can say think about putting the brains on ventilators, if they could do so! The unwise Homeopaths are no better when they forget the holistic-miasmatic Classical Homeopathic approach and tend to advocate many different remedies to be given symptomatically in an acute situation! Such Homeopathic prescribers, whether they be famous teachers/authors or whosoever, are no better than the allopathic doctor and are bound to bring great suffering and death to the hapless patient.
- Let's check out the facts re: Blood Brain Barrier and whether arsenic mimics similar behaviour. Since, I am so confidently advocating Arsenicum Album all the time – it is my duty to show the similia in all ways or accept defeat at the hands of the allopaths & pseudo-homeopaths!

Let's review the following quotes. The facts speak for themselves.

*a) Acute necrotizing encephalopathy (ANE) is a rare complication of influenza and other viral infections and has been related to INTRACRANIAL CYTOKINE STORMS, WHICH RESULT IN BLOOD-BRAIN-BARRIER BREAKDOWN, but without direct viral invasion or para-infectious demyelination.*

[https://pubs.rsna.org/doi/10.1148/radiol.2020201187?fbclid=IwAR2B8lzIa-MaHhah9dGkuNdejIL0qN\\_pCyQBGAV5IXEzJBb1olaQLrcKqC4](https://pubs.rsna.org/doi/10.1148/radiol.2020201187?fbclid=IwAR2B8lzIa-MaHhah9dGkuNdejIL0qN_pCyQBGAV5IXEzJBb1olaQLrcKqC4)

*[In my previous research papers, I have established that arsenic poisoning can present as ANE and that ANE is one of the rare presentations of Covid-19]*

*b) Studies in murine models have demonstrated that iAs crosses the blood-brain barrier (BBB) and is methylated in different brain regions that express the arsenic 3 methyltransferase (AS3MT) enzyme (Rodríguez et al., 2005; Sánchez-Peña et al., 2010). Transplacental transfer of As species from pregnant mice to fetus has been documented (Devesa et al., 2006; Jin et al., 2010).*

Reference:

Neurological effects of inorganic arsenic exposure

<https://www.frontiersin.org/articles/10.3389/fncel.2015.00021/full>

*c) In the case of arsenic, animal studies have shown that brain arsenic levels have a dose–response relationship to levels of arsenic in drinking water, demonstrating that THE BBB DOES NOT EFFECTIVELY BLOCK THE PASSAGE OF ARSENIC TO THE CNS. Additionally, it has been reported that ARSENIC MAY HAVE A DIRECT TOXIC IMPACT ON THE BBB ITSELF. A study on the effects of mixed metals on the BBB, showed THAT VARIOUS METALS, ARSENIC AMONG THEM, DISRUPTED THE INTEGRITY OF THE BBB LIKELY VIA EFFECTS ON ASTROCYTES, LEADING TO INCREASED PERMEABILITY OF THE BBB TO TOXICANTS SUCH AS ARSENIC.*

Reference:

The developmental neurotoxicity of Arsenic: Cognitive and behavioral consequences of early life exposure.

<https://www.sciencedirect.com/science/article/pii/S221499961400304X?fbclid=IwAR1-2GE08b5OibNeCM8a4YWJSDUh15xXuFxFjnsVt3Xyp7AUIT3kNOhJCR9Q>

So, while the scientists can continue to scratch their very confused heads, it is quite clear that whether the SARS-CoV2 virus crosses the Blood-Brain-Barrier (BBB) or not – the effects of the disease (Covid-19) does cross the BBB to affect

the Brain. The above references also re-confirm Arsenicum as the Genus Epidemicus of Covid-19 on the basis of similar symptoms & behaviour.

Moreover, the allopath, with his fragmentary symptomatic approach may be worried about the Brain or the BBB and think about a “*different line of treatment*” but, the genuine Classical Homeopath should be confident that his well selected holistic Similimum/Genus Epidemicus will cover all symptoms - including disease symptoms not reported before!

Whether the virus itself crosses the BBB or not is not important to the Classical Homeopath because the Covid-19 is definitely affecting the entire neurological apparatus and Arsenicum Album is the similia to Covid-19 - so the similia covers the entire spectrum of Covid-19 without excluding any part of the body. Further, because the potentized Homeopathic remedies work on the dynamic plane – the action of the remedy is not dependent on the BBB or placental barrier etc. and the remedies act everywhere unhindered. Moreover, since crude Arsenic crosses the BBB to exert its toxic effects in the Brain – the Classical Homeopath can surely rest assured that the well selected Genus Epidemicus remedy – Arsenicum Album - will definitely prevent or cure serious covid-19 neurological pathologies in the Brain.

4. As before, I am pleased to quote several toxicological research studies to further confirm that Arsenicum does cover the peculiar sensations as reported by the Covid-19 sufferers and therefore it is definitely the Genus Epidemicus of Covid-19.

Check....

a) *What are the health effects of arsenic exposure?*

*Symptoms of exposure to high levels of arsenic include stomach pain, vomiting, diarrhea, and impaired nerve function, which may result in ‘pins and needles’ sensation or numbness and burning in hands and feet.*

<https://www.healthlinkbc.ca/healthlinkbc-files/arsenic-drinking-water>

AND

b) *Arsenic Toxicity: A 35 year-old male presents because of numbness and tingling of his hands and feet.*

*History of present illness: His symptoms began approximately 3 months ago, with gradual onset of numbness and tingling in his toes and fingertips, progressing over weeks to involve the feet and hands in a symmetric "stocking glove" pattern. About 1 month ago he had an episode of nausea, abdominal pain, and diarrhea, which resolved after 3 days. In the past 2 to 3 weeks, the tingling has taken on a progressively painful, burning quality and he has noted weakness in gripping tools.*

<https://www.atsdr.cdc.gov/csem/csem.asp?csem=1&po=3>

**MY POST SCRIPT:** The 'stocking glove' pattern is a beautiful reminder of the Hering's Laws of Cure where 'below upwards' and 'periphery to centre' are the cardinal signs of progress of disease! Surely, truth is not limited to the domain of Homeopathy! But, the mentally conditioned allopath does not care to notice this phenomenon and its significance.

AND

*c) "China accounts for approximately half of the world's Arsenic production and consequently its pollution [48], and there are many regions that contain naturally high amounts of Arsenic in soil deposits. Arsenic toxicity studies from China typically focus on symptoms of neurotoxicity, including loss of hearing, loss of taste, blurred vision, and tingling/numbness in the limbs [49]. Altered mental health is comorbid with these ailments, including a prevalence of insomnia [49], anxiety and depression [50], and symptoms of distress [51]."*

[https://www.ncbi.nlm.nih.gov/pmc/articles/pmc4026128/?fbclid=iwar2krjdy8ek1whv8\\_hlizzqoilzmcvixmqzlqujw3ertkmsb4nqzpybll-o#cr49](https://www.ncbi.nlm.nih.gov/pmc/articles/pmc4026128/?fbclid=iwar2krjdy8ek1whv8_hlizzqoilzmcvixmqzlqujw3ertkmsb4nqzpybll-o#cr49)

**THE ABOVE ANALYSIS & DISCUSSION CONFIRMS ARSENICUM ALBUM AS THE GENUS EPIDEMICUS OF COVID-19 AND COVERING THE PECULIAR SENSORY EXPERIENCES.**

## TREATMENT GUIDELINES (UPDATED)

AND

## FINAL COMMENTS

1. There exists a strange similarity of symptoms between Arsenic poisoning, HIV-AIDS and Covid-19 and this may be confirmed by any forensic toxicologist. Whatever be the cause behind this uncanny similarity – as per the principles of Classical Homeopathy – I confirm Arsenicum Album [Potentized Homeopathic Arsenic Trioxide] to be the Similimum for Covid-19 & HIV-AIDS because, I see the similar Arsenic ‘state’ in Covid-19 & HIV-AIDS. Therefore, Arsenicum Album is the preventive & curative Genus Epidemicus/homogenic remedy both for Covid-19 & HIV-AIDS.

