Tips to Find Out Fake Facebook Account:

1. Check their Profile Picture:

The first thing you must check their profile picture. If you wanted to check that the profile picture is fake or real. You should first save the picture to your computer and then you should use Google Image Search to verify. Then upload the picture to Google Image, and hit search. If the photo is not real, then the picture has been used somewhere else or is the image of somebody else.

2. Number of Photos:

Generally people share their photos about their trips, events and with their family members. They sometime tag their photos with other users also. Fake people do not share their pictures on Facebook.

3. Read the Timeline:

If the user is posting so many links with ads, this means that this account is for promotion. It is possible that it is a fake account. Mostly the facebook users share their experiences, jokes etc. But if you do not see this kind of post, then this is a clear sign of fake account. [This link](#)

4. Check Friends:

You must check their friend list. If the person has a local friend list then it is a real account but if the friend list has

many foreign friends and no local friends then it is a fake account. If it is girl account and is consist of so many friends then there is a doubt because generally girls do not like to make unknown friends. Then it is advised do not accept the friend request.

5. Lack of Interaction:

If the person has posted his picture on Facebook and gets so many comments on it. But the account holder did not reply to any of the comment then this is sign of a fake account because the genuine person always replies, at least they write thanks in return.

If want more information about Facebook then you can call the expert anytime. For safety, you must install Webroot antivirus in your device through www.webroot.com/safe activate webroot key code which protect you from phishing scams.
