

Minecraft Game Server Hosting

It's a fantastic Sandbox game where you place blocks and going on adventures!

1.18 Caves and Cliffs Part II Update is now available!

Explore and survive in endlessly-generated worlds of wide open spaces, featuring a range of different biomes as well as dungeons, enemies and endless possibilities. You can explore the world without being directed where to go, construct incredible dirt mansions or even dig a hole to hide from the mobs in. Everything is up to the player.

There are two primary game modes. Survival is where you have to explore the world, locate food, fight enemies and construct a house. Creative is where you have unlimited resources and can build anything you think of.

Mining can destroy almost every block in the world. Then, it's possible to combine them on crafting tables to create new blocks, armour, and tools.

On the Java Edition of Minecraft there is a huge community of modders for Minecraft, with vast amounts of additional content that you can install on your server. There are over 300 modpacks you can install in one click on our control panel. [Tclonline.org](https://www.tclonline.org) If one you want to play is not listed please let us know! We'll add it.

Java Edition is not for you? No problem! On our service, we provide access to run the Bedrock version of Minecraft so that no matter what device you're using we've got you covered!
