

WHAT IS BONES?

Bones is the approach to create a Web3 business model that is empowered by Digital Assets. Bones **mission** is to open the gates for non-web3 related users and act as a prototype business model for current and future Web3 projects. Bones is going to operate on Solana blockchain.

Bones focuses on the following topics:

- **building an outstanding community**
- **offering valuable & innovative utility**
- **creating awesome artworks**
- **onboarding people to web3**

Bones aims to stand out in the competitive Solana NFT space as a business that is **powered by its community**. All products and services created by Bones are tailored to provide value to Bones holder, non-holder, crypto related and non-crypto related people. Bones believes that blockchain and NFT technology offers the potential to **fix major problems in our current world**.

Bones pursues the goal to onboard as many people as possible to Web3 by taking 2 routes:

- **create web3 products and services that can be used by anyone**
- **introducing the concept of NFTs to talented artists, content creators & creative minds**

WHO IS BONES?

The around 30 people behind Bones are Crypto and NFT enthusiasts. They are from all around the world, have different ages and **worked in different web3 and IRL businesses**. The core team is **experienced in running an NFT business** as they launched 2 successful projects on 2 different blockchains. Also all of them are **doxxed** with these projects. The team behind Bones is **united in its mission to create a Web3 business that connects people, provides benefits & great artworks and competes with the best projects in their space**.

WHY "BONES"?

So why this Web3 business is called "Bones"? Well, we all got bones. It's something **all human have in common**. We believe it's beautiful to use a name that represents something all people have in common. Since our goal is to unite people.

But there are more reasons we have chosen "Bones". Most of them are **branding & marketing** reasons .

- 1 "Bones" is **simple & remarkable**. One word, one syllable.
- 2 "Bones" is **visual**. You read bones. You expect bones. You see bones.
- 3 "Bones" is **memorable**. If you hear it & see the artworks, it will get stuck in peoples mind.
- 4 "Bones" has **neutral** value. It is neither associated good nor bad.
- 5 "Bones" is **suitable for a wide audience**. Since it has neutral value & no stereotypes, it can be adapted by a wide audience.
- 6 "Bones" is **future proof**. The neutral value won't change in the future and secures its Branding potential.
- 7 "Bones" offers **multiple wording opportunities**. "Bone" Jour, "Bone Appetit" or "We are bone Family". There are a lot of different ways to word bones. This creates a lot of fun & imagination which is perfect for building community & culture.

Compare it to Doodles, another famous NFT project from Ethereum. You read Doodles, you expect Doodles & guess what you get? Doodles. It is simple, visual, memorable, neutral, adaptable & future proof. Doodles turned themselves into one of the most successful PFP & NFT projects in our space.

Bone day we will surpass Doodles & co and nobone can stop us.

WHO IS DRAWING BONES?

Bones Studio is our artist hub located in **Bali**. Local people from Bali are creating our outstanding Bones artworks.

As we move forward we are embracing Bones Studio and onboarding more talented local people into our space. Bones Studio will create content & artworks for Bones art collection, marketing campaigns, merchandise & more.

Bones Studio will expand its vision by **opening Creative Studios and workspaces in Bali**.

You can find more informations in the Bones Studio section.

Created by the hands of **Ota, Panji & Tobi** our artworks are **simple, funny and PFP worthy**. While creating our artworks we have been researching the criteria for great PFP artworks. We have figured out these key factors:

- 1 **Simplicity** - Just don't put too much stuff in there. Keep it simple & remarkable.
- 2 **Cartoonish** - The most successful PFP projects have a cartoonish style. This opens the doors for a wide audience, reaching from kids to adults.
- 3 **Emotions** - Having the full variety of face expressions & emotions makes the whole collection more personal. Our Bones can be lucky, sad, angry, tired, bored & more. Pick whatever your mood is.
- 4 **Colors** - The less Colors the better. The Palette has to match. Our Collection uses mainly black, White and cream Colors. We have added more Poppy Colors to highlight Details and traits.

WHAT ARE BONES PLANS?

BONES POKER

Bones Poker will be Bones first web3 product. Bones Poker aims to be the Pokerstars of web3.

All the tables & tournaments are running **on-chain**. Prize pool generation & distribution are **automated & secure**.

Tales & tournaments on Bones Poker platform **can only be hosted by Bones NFT holders**.

Every Bones NFT has a level trait implemented in its metadata that sets its permissions & direct revenue share.