2. A single dose of Arsenicum Album 200c [potentized on K-tronic potentizer] is my suggested preventive & curative treatment for Covid-19. For more guidelines about treatment – please refer to the chapter: FINAL COMMENTS & THE SOLUTION TO THE COVID-19 PANDEMIC (REVISED) in my Covid19 research paper: ‘Arsenic’ - *The central pivot around which revolves the entire drama of covid-19 - A unique analysis for the first time...*

3. PQRS CONFIRMS...

Master Hahnemann says in aphorism 153:

**§ 153 Sixth Edition:** *“In this search for a homoeopathic specific remedy, that is to say, in this comparison of the collective symptoms of the natural disease with the list of symptoms of known medicines, in order to find among these an artificial morbific agent corresponding by similarity to the disease to be cured, the more striking, singular, uncommon and peculiar (characteristic) signs and symptoms of the case of disease are chiefly and most solely to be kept in view; for it is more particularly these that very similar ones in the list of symptoms of the selected medicine must correspond to, in order to constitute it the most*

*suitable for effecting the cure. The more general and undefined symptoms: loss of appetite, headache, debility, restless sleep, discomfort, and so forth, demand but little attention when of that vague and indefinite character, if they cannot be more accurately described, as symptoms of such a general nature are observed in almost every disease and from almost every drug”.*

In my opinion, my research confirms Arsenicum Album as the most suited Genus Epidemicus of covid-19 on the basis of many striking, uncommon, Peculiar-Queer-Rare-Strange (PQRS) characteristic signs and symptoms including Rhabdomyolysis, Immuno-suppression, Acute Necrotic Encephalopathy, loss of taste/smell and atypical Kawasaki disease like hyper-inflammatory syndrome etc.

4. In my previous research papers, I had quoted many experts and discussed how the risk of relapse, re-infection and life-threatening Antibody Dependent Enhancement (ADE) was real. I had also warned that the clueless western medicine doctors will remain baffled until and unless they are able to see the demonic connection of Arsenic-HIV with Covid-19 and that only Classical Homeopathy, based on the fundamental law of ‘*like cures like*’, can be the saviour. I had discussed the cardiac complications of Covid-19 in detail and showed that Arsenicum too has similar cardiac symptoms and that any kind of suppression of Covid-19 with non-homeopathic drugs/vaccines will lead to severe cardiac morbidities. I had pointed out that immuno-suppression is a common feature between HIV infection & Covid-19 and Arsenic toxicity and that any suppression of Covid-19 will surely lead to a viral pandemic & immune dysfunction. My worst fears are coming true and the allopathic doctors are continuing to walk on the wrong path. Steroids, anti-virals, NSAIDs and Hydroxy-chloroquine are being prescribed by the helpless and clueless western medicine doctor but, this suppression will have disastrous consequences.

Nobel Laureate Dr Luc Montagnier has said that SARS-CoV2 is lab made and that it has bits of HIV genome in it. No vaccine was successful against HIV and no vaccine will be successful against Covid-19. Moreover, any forceful attempt to suppress HIV or Covid-19 by any drug or vaccine will lead to severe Antibody Dependent Enhancement (ADE) and/or a pandemic of viral diseases including

HIV and/or an upsurge of tuberculosis & cancer and will make Covid-19 a chronic pandemic with cardiovascular, neurovascular and other complications.

## 5. BAD HOMEOPATHY

But, why should I blame the baffled allopathic doctors alone when majority of the Homeopaths, who are supposed to be the torchbearers of Dr Hahnemann's legacy, are completely in dark and making irrational & unscientific statements? I feel very sad to see some Homeopathic teachers suggesting Bryonia, Gelsemium and Camphora as the Genus Epidemicus of covid-19 and confusing the entire Homeopathic community.

Does Bryonia, Gelsemium or Camphora cover the immensely destructive, syphilitic miasmatic nature of Covid-19?

Does Bryonia, Gelsemium or Camphora cover: Severe Hypoxia, Rhabdomyolysis, Immuno-suppression, Acute Necrotic Encephalopathy and Atypical Kawasaki disease like hyper-inflammatory syndrome? As per Aphorism 153, shouldn't these PQRS symptoms be the confirmatory symptoms of the remedy?

Whom are these homeopaths trying to fool? Prof. Vithoulkas had anticipated this scenario in the early phase of the pandemic itself. It must be noted that a very mild and self-recovering case of Covid-19 can be easily suppressed by any remedy, particularly the high potency and repeated doses of the wrong remedies being prescribed by these misguided Homeopaths - and then these Homeopaths unwisely claim that Bryonia or Gelsemium or Camphora has "worked" on a Covid-19 case!

I quote Prof Vithoulkas...

*"Any remedy or false remedy or a placebo will have the same success as the one described for these cases".*

Those unwise homeopaths who are playing around with Gelsemium or Bryonia or Camphora and managing to suppress very mild and self healing cases of covid-19 will not wake up unless they see their Bryonia or Gelsemium or Camphora not working in severe cases and leading to fatalities. That they need

repeated doses & high potencies of Bryonia, Gelsemium & Camphora is in itself a proof that the remedy is wrong.

These unwise Homeopaths do not understand that wrong remedies & mindless repetition can cause suppression/aggravation more than the allopathic drugs. Unfortunately, multiple remedies/combination formulas and frequent repetitions have become the norm in present day Homeopathy and the future of Classical Homeopathy is in grave danger.

These pseudo-homeopaths do not know that they are unwisely causing suppression and this may lead to relapse or re-infection and it may be fatal due to Antibody Dependent Enhancement (ADE).

Epidemics provide a unique opportunity to serve humanity & also establish the supremacy of Classical Homeopathy over all other systems of medicine. But, in the present covid-19 pandemic - I am sorry to say - majority of the Homeopaths failed Homeopathy. The unwise polypharmacists or reckless prescribers of wrong remedies/multiple doses do not know that covid-19 is no joke and their irresponsible antics may lead a covid-19 patient to death.

**Prof. Vithoulkas is right when he comments thus, about the present scenario:**

***“At this moment with this situation, homeopathy could have its best chance to prove its efficacy, but due to such nonsensical ideas, circulating from irresponsible persons, have damaged deeply the real Classical Homeopathy of Hahnemann”.***

**- Prof. George Vithoulkas**

**31.03.2020**

Unfortunately, some Homeopaths who are prescribing or supporting Bryonia, Gelsemium or Camphora are doing so because of their lack of knowledge of materia medica and some homeopathic teachers are continuing to defend their wrong remedy choices simply because of their ego! These unwise homeopaths have gravely endangered the well-being of suffering mankind and have managed to confuse the gullible common man. If the mis-information campaign and misleading claims of dubious ‘clinical trials’ unleashed by these resourceful homeopaths is not checked immediately –the confused common

man will immensely suffer during the subsequent waves of infection of covid19 – because, severe covid-19 conditions [or covid-19 relapse/re-infection cases where there is a risk of fatal ADE] needs the right remedy in right dose/potency to prevent or cure it.

