Smart Cities

Interidea is a international team in **NASA space app challenge 2017.**

Marijana Vujovic
Novi Sad, Serbia.

Nikola Radovanovic
Jagodina, Serbia.

Mireia Lozano del Moral
Madrid, España.

Smart Cities

Planning, managing, and governing cities in a sustainable way, by maximizing economic
Opportunities and minimizing environmental damage, are challenges that virtually all countries will be facing this century.

Smart Cities

Fernando has a good idea

Easy difusion

Easy to use

Fun, it's a competition game.

Challenging, you need to find possible solutions for different real problems

Possibility to change real life making visible a real problem + proposing solution
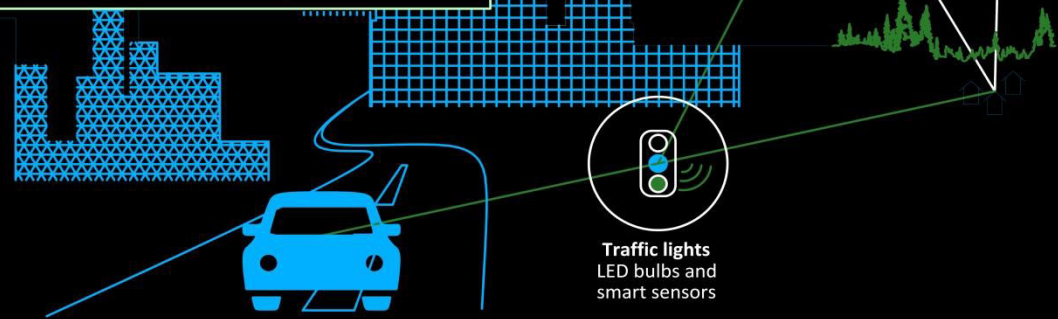

Helping your city and planet to become a better place to live !

NAME: Fernando, 17 years. Spain.
LOCATION: Villa de Meco, c/Manzana n.42
PROPOSAL: Traffic light
☑ LED bulbs and
☑ Smart sensors

Traffic lights
LED bulbs and
smart sensors

Smart Cities

People can here and support Fernandos idea.

Smart Cities

When most of us think about urban planning, the first thing that comes to mind is usually:

But (urban) planning is not only about large cities. The small communities count too!

Smart Cities

Whether the planning is large or small, short or long term, all cities use planning to make their communities sustainable socially, economically, and ecologically.

# Smart Cities

- Mobile & Web app

App must support:
- adding smart items
- Proposal for new smart items
- Share via Facebook and Instagram

App should support:
- measurement
- notifications
- Voting
- events

Smart Cities

The place where proposal can be suggested. It could be your current location or other location.
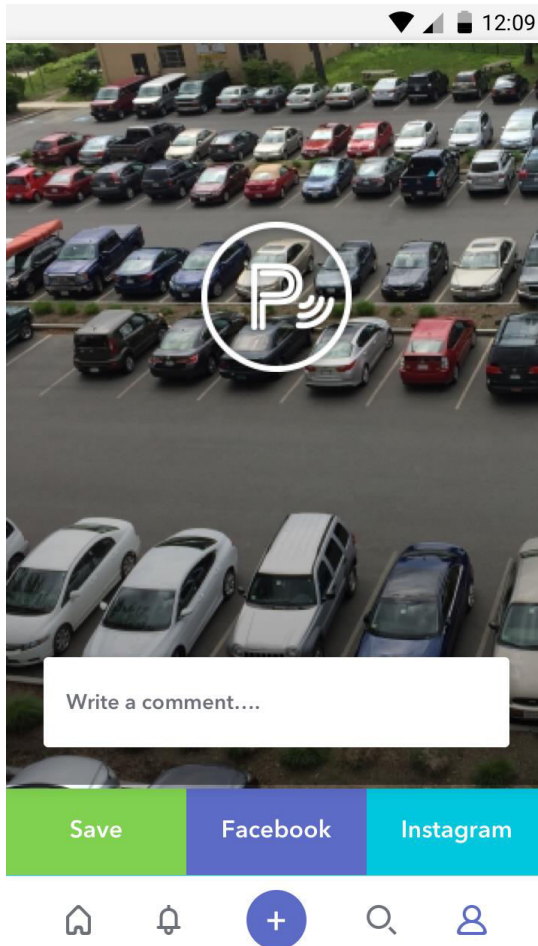

Smart Cities

Screen with smart items

Smart Cities

Choose picture from street view or take your one if you are on current place. Say something about smart item which you want to added.
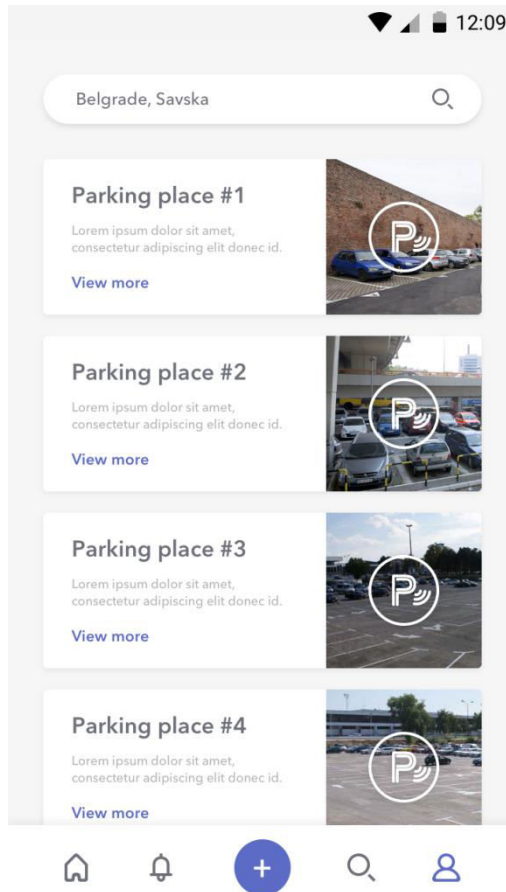

Smart Cities

If you are here it's almost done.
Share your idea with friends! ☺