Bones Poker platform generates **revenue by charging 10% fee of the buy-ins**. This revenue flows back to NFT holders, DAO Community Fund & DAO Development Fund .

BONES DAO

Bones DAO is the organisation of Bones community. Bones DAO will only be accessible by Bones NFT holders.

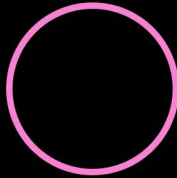

Bones DAO members will have access to **Raffles, Auctions, exclusive Alpha content & more**. Bones DAO has **control over DAO community fund** that is created by 10% of mint revenue, 30% of secondary royalties & 25% of poker revenue.

BONES STUDIO

Bones Studio is Bones creative studio located in Bali, Indonesia. This is the place where all the art magic happens. Bones Studio artists are working on **Bones collection, promotion artworks, banner & more**. Post mint Bones Studio will create & produce Bones **merchandise & streetwear**. Bones studio is created by Bones team members for talented local people. Bones Studio will onboard more talented artists and expand its offers.

2023 -

EARLY BONE DROP

Before Bones drops its main collection it will create an opportunity for early supporters to buy into the ecosystem for cheap & receive certain benefits.

The „Early Bone“ Collection will drop at the end of august & contain the previous Death Trip artworks.

The collection site & price will be:

- **3333 x “Early Bone“ NFTs**
- **20\$ in \$SOL**

The funds raised from the „Early Bone“ drop are going to be used for various aspects.

Bones Team is going to speed up the finalization of our first Bones Studio workspace. Also Bones Team will hire one more developer to ensure the finalization of Bones Poker alpha version before the main collection drop. Bones Team will use part of these funds to push a big marketing campaign before the main

So what are the benefits by investing into the „Early Bone“ collection?

- **Receive 2 mystery airdrops**
- **Exclusive whitelist for main drop and discount**
- **Access to Bones Alpha before main drop**
- **Early Access to Bones DAO**
- **Access to free roller tournaments on Bones Poker**
- **Outstanding artworks**
- **Cheapest entry into Bones ecosystem**
- **Pre-access to all future products & services**

These are the *current benefits* of Early Bone collection. *There might be more in the future.* Nevertheless if you are looking into Bones and Bones Poker it is more than recommended to get these early & cheap. *These will play a crucial role in \$BONES tokenomics too.*

WEN SNEAK PEEK?

BONES MAIN DROP

Bones Team aims to drop its main collection with **Bones Poker alpha version**.

The main collection will have all the utility we are displaying in the following parts of Bones Whitepaper.

The collection site & price will be:

- **10.000 x Bones NFTs**
- **to be determined**

Bones has chosen 10.000 as supply since it is going to have its main product - **Bones Poker - up at mint day**. Bones Team aims to **utilize the initial hype on mint day to onboard as many people** as they can to their Bones Poker platform. Bones Team provides **high quality in every relevant aspect of an NFT project** and the fundament it has set pre-mint is mature to build an outstanding project in web3 space.

The **mint revenue will be split between Bones DAO Community fund, Bones DAO Development Fund, Bones Studio Development Fund & Bones Team**. Details follow mint distribution.

