KR8

## Background

Cryprocurrency, and the Blockchain have been recognized to be a ground breaking technology in the present world, although it is still in its initial stages of devlopment, with a number of applications and possibilities being explored.

As a result of this several fresh cryprocurrency ideas are being marketed to close the gap between usability and technical difficulties. The potential in this ever growing market together with the rising acceptability of the cryptocurrencies and the blockchain makes start-up new projects very interesting for a wide range of stakeholders.. The realization of the cryptocurrency and of blockchain-enabled technologies market is not fully achieved and the exploration of the problem-space is incomplete.. Basically, trading of cryptocurrency can prove to be a difficult task for majority of the potential users as a result of identity confirmation complexities and security concerns.  The kreate token KR8 or KR8TN will bring together collectors, creatives, and crowd funding in one. The blockchain will allow for clear distinguishing of original and duplicate files. It is our belief that original copies possess a higher value, all digital copies used to be considered equally and indistinguishable until the recent development of the blockchain and bitcoin by Satoshi Nakomot.. The utilization of the block chain technology will be useful in the distinguishing of original and duplicate files and creation of verifiable original content for crowdfunding for sales for keepsakes

.In this crowdsale the email  address will be required for all non-token rewards.

## Token description

KR8 or KR8TN is based on the belief that original copies contain a higher value than copies. This is shown by the art world, after all the Mona Lisa has a far higher value than copies of it possesses. The blockchain allows for distinguishing between original and duplicates of digital files. This will work through embedding at creation time a token , with which one will be able to validate an original copy which can be sold at a premium to a collector and also being able to establish a limited number of collector's edition of the digital goods. The KR8 token will be used for attribution/validation and purchase/sale of the original artwork on the platform. 1000kr8 will be available for airdropping and bounty hunting. All other extra KR8 which will not be in this crowd sale will be put under indefinite lock up. They may be used for development purpose such as proof of burn and transmission fees on platform or dapps.. The developer/marketer/ publicity or other cash out will be limited to 500kr8 total per month.

## Market Overview

The demand for advanced and new digital products has always been on the increase and the use of block chain technology to advance and create a wide range of digital products is key to success of KR8 token. The photos, videos, and audios with embedded block chain tokens proving authorship and copyright as a distributed ledger will be created. This digital products will attract a high number of users and buyers due to its enhanced security features and proof of authority and copyright as a distributed ledger.  The art exchange platform will be used for

buying, selling, and trading original and limited editions books, artwork, videos, and music directly from the content creator. This will eliminate chances of having pirated copies of the products from unscrupulous sellers. Most importantly, people will own something unique/special or rare at the same time assisting in funding the artists' endeavors.
