

Pipe Repair Specialists in San Diego, CA

Specialized Pipe Technologies has 8 locations throughout North America. Start solving your pipe problems and find a location near you.

At Specialized Pipe Technologies, we service the sunny city of San Diego with sewer and drain services. San Diego is the eighth-largest city in California and located in the southernmost part of the state. With its mild climate year-round, San Diego is a heavily populated city with vast beaches, universities, historic sites, naval bases, and more. Our team at SPT is made up of industry experts and pipe repair specialists in San Diego, CA who work tirelessly to make sure San Diego pipes are always running optimally.

SPT provides several pipe related services that leave customers pleased with their results. At SPT, we perform services like drain investigation, sovent cyclonic cleaning, trenchless sewer and water pipe repair, and more. Every service we conduct begins with a pipe inspection and pipe cleaning. Drain inspections are invaluable in providing our team with the necessary information to solve your pipe problems. If pipes are old, they are more susceptible to leaks and they will need to be tended to regularly. Drain cleaning allows us to prep the pipe for various repairs.

In a large city like San Diego with multi-story buildings, sovent drain systems require a specific type of cleaning, and this cleaning is one of our most relied on services. Sovent cyclonic cleaning is specially designed for high-rises which have vertical sovent pipe systems. Sovent pipe systems make it difficult to repair because of the specialized fittings that they contain.

In addition to servicing the city of San Diego, SPT also services all of San Diego County, California. It is our goal to provide our Southern California customers with the best trenchless technologies possible. We are proud to say that our inspections can often be completed within an hour and most sewer and drain projects can often be completed within the day. If you are in our area, call us today to create a plan that best fits your needs.