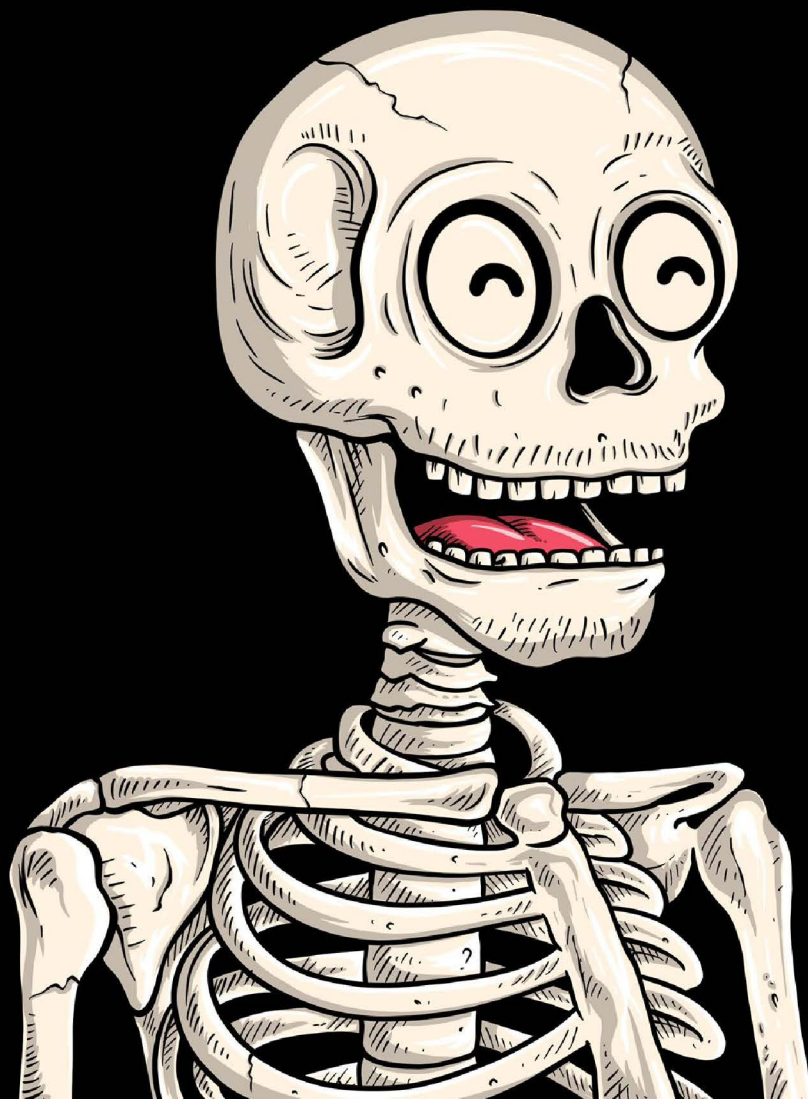

So what are the benefits by investing into the Bones collection?

- **Hosting permissions in Bones Poker**
- **Direct revenue share from Bones Poker**
- **\$BONES emissions**
- **Access to Bones DAO**
- **Access to Bones Alpha**
- **Art Upgrade**
- **Benefits from Bones Studio**
- **Being part of an outstanding NFT community**

Just continue reading from here. **We have prepared your next potential bluechip**. When Bones Team talks about bluechip, it talks about being that kind of project every other project leads & developers should aim to be. The one that innovates & opens doors for mass adoption.

WEN SNEAK PEEK?

BONES ANCESTORS

As you might have read in the team chapter *this is not Bones Team's first collection*. They have already launched 2 successful projects and sold both in seconds. *One of those collections is a Solana collection*. We won't reveal which one it is - *for now*.

Since Can, Karl and Nate are using their private funds from those launches to build Bones, they are planning to integrate this collection into Bones ecosystem.

Bones Studio is currently working on an exclusive art collection that matches the Bones theme. The previous collection from Can, Karl & Nate will be upgraded to these new artworks and implemented with exclusive permissions into Bones Poker. Since it is a super small supply collection, these NFT will have some exclusive benefits.

BONES COMMUNITY

Bone Jour!

Bones believes that **community is the most important & relevant** driver of a Web3 business. Projects can offer great services, create awesome products or have great branding potential. But at the end you always need people to support and use it. If you lack community, you will have a hard time selling your products and services.

Bones believes that Digital Assets are the greatest technology so far that offer **massive potential to connect people and unite them for the same vision.**

Bones aims to create a community that shares its vision and helps to **create an open-minded, respectful and creative space for like-minded.**

If we all want to create a successful and great project, we all got to work together.

If we all want our lovely crypto & NFT space to succeed and be adapted, we all got to help each other.

Bones is created for its community.

We are bone Family.

Bone Voyage!

BONES COMMUNITY MISSION

Bones codifies following community missions:

1 Empowering Bones community

Empowering talented & skilled people to either onboard them to the Bones Team or help them realizing their visions.

2 Listening to Bones community

Listening to feedback, suggestions & ideas of Bones community members and considering them in the future decision making.

3 Trusting Bones community

Trusting its community members by giving them full access to the DAO Comunity Fund.

This treasury will be filled by

- 10% of the mint revenue
- 25% of future revenue streams
- 30% of the secondary market royalties

4 Rewarding Bones community

Rewarding Bones community by creating direct revenue streams, Discount on merchandise, giveaways & more.

5 Connecting Bones community

Connecting Bones community by creating interactions on social media platforms, creating community projects, offering IRL workspaces & hosting IRL events.

BONES COMMUNITY RULES

To build an outstanding community Bones members agree to:

- 1** Respect everyone.
- 2** Welcome everyone.
- 3** Follow everyone on Twitter.
- 4** Raid everyone on Twitter.
- 5** Insult noone.
- 6** Cut "one" of their Vocabulary and use "bone" instead.
- 7** Spaghetti Carbonera.

