

## **Domestic Violence Response Pilot Program for CALD Men**

**Do you work for an organisation helping CALD men affected by or affecting domestic violence? Are you interested in providing your clients with holistic support?**

If the answer is yes, we welcome you to join us in developing a legal education program concerning domestic and family violence for CALD communities and would appreciate your input and expertise to ensure the program's effectiveness.

## WHAT CAN WE OFFER SERVICE PROVIDERS?

We offer a FREE legal spotting training to community and social workers about:

- Identifying common legal problems you are likely to encounter;
- what types of matters free legal services can assist with;
- which free legal services are available in the area; and
- how to make an effective referral.

We also welcome **your input** in assisting us to develop the most effective education program for your clients. If you have your own domestic and family violence program and would like to include legal information, please contact us and we can work together.
