## ABOUT

**B**attlerite is a team arena brawler action video game, with a dynamic playstyle. The game is considered a spiritual successor to Bloodline Champions and is created by the same developers, Stunlock Studios. An early access version of the game was released on September 20, 2016, and within a few weeks had already sold over 200,000 copies.

The game could be bought from STEAM store for 20 USD but went free to play on November 8 2017 because of the low player base. Battlerite is similar to multiplayer online battle arenas (MOBAs) like League of Legends and Dota 2. However, Stunlock's take focuses more on combat. It's game is quicker and feature more action, as a team-based arena brawler.

## GAMEPLAY

### 2 v 2

The 2 v 2 battle format is a not so balanced format that puts you and a teammate against two enemies. The perks of this format are the fact that you have to pay attention only to two enemies rather than 3, which makes it easier to follow what's happening. Getting into a 1 v 2 situation makes it way more possible to clutch it and comeback rather than a 1 v 3 situation which is harder.

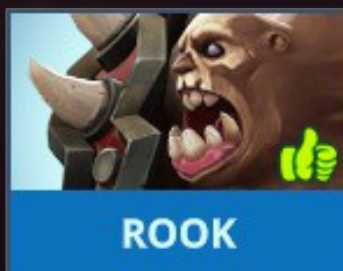

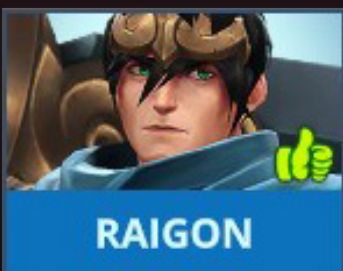

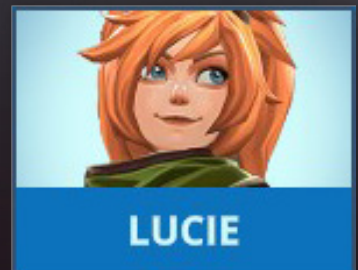

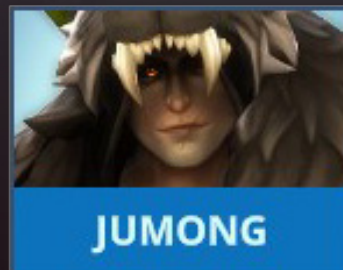

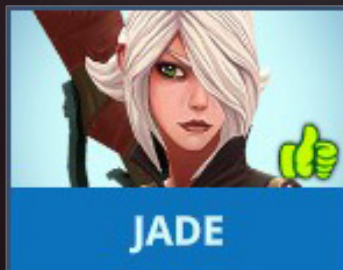

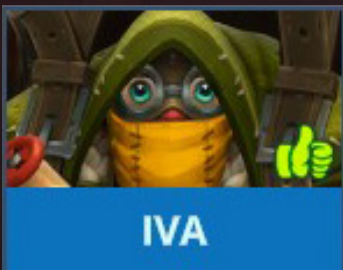

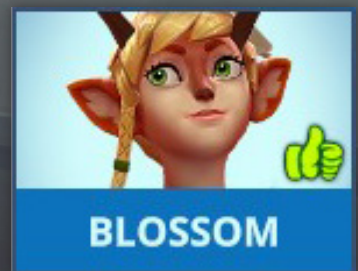

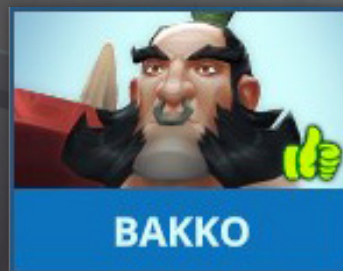

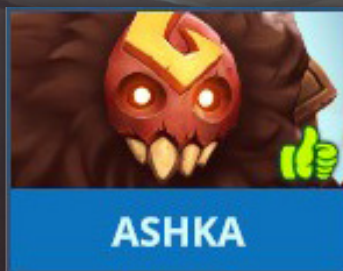

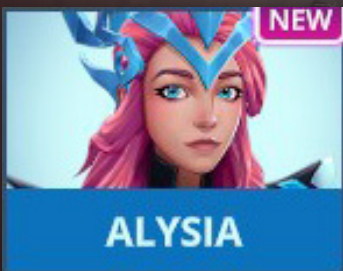

### 3 v 3

The 3 v 3 battle format is the most balanced battle style, which makes it great for the competitive scene. Here you can use the most complete teamcomp which is Ranger + Melee + Support, with the best thing being that there is no “best teamcomp” and no “meta picks”. This style is more complex than the 2 v 2, making you practice your dodging and focusing abilities way harder.

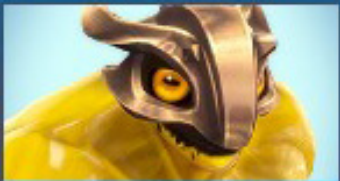

# CHAMPIONS

Battlerite has at the moment 24 Champions from which you can choose and use in fight. They all have unique playstyles, everyone of them having nine abilities that can be used, one of them being the Ultimate Ability.

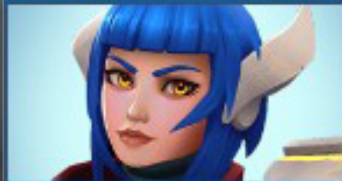

# OPTIONS

Rangers that can kite from distance, melee assassins and tanks that can assault those rangers and supports that are made for helping the rangers get out of those situations. They are all ready for battle!

# ODEUM

## ODEUM

The hub for watching and posting your favorite replays

Battlerite's Odeum is the place where you can watch your previous 50 games which are stored on the servers.

Here, you can post a highlight from any of your games for others to see, like and, if you did really well, repost your play.

You can also search for other players and watch their own highlights and if you really enjoy the way he plays, you can FOLLOW him and get notified every time he posts another play.

# THE COMMUNITY

# reddit

Reddit is the most active online community when it comes to Battlerite. Here you can ask or share anything that you want, including personal creation like drawings or in-game plays.

The second highest Battlerite active online community is the Steam Community, again being a place where you can do similar things to what you can do on Reddit.