BONES DAO

In order to fulfill our community missions we are creating Bones DAO.

Bones DAO will create an infrastructure to organize our community building. Bones DAO is just accessible for Bones NFT holders.

It unlocks access to:

- 1 Exclusive alpha content**
- 2 DAO votes**
- 3 DAO community funds**
- 4 DAO giveaways**
- 5 DAO contests**
- 6 Exclusive news & informations**
- 7 Early access to future products & services**

BONES ALPHA

Bones DAO offers exclusive Alpha Content provided by excellent NFT analysts. Our Alpha Leads are top callers for communities like Cets on Creck and Jelly Rascals. Various Alpha Callers & Whitelist Hunters are completing Bones Alpha Team. Our Alpha Content includes:

- 1 Top tier Alpha Calls**
- 2 Whitelist opportunities for top tier mints**
- 3 Automated Alpha Tools**
- 4 Mint Calendar & Reviews**
- 5 Whale wallet trackers**
- 6 Wallet reminders**
- 7 Bluechip updates**
- 8 Volume tracker**

BONES COMMUNITY FUND

Bone DAO gives its community **access** and full **control** for Bone DAO community fund.

Bones **DAO will postulate the use of its community fund.**

After a proposal has been made Bones DAO will vote on the execution of it. If proposals are successful the community fund manager - a Bones DAO Team member - will execute these.

This DAO community fund will be filled by

- **10% of the mint revenue**
- **25% of future revenue streams**
- **30% of the secondary market royalties.**

The DAO community fund can be **used for:**

- Funding community **giveaways**
- Funding **contests**
- Funding DAO tools
- Funding memberships & partnerships
- Investing into Crypto & NFT Assets
- Donations

BONES DEVELOPMENT FUND

Besides the community fund Bones DAO possesses a development fund. Bones **DAO can make suggestions** for the use of these funds, **but the decision will be always up to the Bones Team.**

The reason is that these funds are crucial for the future development of Bones products & future and it is necessary that the final executions will be decided by the team. Bones Team possesses the experiences, knowledge and competence to make important decisions. Bones Team takes the responsibility for the outcome of these executions.

Nevertheless Bones Team will always consider the opinions & feedback from its Bones community.

This DAO development fund will be filled by

- **30% of the mint revenue**
- **25% of poker revenue stream**
- **40% of the secondary market royalties.**

The DAO community fund can be **used for:**

- Expanding Bones **Developer Team**
- Implement **new features** into Bones Poker
- Maintaining **Bones Poker**
- Funding free roller tournaments
- Funding cross DAO tournaments & Bones Poker Events
- Funding **promotion & marketing campaigns**
- Funding merchandise
- Investing in onboarding systems
- Funding a potential Bones Poker metaverse
- Funding new innovations & products

\$BONES TOKEN

Bones ecosystem will be driven by its NFTs and its native crypto token \$BONES.

\$BONES can only be earned by staking Bones NFT, playing \$BONES tables or tournaments at Bones Poker or participating in contests & giveaways.

\$BONES can be used it for:

- 1 Bones Poker**
- 2 Bones Upgrade**
- 3 Future Bones products, services & mints**
- 4 Raffles & Auctions**
- 5 Renting workspaces in Bali**
- 6 Bones Streetwear**

The detailed \$BONES tokenomics will be released with the Alpha Launch of Bones Poker.

BONES POKER INTRO

Crypto is full of degens & gamblers. The amount of people that are gambling is astonishing. There is a big demand for gambling applications that run on-chain and are accessible by just having a wallet and crypto funds. **Poker is one of the most popular ones.** Lot of Crypto & NFT communities are running Poker tournaments for their DAOs. Most of the time they are using web2 applications to host their tables or tournaments. But that comes with a lot of problems.

Players have to trust that their buy-ins are going to be distributed as prizes from the host. Also they have to trust that they receive their prizes from the host when they win the game. The hosts themselves have to collect all wallet addresses and send out the prizes manually. Sometimes it takes weeks until all prizes are sent to their winners.

It is kind of ironic to see crypto natives playing poker this way. **Blockchain technology is offering the opportunity to build an automated, trustful & fun poker platform.** Yet there are none or rare products that bring all of these together. That's what we are going to fix. We are building Bones Poker. **A poker platform that is accessible for everybody and fueled by Bones NFTs.**

As we said at the very beginning Bones' mission is to open the gates for non-web3 related users and act as a prototype business for current and future web3 projects. Bones Poker will help us accomplishing this!

