

First Data Mobile Pay™

Accept Payments In-store or on the Go

Save Money
Save Time
Fast Funding
Accept Payments
Anywhere, Anytime
Secure Transactions

Mobile Solutions

Turn your smartphone into a point-of-sale terminal and accept payments anytime, anywhere. Three great solutions:

First Data Mobile PaySM service

Insert this secure, low-cost device into your Android, download the app, and begin swiping credit cards

VeriFone® PAYware Mobile

Slip your iPhone into a special sleeve to securely swipe and accept credit card payments

First Data™ FD400Ti Terminal

Accept credit, debit and paper checks with this fully functional, handheld wireless solution

Accept payments wherever you go by turning your smart phone into a point-of-sale terminal.

When you're delivering products or services to homes or businesses, it's not always practical or preferable for your customer to pay by cash, and accepting checks on faith is risky. First Data lets you turn your smart phone — the one that's with you wherever you go — into an affordable, secure payment terminal. Two great solutions:

First Data Mobile Pay App

Once you've downloaded the application, a handy encrypting card reader device plugs into your Android, BlackBerry or iPhone*, enabling you to slide your customer's credit card to capture a sale.

Web-Based First Data Mobile Pay

Purchase no additional equipment; just use the Android, BlackBerry, iPhone or iPod Touch you always carry; navigate to the First Data Mobile Pay URL; and enter and transmit the customer's credit card number.

Purchase & Setup \$199.95 - Monthly Fee \$9.95 per device
