WOMEN & MEN COLLECTION

RESET

LOOKBOOK SPRING/SUMMER 2023

ABOUT THE COLLECTION

RESET empowers to go outside and explore no matter the weather. It's not about going from A to B, but about moving through the city from A to Z, whatever the conditions. RESET is designed for the urban commuter, to keep them dry and cool, to protect them from the weather as they are on the go.

The RESET collection is built on three strong pillars. Reset Rainwear, Essentials and Lightweight collection.

The Rainwear collection consists of styles that provide all-weather protection for urban challenges with cleverly designed elements. The jackets are windproof, waterproof and breathable.

Within the Essentials collection you will find seasonal items that incorporate contemporary fashion influences of the season, but always remaining true to RESET's signature.

RESET lightweight collection is a capsule collection that offers unbeatable warmth, especially for the weight of the jacket itself. Our jackets are filled with high quality down, which is cruelty free obtained and meets the criteria of the Responsible Down Standard (RDS).

We have developed distinctive branding to distinguish between each pillar in the collection, but still offer a whole brand experience.