BONES POKER KEYS

Bones Poker focuses on following key topics. These will be explained further on the next pages.

- 1 Access**
- 2 Automation & security**
- 3 Simplicity**
- 4 Hosted by Bones holders**
- 5 Gamification**
- 6 Revenue**

BONES POKER ACCESS

Accessible - The game will be accessible to anybody who owns a Solana wallet.

The registration process will just ask to connect your wallet to our poker platform. After approving your wallet you are able to set your nickname. Furthermore you can select an NFT out of your wallet that you want to display as your PFP. After this you are officially registered. No need to enter your mail, name or any personal information. Let's play!

Automated - Bones Poker runs on-chain.

Poker tables & tournaments will run on Solana blockchain. If you want to join tables or tournaments, a transaction window will pop up as soon as you request to participate. It will charge you the buy-in fee. Assumed you got enough balance and approve the transaction, you will be seated on the table. The amount of \$SOL - let's assume the host has set \$SOL as buy-in currency - will be locked in the prize vault via another smart contract. As soon as the game starts the prize pool will be generated automatically. And as soon as the game ends the prizes will be sent to the winners automatically. Good luck!

BONES POKER HOSTING

Simplicity - Bones Poker is easy to use for crypto and non-crypto related users.

Simplicity is going to be the biggest key for the biggest goal we have: Onboarding as many people as we can. Bones Team focuses on building an easy to use poker platform, with an attracting user interface and a smooth game experience.

Our developer team is creating the game engine & the basic onchain functions in a simple way. The goal is to create a self explaining user experience. Enter the website, create a wallet, move funds if needed or play with a non value token and have fun. Keep it simple!

Hosted by Holders - Only Bones NFT Holders can host tables & tournaments.

This is where we start innovating. So all the poker tables & tournaments on our platform can only be hosted by holders of Bones NFTs. The platform will detect Bones NFTs in your wallet after you connected it. If you hold a Bones NFT, a new interface shows up which allows you to host tables & tournaments.

Hosts are able to set the amount of players, buy-in currency & amount, player stack, blinds & game tempo, private or public mode & more. Hosts can set the prize pool generation & distribution. Also they are able to send additional NFT & SPL token to the prize vault. Let's host!

BONES POKER LEVEL & REVENUE

Level System - Level up your Bonres NFT for more benefits. This is where we continue innovating. All Bones NFTs will own a level trait in their metadata. The level of your Bones NFT determines your permissions & revenue share on our poker platform. The higher the level of your NFT the more hosting permissions & revenue share you get.

Hosts will have just a limited capacity of tables & tournaments to host weekly. The higher their NFT level is the more capacity they earn.

Hosts are also just able to host a tournament if their NFT has a certain level.

You can upgrade your NFTs by using our native token \$BONES. You can earn \$BONES by staking Bones NFTs, playing poker for \$BONES or hosting free roller tournaments on our poker platform.

\$BONES tokenomics will be revealed & explained in \$BONES tokenomics whitepaper.

The amount of \$BONES to level up your Bones NFT will increase with each level. Also there is a cooldown period after each level upgrade. Technically we are overwriting the level trait in the metadata after executing the upgrade. This means you will be able to detect higher level NFTs on secondary marketplaces. Sounds fun? It is!

Revenue - Bones Poker generates revenue for DAO & hosts. Our poker platform will generate revenue by charging 10% of the buy-in fees. We will start with playing for \$SOL and \$BONES, then implement other SPL token. If you buy into a table for 1 SOL, then 0.1 SOL revenue will be created. This revenue goes either to Bones DAO or to the host. The revenue distribution depends on the level of the Bones NFT that hosts the table or tournament.

Higher level equals higher direct revenue share for the host. The left revenue will be allocated to Bones DAO. The revenue distribution looks like this - after the host took his share:

- 50% Bones DAO Development Fund
- 40% Bones DAO Community Fund
- 10% Bones Team

BONES POKER LEVEL SYSTEM

Example Level System - We have created an example model of our level system so potential investors can imagine how this is going to look like. As already mentioned this is just an example model. It's not the final version. The final version will be released in \$BONES tokenomics whitepaper.