Hahnemann, Kent, Allen, Lippe and Hering would have been very sad to see Homeopathy in such a deep mess today. However, I am an optimist and I will continue to write for those very few Classical Homeopaths who are loyal adherents of the teachings of our great master Dr Hahnemann and have the experience & confidence to cure serious diseases in emergency setting with a single remedy & single dose.

I have come across some dubious so-called clinical trials/researches by 3 so-called homeopaths/homeopathic teachers who claim that they have given the remedies to thousands or millions or across several continents and found that Bryonia or Gelsemium or Camphora is the Genus Epidemicus! These dubious, ignorant and egoistic fools are a curse for Classical Homeopathy and use their political connections, money power and popularity to spread lies and mis-information. I feel so sorry for Classical Homeopathy and the suffering mankind. At times, I wonder why I soldier on and keep writing about Classical Homeopathic cure of Covid-19. It's a David vs. Goliath scenario here. I keep working hoping that David will win one day because; he has the truth on his side.

It is surely the misfortune of the suffering common man that my in-depth research & analysis and the huge success of Arsenicum Album in preventing as well as curing Covid-19 cases - gets less popularity than all kinds of rubbish so-called 'research' by western medicine doctors, ayurvedic experts and the pseudo-homeopathic lobby. These are no researches but, experiments actually. In this grim scenario – where there are no takers for the truth - the Bill Gates empowered Vaccine lobby is confident that they will be successful in forcibly vaccinating everyone. It's all about money, honey!

I have come across a European research study and some US/Indian/European Homeopaths/medical doctor-homeopaths who have claimed that they are 'Individualizing' each case. I carefully studied some of their case histories and their data and found that they needed 20 or more remedies to 'cure' their

cases or the cases needed several remedies according to the changing symptoms of the case or frequent repetitions were necessary! This is not even worthy of being called 'Bad Homeopathy' but, deserves to be medico-legally challenged for medical negligence. No wonder, Classical Homeopathy gets a bad name because of these black sheep. And these dim-witted people are at the forefront of peddling Bryonia or Gelsemium or Camphora and many other remedies because they fail to see the Arsenicum Album picture in the cases in front of them.

I saw case histories of several Indian/US/European Homeopaths where these pseudo-homeopaths had prescribed repeated doses of Bryonia or Lycopodium or Gelsemium or Nux-v to covid-19 cases with a clear Arsenicum picture and then these homeopaths claimed that they had 'cured' Covid-19 with Bryonia or Lycopodium or Gelsemium or Nux-v! I am sure that I will never be successful in convincing these dim-witted prescribers that they are actually suppressing very mild cases of Covid-19 and that mere absence of symptoms in the present instant is not a confirmation of cure and there is no guarantee that there will not be a relapse.

A true cure will show clear signs of cure as evidenced by Hering's Laws of cure. But, a bad homeopath is not used to observing such details. No wonder a famous but, misguided homeopath asked me whether Hering's Laws of Cure is observed in Acute cases or not!

On one hand we have these pseudo-homeopaths who prescribe 10M of the wrong remedy twice a day and on the other hand we have the polypharmacy prescribers who think that a combination formula works best. And then there are those 'educated' doctors who think prescribing Hydroxy-chloroquine or Anti-virals along with Homeopathy is 'advanced homeopathy' and that they are doing some kind of advanced covid-19 research! Did Dr Hahnemann gift us Homeopathy for this kind of pseudo-treatment? Surely, these are the '*mongrel sect*' cursed by Dr Hahnemann in Aphorism 148 of the Organon.

While fools will remain fools, it pains me to see Classical Homeopathic teachers OR even the AYUSH ministry talking about Arsenicum Album is a generalized vague way for 'ILI' – influenza like illnesses and not confidently declaring Arsenicum Album to the confirmed preventive as well as the curative Genus

Epidemicus of Covid-19. I wonder why I was the first person who confidently declared Arsenicum Album as the preventive as well as curative Genus Epidemicus of Covid-19 and in the due course of my research, discovered the Covid19-arsenic-HIV connection too. Why didn't any other Homeopathic teacher find this truth about covid-19 or HIV before me?

While fools will remain fools, it pains me to see Classical Homeopathic teachers (who advocate for the 6<sup>th</sup> edition of the Organon) or even the AYUSH ministry talking about prescribing Arsenicum Album 30c daily for 3 or 4 days. Is this daily dosing Classical Homeopathy? Is it as per the instructions in the 6<sup>th</sup> organon? I politely questioned an organon teacher who advises Arsenicum Album 30c to be taken daily for 4 days: *"Why 30c daily for 4 days, Sir? Why not 200c one dose only once? Won't repeated doses aggravate?"* He replied – *"To wake up the vital force, it is required to repeat daily for 4 days. 30c does not aggravate"*. I was too stunned and saddened to hear this from a teacher of the 6<sup>th</sup> edition of the Organon. I could hear Dr Hahnemann screaming from his grave: *"discite moniti"* [Do not do this].

If Dr Hahnemann would have heard about repeated doses of Bryonia 200c or Bryonia 10M or Camphora 1M being prescribed to Covid19 Arsenicum cases and Organon teachers justifying repeated doses of the remedy – the master would have joined me to drown his sorrows in the old song by Mohd. Rafi *"Yeh duniya, yeh mehfil mere kaam ki nahi"* [this world and its soirées are not fit for me] <https://www.youtube.com/watch?v=jFNEVz6pqio>

This Covid-19 epidemic has provided a god-send opportunity to the Homeopaths not only to serve humanity but, also to establish that ONLY Classical Homeopathy can save the world from this disaster. I hope my research reaches some wise people who are well connected with those in power and my Genus Epidemicus suggestion is CORRECTLY implemented or else covid-19 is a doomsday scenario – at present and also in the future. The allopathic drugs & vaccine will turn covid-19 into a chronic inheritable suffering along with a permanent cancer/tuberculosis/viral pandemic and as usual, the western medicine lobby will fail to see or never acknowledge the connection.

6. I have opted for a single dose approach and advise that the remedy be allowed to act undisturbed for a long time. Those Homeopaths who are used to bad homeopathy, reckless prescribing and frequent repetitions fail to understand the rationale behind my cautious approach.

I have drafted the treatment guidelines keeping the following objectives in mind:

- The prevention or cure regimen should be as per the time-tested principles of Classical Hahnemannian Homeopathy.
- SIMI-MINI-MONO is and will be the central theme of the treatment at all times.
- For preventive Genus Epidemicus it must be remembered that the remedy is being applied to a large section of the community without assessing each individual's health status. And as such the conscientious classical homeopath must keep 4 things in mind:

A) Prevent covid19 by right remedy & single dose. But, do not suppress. Repeated doses of any remedy can suppress.

**B) Make sure that the underlying untreated constitutional issues are not brought up on the surface or the existing morbidities are not aggravated due to high potency and frequent repetition of the Genus Epidemicus.**

C) There will be people in the community who have taken wrong homeopathic remedies/taken many doses of the right remedy AND also those with fragile health conditions eg. neurological/neurovascular or cardiovascular or nephrological morbidities. After careful deliberations – a suitable strategy should be devised that efficiently covers all sub-types of the populace and yet, is easy to implement in the community setting.

