Consultation Summary

As per the public consultation process prescribed by the Township of Mapleton and ISED, the below requirements have been met for this proposal:

1. A public notice placed in a local newspaper;
2. Notification packages sent to all landowners within 135 m of the tower property

No correspondence was received throughout the consultation period.

Although most tower proposals receive some level of opposition, we are pleased to advise Council and staff that no objections were brought forward in regard to the tower location, or to the proposal in general.

Conclusion

- This proposed tower will bring improved home internet and home phone services to the community as part of our mission to make affordable, robust wireless broadband high-speed internet services available to every Canadian home and business.
- The current proposals will have low visual and land-use impacts within the community while providing a significant increase in home internet and home phone services
- **Xplornet is officially requesting that Council deliver a Letter of Concurrence for the ON8070 – Spruce Green tower proposal.**

Thank you