NFT Level implemented in Bones NFT metadata	Table Cap how many tables can I host in 1 week?	Tour Cap how many tournaments can I host in 1 week?	Revenue Share how much revenue share do I receive from hosting?
1	3	0	10%
2	6	0	12,5%
3	9	0	15%
4	12	0	17,5%
5	15	1	20%
6	15	3	25%
7	15	5	35%
8	20	7	50%

Example - Let's run down an example. Let's say you hold a level 7 Bones NFT. You either minted, leveled it up or bought it from secondary at level 7.

You can now go to Bones Poker and our platform will detect it in your wallet. If you choose this to access the platform, a separate User Interface for hosting tables & tournaments will pop up.

You are allowed to host 15 tables & 5 tournaments during a week. You will get 35% from your hosted table buy-ins. The platform fee for buy-ins is 10%.

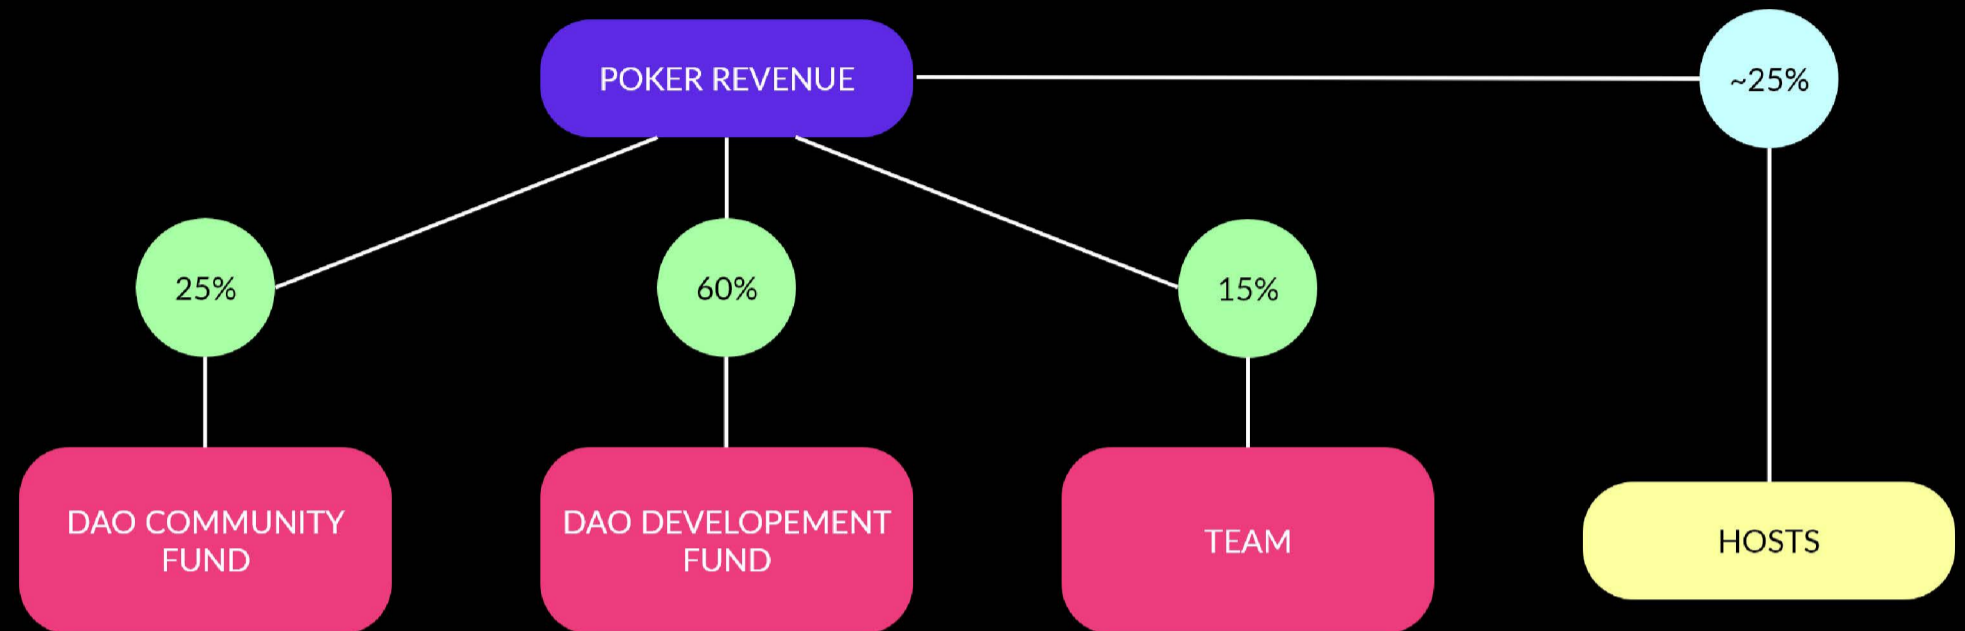

So let's do some maths. Let's say your tables average 10 players and your tournaments average 50 players during 1 week. The average entry is 0.5 SOL. This would end up in 75 SOL total table volume and 125 SOL total tournament volume. 200 SOL total volume, the 10% Bones poker platform fee generate 16 SOL. Your NFT direct share is 35%, **you would receive 7 SOL per week**. The left revenue goes to the DAO community & development funds.

You could also host a table for 2 SOL buy-in, if it fills up with 10 people **you would receive 0.7 SOL direct rev share for hosting this table**.

If you want to level up to Level 8 for max permissions and revenue share, you need to unlock it with \$BONES.

POKER REVENUE ALLOCATION

BONES POKER ALPHA VERSION

Bones is planning to launch [Bones Poker Alpha Version in September](#). Before or at mint.

The Alpha Version will be a simplified Poker Platform. A flawless poker engine & game experience running already on-chain. There will be only tables, no tournaments. The tables will be hosted by Bones Team first, NFT hosting & tournaments will be implemented with Beta Version.

Bones Poker Alpha Version contains following functions:

On-Chain - You are able to connect your Solana wallet to Bones Poker Alpha Version. The table buy-ins are paid in \$SOL. The platform generates & allocates all prize pools automatically via smart contracts.

Smooth game engine & user experience - Bones Poker Alpha Version is simple & easy to use. The poker engine is fair & flawless.

Only Tables - There are only tables in Bones Poker Alpha Version. No tournaments and no NFT hosting. The buy-ins are set by Bones Team and range from 0.05 to 1 SOL. Tables are hosted every hour. Maximum amount of players at one table is 10.

Revenue Distribution - Bones Poker Alpha Version will generate & distribute revenue to Bones DAO community fund, Bones DAO Development fund & Bones team.