D) The motto of the preventive Genus Epidemicus or curative treatment should be ***Primum non nocere* – First, do not harm.**

I have drafted the treatment guidelines keeping the above objectives in mind.

I recommend a single dose of Arsenicum Album as the preventive Genus Epidemicus as well as curative remedy for Covid-19. Arsenicum Album in 200c

potency (SBL/BOIRON) - given just once and the remedy allowed to act undisturbed at least for 5 months.

- I propose a worldwide mass distribution by all governments.
- The remedy must be of standard quality and not spurious – particularly in countries like India.
- Although a genuine Arsenicum Album 200c from any reputed pharmacy will work – potentization method does make a difference. **I recommend a high quality Arsenicum Album 200c prepared on K-Tronic Potentizer of Labotics (Belgium), as offered by Boiron (France) or SBL (India) or any other very reliable pharmacy which uses the K-Tronic Potentizer, as the best & standardized choice.**
- Earlier, in the first week of March 2020, I was suggesting constitutional treatment OR Genus Epidemicus - as the case may require - and Arsenicum Album 30c just one dose in areas with low risk. But, seeing the present scenario with the looming threat of stage-3 community transmission and long term chronic effects of Covid19 – I have revised my advice. Now, I am suggesting only the Genus Epidemicus. Arsenicum Album 200c (K-tronic potentized). One dose. Only once. Remedy should be allowed to work undisturbed for 5 months. Quick repetitions may produce strong aggravation along with disturbance in remedy action.
- Sensitive provers (I myself being one such prover) have found that a 200c hand succussed remedy by brands such as HAPCO of Kolkata lasts at least for 84 days with just one single dose.

Remedies potentized on K-Tronic Potentizer are stronger and last longer. A 200c SBL remedy lasts at least for 4 months. I would never repeat a 200c SBL remedy (single dose) before 5 months, at least.

## APPLICATION OF THE GENUS EPIDEMICUS

- **SINGLE DOSE APPROACH** is the best and most suitable approach for applying the Genus Epidemicus in the community. It is preferable that the person is not already over-medicated with many wrong remedies and multiple repetitions (Bad Homeopathy) and the correct Genus Epidemicus – Arsenicum Album 200c (K-tronic potentized SBL/BOIRON) - one single dose - given only once - is allowed to work undisturbed for 5 months. Do not repeat and wait at least for 1 year from the date of prescription.
- **DELAYED APPROACH:** If any another potentized remedy has already been taken before – prescribe Ars Alb 30 (K-tronic potentized) immediately. Only one dose. Only once. Thereafter don't prescribe any other remedy for 2 months. Then after 2 months – prescribe Ars Alb 200c (K-tronic potentized). Let Ars Alb 200c work undisturbed for 5 months. Do not repeat and wait at least for 1 year from the date of prescription of Ars Alb 200c.
- **STAGGERED APPROACH or INDIVIDUALIZATION:** In case of patients of neurological disorders (like epilepsy) or neuro-vascular cases (like cerebral stroke) or patients with severe cardiac or renal issues or any other patient with a very fragile health condition – please do not assume that the Homoeopathic remedy can be recklessly prescribed without harm. In such cases, multiple remedy prescriptions or repeated doses or high potency may prove to be fatal. In such very severe & precarious cases – it may be advisable not to prescribe the Genus Epidemicus unless the case is carefully evaluated by a medical doctor along with a very experienced Classical Homeopath. **The Chronic constitutional remedy may be the best protection in such cases.** Even if a decision is taken to prescribe Ars. Alb. as the Genus Epidemicus – it should only be prescribed in K-tronic potentized 30c potency (One dose. Only once). Then wait for 2.5 months. Thereafter, repeat Ars Alb 30c again (one dose. Only once). Do not disturb the remedy action for 2.5 months. Thereafter, Ars. Alb. may be repeated only after 1 full year (from the

date of the first dose of Ars Alb 30c) and not before. Such critical cases are best handled individually by a very experienced Classical Homeopath and should be kept outside the purview of mass general Genus Epidemicus. Keep Ars Alb 200c (K-tronic potentized) in mind for Covid19 acute, though.

- **NO REMEDY APPROACH OR PLACEBO APPROACH:** In case, it is seen that the a person has already taken 2 or 3 or more doses (at least 2 doses) of Arsenicum Album 30c (or higher potency) within last 6 months – it is best not to prescribe any remedy and only prescribe placebo. Similarly, in cases of patients of neurological disorders (like epilepsy) or neuro-vascular cases (like cerebral stroke) or patients with severe cardiac or renal issues or any other patient with a very fragile health condition (as discussed above) – it may be wiser to prescribe only placebo – because, further individualization and constitutional treatment is not possible in community health centre setting (particularly in developing countries like India or Africa) and also because, experienced & genuine classical homeopaths are a rare commodity everywhere.
- **EMERGENCY REPETITION:** I have advised using the remedy Arsenicum Album 200c [K-tronic potentized. SBL or Boiron] only one dose once and then not disturbing the remedy action for 5 months and not repeating before 1 year from the date of prescription. This cautious approach is to ensure that the underlying constitutional disorder of the person is not brought to the surface by repeated doses and also because, one single dose of the very carefully selected preventive & curative Genus Epidemicus remedy (Arsenicum Album) in 200c potency will not only work for 5 months but, will also eradicate the susceptibility of the organism to Covid-19 for quite a long time. I do not foresee such a person getting Covid-19 or needing another dose for at least 1 year if not several years.

However, understanding the fact that the Genus Epidemicus remedy is to be applied by untrained health workers in a community setting

(particularly in developing countries like India & Africa) and there are people who may take the remedy with menthol/peppermint/pan-masala etc. in mouth or the remedy may have been spoilt due to storing in high heat/exposure to sunlight or the ignorant persons may take some other homeopathic remedy after taking Arsenicum Album and thereby antidoting or disturbing the action of Arsenicum Album 200c single dose – **if required** it **MAY** be necessary to repeat a dose of Arsenicum Album 200c (SBL/BOIRON) single dose **AFTER 6 MONTHS** (and not before) if there is a stage-3 spread of Covid-19 in a particular locality or if a particular person reports with Covid-19 positive test report (or has covid-19 symptoms).

[Please note my emphasis on ‘if required’ and ‘may’ and not make it a routine affair. Not before 6 months – is a good advice considering the variable factors in a community setting with the Genus Epidemicus ‘*one size fits all*’ approach].

In case, a person is an acute Covid-19 case, he should immediately be prescribed a single dose of Arsenicum Album 200c even if he says that he has taken dose/s of Arsenicum Album in any potency at any time before. Care must be taken that the single dose of Arsenic Album prescribed during emergency acute situation is of high standardized quality [I recommend the K-tronic potentized SBL or Boiron remedy] and is stored away from heat/sunlight/strong odours/electromagnetic fields and is taken by the patient in a clean mouth (empty stomach before brushing teeth or 6 hours after brushing teeth and 2 hours after breakfast/lunch) and no food for 2 hours after taking the remedy. No brushing teeth for at least 2 hours after taking the remedy. Peppermint / menthol / pan-masala / coffee / caffeinated drinks / taking other homeopathic remedies and disturbing the action of the single dose of Arsenicum Album 200c are not advisable throughout the homeopathic treatment.

