It might be easier to use an "easy" one sometimes, but it is important for you to test it out first. Comparing several EAs will optimize the use of them, rather than picking one at random. You should be able to adjust variables if you use an EA you have programmed. Your program may need changes as market trends change. An EA or robot can compare far more variables per second than a human can. Our brains cannot keep up with an EA's speed in weighing options.
