Pocket Bike Range

The V'Lec Pocket+, PocketR and RClassic represents, inside the Pocket range of foldable ultra-light electric assisted bikes (EAB) of V'Lec brand, the culmination of many researched and developments.

The Pocket range has been designed according to criteria of reliability, endurance, adaptability and most demanding comfort, while seeking to minimize bicycles weight and size.

With a weight spread from 22 to 28 lbs (10/12,7kg), the foldable EAB of the Pocket range are the lightest on the market.

Our challenge: make accessible to everyone a range of foldable E-bikes in order to reduce travel times for functional/recreational journeys with a minimum effort whilst making them enjoyable.