Please note that many of the above said advisories are based on the community scenario where individualized treatment is not possible.

If asked, I will be pleased to further fine-tune my advisories to make it easier to apply in rustic community setups.

- **Summary of my BASIC Genus Epidemicus advice:** I propose the use of Arsenicum Album 200c - potentized on K-Tronic Potentizer (SBL/BOIRON). Just one single dose and not repeated thereafter. It is the best suited worldwide Genus Epidemicus prophylaxis as well as the curative remedy. Do not disturb the remedy action at least for 5 months. Do not prescribe any other remedy at least for 5 months. Do not repeat and wait at least for 6 months, if not 1 year or longer from the date of prescription, before repeating.
- I will recommend the use of Arsenicum Album in 200c potency (SBL/BOIRON) particularly in areas with stage 3 community transmission risk and for doctors, health workers and everyone whose profession involves interaction with people.
- This 200c is the syphilitic phase potency as per Dr Prafull Vijayakar and was the frequently used potency by Lippe, Boenninghausen and Dunham. A careful analysis of the in-vitro research work by Dr Girish Gupta of Lucknow (India) confirms the unique curative effects of 200c potency in infections.

As per Dr Prafull Vijayakar - 200c is the best potency for acutes.

Single dose Arsenicum Album 200c makes more sense than the AYUSH ministry suggestion of 30c on 3 days. Taking the remedy daily for 3 days may aggravate or disturb the remedy action. One single dose – taken just once and thereafter ‘wait and watch’ – is the Classical Hahnemannian approach.

I recommend only the 200c potency for Covid-19 prophylaxis as well as cure. According to me, 200c is the similimum harmonic potency for the Covid-19 syphilitic symptoms. Now-a-days, the Covid-19 cases are presenting with great virulence and quickly leading to life-threatening

hypoxia or cardiological symptoms or sudden neuro-vascular incidents or hyper-inflammatory syndromes. Seeing this depth and speed of Covid-19 symptoms – which is quite destructive and evidently of the syphilitic miasmatic nature – I am unable to endorse the use of 30c as the optimum potency and suggest the use of a single dose Arsenicum Album only in 200c potency. Only one single dose and thereafter ‘wait and watch’!

- My emphasis on remedies potentized on K-tronic potentizer (Labotics, Belgium) and suggestion of SBL or BOIRON brands is not a matter of personal opinion. I have no business links with any of these companies.

Actually, I have carefully studied the potentization methods and the potentizer used by many pharmacies worldwide and was surprised to find wide variations in the process. For example, the vintage BT potencies were fluxion potencies which were diluted 1:17 times and were never succussed! [Info courtesy: my late friend Julian Winston]. Again, the number of succussion varies from one pharmacy to another and may be 10 or 20 or 40 or more!

All potentizer machines are not the same. The Quinn potentizer of Hahnemann Labs, USA and the K-tronic potentizer used by SBL or BOIRON are as different as chalk and cheese!

A 200c (vintage BT) and a 200c (HAPCO, Kolkata) and a 200c (Helios, UK) and a 200c (Hahnemann Labs) and a 200c (SBL or Boiron) and a 200c (vintage swan) and a 200c (vintage Dunham)...are all different! And then there is Hahnemannian multi-vial potentization VS. single vial korsakoff! And then difference in machines! I can go on and on....!! ALL DIFFERENT ALTHOUGH THE LABEL SAYS “200c”

Without going into too much detail – I would like to add that I have carefully studied and compared the potentization details and above all – as a true student of Hahnemann – I HAVE DONE COMPARATIVE PROVING OF REMEDIES POTENTIZED IN DIFFERENT WAYS ON MYSELF &

OTHERS and my observations + clinical experience forms the basis of my advisories in this research paper.

My final & much verified opinion is that the remedies potentized on K-tronic potentizer (of the Labotics company of Belgium) which is used by SBL (India) and BOIRON (USA & France) are the most powerful and last longest. Moreover, these remedies potentized on the vibratory K-tronic potentizer have the maximum penetrative depth, are more effective for pathologies and are likely to be more effective to prevent & cure the destructive syphilitic symptomatology of Covid-19.

Recommending a particular potency, potentization method and brand is also necessary to ensure standardization.

- Quantity of medicine (Dose): In Classical Homeopathy – the remedies are being used just to give ‘information’ to the dynamically vibrating mind-matter continuum of the patient. THERE IS NO PHYSICAL DOSE. Any ‘dose’ from 1 poppy seed size globule to several drops is fine. I am the student of the great classical homeopathic master of Kolkata – Late Dr Dhananjay Ray. In my earlier years, I have done great experiments on posology and shared my observations with this old master. 1 poppy seed globule of the remedy works even after diluting in 1 or 2 litre bottle of water OR even after serial dilutions in the 15<sup>th</sup> glass of water (each glass having 200 ml water and 5 ml transferred at each step)! Aha! minimum dose! Aha! Miracle of minimum dose!

Btw – my favourite posology is using 1 poppy seed of the 50-millesimal potency in a 1 oz. vial and just olfaction! *Nur einmal riechen. Dies ist meine Mindestdosis* [The Germans know what I mean! Hahnemann would have been pleased!]

With due respect, I am unable to endorse prescriptions like “4 globules of 30 no. size globules” as perfectly logical or classical homoeopathic ‘dose’! We classical homeopaths are not materialists like the allopaths!

However, for the sake of ease in dispensing and standardisation in community setting – I would suggest “4 medicated globules of 30 no. or 40 no. globule size” as 1 dry dose OR “1 drop of the remedy in distilled water” (In a NEW unused glass bottle - washed with distilled water before use) as 1 dose in water. The globule sizes mentioned are Indian. Those in UK may opt for 2 to 4 pills of pill no. 6 having 3.5 mm diameter OR 4 pills of pill no. 3 having 2 mm diameter. Boiron gives pellets of standard size and 4 pills may be considered a ‘dose’. Both dry dose and water dose work well – choose any of these two on the basis of convenience.

- There may be some atypical cases needing other remedies for cure. Some patients may need their constitutional remedy for cure. Nevertheless, Arsenicum Album is undoubtedly the best suited Genus Epidemicus preventive remedy and is likely to be the curative similia in almost all very severe, potentially fatal Covid-19 cases.
- There are some pseudo-homeopaths who tend to merrily prescribe many remedies and many doses and/or prescribe ‘combination formula’ of several homeopathic remedies and/or prescribe combos of allopathic drugs + homeopathic remedies. These pseudos are a curse for Classical Homeopathy and are responsible for all the mess and bad repute of Homeopathy. Some of these bogus Homeopaths may also conduct ‘Research’ and publish articles in Journals! Recently, I came across a ‘Research Paper’ on the Homeopathic treatment of Covid19 in an European country where 2 to 6 remedies were given to the same patient and it was claimed that about 20 different remedies were indicated in Covid19 cases and that the homeopathic remedies were prescribed along with allopathic drugs! This is not individualization – this is not treatment – this is not Research - this is not homeopathy! It is VERY BAD Homeopathy and a gross professional misconduct. Such pseudo-homeopaths with zero knowledge of Homeopathy have turned Homeopathy into a joke.