BONES POKER CHALLENGES

Bones Poker is facing certain challenges while creating its poker platform. The whole process is an experiment too since there is no similar model to what Bones Team is creating. Of course there are the standard challenges while creating a poker engine & platform like security, traffic handling & fairness.

Since Bones Pokers developer team is working closely with the help of other poker platform developers, these can be handled easily.

Still there are some challenges coming up with the hosting & level model.

Scalability - How many NFTs will have high levels at the beginning? Scalability is one of the biggest challenges Bones Poker is facing. Since there are no similar products we can relate to this will be the biggest experiment. One important challenge is to handle the amount of the permissioned NFTs we are emitting at launch. Bones Poker aims to release less permissioned NFTs at the very beginning to solve this. For our product it is a better setup to have less tables & high demand at the very beginning. Because then we are able to scale up manually anytime if needed.

This challenge will be covered in tokenomics whitepaper.

Price for leveling up - Another challenge Bones Team is facing is to create sustainable tokenomics. Bones Team needs to figure out what a reasonable price is for leveling up Bones NFTs to unlock higher permissions. The main question is how long do Bones holders need to stake their NFT to level up. Will the price increase with every higher level?

This challenge will be covered in tokenomics whitepaper.

Onboarding - Bones Poker can just create value for holders & iSolana ecosystem if it manages to onboard a lot of players to its platform. This is the reason why Bones Team aims to release the Bones Poker Alpha Version with the main collection launch. Bones Team wants to utilize the initial hype at mint days to onboard as many holders as they can to their Bones Poker platform. Also it will raise awareness among interested people.

Of course there are other challenges Bones Team will face in its development process. We just named the biggest ones for now.

BONES STUDIO

Bones Studio is located in **Bali, Indonesia**.

It is an art studio **founded by local artists, musicians and content creators**. This is where the Bones artworks are being created by Bones Studio lead artists **Panji, Ota and Indra**.

While Bones core team is building & promoting Bones as NFT collection it will embrace Bones Studios too. A successful Bones launch will give Bones Studio great reputation in our space. From there Bones Studio can onboard more local artists, help them to find jobs in web3 space, deliver beautiful artworks & content for web3 space and change a lot of lifes.

