CLOUD CONNECT

HOW CLOUD TELEPHONY WORKS

What is Cloud Telephony?

- Technology that brings your business phone system to the internet
- Enables businesses to manage their entire operations seamlessly at the fraction of the cost of traditional office communication systems

Why Cloud Telephony?

Less Capital Expenditure
- Cuts cost on hardware.
- Subscription-based model.
- Don't pay more than you already do on PBX.

Flexible and Scalable Solutions
- Multi-office centralized PBX.
- No need to add more phone lines/extension.
- Pay only for what you need.

Business Integration
- Integrate voice, video and data sharing into a single platform.

Secure and Reliable
- High uptime.
- Loss of hardware doesn't mean loss of data.

Automatic System Updates
- Off-premise servers.
- Service providers take care of regular/security updates.

Environment Friendly
- Server capacity adjusts itself as needs fluctuate.
- Low carbon footprint!