***Discite moniti*** (Hahnemann). ***Primum non nocere*** (Thomas Sydenham).

- In an acute case, I feel more comfortable with Dr Prafull Vijayakar's approach of giving the carefully chosen similimum remedy in 200c potency (just one dose) and thereafter, just wait and watch! For curing an acute case of Covid-19 - a single dose of Arsenicum Album 200c (SBL/BOIRON) given just once should suffice. If the remedy is given in time and the vitality still has the strength to react to the homeopathic remedy – and also assuming that the allopathic medicines have not spoiled and complicated the case beyond repair - the single dose of Ars Alb 200c should cover all stages/act in any stage and resolve the entire acute emergency very beautifully as per Hering's laws of cure within minutes or 24 to 72 hours! [Time of resolution varies according to the situation of the case at hand]

7. In my humble opinion - if the Genus Epidemicus (Arsenicum Album) is applied *en-masse* throughout the population it will ensure that the silent spreaders - the asymptomatic Covid +ve carriers will become Covid -ve and will not be able to infect others. This Genus Epidemicus will also help to eradicate the susceptibility of the entire population to Covid-19 and lower the infection rate. Hence, there will be no need for a lockdown or fear of community stage-3 spread and the pandemic will end on its own.

This Genus Epidemicus (Arsenicum Album) is the practical and effective prophylaxis strategy which sidesteps A) the delay, costs as well as the possible perils of the mainstream Covid-19 vaccine and B) possible dangers of the proposed BCG vaccination and C) side-effects of the hydroxy-chloroquine prophylaxis.

Mass public application of this Genus Epidemicus (Arsenicum Album) will ensure prophylaxis without burdening the state exchequer with the costs of tests and quarantine. It will also allay public fear & panic and give people hope & confidence of protection.

I declared Arsenicum Album as the preventive and curative Genus Epidemicus of Covid-19 on 13 March 2020 and publicly declared the Covid19-arsenic-HIV connection on 26 April 2020 – all for the first time in the world and with elaborate analysis & evidence. My viewpoint has consistently been the same.

Allopathic drugs and vaccine will neither cure nor prevent Covid-19 - but, will suppress and complicate the matter and lead to high fatalities - apart from making Covid-19 a permanent chronic pandemic. Classical Homoeopathic treatment of the acute Covid-19 infection with Arsenicum Album is without side effects as compared to the western medicine's cocktail of anti-HIV drugs & hydroxy-chloroquine or the antiviral remdesivir (ebola drug) or kaletra (combination drug against HIV) or camostat mesylate (used in pancreatitis) or anti-malarial drugs or drugs used for arthritis- all of which can result in lifelong morbidities or make the virus resistant or weaken the immunity of the body making it vulnerable to new pathogens in future or in the present instant, due to the suppression of disease - lead to relapses or 2nd / 3rd waves of Covid19 re-infection or lead to fast mutation of the virus...all of which may make Covid19 a chronic pandemic and/or have fatal consequences due to Antibody Dependent Enhancement (ADE) and/or lead to the emergence of new viral pandemics.

Moreover, the correct classical Homoeopathic acute remedy (Arsenicum Album) will cure fully without any chronic pathological sequela - unlike the allopathic 'treatment' of Covid-19 cases which is relapsing in many cases and there are reports of lifelong cardiac, pulmonary and renal morbidities too. Thus, the classical Homoeopathic approach will ensure that this acute Covid-19 does not become a chronic pandemic and does not irreparably damage the health and the economy beyond repair.

Only the correct classical Homoeopathic remedy (Arsenicum Album) can prevent serious rare conditions like Acute Necrotic Encephalopathy, Rhabdomyolysis and Toxic-shock-syndrome/atypical Kawasaki disease like Hyper-inflammatory syndromes.

The correct classical homeopathic Genus Epidemicus remedy (Arsenicum Album) is preventive as well as curative and therefore it will prevent re-infection. Hence, no risk of death due to Antibody Dependent Enhancement (ADE) during re-infection - as is being feared by some scientists. This protection is not possible with partial similia/wrong remedies like Bryonia, Gelsemium, Camphora, Nux-vomica, Lycopodium etc.

No vaccine was successful against HIV and no vaccine will be successful against Covid-19. Moreover, any forceful attempt to suppress HIV or Covid-19 by any drug or vaccine will lead to severe antibody dependent enhancement (ADE) and/or a pandemic of viral diseases including HIV and/or an upsurge of tuberculosis & cancer and will make Covid-19 a chronic pandemic with cardiovascular, neurovascular, pulmonary and other complications.

**Let us assess the worldwide covid-19 treatment scenario which is being guided by the western medicine experts:**

- Based on varying estimates from India and China – up to 86% cases were/are asymptomatic and so escaped/escape detection.
- As per Chinese and Japanese research - the number of “silent carriers” (asymptomatic covid19 +ve cases) who silently transmit infection - may be as high as 30%.
- 20% covid19 +ve cases in South Korea and 50% covid19 +ve case in Iceland, had no symptoms even after testing positive and being kept under observation in a hospital.
- As per Chinese and US experts more than 30% tests are false negative.
- The BMJ was honest and candid when it admitted in an article on 8 April 2020: *“For now, except for supportive measures, infection with SARS-CoV-2 is ‘essentially untreatable’”*.
- False negative tests for the virus are fairly common. According to the BBC and other media outlets, some laboratory tests are incorrectly telling people they are virus-free. There is also anecdotal evidence of people having up to six negative results before being diagnosed correctly.

- As per Chinese doctors - there are reports of test kits failing to detect Covid-19 cases and at times a patient is found positive only after testing 4 or 5 times even though the lungs show the typical ground-glass picture from the very beginning confirming that the case is very much Covid-19 positive but, the tests give negative report.
- Chinese pulmonologist Zhong Nanshan is saying the average incubation period is three days, but it can take as little as one day and up to 24 days to develop symptoms leading to confusion in diagnosis and treatment.
- The Tanzanian President held a press-briefing in which he highlighted the false positive status of the Covid-19 tests and hilariously pointed out instances where sheep, goat and even pawpaw fruit swab tests were reported as Covid-19 positive!

**If the above said facts are considered – the WHO’s forceful emphasis on tests rings hollow and the widespread confusion is very much palpable. Surely, it is not possible to test 7.8 billion people of the world on a regular basis and even if it is done –the tests are not conclusive and western medicine has no cure or prevention.**

- The side effects of hydroxy-chloroquine and the anti-virals being prescribed may lead to lifelong morbidity. The Covid-19 virus causes hypoxia by interfering with the heme biosynthesis and to treat it as dyspnoea/pneumonia with ventilation is a gross medical error of judgment. The cardiac and neurological complications of Covid-19, that are beginning to emerge, are just the tip of the iceberg.
- *“It’s highly possible to get infected a second time. A few people recovered from the first time by their own immune system, but the meds they use are damaging their heart tissue, and when they get it the second time, the antibody doesn’t help but makes it worse, and they die a sudden death from heart failure.”*

- **BILL GATES - THE GLOBAL VACCINE PUSHER:** Bill 'vaccine' Gates made a USD 10 billion investment on vaccines - now he wants all of us to get vaccinated quickly! In addition to using his philanthropy to control WHO, UNICEF, GAVI, and PATH, Bill Gates funds a private pharmaceutical company that manufactures vaccines, and additionally is donating \$50 million to 12 pharmaceutical companies to speed up development of a coronavirus vaccine. In his recent media appearances, Gates appears confident that the Covid-19 crisis will now give him the opportunity to force his dictatorial vaccine programs on American children.