HOLDERS THAT ARE LIVING OR VISITING BALI CAN FEEL FREE TO REACH OUT TO BONES STUDIO TO MEET UP IN OUR FIRST BONES STUDIO WORKSPACE. Bali is the home to many talented artists. Bones Team believes that creating more creative studios and workspaces for local people will benefit Bones & local people. **By onboarding people to web3 Bones Team is able to change a lot of lifes.** Furthermore web3 space receives outstanding artworks from dedicated artists.

The first Bones Studio is already in building progress in Ubud, Bali. After our launch Bones Studio will open a second Bones Studio workspace near to Ubud and offer it as a working space for Bones holders, local people and tourists.

In 2023 Bones Studio plans to open new creative studios in Bali and start a local marketing campaign to onboard talented content creators into the web3 space. We aim to connect artists to web3 project leaders that are looking for outstanding artworks. Doing this will help us to build an awesome reputation for Bones and also give local people a life changing opportunity.

All our upcoming artists will represent Bones & create personal artworks, 1/1's and other content for Bones.

Bones Studio will furthermore work Bones streetwear & merchandise, art exhibitions, galleries & animation studio.

BONES STUDIO KEYS

Bones Studio focuses on following key topics. These will be explained further on the next pages.

- 1 Artworks & content creation**
- 2 Onboarding artists & content creators**
- 3 Workspaces**
- 4 Streetwear & Merchandise**
- 5 Art exhibitons & galleries**
- 6 Animation studios**

BONES STUDIO ARTWORKS

Bones Studio is offering:

- **Creation of NFT collections & 1/1 artworks**
- **Creation of promotional artworks & content**
- **Creation of logos & symbols**
- **Creation of artworks for merchandise & streetwear**
- **Animation of artworks**

After Bones launch upcoming or existing projects & companies are allowed to collaborate or hire Bones Studio artists for any of these offers.

The partnerships & contracts will be determined individually. **The revenue out of these deals will flow back to Bones Studio artists and Bones Studio Developement Fund.**

BONES STUDIO ONBOARDING

Bones Studio will onboard:

- **local artists & content creators**
- **foreign artists & content creators**

Any artist or content creator that applies for Bones Studio will have to **showcase his portfolio and create an application artwork or content for Bones Studio & Bones Team first.** Also they will have to doxx themselves. Depending on the quality & style of the content creation Bones Studio will take them into the team. Bones Studio will **provide them access to their workspaces & creator equipment.**

Bones Team will help them to **connect to potential customers in web2 & web3 space.**

BONES STUDIO WORKSPACES

Bones Studio will **open workspaces in Bali for Bones members & external people**. The first one is being built right now in **Ubud, Bali**. All workspaces will carry the Bones logo.

The workspaces will be funded by parts of Bones DAO Development Fund and Bones Studio Development Fund. The workspaces will include:

- **outstanding & inspiring locations**
- **drawing equipment**
- **music & instrumental equipment**
- **streaming & recording equipment**
- **Desktop PCs with content creation software**

Bones Studio workspaces can be booked by local & foreign people that are living or visiting Bali. Bones Studio will **accept crypto payments**.

In the future Bones Studio will allow Bones holders to **book slots in Bones Studio workspaces in exchange for \$BONES**.

BONES STUDIO MERCHANDISE

Bones Studio will create artworks & designs for Bones **merchandise & streetwear**. Also they will offer their own fashion line in the future.

Bones Studio merchandise & streetwear will include:

- **Shirts**
- **Hoodies**
- **Headwear**
- **Handcrafted Items**

Bones Studio works together with a **local balinese manufactory to produce ist merchandise & streetwear**. Bones holders will be able to purchase these and receive a discount by paying \$BONES.

Bones Studio aims to use one of its future workspaces as a merchandise shop too.

BONES STUDIO EXHIBITIONS

Bones Studio will **host & participate in local art exhibitions. Bones Studio will display Bones NFT artworks, 1/1 artworks & more.**

Art exhibitions with Bones Studio participations will be livestreamed. Bones Studio aims to **introduce artists & people interested into arts to the concept & benefits of NFTs.**

Furthermore Bones Studio plans to open its own gallery to host art exhibitions in the future.

Bones Studio is planning a **major NFT art exhibition for 2024.** Various NFT projects from all blockchains will be invited.

BONES ANIMATION STUDIO

Bones Studio plans to onboard artists that are talented in animations and video editing. Bones Studio has various plans to bring the Bones NFT collection to life in the future.

Furthermore Bones Studio plans to expand its offers by creating animated and video content for promoting, marketing & other purposes.

Bones Studio is not planning to make a comic or animation series. At least not yet.