- Bill Gates offered Nigeria House of Representatives, \$10m bribe for speedy passage of compulsory vaccine bill – The Coalition of United Political Parties (CUPP) alleges.

<https://dailypost.ng/2020/05/04/bill-gate-offered-house-of-reps-10m-bribe-for-speedy-passage-of-compulsory-vaccine-bill-cupp-alleges>
- *“We need to be very clear; this is not a 100% solution and cure. Maybe 60-70% of people who take the vaccine will have that protection, the rest may still get the disease despite being vaccinated,”* said Adar

Poonawalla, chief executive officer of Serum Institute of India (SII), which has a budget of \$100 million for developing the vaccine.

- *"There are some viruses that we still do not have vaccines against. We can't make an absolute assumption that a vaccine will appear at all, or if it does appear, whether it will pass all the tests of efficacy and safety,"* Dr David Nabarro, World Health Organization's Covid-19 special envoy, was quoted as saying in a CNN report.
- *"SARS-COV-2 is very likely to fade and return every winter, like the flu"* says Virologist Luis Enjuanes, Spain's foremost expert on coronaviruses, from his laboratory at the CSIC's National Centre for Biotechnology.
- Drs. Chengzhi Yang and Zening Jin, both of Beijing Tiantan Hospital and Capital Medical University in China, co-authored an editorial that was published alongside the new study in JAMA Cardiology... Yang and Jin wrote. *"Emerging as an acute infectious disease, COVID-19 may become a **chronic epidemic** similar to influenza because of genetic recombination. Therefore, we should be ready for the reemergence of COVID-19 or other coronaviruses."*
- A separate study published in the New England Journal of Medicine in 2018 found a significant association between respiratory infections, especially influenza, and acute heart attack... *"this is a solid and important study,"* said Brooks Gump, the Falk Family Endowed Professor of Public Health at Syracuse University in New York, who was not involved in the study. When it comes to the public health impacts of Covid-19 and cardiac injury, the study suggests that *"two key take-aways are that it's an important marker of those at high-risk for mortality as a consequence of Covid-19 infection and it may be an indicator of future risks associated with the cardiovascular injury from this infection, **even if you recover,**"* Gump said.

- CBS News spoke to one of the country's top experts on viruses, Marc Lipsitch from Harvard University, who cautions that **40-70% of the world's population will become infected.**  
[https://www.washingtonpost.com/outlook/coronavirus-pandemic-immunity-vaccine/2020/03/12/bbf10996-6485-11ea-acca-80c22bbee96f\\_story.html](https://www.washingtonpost.com/outlook/coronavirus-pandemic-immunity-vaccine/2020/03/12/bbf10996-6485-11ea-acca-80c22bbee96f_story.html)
- Lockdown can slow down the spread of the virus temporarily but, not end this menace completely and permanently. Moreover, an indefinite lockdown is not possible. The effect of this pandemic on the economy will be very damaging worldwide. Obsessive hand washing or putting masks cannot be a permanent solution or cure.
- One news report on 6th May 2020 reads ominously:  
*"Herd-immunity gamble set to haunt Sweden as country nears 'horrifying' 3,000 deaths from coronavirus"* The Swedish idea of taking things easy and giving time to develop herd immunity is not the solution either. This 'taking easy' approach is very risky and can lead to high fatality. It is unthinkable in a densely populated city because the community spread of Covid-19 can completely overwhelm and collapse the healthcare system. And in any case, herd immunity for Covid-19 is not going to happen too soon. Moreover, those relying on herd immunity do not know what will happen during the second/third wave of infection and whether the second/third waves of infection will show high fatality due to Antibody Dependent Enhancement (ADE).
- Virologist Peter Piot, director of the London School of Hygiene & Tropical Medicine, fell ill with COVID-19 in mid-March. He spent a week in a hospital and has been recovering at his home in London since. Climbing a flight of stairs still leaves him breathless.

***"Many people think COVID-19 kills 1% of patients and the rest get away with some flu like symptoms. But the story gets more complicated. Many people will be left with chronic kidney and heart problems. Even their neural system is disrupted. There will be hundreds***

***of thousands of people worldwide, possibly more, who will need treatments such as renal dialysis for the rest of their lives”.***

*‘Finally, a virus got me’ - Scientist who fought Ebola and HIV reflects on facing death from COVID-19*

<https://www.sciencemag.org/news/2020/05/finally-virus-got-me-scientist-who-fought-ebola-and-hiv-reflects-facing-death-covid-19#>

**After reviewing all the above information – honestly, don’t you think that the western medicine approach is a complete failure and that a strong, effective and safe prophylaxis is URGENTLY required as the answer to all the confusion, complications & doomsday scenarios described above and that classical homeopathic Genus Epidemicus is the answer the world is looking for?**

There is ONLY ONE solution to end this pandemic...

I propose worldwide public distribution of the Homeopathic remedy – ARSENICUM ALBUM 200c (SBL/BOIRON) as Genus Epidemicus prophylaxis.

Arsenicum Album 200c has not even one molecule of Arsenic and so the toxicity is ZERO. It is SAFE. No harm in following my advice. As such the mainstream medical establishment worldwide has failed to provide any solution.

I can understand that the mentally conditioned medical doctors may not easily accept the idea of a Homeopathic remedy being preventive & curative. I wish to tell them that during the 1918 flu pandemic – the great Homeopaths in USA saved millions of lives by distributing the Genus Epidemicus remedy for that pandemic – Gelsemium and reported a mortality of mere 0-1%. Whereas, the allopathic doctors prescribed aspirin and about 30% patients died.

Further, please check page 89 to 91 of my previous research paper (*‘Arsenic’ – the central pivot...)* to find references of several published research studies on Arsenic toxicity and the effect of the potentized Homeopathic remedy Arsenicum Album in 30c and 200c on animal/human arsenicosis. The western

medicine doctor should see these references and acknowledge the fact that Arsenicum Album works very well!

I can also present research proven data on the successful use of Homeopathy during the 1974 meningitis epidemic in Brazil and other epidemics.

**Please check the following links that give details of the glorious success of classical homeopathic Homeo-Prophylaxis / Genus Epidemicus during epidemics:**

**NOW A CHALLENGE....**the western medicine expert is most welcome to test the theoretical background of my advice – any Government worldwide can summon its top forensic toxicologists and ask them to compare all the symptoms of acute/chronic effects of Arsenic/Arsenic Trioxide poisoning with all the symptoms of Covid-19 and all the symptoms of HIV-AIDS. If the toxicological experts confirm that there is indeed an uncanny similarity between the symptoms of acute/chronic effects of Arsenic/Arsenic Trioxide

poisoning and the symptoms of Covid-19 and the symptoms of HIV-AIDS – the Government is most welcome to form a panel of medical experts (Including classical homeopaths) to study my entire research work and thereafter, distribute Arsenicum Album 200c – as the preventive & curative Genus Epidemicus throughout the country.

My elaborate research study is itself sufficient to confirm that Arsenicum Album is the preventive and curative Genus Epidemicus for Covid-19 because, I have not only given extremely detailed Classical Homeopathic evidence but, have also given very detailed evidence from the perspective of western medicine (toxicology, biochemistry, pharmacology, virology etc.). After, such detailed analysis – no further proof is necessary! However, there is massive clinical evidence too! Doctors worldwide have confirmed that Arsenicum Album works very well to prevent and cure Covid-19 and I have myself done a sample study of 50 high-risk poor people (many of whom did not observe social distancing) and gave them Arsenicum Album as Genus Epidemicus. NONE of them got Covid-19! Moreover, AYUSH has reported great success with Arsenicum Album in thousands of cases and Kolkata Municipal Corporation & Homeopathic Medical Colleges in Kolkata have also initiated the drive to distribute Arsenicum Album in many areas of Kolkata. The Central Railway has distributed Arsenic Album too.

**Dr.Sasvári Ferenc Homeopátiás Rendelő (Budaörs, Hungary) has applied to AYUSH to conduct a systematic clinical trial on the basis of my research.**

## 8. AN UPDATE & ADVICE FOR THE WESTERN MEDICINE COVID-19 EXPERTS

The honest truth is that the diagnostic tests of western medicine (allopathy) are not conclusive and allopaths have NO safe preventive or curative remedy for Covid-19. Moreover, the allopaths do not understand the meaning of true cure. Whereas classical homeopathy has preventive & curative remedy for covid-19 because classical homeopathy is based on the eternal principle of *'like cures like'* and the Hering's laws of cure form the basis of differentiation between suppression and cure. I wish the western medicine doctors could understand that their vaccine are neither required nor safe and do not prevent any disease – rather it makes people more sick!

For those western medicine doctors who are struggling to make sense of the inconclusive Covid-19 tests and are worried about the 'asymptomatic cases' – I have several advices:

- Allopathy has no prevention or cure. The damage to the economy due to the lockdowns and costs of tests/quarantine/vaccine research is more than the damage due to the virus. Classical Homeopathic Genus Epidemicus (Arsenicum Album) is the only solution.
- The western medicine guys want to test – so that they can isolate the covid-19 positive cases and give them Hydroxy-chloroquine or anti-virals. These drugs are toxic and with side effects and so, it cannot be given *en masse* to everyone and for long. But, with large number of false negative/false positive cases and asymptomatic carriers – diagnosis and treatment by western medicine is difficult. The solution is Genus Epidemicus (Arsenicum Album) for all. The Genus Epidemicus is safe, non-toxic and can be given to ALL. It is preventive as well as curative. Since, it is safe and non-toxic – no testing is required before giving the remedy to ALL.
- My suggestion to use Arsenicum Album in 200c potency (K-tronic potentized) is the ONLY solution that will break the chain, stop human-to-human transmission, prevent covid-19 infection and prevent the acute & chronic manifestations of covid-19. It is very cheap, non-toxic & very effective and can immediately be deployed through the Government Healthcare setup to cover the entire population. No vaccine or Hydroxy-Chloroquine or lockdown is required to defeat the pandemic. It will save the economy too!
- There is NO need to run RT-PCR tests or CT scans to cure Covid-19 cases by Classical Homeopathy (except for research & documentation) and the observant classical homeopath can easily diagnose the cases on the basis of clinical signs and symptoms. This will save tax-payers hard earned money and will safeguard the economy, particularly in developing countries like India. This clinical confirmation approach will

also solve the present dilemma where there are a large number of false negative/false positive/asymptomatic cases/cases still in incubation period.

**I propose the following clinical model for accurate diagnosis of the Covid-19 cases and this will be particularly helpful in detecting the so-called 'asymptomatic' cases which may not be asymptomatic actually but, may appear to be so because of the lack of classic chief complaints of Covid-19.**

#### **CLASSIC SIGNS/CHIEF COMPLAINTS OF COVID-19:**

- = fever
- = dry cough
- = hypoxia
- = diarrhoea/nausea

#### **ATYPICAL SIGNS AND SYMPTOMS OF COVID-19**

**[to detect the so-called 'asymptomatic' Covid-19 cases where the patients do not have the classic quadrad of fever, dry cough, hypoxia and diarrhoea].**

#### **LOOK OUT FOR THESE ATYPICAL SIGNS OF COVID-19 +VE CASES:**

- = partial or total loss of smell or taste or hearing (any of these)
- = red inflammatory rash anywhere
- = burning anywhere or burning amel. by heat
- = Hypoxia without fever
- = metallic or bitter taste in mouth
- = very bad (cadaver/rotten meat like or garlic like) odour from mouth/body/urine/stool
- = un-explained chilliness
- = thirsty feeling but, thirst only for frequent sips of small amounts of water.

= red or pink eyes (conjunctivitis) or redness around the eyes

= 'covid toes' – that look like frost-bite. red/blue/purple coloured inflamed toes

= unexplained feeling of tingling/buzzing/electric current/pins-n-needles/icy feeling throughout the body without any fever

### **SUMMARY:**

- My clinical model is better than the tests which may be inconclusive.
- My clinical model of detection of so-called asymptomatic cases is better than the tests and diagnosis suggested by WHO and CDC of USA.
- Adopting the Clinical model of diagnosis & Arsenicum Album for prevention and cure will not only be a life saver for the common man but, will also be a lifesaver for the economy. No tests, vaccine, allopathic drugs, CT-scan or lockdown will be required to defeat the Covid-19 pandemic.

## HOW HOMEOPATHIC ARSENICUM ALBUM WORKS....

### A COMMENTARY FOR THE DOUBTING THOMAS....

Excerpts from a research paper:

(Kindly refer to the entire text of the research paper including the reference citations)

***“The opinion that the homeopathic principles conflict with scientific laws could be revised...”***

*It has been claimed that the homeopathic principle of ‘similarity’ (or ‘similia’) and the use of individualized remedies in extremely low doses conflicts with scientific laws, but this opinion can be disputed on the basis of recent scientific advances. Several mechanisms to explain the responsiveness of cells to ultra-low doses and the similarity as inversion of drug effects, have again been suggested in the framework of hormesis and modern paradoxical pharmacology....*

*Growing evidence from several science fields suggests that hormesis and paradoxical pharmacology are included in the ‘adaptation’ capacity of immune, neuroendocrine and cardiovascular systems, but also in cellular defence/repair mechanisms and even in molecular dynamics and conformational changes....*

*Our working hypothesis is that recognition of the function of enzymes, receptors and signal transduction and their dynamic interaction with drugs, makes it possible to look at homeopathy in a new and fully rational light...*

*In experiments conducted in microbiological models (arsenite or UV treated *E. coli* and *Saccharomyces* cultures), ultradiluted Arsenicum album 30C or Arnica montana 30C modified the expression of specific genes that are the targets of arsenite and UV irradiation injury, respectively. Ultrahigh diluted arsenic (45X treatment, containing a theoretical dose of As<sub>2</sub>O<sub>3</sub> 10<sup>-47</sup> Mol/L) applied to wheat seedlings, poisoned with a sublethal dose of arsenic, produced a strong gene modulating effect compared to pure water (control).*

*Authors have suggested that diluted arsenic treatment induced a reequilibration of those genes that were up-regulated during poisoning. Mother tinctures and highly diluted drugs were tested in human tumour cell lines or cells challenged with carcinogens; they affected the modulation of the expression of specific mRNA markers (NF-κB, Akt, p53, Bax, Bcl-2, caspase 3, Cyt-c) and increased tumour cell death. **These findings support the hypothesis that homeopathic remedies could turn some important genes on or off, initiating a cascade of gene actions to correct the gene expression that has gone wrong and produced the disorder or disease.** In this hypothesis the relevant target gene should be sensitive to similar stimuli and exert a pleiotropic transcriptional regulation on a battery of genes with related functions”.*
